

Futures Yet Unknown

[#future](#) [#unknown](#) [#uncertainty](#) [#unpredictable future](#) [#future possibilities](#)

The phrase 'Futures Yet Unknown' profoundly captures the essence of life's inherent unpredictability, reminding us that tomorrow remains a blank canvas. It speaks to the countless possibilities, challenges, and opportunities that lie ahead, all shrouded in a captivating veil of uncertainty, inviting both trepidation and anticipation for what is yet to unfold.

Futures Yet Unknown

An anthology of ten stories about the future. A hunting expedition on an alien world. An Alien serial murderer and a furry detective with fleas. Murder on a alien world by altered humans. Disturbing apocalyptic visions and monstrous dystopian societies. A man on trial for breathing the human race to robots. Devils, demons and ghosts come to visit. Ambitious survivors of a plague war. Cyborgs trying to be human once again. Six friends in the strangest sinkhole ever discovered. The truth about a world drowning in rain, without sun, without hope.

The Future: A Very Short Introduction

From the beginning of time, humans have been driven by both a fear of the unknown and a curiosity to know. We have always yearned to know what lies ahead, whether threat or safety, scarcity or abundance. Throughout human history, our forebears tried to create certainty in the unknown, by seeking to influence outcomes with sacrifices to gods, preparing for the unexpected with advice from oracles, and by reading the stars through astrology. As scientific methods improve and computer technology develops we become ever more confident of our capacity to predict and quantify the future by accumulating and interpreting patterns from the past, yet the truth is there is still no certainty to be had. In this Very Short Introduction Jennifer Gidley considers some of our most burning questions: What is "the future"?; Is the future a time yet to come?; Or is it a utopian place?; Does the future have a history?; Is there only one future or are there many possible futures? She asks if the future can ever be truly predicted or if we create our own futures - both hoped for and feared - by our thoughts, feelings, and actions, and concludes by analysing how we can learn to study the future. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Speech of the Unknown Future

There is today a surfeit of cultural practices, oriented towards the posited future, that merely reflect personal beliefs or desires, or are utopian or, as we know through terrorism, are destructive in character ... We now need another way to address the future, the future in its character of being always unknown and yet REAL! This future requires a corresponding method; a cultural practice that is synchronized

to the quality of the future as unknown yet real, and at the same time participates in its coming-to-be. This book is an attempt to "spell out" such a method. (from the preface)

What is the Future?

Thinking about the future is essential for almost all organizations and societies. States, corporations, universities, cities, NGOs and individuals believe they cannot miss the future. But what exactly is the future? It remains a mystery – perhaps the greatest mystery, especially because futures are unpredictable and often unknowable, the outcome of many factors, known and unknown. The future is rarely a simple extrapolation from the present. In this important book, John Urry seeks to capture the many efforts that have been made to anticipate, visualize and elaborate the future. This includes examining the methods used to model the future, from those of the RAND Corporation to imagined future worlds in philosophy, literature, art, film, TV and computer games. He shows that futures are often contested and saturated with different interests, especially in relation to future generations. He also shows how analyses of social institutions, practices and lives should be central to examining potential futures, and issues such as who owns the future. The future seems to be characterized by 'wicked problems'. There are multiple 'causes' and 'solutions', long-term lock-ins and complex interdependencies, and different social groups have radically different frames for understanding what is at stake. Urry explores these issues through case-studies of 3D printing and the future of manufacturing, mobilities in the city, and the futures of energy and climate change.

Collaborative Futures in Qualitative Inquiry

Collaborative Futures in Qualitative Inquiry critically reflects on and explores the role of qualitative research amidst the global COVID-19 pandemic. Against this unprecedented backdrop, it asks what research means during a global pandemic and what it means to be an academic. Leading international scholars from the United States, Canada, Chile, New Zealand, Norway, and the United Kingdom wrestle with the changing dynamics of research in pandemic times. Collectively and collaboratively, contributors call for a critical, performative, social justice inquiry directed at the multiple crises of our historical present—a rethinking of where we have been, and, critically, where we are going. More specifically, contributors focus on such topics as: the emotional geographies of academic writing; assaults on science and truth; pedagogies of the imagination; indigenization and reconciliation; the search for our common humanity; and the relevance of qualitative inquiry in an era of big data and digital transformation. Collaborative Futures in Qualitative Inquiry is a must-read for faculty and students alike who are interested in imagining new ways to collaborate, to engage in research and activism, and represent and intervene into social life in pandemic times.

