In this book the Promised Messiah, on whom be peace, discusses the philosophy of divine revelation, the three categories of people who claim to receive revelation, and the distinction of the truthful from the false. He then establishes his truthfulness by documenting over 200 Signs, including the fulfillment of prophecies made by the Holy Prophet Muhammad, may peace and blessings of Allah be upon him, other men of God, earlier scriptures, and his own revelations spanning over twenty-five years. The author cites numerous examples of his enemies who publicly predicted his downfall and demise, only to become the very victims of their own prophecies. God, however, protected him against every assault, while continuously reassuring him of His promise to bless his Community—a promise which continues to bear the seal and testimony of history. The author also appeals to the followers of different faiths to read this book cover to cover to appreciate and accept this evidence as proof that God is One and the Holy Prophet Muhammad is the Messenger of God, and that he is the Promised Messiah raised to unite humanity under the banner of Islam.

Al-Kitaab Fii Tacallum Al-CArabiyya Part One

Bite-Size Arabic is a textbook for absolute beginners designed for both independent learners and traditional language courses. It takes a minimal approach by introducing the alphabet gradually, with just a few letters per lesson. As you learn new letters, you also learn just enough vocabulary and grammar to put them into practice, allowing you to read complete simple sentences right from the second lesson. Everything is explained in simple language, and the book uses big, easy-to-read Arabic script with ample phonetic transcription. It contains lots of easy exercises with answer keys, and you can listen to the pronunciation on the free companion website. The focus is on informal Standard Arabic, the ideal basis for learning any variety of Arabic.

Gardens of the Righteous

'Arabiyyat al-Naas (Part One) offers a groundbreaking introduction to Arabic as it is written and spoken by native speakers. It combines a progressive and rigorous grounding in Modern Standard Arabic (MSA) – the form employed for reading, writing and formal speaking – with an innovative integration of the spoken Levantine variety used in everyday situations in Syria, Lebanon, Jordan and Palestine. Introducing the two simultaneously 'Arabiyyat al Naas (Part One) uses each in its proper context: Levantine for conversations and MSA for reading and writing activities. In this way, the course efficiently prepares students for the practical realities of learning and "living" Arabic today. Features include: 21 theme-based units covering all the core topics expected in a first-year Arabic course, such as countries, clothes, colors, family and professions a broad range of stimulating activities and exercises fostering active engagement with the course and the development of comprehension and communication skills comprehensively covers the 5 Cs: communication, culture, connections, comparisons and communities free downloadable resources filmed on location in Jordan, presenting over 40 videos and incorporating a wide variety of entertaining and realistic scenarios a free companion website (www.routledge.com/cw/younes) offering a wealth of additional instructor and student resources, including a teacher's guide, an introduction to the letters and sounds of Arabic (with audiovisual aid and writing demonstrations), audio recordings of songs and listening passages, video clips, sample tests, an answer key and language games clear explanations of grammatical structures and concepts as they occur in the reading and listening materials to encourage progressive learning and active interaction with the text a user-friendly and vibrant full colour text design, richly illustrated throughout with over 200 illustrations and photographs songs with simple lyrics tied to the themes of the course to help advance vocabulary acquisition and understanding of basic grammatical structures. Written by a dynamic author team and tested over a number of years at Cornell University, 'Arabiyyat al-Naas (Part One) will be an essential resource for students beginning to learn Arabic. While primarily designed for classroom use, the accessibility of the course and website also renders it highly suitable for independent study. The materials are designed to bring students from the novice low level to the intermediate low level on the ACTFL scale (American Council on the Teaching of Foreign Languages), and from A1 to A2/B1 on the CEFR scale (Common European Framework Reference). This volume is the first in an exciting three-part series of Arabic textbooks which together provide a complete three-year undergraduate language program.

