Permanent Revolution

"Permanent Revolution stands out as a classic study of the social structure of totalitarian rule. The problem of totalitarianism and democracy is still with us, and Neumann's dictum 'that it is much more than a problem of constitutional structure of economic progress, it is above all the difference in basic human concepts' is as valid today as it was in 1942. Neuman's analysis of dictatorship opens a new approach to political dynamism for the democracies .(...) For it deals ultimately with a lasting problem: the dignity and personal responsibility of the individual." (from the Preface by Hans Kohn)

Permanent Revolution

"0051." "For further reading of Trotsky's works": pages [366]-367.

The Age of Permanent Revolution

American Military History provides the United States Army-in particular, its young officers, NCOs, and cadets-with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior ROTC courses. Since then it has gone through a number of updates and revisions, but the primary intent has remained the same. Support for military history education has always been a principal mission of the Center, and this new edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001 has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root had proposed changes and reforms that within a generation would shape the Army of the future. But world war-global war-was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on terrorism and includes an analysis of the wars in Afghanistan and Iraq up to January 2009.

American Military History Volume 1

An overview of women's work in classical and popular music since 1900 as performers, composers, educators and music technologists.

The Cambridge Companion to Women in Music since 1900

Liberalism and Transformation is the first scholarly work that explores the historical, philosophical, and intellectual development of global liberalism since the nineteenth century in the context of the deployment of violence, force, and intervention. Using an approach that includes interpretive and contextual analysis of texts from writers, philosophers, and policy-makers across nearly two centuries, as well as historiographical and historical analysis of archival documents (some of which have been recently declassified) and other media, Liberalism and Transformation narrates the messy history of emancipatory liberalism and its engagement with issues of war and peace. The book contributes to both a rethinking of liberal democracy and its relationship to world politics, as well as the effects of liberal internationalism on global processes. Furthermore, Liberalism and Transformation invites readers to reflect on global ethics and transformation in world politics. In the first place, it shows how ethical imaginings of the world have direct effects on actions of transformative importance. In the second place, it suggests that discourses are fluid, changing, and complex.

Liberalism and Transformation

From award-winning historian Mark Mazower, *Dark Continent: Europe's Twentieth Century* retells the story of a century of division, charting the struggles of rival ideologies to create a new world order for mankind. The end of the First World War saw old empires swept away and the opportunity to build a better society from the ruins. Yet the result was division and bloodshed on an unprecedented scale, as liberal democracy, communism and fascism struggled against one another for mastery of the world. *Dark Continent* radically overturns the myth of Europe as a safe haven of democracy to redefine our view of the twentieth century. 'Original, thought-provoking, iconoclastic' Frank McLynn, *Irish Times* 'Fascinating and forceful' Martin Gilbert, *Literary Review* 'Mazower leaves us, in this wonderful book, with an account of our century that anyone who takes an interest in Europe's present and future will enlarge their mind by reading' John Keegan, *Daily Telegraph* 'There are few who can walk with A.J.P. Taylor. One is Mark Mazower ... a tour de force' Alex Danchev, *TLS* 'Combines narrative verve with wise and humane analysis. For anyone who wants to know how Europe came to be the way it is in the years since 1900, this is the work to provide the answers' David Cannadine, *Observer* Books of the Year Mark Mazower is the author of *Inside Hitler's Greece*, *The Balkans*, which won the Wolfson Prize for History, *Salonika: City of Ghosts*, which won both the Runciman Prize and the Duff Cooper Prize and *Hitler's Empire*.

Dark Continent

The book brings together many recent trends in writing history under a common framework: thinking history globally. By thinking history globally, the book explains, applies, and exemplifies the four basic strategies of analysis, the big C's: comparing, connecting, conceptualizing, and contextualizing, using twelve different branches of history.

Thinking History Globally

This book discusses contemporary constellations of international politics and global transformation. It offers guidance on how to conceptualize the complexity of current global changes and practical policy advice in order to promote an open global society. In the light of today's challenges, the author re-interprets the main argument of the philosopher Karl Popper in "The Open Society and Its Enemies". Based on this framework and new empirical evidence, the book discusses the thesis of an ongoing Third World War, triggered by fundamental deficits in nation-building, occurring primarily within states and not between them, and accelerated by asymmetric forms of warfare and Islamist totalitarianism. The book also explores various threats to the global order, such as the paradox of borders as barriers and bridges, the global effects of the youth bubble in many developing countries, and the misuse of religious interpretation for the use of political violence. Lastly, the author identifies advocates and supporters of a liberal, multilateral and open order and argues for a reinvention of the Western world to contribute to a revival of a liberal global order, based on mutual respect and joint leadership.