The Discovery of the Future

DigiCat Publishing presents to you this special edition of "The Discovery of the Future" by H. G. Wells. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

In Search of Lost Futures

In Search of Lost Futures asks how imaginations might be activated through practices of autoethnography, multimodality, and deep interdisciplinarity—each of which has the power to break down methodological silos, cultivate novel research sensibilities, and inspire researchers to question what is known about ethnographic process, representation, reflexivity, audience, and intervention within and beyond the academy. By blurring the boundaries between the past, present, and future; between absence and presence; between the possible and the impossible; and between fantasy and reality, In Search of Lost Futures pushes the boundaries of ethnographic engagement. It reveals how researchers on the cutting edge of the discipline are studying absence and grief and employing street performance, museum exhibit, anticipation, or simulated reality to research and intervene in the possible, the impossible, and the uncertain.

Manifesting Possible Futures

If the present alienation of mind from nature, i.e., the Cartesian reality principle, is to be overcome, there "surely must be a climate of extreme depression amounting in many quarters to despair... One way or another there is an opportunity here for a good writer... who should fill out in terms of concrete events and experiences the issues... If a society is really faced with startling changes and fairly imminent ones (and there is a good deal of evidence that ours is) it cannot be amiss for a few people here and there to be peering ahead, however inadequately, by way of preparation for them." Owen Barfield: *The Coming Trauma of Materialism*

Law and Practice of International Commercial Arbitration

Highly acclaimed by practitioners all over the world, *Law & Practice of International Commercial Arbitration* has deservedly become the leading text in its field. With its comprehensive review of the legal context within which international commercial arbitration operates, Redfern & Hunter is the ultimate user-friendly explanation of how arbitration, and in particular international commercial arbitration, works. The 4th edition has been expanded to give a wider global scope to the work. Readers can also benefit from the expert insight and advice of world-renowned international practitioners.

- international practitioner
- * Contains a comprehensive review of the international commercial arbitration process from start to finish
- * Includes commentary on suitable places of arbitration, developments in international trade law and the increasing harmonisation of national laws governing international arbitration
- * Appendices include the major international rules of arbitration and conventions
- * Explains how arbitration should be conducted to be cost effective and profitable
- * Fully updated to take account of the latest developments all over the world - including a new chapter on investment arbitrations

Futures Thinking and Organizational Policy

This book proposes that organizational policies are what ensure the institutionalization and sustainability of futures thinking in organizations. It presents several case studies from corporations and other institutions that describe effective use of foresight methods and internal policies to respond to rapid change. The case studies address changing trends in technology, globalization and/or workforce diversity, and the impact on the economic and political well-being of the organization. The editors also develop an organizational capability maturity model for futures thinking as well as providing questions for discussion that promote critical review of each case chapter. This book will inform scholars and organizational leaders how best to utilize foresight methodologies and organizational policies to sustain successful management strategies within futures thinking organizations. Chapter 9 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Risk Management in Commodity Markets

Commodities represent today the fastest growing markets worldwide. Historically misunderstood, generally under- studied and under- valued, certainly under- represented in the literature, commodities are suddenly receiving the attention they deserve. Bringing together some of the best authors in the field, this book focuses on the risk management issues associated with both soft and hard commodities: energy, weather, agriculturals, metals and shipping. Taking the reader through every part of the commodities markets, the authors discuss the intricacies of modelling spot and forward prices, as well as the design of new Futures markets. The book also looks at the use of options and other derivative contract forms for hedging purposes, as well as supply management in commodity markets. It looks at the implications for climate policy and climate research and analyzes the various freight derivatives markets and products used to manage shipping and freight risk in a global commodity world. It is required reading for energy and mining companies, utilities' practitioners, commodity and cash derivatives traders in investment banks, CTA's and hedge funds

Music's Immanent Future

The conversations generated by the chapters in *Music's Immanent Future* grapple with some of music's paradoxes: that music of the Western art canon is viewed as timeless and universal while other kinds of music are seen as transitory and ephemeral; that in order to make sense of music we need descriptive language; that to open up the new in music we need to revisit the old; that to arrive at a figuration of music itself we need to posit its starting point in noise; that in order to justify our creative compositional works as research, we need to find critical languages and theoretical frameworks with which to discuss them; or that despite being an auditory system, we are compelled to resort to the visual metaphor as a way of thinking about musical sounds. Drawn to musical sound as a powerful form of non-verbal

communication, the authors include musicologists, philosophers, music theorists, ethnomusicologists and composers. The chapters in this volume investigate and ask fundamental questions about how we think, converse, write about, compose, listen to and analyse music. The work is informed by the philosophy primarily of Gilles Deleuze and Felix Guattari, and secondarily of Michel Foucault, Julia Kristeva and Jean-Luc Nancy. The chapters cover a wide range of topics focused on twentieth and twenty-first century musics, covering popular musics, art music, acousmatic music and electro-acoustic musics, and including music analysis, music's ontology, the noise/music dichotomy, intertextuality and music, listening, ethnography and the current state of music studies. The authors discuss their philosophical perspectives and methodologies of practice-led research, including their own creative work as a form of research. *Music's Immanent Future* brings together empirical, cultural, philosophical and creative approaches that will be of interest to musicologists, composers, music analysts and music philosophers.