Bite-Size Arabic

This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

Arabiyyat al-Naas (Part One)

Muslims Under Non-Muslim Rule

The Book Of Remembrances [Kitab al-Adhkar] – By Imam Yahya ibn Sharaf an-Nawawi. *Kitab al-Adhkar* is the definitive compilation of words of remembrance and glorification of (dhikr), and supplicatory prayer to (du'a), the Lord of the Universe, as related from His final Emissary, the Prophet Muhammad (may Allah bless and exalt him). Dhikr and du'a lie at the very heart of the din, the relationship between creature and Creator. As part of the Sunna or Prophetic Way, they are a divinely appointed means of approaching Allah Most High for all our needs, and of making use of all the moments of daily life to strengthen our tawhid, the existential and cognitive Unity that is the hallmark of Muslim spirituality. Also covered are the vital principles of speaking only what is good and avoiding the sins of the tongue. The author, Muhy al-Din Yahya ibn Sharaf al-Nawawi (631-676/123-1277) devoted his entire life to the pursuit of sacred knowledge. He is revered throughout the Sunni world as one of its greatest authorities. Among his most famous writings are the *Arba'in*, a collection of forty Hadiths; a commentary on the *Sahih* of Imam Muslim; and *Kitab al-Adhkar*. Designed as a reference guide and a source of inspiration, this volume presents a clear and elegant English translation of Imam al-Nawawi's classic, together with the text of every single prayer and invocation, both in Arabic letters and in romanisation. Also included are all the author's statements about those Hadiths which he related personally from his own teachers, and his guidance on the correct spelling and meanings of rare words and names. Finally, al-Nawawi's comments on the sources of Hadiths are supplemented by further scholarly notes.

Kitab Ash-Shifa bi ta'rif huquq al-Mustafa, (Healing by the recognition of the Rights of the Chosen One), of Qadi 'Iyad (d. 544H/1149CE) is perhaps the most frequently used and commented upon handbook in which the Prophet's, may Allah bless him and grant him peace, life, his qualities and his miracles are described in every detail. Generally known by its short title, *Ash-Shifa*, this work was so highly admired throughout the Muslim world that it soon acquired a sanctity of its own for it is said: "If *Ash-Shifa* is found in a house, this house will not suffer any harm... when a sick person reads it or it is recited

to him, Allah will restore his health." Ash-Shifa gathers together all that is necessary to acquaint the reader with the true stature of the Prophet, may Allah bless him and grant him peace, with the esteem and respect which is due to him, and with the verdict regarding anyone who does not fulfil what his stature demands or who attempts to denigrate his supreme status - even by as much as a nail paring.

QADI 'IYAD His full name was Abu al-Fadl 'Iyad ibn Musa ibn 'Iyad ibn 'Imran ibn Musa ibn Muhammad ibn 'Abdullah ibn Musa ibn 'Iyad al-Yahsubi, the famous Imam. He was born in Ceuta in the month of Sha'ban, 496 AH and lived there although his family originated from Andalusia. According to his son, Muhammad, his ancestors originated in Andalusia and then moved to the city of Fes, staying in the Qarawiyyin at some point. 'Imrun moved to Ceuta after having lived in Fes. Qadi 'Iyad was the Imam of his time in hadith and its sciences. He was a scholar of tafsir and its sciences, a faqih in usul, a scholar in grammar, language and Arabic speech, as well as in the battles and lineages of the Arabs. He had insight into judgements and had the legal competence to write contracts. He preserved and knew the Maliki madhhab. He was an excellent poet, familiar with literature and an eloquent orator. He was steadfast, forbearing and a good companion. He was generous and gave a lot of sadaqa. He was constant in action and tenacious in the truth. He died in Marrakesh in the month of Jumada al-Akhira or Ramadan in 544 AH.

The Book Of Remembrances

Regarded as one of the most difficult languages to learn for native English speakers by the U.S. State Department, Arabic is gaining both prominence and importance in America. Recent world events have brought more and more Americans and other English speakers into contact with Arabic-speaking populations, and governments and businesses are increasingly aware of the importance of basic Arabic language skills. *Arabic for Dummies* provides you with a painless and fun way to start communicating in Arabic. Why should you learn Arabic? Well, besides the fact that over 200 million people in more than 22 nations use it to communicate, there are tons of reasons to get up to speed this 1,400 year old language, including: Nearly all of the Middle-East speaks Arabic or one of its dialects Basic Arabic skills are extremely useful for anyone traveling to, doing business in, or serving in the Middle East It is the language in which the Koran is written There is a rich, centuries-old literary tradition in Arabic *Arabic For Dummies* presents the language in the classic, laid-back *For Dummies* style. Taking a relaxed approach to this difficult language, it's packed with practice dialogues and communication tips that will have you talking the talk in no time. You'll get the scoop on: The Arabic alphabet, pronunciation, basic grammar, and the rules of transliteration The history of the language and information on classical Arabic and its dialects How to make small talk and make yourself understood when dining, shopping, or traveling around town How to communicate on the phone and in business conversations Handy words and phrases for dealing with money, directions, hotels, transportation, and emergencies Arabic culture and etiquette, including ten things you should never do in Arabic countries The book also includes an Arabic-English dictionary, verb tables, and an audio CD with dialogues from the book to help you perfect your pronunciation. Written by a native Arabic speaker who helped start a year-round Arabic department at Middlebury College, *Arabic For Dummies* is just what you need to start making yourself

