Murder and Magic

The Stage is Set for Murder! Police are mystified when a magician is killed on stage - shot inside a locked box in front of the audience - and The Great Vicari is called in to investigate. Ben Vicekry returns to the theatre he fled when one of his own illusions went horribly wrong. Here he encounters faces from his own past, and has an opportunity to lay a ghost to rest - but is he ready to go back on stage? As their enquiry progresses, the magician-sleuth and his assistant Malloy learn there is no one with a motive for murder - except for one man who could not possibly have done it. Unless he used magic. Can they learn how the trick was performed - and who was the mastermind behind it - before the curtain rises on another corpse? Murder by Magic is the sequel to The Sword in the Stone-Dead. Look for the third in the series, The Missing Magician.

Murder by Magic

In 1856 William Dove, a young tenant farmer, was tried and executed for the poisoning of his wife Harriet. The trial might have been a straightforward case of homicide, but because Dove became involved with Henry Harrison, a Leeds wizard, and demonstrated through his actions and words a strong belief in magic and the powers of the devil, considerable effort was made to establish whether these beliefs were symptomatic of insanity. It seems that Dove murdered his wife to hasten a prediction made by Harrison that he would remarry a more attractive and wealthy woman. Dove employed Harrison to perform various acts of magic, and also made his own written pact with the devil to improve his personal circumstances. The book will study Dove's beliefs and Harrison's activities within the rural and urban communities in which they lived, and examine how modern cultures attempted to explain this largely hidden mental world, which was so sensationally exposed. The Victorian period is often portrayed as an age of great social and educational progress. This book shows how beliefs dismissed by some Victorians as 'medieval superstitions' continued to influence the thoughts and actions of many people, viz most famously Conan 'table tapper' Doyle.

Murder, Magic, Madness

The Sidewise Award–winning series. “If you are looking for something different in the way of mysteries a few hours with Lord Darcy is a fun way to go” (Daily Kos). This alternate history series starring detective Lord Darcy and his sorcerer sidekick, Sean O Lochlainn, takes us into a reality where Richard the Lionheart’s descendants rule the Anglo-French Empire and the laws of magic have developed in place of the laws of physics. Murder and Magic, comprised of the first four stories of the acclaimed Lord Darcy series, finds Lord Darcy solving murders using his wits, a keen eye for observation, and a few choice magic tricks. In “The Eyes Have It,” Lord Darcy must figure out who killed the taciturn playboy, the Count D’Evreux. In the political thriller “A Case of Identity,” Lord Darcy picks apart the disappearance of the Marquis of Cherbourg, especially mysterious considering the escalating cold war with Poland. Lord Darcy and Master Sean investigate a body coated in blue paint already occupying a coffin built for the late Duke of Kent in “The Muddle of the Woad.” Literary humor is at the heart of “In a Stretch of the Imagination,” where the head of an important publishing house commits suicide under suspicious circumstances. Praise for the Lord Darcy series “Some of the finest fantasy ever written . . . Will certainly guarantee him a lasting place in the genre.” —SF Chronicle “He has combined the best of the fantasy and detective genres—and made them work as science fiction.” —Marion Zimmer Bradley “I cannot count the number of times I have read ‘Too Many Magicians’—each time with the same pleasure.” —Andre Norton

Murder by Magic

People have always been curious about the plants and animals with which they coexist. Primitive cultures identified edible and poisonous plants largely by trial and error, and then used them for hunting, executions, euthanasia, and magico-religious rites, as well as for their medicinal properties. In this fascinating book, John Mann investigates the evolution of modern medicine from its roots in folk medicine, and reveals the continuing importance of natural plant and animal products, many of which remain undiscovered but under threat by the wholesale destruction of the Earth’s wild places. In this new edition, he has updated the material to include discussion of the background to some of the most talked-about drugs of recent years, including Prozac and Viagra. ‘This is an erudite treasure trove in which each page sparkles with a concoction of historical anecdote and scientific revelation.’ The Good Book Guide ‘The book is peppered throughout with the legend, superstition and science of bygone ages, and interesting reading they make.’ New Scientist ‘This highly entertaining account investigates the evolution of modern medicines. ... Professor Mann does it with great style.’ The Lancet ‘... an excellent introductory text for those not liable to dizziness as they jump from one culture to another, or one century to the next.’ Nature ‘... provides intelligent material for those advocating conservation of our global plant resources because of their potentially important reservoir of therapeutically active chemicals for animal and human disease.’ The Times Higher Education Supplement ‘Delightfully rich... buy and read Mann’s wonderful book.’ Chemical and Engineering News