European Perspectives for Public Administration

Ebook available in Open Access: oapen.org/search?identifier=1006705 Strategies and priorities for the public sector in Europe The public sector in our society has over the past two decades undergone substantial changes, as has the academic field studying Public Administration (PA). In the next twenty years major shifts are further expected to occur in the way futures are anticipated and different cultures are integrated. Practice will be handled in a relevant way, and more disciplines will be engaging in the field of Public Administration. The prominent scholars contributing to this book put forward research strategies and focus on priorities in the field of Public Administration. The volume will also give guidance on how to redesign teaching programmes in the field. This book will provide useful insights to compare and contrast European PA with PA in Europe, and with developments in other parts of the world. Contributors: Geert Bouckaert (KU Leuven), Werner Jann (University of Potsdam), Jana Bertels (University of Potsdam), Paul Joyce (University of Birmingham), Meelis Kitsing (Estonian Business School, Tallinn), Thurid Hustedt (Hertie School of Governance, Berlin), Tiina Randma-Liiv (Tallinn University of Technology), Martin Burgi (Ludwig Maximilians University of Munich), Philippe Bezès (Science Po Paris; CNRS), Salvador Parrado (Spanish Distance Learning University (UNED), Madrid), Mark Bovens (Utrecht University; WRR), Roel Jennissen (WRR), Godfried Engbersen (Erasmus University Rotterdam), Meike Bokhorst (WRR), Bogdana Neamtu (Babes Bolyai University, Cluj-Napoca), Christopher Pollitt (KU Leuven), Edoardo Ongaro (Open University UK, Milton Keynes), Raffaella Saporito (Bocconi University, Milan), Per Laegreid (University of Bergen), Marcel Karré (Erasmus University Rotterdam), Thomas Schillemans (Utrecht University), Martijn Van de Steen (Nederlandse School voor Openbaar Bestuur), Zeger van de Wal (National University of Singapore), Michael Bauer (University of Speyer), Stefan Becker (University of Speyer), Jean-Michel Eyméri-Douzans (Université de Toulouse), Filipe Teles (University of Aveiro), Denita Cepiku (Tor Vergata University of Rome), Marco Meneguzzo (Tor Vergata University of Rome), Külli Sarapuu (Tallinn University of Technology), Leno Saarniit (Tallinn University of Technology), Gyorgy Hajnal (Corvinus University of Budapest; Centre for Social Research of the Hungarian Academy of Sciences).

The Future

Two new color-illustrated volumes in this series for older children examine evidence surrounding many of the world's most mysterious events. The books guide their readers through mysteries by presenting events in a format that is both accessible and sensible. Events described might seem to be out of the supernatural, but many have entirely natural explanations -- while a few others have turned out to be elaborate hoaxes. Yet many more remain surrounded by mysteries that even the world's scientists haven't yet solved. Young readers get the opportunity to put facts in perspective with sidebar features, What Science Says information boxes, and What Do You Think? question boxes. Readers are encouraged to review the information objectively and draw their own conclusions. How will people travel in the future, and how fast will their vehicles go? Will medical advances eliminate today's killer diseases? What will future computers look like, and what new tasks will they perform for us? These are a few of the questions explored in this fascinating volume.

Between Past and Future

The tenth anniversary of the collapse of communism in Central and Eastern Europe is the basis for this text which reflects upon the past ten years and what lies ahead for the future. An international group of academics and public intellectuals, including former dissidents and active politicians, engage

in an exchange on the antecedents, causes, contexts, meanings and legacies of the 1989 revolutions. The contributors address various issues including liberal democracy and its enemies; modernity and discontent; economic reforms and their social impact; ethnicity; nationalism and religion; geopolitics; electoral systems and political power; European integration; and the demise of Yugoslavia.

Ethics in Light of Childhood

Childhood faces humanity with its own deepest and most perplexing questions. An ethics that truly includes the world's childhoods would transcend pre-modern traditional communities and modern rational autonomy with a postmodern aim of growing responsibility. It would understand human relations in a poetic rather than universalistic sense as openly and interdependently creative. As a consequence, it would produce new understandings of moral being, time, and otherness, as well as of religion, rights, narrative, families, obligation, and power. *Ethics in Light of Childhood* fundamentally reimagines ethical thought and practice in light of the experiences of the third of humanity who are children. Much like humanism, feminism, womanism, and environmentalism, Wall argues, a new childism is required that transforms moral thinking, relations, and societies in fundamental ways. Wall explores childhood's varied impacts on ethical thinking throughout history, advances the emerging interdisciplinary field of childhood studies, and reexamines basic assumptions in contemporary moral theory and practice. In the process, he does not just apply ethics to childhood but applies childhood to ethics—in order to imagine a more expansive humanity.