understood in Arabic. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

This text presents the theory and practice of law enforcement in the backcountry of the National Park System of the United States. The principles outlined in this text can be applied to wilderness areas within the National Forests and areas under the control of the Bureau of Land Management and the U.S. Fish and Wildlife Service. NATIONAL PARK SERVICE LAW ENFORCEMENT covers such issues as drug manufacturing, archaeological theft, off-road vehicle use, criminal violations, and violations by unknowing violators. The text also familiarizes the reader with the basics of Constitutional law, criminal law, natural resource law, and the U.S. Code of Federal Statutes and regulations as they apply to this topic.

In recent decades many attacks have been launched against the concept of taqlid [following a school of Islamic law]. Opposition has ranged from being mild with degrees of acceptance to malicious attacks. Certain extreme elements have gone so far as to brand those who follow a madhhab [school] as mushrik [polytheist]. Much of the opposition has been a result of misunderstanding the realities of this concept. The first part of this book seeks to clarify certain aspects of taqlid that have been misunderstood and gravely distorted. It sheds light on the necessity of taqlid, its history, and its role in today's world. The second part includes several chapters devoted to issues regarding salat [ritual prayer] according to the Hanafi school of law. Through illustrative examples and detailed discussions, the chapters on prayer sufficiently demonstrate the sophisticated legal philosophy employed by the Hanafi school (indeed all the madhhabs) in their derivation of legal rulings from the source texts of Islam. All rulings have been supported with evidentiary proofs from the Quran and Hadith. The author delivers an even-handed presentation of arguments throughout the book. He intends neither to offend nor to perpetuate polemic disputes, but rather to state the facts in a lucid and rational style, with a view to appeal to the reader's sense of reason.

Al-Kitaab Fii Ta'allum Al-'Arabiyya with DVD

The Hidayah has dominated the field of Islamic jurisprudence since the day it was written over 800 years ago. It has been the primary text used by Muslim jurists to issue authentic and reliable rulings on Islamic law according to the school of Imam Abu Hanifa (d 150H/767CE). The Hidayah commands such an authoritative position amongst the doctors of law that the knowledge of a scholar who has not read it is not considered reliable. It has been a standard text in the curricula of Islamic law schools since the 12th century. It was first translated into English by Charles Hamilton in 1791. Around 70 huge commentaries, some spread over more than a dozen volumes have been written on it. The number of explanatory glosses is in thousands. Comprehensive in content and conveniently organized, with the publication of this all previous works that discussed Islamic jurisprudence according to the Hanafi law become outmoded and soon fell into disuse. If revealed books are not taken into account, never has a book received so much attention as the Hidayah. This landmark publication of the Hidayah not only has been translated in its entirety for the first time but has been done so from Arabic, the language in which it was written. The author, Shaykh Al-Islam, Burhan Al-Din Marghanani (d 593 AH/ 1197 CE) was considered to be the leading jurist of the Muslim world in his times. "The Hidayah is justly celebrated as the most practical and useful summary compilation of Hanafi jurisprudence. It has been a standard text in the curricula of Islamic law schools since the 12th century. It was first translated by Charles Hamilton in 1791. A new translation into modern English has been long overdue. This translation by Imran Ahsan Khan Nyazee is both precise and straight forward. With his knowledge of Islamic law and jurisprudence combined with his command of both the Arabic and English languages, he has conveyed the meaning of the original with great clarity. The Hidayah is a dense work, intended for use in teaching Hanafi fiqh - it is a work that needs explication if its arguments are to be understood fully. This the translator has provided through this valuable notes" Dr Mohammad Akram Nadwi, research fellow, Oxford Centre for Islamic Studies, Oxford

A New Arabic Grammar of the Written Language

Professor Abdur Rahim's eight-volume texts enable the student to acquire a knowledge of Arabic in the classical structural form. All of the books teach essential language skills through applied grammar.

