Winston Churchill and the German Question in British Foreign Policy 1918–1922

It was in the early summer of 1906 that Violet Bonham Carter first met Winston Churchill: an encounter which left an "indelible impression" upon her. "I found myself," she recalled, sitting next to this young man who seemed to me quite different from any other young man I had ever met. For a long time he remained sunk in abstraction. Then he appeared to become aware of my existence. He turned on me a lowering gaze and asked me abruptly how old I was. I replied that I was nineteen. "And I," he said almost despairingly, "am thirty-two already. Younger than anyone else who counts, though," he added, as if to comfort himself. Then savagely: "Curse ruthless time! Curse our own mortality! How cruelly short is the allotted span for all we must cram into it!" And he burst forth into an eloquent diatribe on the shortness of human life, the immensity of possible human accomplishment - a theme so well exploited by the poets, prophets and philosophers of all ages that it might seem difficult to invest it with a new life

and startling significance. Yet for me he did so, in a torrent of magnificent language which appeared to be both effortless and inexhaustible and ended up with the words I shall always remember: "We are all worms. But I do believe that I am a glow worm."

Every year more and more Europeans, including Germans, are embracing Islam. It is estimated that there are now up to one hundred thousand German converts—a number similar to that in France and the United Kingdom. What stands out about recent conversions is that they take place at a time when Islam is increasingly seen as contrary to European values. *Being German, Becoming Muslim* explores how Germans come to Islam within this antagonistic climate, how they manage to balance their love for Islam with their society's fear of it, how they relate to immigrant Muslims, and how they shape debates about race, religion, and belonging in today's Europe. Esra Özyürek looks at how mainstream society marginalizes converts and questions their national loyalties. In turn, converts try to disassociate themselves from migrants of Muslim-majority countries and promote a denationalized Islam untainted by Turkish or Arab traditions. Some German Muslims believe that once cleansed of these accretions, the Islam that surfaces fits in well with German values and lifestyle. Others even argue that being a German Muslim is wholly compatible with the older values of the German Enlightenment. *Being German, Becoming Muslim* provides a fresh window into the connections and tensions stemming from a growing religious phenomenon in Germany and beyond.

Eleven critical issues in the study of bilingualism: Insightful analyses by renowned expert François Grosjean The majority of people living around the world today are able to speak more than one language, yet many aspects of the nature and experience of bilingualism raise unresolved questions for researchers. Who exactly is bilingual? What is the extent of bilingualism? How do infant bilinguals who acquire two languages at the same time manage to separate them? Does language processing work differently when bilinguals are interacting with monolinguals and with bilinguals? When a speaker changes their language, do they also change aspects of their personality? In *The Mysteries of Bilingualism*, eminent scholar François Grosjean provides a comprehensive examination of individual bilingualism that delves into unanswered questions and challenges many of the myths and misconceptions surrounding bilingualism. Through insightful analyses of eleven key questions, this book offers a unique combination of personal reflection, literature review, personal testimony, and case studies to explore these mysteries. Altogether, this text offers: Comprehensive explorations of the linguistic aspects of bilingualism, including who is bilingual, describing bilinguals, accented speech, and language loss Practical discussions of speech and language processing, including language choice and mixed speech perception and production In-depth examinations of personality and culture in relation to bilingualism and biculturalism Perfect for undergraduate and graduate students of bilingualism, multilingualism, second language acquisition, and applied linguistics, *The Mysteries of Bilingualism* offers an up-to-date view of the leading research questions in the study of bilingualism today.