Murder by Magic

A compelling debut by a new voice in fantasy fiction, *The Conductors* features the magic and mystery of Jim Butcher's Dresden Files written with the sensibility and historical setting of Octavia Butler's *Kindred* introducing Hetty Rhodes, a magic-user and former conductor on the Underground Railroad who now solves crimes in post-Civil War Philadelphia. As a conductor on the Underground Railroad, Hetty Rhodes helped usher dozens of people North with her wits and magic. Now that the Civil War is over, Hetty and her husband Benjy have settled in Philadelphia, solving murders and mysteries that the white authorities won't touch. When they find one of their friends slain in an alley, Hetty and Benjy bury the body and set off to find answers. But the secrets and intricate lies of the elites of Black Philadelphia only serve to dredge up more questions. To solve this mystery, they will have to face ugly truths all around them, including the ones about each other. In this vibrant and original novel, Nicole Glover joins a roster of contemporary writers within fantasy, such as Victor LaValle and Zen Cho, who use speculative fiction to delve into important historical and cultural threads.

Murder, Magic, and Medicine

Nicole Glover delivers the second book in her exciting *Murder & Magic* series of historical fantasy novels featuring Hetty Rhodes and her husband, Benjy, magic practitioners and detectives living in post-Civil War Philadelphia. Nothing bothers Hetty and Benjy Rhodes more than a case where the answers, motives, and the murder itself feel a bit too neat. Raimond Duval, a victim of one of the many fires that have erupted recently in Philadelphia, is officially declared dead after the accident, but Hetty and Benjy's investigation points to a powerful Fire Company known to let homes in the Black community burn to the ground. Before long, another death breathes new life into the Duval investigation: Raimond's son, Valentine, is also found dead. Finding themselves with the dubious honor of taking on Valentine Duval as their first major funeral, it becomes clear that his passing was intentional. Valentine and his father's deaths are connected, and the recent fires plaguing the city might be more linked to recent community events than Hetty and Benji originally thought. *The Undertakers* continues the adventures of murder and magic, where even the most powerful enchantments can't always protect you from the ghosts of the past . . .

Murder by Magic

"[A] lighthearted mystery . . . Kids who like mystery and fantasy and fans of television's *Sabrina*, about a teenage witch, will like this" (Booklist). Nola's not much of a witch—she can work only a few useless spells, like the one that lets her spy on people. But there's no spell for keeping her crazy mother—who hears voices and is a magnet for witch-hunters—out of trouble. The two flee from town to town until the day Nola witnesses a murder. Which is bad enough, but worse is that the murderer may frame Nola and her mother for the crime. And then no amount of magic will save her. And you think your teenage years are tough . . . "Dialogue is fast and funny, the characters evincing a certain human desperation that makes them (the good guys, anyway) unfailingly sympathetic. Introduce Rowling fans to Vande Velde, and watch them make magic." —The Bulletin of the Center for Children's Books "Vande Velde has produced a winner in this fantasy mystery . . . [Fans] will not be disappointed in this funny and charming story, which will attract mystery and romance lovers as well." —VOYA "Vande Velde's offering throws murder, witchcraft, and romance into the brew . . . The well-developed characters provide entertaining reading." —School Library Journal "Fun and suspense for readers . . . Entertaining." —Publishers Weekly "The story moves from a witch's tale of many spells, to a murder mystery, and finally, a love story . . . Amusing, light reading." —Kliatt "An entertaining fantasy for any reader." —SF Site

The Conductors

Fans of Patrice Kindl's *Keeping the Castle* or Patricia C. Wrede and Caroline Stevermer's *Sorcery and Cecelia* will adore this funny Regency-era mystery about a determined young woman with a magical trick up her sleeve . . . The year is 1818, the city is London, and 16-year-old Annis Whitworth has just learned that her father is dead and all his money is missing. And so, of course, she decides to become a spy. Annis always suspected that her father was himself a spy, and following in his footsteps to unmask his killer makes perfect sense. Alas, it does not make sense to England's current spymasters—not even when Annis reveals that she has the rare magical ability to sew glamours: garments that can disguise the wearer completely. Well, if the spies are too pigheaded to take on a young woman of quality, then Annis will take them on. And so she crafts a new double life for herself. Miss Annis Whitworth will appear to live a quiet life in a country cottage with her aunt, and Annis-in-disguise as Madame Martine, glamour artist, will open a magical dressmaking shop. That way she can earn a living, maintain her

social standing, and, in her spare time, follow the coded clues her father left behind and unmask his killer. It can't be any harder than navigating the London social season, can it? "Murder, Magic, and What We Wore blew my bonnet off. Kelly Jones has found a fresh way to share the delights of the magical regency. I truly love this book!" —Caroline Stevermer, coauthor of *Sorcery & Cecilia*, or the Enchanted Chocolate Pot "A deliciously enchanting adventure full of magic, mystery and delight." —Stephanie Burgis, author of *Kat, Incurable*