Each lesson is based on a conversation which illustrates distinctive language patterns. A variety of exercises helps the student to understand and master each of the patterns occurring in the lesson. The vocabulary ranges from classical and Quranic Arabic to words and expressions current in modern Arabic. This series of books is currently being utilized at various schools to prepare students for the University of London (UK) GCE O-Level and A-Level examinations.

Muhammad Messenger of Allah

The Mukhtasar Al-Quduri is one of the most celebrated and influential treatises in any Muslim school of methodology and thought and is the foundation for the Hanafi school. It is both the first source for scholars and a manual for the general reader.

Think! Different

Think! Different is a different kind of self-help book: the author, Andreas Boskugel, is well-known in Europe and appreciated for his clear and direct manner. Boskugel has taken the law of attraction to its systematic and logical conclusion! This book is completely free of otherwise typical references to moral or religious "standards" because the law of attraction – like all natural laws – isn't based on morality or religion. Consequently the author has a very different take than do others on success; for example, he doesn't idolize hard work, honesty and gratitude ad absurdum, for these are only religious and cultural based opinions and actually contradict the law of attraction. The author also forgoes otherwise typical teachings about what is right or wrong; after all, what is "right" is individually defined. Feigned pity or morality sermons are also not included in this work. This work is for those who love the integrity of the law of attraction and prefer clarity over political correctness. And it's for those who really want

to get somewhere in life and who therefore question existing opinions. It's for people who are able to think on their own instead of going with the flow. For many, it was not until reading this book that they finally understood the law of attraction, for the topics in this book are more logically organized than in other popular works, and insights are offered that can dramatically improve the lives of readers. Completely new insights about the existing laws of life can help readers become invincible masters of their own destiny. Keywords: Law of Attraction, Self-Help, Success, Wealth, Dream, Wish Fulfillment, Love, Relationship, Money

Manifesto of New Realism

Retraces the history of postmodern philosophy and proposes solutions to overcome its impasses. Philosophical realism has taken a number of different forms, each applied to different topics and set against different forms of idealism and subjectivism. Maurizio Ferraris's *Manifesto of New Realism* takes aim at postmodernism and hermeneutics, arguing against their emphasis on reality as constructed and interpreted. While acknowledging the value of these criticisms of traditional, dogmatic realism, Ferraris insists that the insights of postmodernism have reached a dead end. Calling for the discipline to turn its focus back to truth and the external world, Ferraris's manifesto—which sparked lively debate in Italy and beyond—offers a wiser realism with social and political relevance. Maurizio Ferraris is Full Professor of Philosophy and Director of the Laboratory for Ontology at the University of Turin, Italy. His books include *Goodbye, Kant! What Still Stands of the Critique of Pure Reason*, also published by SUNY Press. The Imperative of Responsibility

Hans Jonas here rethinks the foundations of ethics in light of the awesome transformations wrought by modern technology: the threat of nuclear war, ecological ravage, genetic engineering, and the like. Though informed by a deep reverence for human life, Jonas's ethics is grounded not in religion but in metaphysics, in a secular doctrine that makes explicit man's duties toward himself, his posterity, and the environment. Jonas offers an assessment of practical goals under present circumstances, ending with a critique of modern utopianism.

Mindfulness is the elementary human aptitude to feel own presence, i.e., being conscious of the point of the existence of self and the corresponding boundary of performance, posing complete rejection to the undue recognition or excessive activities, revolving around alarmingly. Awakening to the 3-pronged internal functional structure of the physical, mental and spiritual processes, lying dormant in an individual is the prime objective of mindfulness. Mindfulness is naturally present in a person's mind and soul, but it warrants a steadfast practice and exertion that should be included in daily chores. Then only, this abstract element can be viewed as a tangible object and mindfulness will complete its full circle. Sometimes, knowledge is taken as lessons of what a person observes straight through senses or thoughts and perceptions. This indicates that a particular person is mindful. Experiments are always on the path of an impulsive run in displaying that an individual is reshaping the brain's physical framework when the brain is educated to be mindful.

The ultimate night out – and not only for the girls! Ladies Night tells the story of five Liverpudlian men on the dole who decide to form a male stripping act. As they try to raise a fast buck, they pitch the idea to a local club owner and take lessons from a slightly shop-worn dance instructor with a heart-of-gold in all manner of things, including what women really want from a male stripper – and how to deliver it. Written in 1987 by Anthony McCarten and Stephen Sinclair, Ladies Night was a global theatrical hit. It has been translated into sixteen languages and remains New Zealand's most commercially successful play of all time. After eight sell-out tours of Britain, it went on to win The Molière Prize, France's premiere theatre award for comedy, in 2001.