Bringing in the harvest. Rescuing survivors from the wreckage of bombed houses. Raising money for Spitfires and warships. Keeping the family business running when parents were enlisted into war-work. These are just a few examples of how children and young people made substantial contributions to the war effort during the Second World War. --

Argentinean philosopher, theologian, and historian Enrique Dussel understands the present international order as divided into the "culture of the center" -- by which he means the ruling elite of Europe, North America, and Russia -- and "the peoples of the periphery" -- by which he means the populations of Latin America, Africa, and part of Asia, and the oppressed classes (including women and children) throughout the world. In 'Philosophy of Liberation,' he presents a profound analysis of the alienation of peripheral peoples resulting from the imperialism of the center for more than five centuries. Dussel's aim is to demonstrate that the center's historic cultural, military, and economic domination of poor countries is 'philosophically' founded on North Atlantic ontology. By expressing supposedly universal knowledge, European philosophies, argues Dussel, have served to equate the cultural standards, modes of behavior, and rationalistic orientation of the West with human nature and to condemn the unique characteristics of peripheral peoples as "nonbeing, nothing, chaos, irrationality." Hence, Western philosophies have historically legitimated and hidden the domination that oppressed cultures have suffered at the hands of the center. Dussel probes multinational corporations, the communications media, and the armies of the center with their counterparts among the Third World elite. The creation of a just world order in the future, according to Dussel, hinges on the liberation of the periphery, based on a philosophy that is able to "think the world" from the perspective of the poor and to reclaim the Third World's distinct cultural inheritance, which is imbedded in the popular cultures of the poor. Apart from the liberation of the periphery, there will be no future: "the center will feed itself on the sameness it has ingrained within itself. The death of the child, of the poor, will be its own death." This is a disquieting but stimulating book for scholars and advanced students of philosophy, ethics, liberation theology, and global politics.

Philosophy of Liberation

This book continues to serve as an excellent introduction for new-comers to the modern history and politics of a region that is usually portrayed as mysterious, unpredictable and violent.

State Power and Politics in the Making of the Modern Middle East

In *Creating the Empress*, Vera Proskurina examines the interaction between power and poetry in creating the imperial image of Catherine the Great, providing a detailed analysis of a wide range of Russian literary works from this period, particularly the main Classical myths associated with Catherine (Amazon, Astraea, Pallas Athena, Felicitas, Fortune, etc.), as well as how these Classical subjects affirmed imperial ideology and the monarch's power. Each chapter of the book revolves around the major events of Catherine's reign (and some major literary works) that give a broad framework to discuss the evolution of important recurring motifs and images.

Peace, Conflict and Identity is the third book in the junior series of the EDEN (European Doctoral Enhancement Programme in Peace and Conflict Studies) and contains cutting edge research that was first delivered in a series of presentations by PhD students at two of the EDEN Intensive Programmes held at the universities of Deusto and Graz in 2007 and 2009 respectively. The book has been edited in the spirit that publishing work whilst still engaged on a post-graduate research programme is an essential element of early career progression. As such, several of the contributors to this book have since gained their doctorates.

Peace, Conflict and Identity

The collapse of the USSR seemed to spell the end of the empire, yet it by no means foreclosed on Russia's enduring imperial preoccupations, which had extended from the reign of Ivan IV over four and a half centuries. Examining a host of films from contemporary Russian cinema, Nancy Condee argues that we cannot make sense of current Russian culture without accounting for the region's habits of imperial identification. But is this something made legible through narrative alone-Chechen

wars at the periphery, costume dramas set in the capital-or could an imperial trace be sought in other, more embedded qualities, such as the structure of representation, the conditions of production, or the preoccupations of its filmmakers? This expansive study takes up this complex question through a commanding analysis of the late Soviet and post-Soviet period auteurs, Kira Muratova, Vadim Abdrashitov, Nikita Mikhalkov, Aleksei German, Aleksandr Sokurov and Aleksei Balabanov.

The Imperial Trace

This volume, taking account of recent developments in both political economy and Catholic social teaching, examines the extent to which that teaching can be used to justify the free market, or alternative forms of political and economic organization, in areas such as taxation, welfare, foreign aid, labor markets and business. Throughout history, but particularly in the last century or so, the Catholic Church has developed a formal body of teaching on economic and political matters. Other Christian faiths have absorbed much of that work, as have non-Christians, and thus the body of Catholic social teaching has often been influential in the public policy arena. The book also critically examines the general case for an interventionist state in the economic sphere, as well as the importance of the development of responsible culture, underpinned by sound education, in a free society.