The Undertakers

This absorbing account of the evolution of modern medicine from its roots in folk medicine will entertain and inform both scientist and general reader alike. It explains the chemical basis of pharmacology, and provides a fascinating description of how the use and abuse of natural products in various societies throughout the ages has led to the development of many of the drugs we now take for granted.

Magic Can Be Murder

The Hardy boys will have to come up with their own hocus-pocus to avoid becoming victims of the deadliest trick of all. *Hardy Boys Casefiles #98*.

Murder, Magic, and What We Wore

Hella battles the consequences of her spell: one soul lost, another broken, as the demons rise to claim the earth as their new hunting ground. No witches, Cambions, or humans are safe. Hella Corvime used to be an ordinary 16-year-old girl, but those days are long gone. Now she's The Promised Witch, and her prophesised destiny is far from over. The angels have been defeated, but the cost of the battle was high: Remy and her coven are dead, the Cambion Den and its occupants were destroyed, Harrow's soul was lost, his humanity with it, and now he's out for her blood. Cambions, no longer hunted by angels, breathe a sigh of relief. But their relief is short-lived. Now that Heaven's warriors are locked away, there's nothing to stand between earth and Azazel: he and his demons surge into the world, intent on mass murder. It's up to Hella again to save the world, and she's getting tired of it. It's already cost her James and Alexa, her father, and her family. Now Harrow too. A new threat looms from one of their own: a warlock darkened by pain and loss. He and his Wiccan step-sister have created weapons from severed Cambion Marks, a heinous crime, and are bent on creating more. Cambions are hunted once again. Hella is drowning in the fallout of the angel battle. When the demons come to town, will she be able to stop them? Or will she perish with everyone she loves? She must find a way to make her stand, with those who will fight with her, and save Harrow, before he kills her first. In this thrilling sequel, again the Cambions—even the werewolf and vampire outcasts—her family, and friends, and all the humans in the world, rely on Hella to save them. It's a heavy burden, one she never asked for or had a choice in. It's a miracle she hasn't been killed already. Can she save them all? If you like witches, angels, demons and good versus evil, you'll love the second book in The Promised Witch Series by Dionnara Dawson.

Strong Mystery is an omnibus, a collection of the first three books in the Owen Strong and Jinhao stories. **BOOK ONE - STRONG ADEPT** In Strong Adept, Raven Bond has created an inventive and highly mystical world, where East and West, the ancient ways and the Age of Steam intertwine. Murder and magic are at the heart of the first meeting of Owen Strong, Master Sorcerer, and the mysterious Imperial Adept, Jinhao. **BOOK TWO - STRONG MAGIC** The year is 1885. The city is an alternate Hong Kong. Some of the city's most powerful men are dead from what appear to be heart attacks. Though no evidence points to foul play, members of the British Crown's secretive Obsidian Order know something is amiss. Owen Strong is a former member of the secret sect and a Master Sorcerer who no longer has any interest in the Order-or its rules. He's recruited by the Order to come out of retirement to investigate the mysterious deaths and save his island city. When Owen and Jinhao discover that there are radicals in Hong Kong who are planning to assassinate key delegates to disrupt upcoming trade negotiations, it's not just Hong Kong that they must save: if they do not succeed, a world war will be imminent. **BOOK THREE - STRONG JUSTICE** In an alternate Hong Kong, Owen Strong is in trouble. He meets with an old friend from his school days in Britain who asks for his help in a personal matter, only to betray him. When Jinhao, Owen's mysterious Chinese companion, returns early from a visit with a sister who is a notorious pirate, she finds Owen missing. She will search for him with all her considerable martial and

investigative skill, even if that means calling on the help of the Dragon ruler of Hong Kong. Nothing and no-one is going to stand in her way.