[B]ecause of the thoroughness of the literature reviews and the comprehensive coverage of the chapter topics, [this book] should be required reading for any scholar working in related areas of personality or intelligence."--PsycCRITIQUES "This book is a masterly attempt to bring order and cohesion to a field that for many years has been riven with claims and counterclaims. The editors and authors are to be congratulated for addressing a very complex task so helpfully." John Biggs, PhD Honorary Professor of Psychology University of Hong Kong "If you are interested in intellectual stylesópeople's preferred ways of processing informationóthen this book belongs on your bookshelf." Richard E. Mayer, PhD Professor of Psychology University of California, Santa Barbara "For more than half a century, the construct of styleówhether designated as cognitive, thinking or learningóhas been in or out of fashion in the history of psychology and education. The editors of the present Handbook have invigorated the style construct in the form of intellectual styles, and have brought together a distinguished international panel of chapter authors who offer up-to-date surveys of the assessment, development, correlates, and educational and organizational applications of intellectual styles. For those seeking to familiarize themselves with current theory and research in an intellectually exciting field, the present Handbook is essential." Nathan Kogan, PhD Professor Emeritus, Department of Psychology New School for Social Research, New York, NY The concept of intellectual styles has had a controversial history based on diverse philosophical and theoretical foundations. Most recently, the idea of intellectual stylesóan umbrella term that covers such closely related constructs as "cognitive styles," "learning styles," "teaching styles," and "thinking styles"óhas gained momentum as an explanation for why different people succeed in different professional and organizational settings. Previously, it was thought that high-achievers simply had more innate abilities than their less successful peers, but research has shown that individuals have different intellectual styles that are better suited for varying types of contexts and problems. Based on the most current and expansive research, this handbook is the first to provide a comprehensive review of research on the construct of intellectual style, from its foundations and development, to its relations to allied constructs, its roles in school and job performance, its applications in various populations, and its future.. This understanding of intellectual styles as a valid concept for both individuals and groups has far-reaching implications for researchers in cross-cultural psychology, multicultural education, organizational behavior and work performance, and many other academic disciplines, as well as practitioners in education and beyond. Key Features: Provides a comprehensive review of intellectual styles from multiple perspectives Written for students and scholars in diverse academic arenas, as well as practitioners in education and other fields Includes contributions from researchers from diverse disciplines, such as psychology, business, education, and health sciences

New Success

This book examines the coding of the three coordination relations of combination, contrast and alternative between states of affairs on the basis of a 74 language sample, with special focus on the languages spoken in Europe. It constitutes the first systematic inquiry so far conducted on the cross-linguistic coding of coordination, as defined in cognitive and pragmatic terms. This research shows that the 'and-but-or' coding system which is typical of Central-Western Europe appears to be extremely rare outside Europe, where a great variation in the coding of coordination is attested. This cross-linguistic variation, however, is not random, but is crucially constrained by the interaction of economic principles with the semantic properties of the individual relations expressed. A fine-grained functional systematization of coordination is proposed and described by means of implicational patterns and semantic maps. This work brings together a broad cross-linguistic perspective and a detailed semantic analysis, largely based on new and comparable data collected by means of questionnaires,

all accessible in the appendix of the book. It represents the first systematic attempt towards a unified typology of coordination relations.

Handbook of Intellectual Styles

The Great Recession, triggered by the collapse of financial markets in 2008, struck with such ferocity that millions of people began to question the rationality of our capitalist economic system. And as scholars, journalists, and activists tried to comprehend what was happening, they were forced to look deeply into the nature of capitalism—inevitably leading them to the work of Karl Marx. Now, Marx is enjoying a worldwide rediscovery and resurrection, and his masterwork, *Capital*, has found its way back into college classrooms, labor unions, the Occupy movement, study groups, and into the hands of disillusioned young people. Reading *Capital* can be a daunting endeavor and most readers need guidance when tackling this complex work. *PolyluxMarx* provides such guidance. Developed by scholars and political activists associated with the Rosa Luxemburg Stiftung (Foundation), one of the leading political education institutions in Germany, this book has been field tested with groups studying Marx's masterpiece over several years. It consists of a large set of PowerPoint presentations, combined with detailed annotations and suggestions for ways to discuss the material. Each page illustrates a central argument from *Capital*, provides helpful introductory texts, and supplies notes on methodology and teaching tips. *PolyluxMarx* is an ingeniously devised illustrated workbook that will help readers grasp the key arguments of *Capital*. It will prove invaluable to the curious reader of all ages, as well as to students, teachers, workers, activists, and study groups.