Catholic Social Teaching and the Market Economy

Interweaving key cultural, economic, social, and political events, a history of the United States in the post-World War II era ranges from 1945, through a turbulent period of economic growth and social upheaval, to Watergate and Nixon's 1974 resignation

Grand Expectations

Concepts associated with nuclear strategy often go beyond any 'objective' logic of deterrence. Nuclear weapons have special roles in different national belief-systems, myths surround them, they have catalysed tensions already existing in societies, become symbols of power or of past sins. This book delves into the conscious and subconscious beliefs in Britain, France and the Federal Republic of Germany (all voiced in debates about nuclear strategy) about society, the State and power structures, each country's place in the world, the international system, allies and enemies.

Globalization, Armed Conflicts and Security

The fundamental question uniting the contributions to this volume is: what exactly is populism? This is certainly not a new question, as a large amount of literature has focused on this topic for more than half a century. As little conceptual consensus has been reached so far, this book aims to reduce the level of abstraction. To this end, it approaches the populist phenomenon from a broader theoretical and empirical perspective, making reference to its developments on several continents. The book is divided into two parts: the first is theoretical and discusses various perspectives on populism, while the second is empirical and emphasises the diversity of the forms populism has embraced throughout the world. Without aiming to solve old dilemmas, to cover all the existing forms of populism, or to outline unequivocal conclusions, the contributions to this book fulfil a twofold task. On the one hand, they help to clarify theoretically a concept that is difficult to grasp and use. On the other hand, by way of reflecting these difficulties, they present several forms of populism worldwide. Their main purpose is to highlight the differences between the continents. Each of the chapters in the second section successfully accomplishes this, providing an overview that is useful both in analysing populism and in identifying the populist elements in national and international political actions or discourses.

Nuclear Mentalities?

Provides an original view of the potential for a radical democratic politics today that speaks not only to the Italian situation but also to a broadly international context. First, the essays settle accounts with the culture of cynicism, opportunism and fear that has come to permeate the Left. They then proceed to analyze the new difficulties and possibilities opened by current economic conditions and the crisis of the welfare state. Finally, the authors propose a series of new concepts that are helpful in rethinking revolution for our times. Contributors include Giorgio Agamben, Massimo De Carolis, Alisa Del Re, Augusto Illuminati, Maurizio Lazzarato, Antonio Negri, Franco Piperno, Marco Revelli, Rossana Rossanda, Carlo Vercellone and Adelino Zanini.

Contemporary Populism

Within the past four decades a powerful scientific methodology has emerged that promises to dramatically recast our concept of nature and mankind's place in it. Unlike the traditional analytical approach which breaks nature down into smaller and smaller constituent parts, chaos theory, the theory of self-organization, and other so-called sciences of complexity, explore dynamic systems in their totalities, so as to lay bare the great constants governing their emergence, organization, and evolution. Using the tools of complexity, researchers recently have made breakthroughs in the understanding of such diverse phenomena as weather systems, economies, and even the most daunting scientific mystery of all, the mind as an emergent property of the brain's dense neuronal mazes.

Radical Thought in Italy

The development of atomic bombs under the auspices of the U.S. Army's Manhattan Project during World War II is considered to be the outstanding news story of the twentieth century. In this book, a physicist and expert on the history of the Project presents a comprehensive overview of this momentous achievement. The first three chapters cover the history of nuclear physics from the discovery of radioactivity to the discovery of fission, and would be ideal for instructors of a sophomore-level "Modern Physics" course. Student-level exercises at the ends of the chapters are accompanied by answers. Chapter 7 covers the physics of first-generation fission weapons at a similar level, again accompanied by exercises and answers. For the interested layman and for non-science students and instructors, the book includes extensive qualitative material on the history, organization, implementation, and results of the Manhattan Project and the Hiroshima and Nagasaki bombing missions. The reader also learns about the legacy of the Project as reflected in the current world stockpiles of nuclear weapons. This second edition contains important revisions and additions, including a new chapter on the German atomic bomb program and new sections on British and Canadian contributions to the Manhattan project and on feed materials. Several other sections have been expanded; reader feedback has been helpful in introducing minor corrections and improved explanations; and, last but not least, the second edition includes a detailed index.

The Symbiotic Man

This volume studies elements of Austro-Hungarian or Central European culture that were common across linguistic, national, and ethnic communities, and shows how some of these commonalities survived or were transformed by the turmoil of the 20th century: two world wars, a major depression between the wars, Stalinism and the Iron Curtain

Disintegration and Integration in East-central Europe: 1919 - Post-1989 (Veröffentlichungen Der Historiker-verbundungsgruppe Bei Der Kommission Der EG).