Murder, Magic, and Medicine

Martyrdom, Murder, and Magic: Child Saints and Their Cults in Medieval Europe is a comprehensive history of child saints and their cults from late Antiquity to the end of the fifteenth century. The child martyrs of the persecutions, including the Holy Innocents, were the first child saints recognized by the Church and their cults spread throughout Europe in the early Middle Ages. Alongside these cults, medieval society also venerated child «martyrs», victims of political or domestic violence. The increasing role of the papacy in the canonization process after the tenth century resulted in the veneration of saintly child confessors in the high Middle Ages, but from the end of the twelfth century, most children worshipped as saints were the alleged victims of ritual murder by Jews. This book considers the formation and transformation of child saints and their cults in the context of popular belief and the history of childhood.

The word outsider describes Ola Mae Masters to a T. Orphaned at the young age of seven and tucked away in a swanky orphanage, run by a group of dismissive nuns, the life of Ola Mae Masters is anything but normal. Especially when she realizes that it's ghosts she sees walking and talking in the local graveyard. Shunned by her peers for being different, Ola Mae is constantly barraged by the unspoken thoughts and feelings of everyone she meets. But how is that even possible? Alone, confused and longing to be a regular kid, Ola Mae must wait until she grows up to seek her own "normal." Degree in hand and on a quest to create a new life for herself, she lands in New Moon Beach and is overjoyed to open her own bookstore - Literally Magic. Things seem to be looking up for the young woman until unexplainable magical abilities start uncontrollably bubbling out of her. Plagued with fear over what is happening to her, it appears that fate has dropped Ola Mae into a cauldron filled with many more unexpected surprises. Not the least of which is that she's not really an orphan, but part of a powerful family of witches living in her adopted city. How could she not have recognized that she's a witch too? Opening their arms to their sister, the witches of New Moon Beach must help Ola Mae hone her witchy powers and fast. A dark evil has descended on the beach city that threatens to engulf Ola Mae and her newly found family in a maze of murder, magic, and mayhem. And what of the handsome witch and the love he tempts her with? Will she allow this darkness to destroy her chances for a happy ending? Ola Mae must learn quickly how to use her emerging magical skills if she's ever going to be able to navigate this maze of death and destruction to save New Moon Beach and the man she's come to love.

A Pocket Full of Murder

Ivy Gamble was born without magic and never wanted it. Ivy Gamble is perfectly happy with her life – or at least, she's perfectly fine. She doesn't in any way wish she was like Tabitha, her estranged, gifted twin sister. Ivy Gamble is a liar. When a gruesome murder is discovered at The Osthorne Academy of Young Mages, where her estranged twin sister teaches Theoretical Magic, reluctant detective Ivy Gamble is pulled into the world of untold power and dangerous secrets. She will have to find a murderer and reclaim her sister—without losing herself. “An unmissable debut.”—Adrienne Celt, author of *Invitation to a Bonfire* At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

FROM AWARD-WINNING ROMANCE AUTHOR JANUARY BAIN Charm McCall, armed with a library full of Agatha Christie stories and her unique witchy gifts, knows how to solve a small-town murder... Charm McCall, the oldest of the McCall triplets by a whole day—or one minute before midnight if one's being picky—is the designated driver for her whole town. Why, if it wasn't for her Snowy Lake would incinerate or fall into Hudson's Bay. Now add her Salem Witch heritage that's gifted her with some unique abilities and she's all set to keep her family and town safe and on its proper course. That is, until a hot Mountie moves into town, a busload of strippers breaks down on Main Street and Mrs. Hurst goes and gets herself murdered with poisoned jam. Jam crafted by Charm's family at the Tea & Tarot café. Now it's up to her to solve the murders—yes, plural, when another local business owner ends up dead. Charm knows just what to do. What's breaking a few laws if she can sleuth out the culprit?

She knows the people of Snowy Lake better than any new lawman possibly could. So why can't he just leave her be to get on with things? And why does he have to be so darn hot?

Magic, Mayhem & Murder

A poet, philosopher, essayist, playwright, actor, and director, Antonin Artaud was a visionary writer and a major influence within and beyond the French avant-garde. A key text for understanding his thought and his appeal, *50 Drawings to Murder Magic* is rooted in the nine years Artaud spent in mental asylums, struggling with schizophrenia and the demonic, persecutory visions it unleashed. Set down in a dozen exercise books written between 1946 and 1948, these pieces trace Artaud's struggle to escape a personal hell that extends far beyond the walls of asylums and the dark magicians he believed ran them. The first eleven notebooks are filled with fragments of writing and extraordinary sketches: totemic figures, pierced bodies, and enigmatic machines, some revealing the marks of a trembling hand, others carefully built up from firm, forceful pencil strokes. The twelfth notebook, completed two months before Artaud's death in 1948, changes course: it's an extraordinary text on the loss of magic to the demonic--the piece that gives the book its title. "Artaud matters," wrote John Simon in the *Saturday Review* years ago. Nearly seventy years after his death, that remains true--perhaps more than ever.