The aging of the population and the increasing number of older adults pursuing foreign language courses call for a greater understanding of the ways in which these individuals learn foreign languages. This book offers a pioneering contribution to the literature on foreign language education for older adults (aged 60 and over), termed foreign language geragogy. It details an empirical, multidisciplinary study on Japanese older learners of Spanish and focuses on the influence of learning experiences on vocabulary learning strategy use. It discusses the constraints that preconceptions impose on learners, researchers, instructors and administrators, and it offers a set of practical recommendations for foreign language activities for elderly individuals. It also introduces the notion of 'learner re-training', an instructional mechanism that contributes to older learners' self-acknowledgment and autonomy development in foreign language learning. The book is directed at teachers and trainee teachers of foreign languages to older adults, and also at education professionals and researchers in the field of foreign language learning in general.

Coordination Relations in the Languages of Europe and Beyond

This study is an attempt to explain coordinate conjoining as a rule-governed process of establishing specific semantic relations within and between sentences. Coordination is thus conceived of both as a basic device of linguistic complex formation and as a rather fundamental principle underlying the creation of the text. From the point of view of achieving coherence, coordinate conjoining is described in this monograph as an integrative process. Described are the conditions governing this process, the rules according to which take place, in short: the complex interaction of various linguistically identifiable features displayed by coordinate structures. Coordinate conjoining is regarded here as the result of the interplay of three factors which belong to distinct levels of semantic description: the meaning of the conjuncts, the relation between the meaning of the conjuncts and the meaning of the connectors. The step-by-step explication of the interaction of these levels in determining the semantic interpretation of coordinate structures forms the core of the present study.

The Manual of Standard Tibetan presents the everyday speech of Lhasa as it is currently used in Tibet and among the Tibetan diaspora. It not only places the language in its natural context but also highlights along the way key aspects of Tibetan civilization and Vajrayana Buddhism. The Manual, which consists of forty-one lessons, is illustrated with many drawings and photographs and also includes two informative political and linguistic maps of Tibet. Two CDs provide an essential oral complement to the manual. A detailed introduction presents a linguistic overview of spoken and written Tibetan.

The book analyses the differences between the mathematical interpretation and the phenomenological intuition of the continuum. The basic idea is that the continuity of the experience of space and time originates in phenomonic movement. The problem of consciousness and of the spaces of representation is related to the primary processes of perception. Conceived as an interplay between cognitive science, linguistics and philosophy, the book presents a conceptual framework based on a dynamic and experimental approach to the problem of the continuum. Besides presenting the primitives of a theory of cognitive space and time, it presents a theory of the observer, analyzing the relationship among perspective, points of view and unity of consciousness. The book's chapters deal with the dynamic elaboration and recognition of forms from the lower to the higher processes in the various perceptual fields. Experimental analysis from visual, auditory and tactile perception outline the basic structures of intentionality and its counterpart in language and gesture. (Series B)

Smart. 4 : Grundkurs : Coursebook

In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Language Teaching and the Older Adult

"The approach that has helped thousands of learners memorize Japanese kanji has been adapted to help students with Chinese characters. Remembering Simplified Hanzi covers the writing and meaning of the 1,000 most commonly used characters in the traditional Chinese writing system, plus another 500 that are best learned at an early stage." "Of critical importance to the approach found in these pages is the systematic arranging of characters in an order best suited to memory. In the Chinese writing system, strokes and simple components are nested within relatively simple characters, which can, in turn, serve as parts of more complicated characters and so on. Taking advantage of this allows a logical ordering, making it possible for students to approach most new characters with prior knowledge that can greatly facilitate the learning process."--BOOK JACKET.

Using his skills as a journalist, historian, and memoirist, Sebastian Haffner (author of *The Meaning of Hitler*) traces the development of the German Empire (1871-1945) and the central role of warfare that characterized the Reich. Haffner contends that Germany's unfavorable geographic position had much to do with the state's belligerence and that, from its inception, created the conflicts that culminated in two world wars. "The fruit of decades of study, the moving and sometimes very personal testament of an author whose works more than any others have influenced public opinion and challenged academic historians." — *Die Zeit* "A brilliant work from the top hat of a powerful historical magician."