The Mysteries of Bilingualism

The study of grammatical variation in language mixing has been at the core of research into bilingual language practices. Although various motivations have been proposed in the literature to account for possible mixing patterns, some of them are either controversial, or remain untested. Little is still known about whether and how frequency of use of linguistic elements can contribute to the patterning of bilingual talk. This book is the first to systematically explore the factor usage frequency in a corpus of bilingual speech. The two aims are (i) to describe and analyze the variation in mixing patterns in the speech of Russian German adolescents and young adults in Germany, and (ii) to propose and test usage-based explanations of variation in mixing patterns in three morphosyntactic contexts: the adjective-modified noun phrase, the prepositional phrase, and the plural marking of German noun insertions in bilingual sentences. In these contexts, German noun insertions combine with either Russian or German words and grammatical markers, thus yielding mixed bilingual and German monolingual

constituents in otherwise Russian sentences, the latter also labelled as embedded-language islands. The results suggest that the frequency with which words are used together mediates the distribution of mixing patterns in each of the examined contexts. The differing impacts of co-occurrence frequency are attributed to the distributional and semantic specifics of the analyzed morphosyntactic configurations. Lexical frequency has been found to be another important determinant in this variation. Other factors include recency, or lexical priming, in discourse in the case of prepositional phrases, and phonological and structural similarities and differences in the inflectional systems of the contact languages in the case of plural marking.

First German on Holiday

The intense rivalry in battleship building that took place between Britain and Germany in the run up to the First World War is seen by many as the most totemic of all armaments races. Blamed by numerous commentators during the inter-war years as a major cause of the Great War, it has become emblematic of all that is wrong with international competitions in military strength. Yet, despite this notoriety, 'the Great Naval Race' has not received the attention that this elevated status would merit and it has never been examined from the viewpoint of both of its participants simultaneously and equally. This volume, which contains a comprehensive survey of the existing scholarship on this topic, both English-language and German, as well as important primary source materials from a range of archives in both Britain and Germany, fills this gap. By putting the actions of the British Admiralty side-by-side with those of its German counterparts, it enables the naval race to be viewed comparatively and thereby facilitates an understanding of how the two parties to this conflict interacted. By offering a comprehensive range of German documents in both their original text and in English translation, the book makes the German role in this conflict accessible to an English speaking audience for the first time. As such, it is an essential volume for any serious student of naval policy in the pre-First World War era.

In the early 20th century, postcards were one of the most important and popular expressions of holiday sentiment in American culture. Millions of such postcards circulated among networks of community and kin as part of a larger American postcard craze. However, their uses and meanings were far from universal. This book argues that holiday postcards circulated primarily among rural and small town, Northern, white women with Anglo-Saxon and Germanic heritages. Through analysis of a broad range of sources, Daniel Gifford recreates the history of postcards to account for these specific audiences, and reconsiders the postcard phenomenon as an image-based conversation among exclusive groups of Americans. A variety of narratives are thus revealed: the debates generated by the Country Life Movement; the empowering manifestations of the New Woman; the civic privileges of whiteness; and the role of emerging technologies. From Santa Claus to Easter bunnies, flag-waving turkeys to gun-toting cupids, holiday postcards at first seem to be amusing expressions of a halcyon past. Yet with knowledge of audience and historical conflicts, this book demonstrates how the postcard images reveal deep divides at the height of the Progressive Era.

This book documents a little-known aspect of the Jewish experience in America. It is a fascinating account of how a group of Jewish refugees from Nazi Germany came to dominate cattle dealing in south central New York and maintain a Jewish identity even while residing in small towns and villages that are overwhelmingly Christian. The book pays particular attention to the unique role played by women in managing the transition to the United States, in helping their husbands accumulate capital, and in recreating a German Jewish community.

In Search of Germany is based on a special issue of the journal *Daedalus*. Additions that have been made to the book include a chapter by Timothy Garton Ash entitled "Germany's Choice," a concluding section by the editors, and an index. While the book focuses on Germany, it serves a wider purpose as well by also studying Europe, democracy, and modernity. The prejudices and fears of Germany, precisely because they are specific to and yet not peculiar to Germany, tell a great deal of why an earlier European (and American) optimism has been lost, and why so much contemporary political discourse avoids explicit consideration of really sensitive issues

Konrad H. Jarausch studies the social structure of the German university and the mentality of its students during the Imperial period as an example of a wider European academic desertion of liberalism. He finds that German higher education combined scientific world leadership and competent professional training with an eroding liberal education (*Bildung*) to create an educated class that was tragically susceptible to the appeal of the Third Reich.