REDD+ must be transformational. REDD+ requires broad institutional and governance reforms, such as tenure, decentralisation, and corruption control. These reforms will enable departures from business as usual, and involve communities and forest users in making and implementing policies that affect them. Policies must go beyond forestry. REDD+ strategies must include policies outside the forestry sector narrowly defined, such as agriculture and energy, and better coordinate across sectors to deal with non-forest drivers of deforestation and degradation. Performance-based payments are key, yet limited. Payments based on performance directly incentivise and compensate forest owners and users. But schemes such as payments for environmental services (PES) depend on conditions, such as secure tenure, solid carbon data and transparent governance, that are often lacking and take time to change. This constraint reinforces the need for broad institutional and policy reforms. We must learn from the past. Many approaches to REDD+ now being considered are similar to previous efforts to conserve and better manage forests, often with limited success. Taking on board lessons learned from past experience will improve the prospects of REDD+ effectiveness. National circumstances and uncertainty must be factored in. Different country contexts will create a variety of REDD+ models with different institutional and policy mixes. Uncertainties about the shape of the future global REDD+ system, national readiness and political consensus require flexibility and a phased approach to REDD+ implementation.

Realising REDD+

Mutual-fund superstar Peter Lynch and author John Rothchild explain the basic principles of the stock market and business in an investing guide that will enlighten and entertain anyone who is high-school age or older. Many investors, including some with substantial portfolios, have only the sketchiest idea of how the stock market works. The reason, say Lynch and Rothchild, is that the basics of investing—the fundamentals of our economic system and what they have to do with the stock market—aren't taught in school. At a time when individuals have to make important decisions about saving for college and 401(k) retirement funds, this failure to provide a basic education in investing can have tragic consequences. For those who know what to look for, investment opportunities are everywhere. The average high-school student is familiar with Nike, Reebok, McDonald's, the Gap, and the Body Shop. Nearly every teenager in America drinks Coke or Pepsi, but only a very few own shares in either company or even understand how to buy them. Every student studies American history, but few realize that our country was settled by European colonists financed by public companies in England and Holland—and the basic principles behind public companies haven't changed in more than three hundred years. In *Learn to Earn*, Lynch and Rothchild explain in a style accessible to anyone who is high-school age or older how to read a stock table in the daily newspaper, how to understand a company annual report, and why everyone should pay attention to the stock market. They explain not only how to invest, but also how to think like an investor.

The second half of the twentieth century was dominated by the unfolding drama of the Cold War, from the Berlin blockade to the fall of the Berlin Wall. A booming global economy has had its sinister shadow in the apparently insoluble crises that have beset much of the Third World. Above all, peace in the West has been offset by wars of unbelievable murderousness elsewhere. Reynolds' account is both an overview of the trends underlying this spectacular and awful variety, and an insight into the lives led in its midst.

This book examines how disruptive technologies and innovation underpin the attainment of a broader development agenda in Africa. Contributors show how distinctive forms of technological innovation can impact critical development processes. For example, disruptive technologies can deepen the ongoing democratic and governance waves in Africa, specifically in the area of contested elections. Similarly, innovations in agriculture, the environment and energy promote changes in value chain agriculture, and the use of sensors to manage e-waste and sustainable energy conservation are also transforming established practices. Furthermore, the role of disruptive technologies and innovation in education, health, financial services and the nature of paid work cannot be ignored. Individually and collectively, the authors discuss and highlight the mechanisms and initiatives that can contribute to the realization of the development goals of African countries, especially in a period where disruptive technologies are rapidly changing how things are done. As a result, this book, which represents one of the most recent systematic efforts to bring together dialogue on disruptive technologies in Africa, will be of particular use and benefit to a wide and an eclectic audience.

This is the first systematic and critical analysis of the concept of national interest from the perspective of contemporary theories of International Relations, including realist, Marxist, anarchist, liberal, English School and constructivist perspectives. Scott Burchill explains that although commonly used in diplomacy, the national interest is a highly problematic concept and a poor guide to understanding the motivations of foreign policy.