Theory without practice is empty, practice without theory is blind, to adapt a phrase from Immanuel Kant. The sentiment could not be truer of cultural heritage ethics. This intra-disciplinary book bridges the gap between theory and practice by bringing together a stellar cast of academics, activists, consultants, journalists, lawyers, and museum practitioners, each contributing their own expertise to the wider debate of what cultural heritage means in the twenty-first century. Cultural Heritage Ethics provides cutting-edge arguments built on case studies of cultural heritage and its management in a range of geographical and cultural contexts. Moreover, the volume feels the pulse of the debate on heritage ethics by discussing timely issues such as access, acquisition, archaeological practice, curatorship, education, ethnology, historiography, integrity, legislation, memory, museum management, ownership, preservation, protection, public trust, restitution, human rights, stewardship, and tourism. This volume is neither a textbook nor a manifesto for any particular approach to heritage ethics, but a snapshot of different positions and approaches that will inspire both thought and action. Cultural Heritage Ethics provides invaluable reading for students and teachers of philosophy of archaeology, history and moral philosophy – and for anyone interested in the theory and practice of cultural preservation.

The History and Science of the Manhattan Project

Through close textual and contextual analysis of British films spanning a century, this book explores how pupils, teachers and secondary education in general have been represented on the British screen. The author addresses a number of topics including the nature of public (fee-paying) and state schooling; the values of special, single-sex and co-education; the role of male and female teachers; and the

nature of childhood and adolescence itself. From the silents of Hitchcock to the sorcery of Harry Potter, British cinema's continued explorations of school life highlights its importance in the nation's everyday experience and imaginary landscape. Beyond this, the school film, varying in scope from low-budget exploitation to Hollywood-financed blockbusters, serves both as a prism through which one can trace major shifts in the British film industry and as a barometer of the social and cultural concerns of the cinema-going public. This applies especially for gender, race and, in all senses, class.

The British School Film

First Published in 2016. In this book starts with the discussion located at the crossroads between two basic political principles. The first one is the democratic idea of representative government, based on elections by general suffrage. The second is the nation-state principle which says that the world is divided into sovereign states and that only those who are citizens can claim a right to take part in political life, in other words that foreign citizens are not allowed to participate in political elections. Democracy is honoured almost everywhere, at least as a principle, but the modern system of states presupposes that as a general rule only those who are citizens are entitled to vote, to stand for election, to join parties, and to participate in political debate and give voice to their political demands and interests. Both these basic political principles are young, and their pre sent confrontation is therefore also new to us.

Shadow Elite

This volume explores the interrelation of international relations, music, and diplomacy from a multidisciplinary perspective. Throughout history, diplomats have gathered for musical events, and musicians have served as national representatives. Whatever political unit is under consideration (city-states, empires, nation-states), music has proven to be a component of diplomacy, its ceremonies, and its strategies. Following the recent acoustic turn in IR theory, the authors explore the notion of "musical diplomacies" and ask whether and how it differs from other types of cultural diplomacy. Accordingly, sounds and voices are dealt with in acoustic terms but are not restricted to music per se, also taking into consideration the voices (speech) of musicians in the international arena. Quality Assurance for the Food Industry

The powerful, disturbing history of Nazi Europe by Mark Mazower, one of Britain's leading historians and bestselling author of *Dark Continent* and *Governing the World* Hitler's Empire charts the landscape of the Nazi imperial imagination - from those economists who dreamed of turning Europe into a huge market for German business, to Hitler's own plans for new transcontinental motorways passing over the ethnically cleansed Russian steppe, and earnest internal SS discussions of political theory, dictatorship and the rule of law. Above all, this chilling account shows what happened as these ideas met reality. After their early battlefield triumphs, the bankruptcy of the Nazis' political vision for Europe became all too clear: their allies bailed out, their New Order collapsed in military failure, and they left behind a continent corrupted by collaboration, impoverished by looting and exploitation, and grieving the victims of war and genocide. About the author: Mark Mazower is Ira D. Wallach Professor of World Order Studies and Professor of History at Columbia University. He is the author of *Hitler's Greece: The Experience of Occupation, 1941-44*, *Dark Continent: Europe's Twentieth Century*, *The Balkans: A Short History* (which won the Wolfson Prize for History), *Salonica: City of Ghosts* (which won both the Duff Cooper Prize and the Runciman Award) and *Governing the World: The History of an Idea*. He has also taught at Birkbeck College, University of London, Sussex University and Princeton. He lives in New York.

'The Morbid Age' opens a window onto this creative but anxious era, the golden age of the public intellectual and scientist: Arnold Toynbee, Aldous and Julian Huxley, H.G. Wells, Marie Stopes and a host of others.

International Relations, Music and Diplomacy

The book traces the reverberations of Ronald Reagan's ideology in selected Hollywood blockbuster movies. The analysis includes filmic content as well as production and distribution. It is concluded that political metaphors and an economic setting inherited from the 1980s continue to shape the style and content of Hollywood blockbuster filmmaking...