— Rudolf Augstein, *Der Spiegel* “A thoroughly successful work.” — *Wiener Tagblatt* “A book with more historical insights than a whole pile of learned volumes.” — *Münchener Abendzeitung* “The history of the Third Reich in just 43 pages? Impossible to do more than discuss a few features superficially. But not with Sebastian Haffner. This brilliant thinker — a journalist turned historian — reveals the fundamental lines of development in a way that anyone can follow. The pages bristle with questions and unexpected answers. The 300 pages of ‘The Ailing Empire’ contain more clever and original insights into German history between 1871 and 1945 than many a weighty tome.” — Dieter Wunderlich “This illuminating survey by a German journalist focuses on the continuities and discontinuities of the modern German Reich ... Haffner argues that the founding of the state was never regarded as a climactic achievement but rather as a springboard for expansion, and that Germany’s unfavorable geographic position had much to do with the state’s armed belligerence. The author also contends that the Reich was self-destructive almost from the beginning, creating a host of enemies who brought it to its knees in two world wars and eventually divided it. He describes how Hitler accelerated the catastrophic finish of the Reich by inopportunistically taking on both the Russians and Americans, then tried to turn military defeat into the annihilation of the German people with his Nero Directive of March 18-19, 1945.” — *Publishers Weekly* “[The Ailing Empire] tells the story of yesterday’s Germans who made today. It is a story Americans must understand.” — *San-Diego Union* “Sebastian Haffner has written a book that traces the path of Germany’s political self-destruction, and offers a realistic account of the war’s real causes ... It is a highly readable analysis of the road from Bismarck to Hitler ... This book, based on many previously unpublished accounts, is a devastating portrait of human society.” — *Chattanooga Times* “This is a highly readable analysis of German history over the last century. A long-time journalist, Haffner asserts that the foundations of the German Reich were an inadequate basis for a modern nation state and contained the seeds of its own destruction. Though lacking documentation, Haffner’s first-hand recollections of the Nazi era are most interesting. Particularly noteworthy are his observations on daily life during the regime and his judgment regarding those literary and artistic ‘antis’ who chose ‘internal emigration’ within the Hitler state.” — *Library Journal*

The Semantics of Coordination

After coming to Vienna from Sudan to win a better life for himself, Hamza struggles to escape from the margins of society and the stigma of the immigrant. Following several years of hardship, his fortunes begin to change when he meets Sandra, a young Austrian woman, who shows him the Palm House. In this famous Viennese greenhouse, the frost of Hamza's heart begins to thaw, and he slowly opens himself to Sandra, revealing his bitter yet beautiful past in Sudan and beyond. This masterful novel draws on the 1001 Nights as well as Sudanese folk traditions, and demonstrates the remarkable power of storytelling to overcome even the most dire circumstances. Critically acclaimed across the Arab world, this novel can be read on its own, or as a sequel to Eltayeb's first novel, *Cities without Palms* (AUC Press, 2009).

Experiments in Ethics

This fascinating and beautifully illustrated book on the work of Francis Bacon, one of the 20th century's greatest painters, takes an in-depth look at his trademark motif of figures imprisoned within ghostly frames. Arguably one of the most influential and original painters of the 20th century, Francis Bacon painted haunting portraits that employed themes of crucifixion, torment, and isolation. Incorporating the insights of *The Logic of Sensation*, French philosopher Gilles Deleuze's seminal criticism of Bacon's work, this volume highlights Bacon's approach to space as one of the defining forces of his work. By organizing the spatial and dramatic structure of his compositions with barely visible cubic or elliptical cages, his figures become trapped in a kind of invisible room. This sense of confinement creates

a direct, unsettling impression on the viewer, and further emphasizes the painter's dark vision. This book features stunning reproductions of 40 large-scale paintings, including *Study for a Portrait* (1952), *Chimpanzee* (1955), *Three Studies of the Male Back* (1970), and *Sand Dune* (1983) as well as a selection of rarely exhibited works on paper. This book also contains a series of essays that explore the range of variation in Bacon's use of isolating constructions over a period of nearly 50 years, as well as the nature of his painting technique and compositions.