Human Interaction, Emerging Technologies and Future Applications IV

This book reports on research and developments in human-technology interaction. A special emphasis is given to human-computer interaction, and its implementation for a wide range of purposes such as healthcare, manufacturing, transportation, and education, among others. The human aspects are analyzed in detail. Innovative studies related to human-centered design, wearable technologies, augmented, virtual and mixed reality simulation, as well as developments and applications of machine learning and AI for different purposes, represent the core of the book. Emerging issues in business, security, and infrastructure are also critically examined, thus offering a timely, scientifically-grounded, but also professionally-oriented snapshot of the current state of the field. The book is based on contributions presented at the 4th International Conference on Human Interaction and Emerging Technologies: Future Applications, IHET-AI 2021, held on April 28-30, 2021, in Strasbourg, France. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design and/or management of the new generation of service systems.

Contact with Reality

Is knowledge discovered, or just invented? Can we ever get outside ourselves to know how reality is in itself, independent of us? Philosophical realism raises the question whether in our knowing we connect with an independent reality—or only connect with our own mental constructs. Far from being a silly parlor game, the question impacts our lives concretely and deeply. Modern Western culture has been infected with antirealism and the doubt, skepticism, subjectivism, relativism, and atheism that attends it—not to mention distrust and arbitrary (mis)use of reality. Premier scientist-turned-philosopher Michael Polanyi stepped aside from research to offer an innovative account of knowing that takes its cue from how discovery actually happens. Polanyi defied the antirealism of the twentieth century, sounding a ringing note of hope in his repeated claim that in discovery, we know we have made contact with reality because "we have a sense of the possibility of indeterminate future manifestations." And that sense marks contact with reality, because it is the way reality is: abundant, generous, and fraught with as-yet-unnameable possibilities. This book examines that distinctive claim, contrasting it to the wider philosophical discussions regarding realism and antirealism in the recent decades. It shows why Polanyi's outlook is superior, and why that matters, not just to scientific discoverers, but to us all.

The Oxford Handbook of Open Innovation

This Handbook seeks to be the definitive reference for the large and growing field of Open Innovation. A comprehensive collection of short and authoritative chapters, the volume summarizes the most vital research published in Open Innovation. It is an essential reference for seasoned scholars, a welcome introduction for junior scholars, and a kick-start package for undergraduate and MBA students. Four editors, 75 reviewers, and 136 contributors collaboratively developed 57 chapter handbook chapters. These present the current state of the art featuring academic theory and managerial practice as well

as the outlook for how open innovation should be further developed. The empirical, conceptual, and practical insights of the handbook highlight the importance of strengthening practice-inspired research and purposeful knowledge exchanges between individuals, organizations, and ecosystems.

The Future of the Study of Religion

This volume brings together divergent voices in religious and theological studies for a conversation about the proper objects, methods, and goals for the study of religion in the twenty-first century.

Design Ethnography

This book advances the practice and theory of design ethnography. It presents a methodologically adventurous and conceptually robust approach to interventional and ethical research design, practice and engagement. The authors, specialising in design ethnography across the fields of anthropology, sociology, human geography, pedagogy and design research, draw on their extensive international experience of collaborating with engineers, designers, creative practitioners and specialists from other fields. They call for, and demonstrate the benefits of, ethnographic and conceptual attention to design as part of our personal and public everyday lives, society, institutions and activism. Design Ethnography is essential reading for researchers, scholars and students seeking to reshape the way we research, live and design ethically and responsibly into yet unknown futures.

Anthropologies and Futures

Anthropology has a critical, practical role to play in contemporary debates about futures. This game-changing new book presents new ways of conceptualising how to engage with a future-oriented research agenda, demonstrating how anthropologists can approach futures both theoretically and practically, and introducing a set of innovative research methods to tackle this field of research. Anthropology and Futures brings together a group of leading scholars from across the world, including Sarah Pink, Rayna Rapp, Faye Ginsburg and Paul Stoller. Firmly grounded in ethnographic fieldwork experience, the book's fifteen chapters traverse ethnographies with people living with HIV/AIDS in Uganda, disability activists in the U.S., young Muslim women in Copenhagen, refugees in Milan, future-makers in Barcelona, planning and land futures in the UK, the design of workspaces in Melbourne, rewilding in the French Pyrenees, and speculative ethnographies among emerging communities in Antarctica. Taking a strong interdisciplinary approach, the authors respond to growing interest in the topic of futures in anthropology and beyond. This ground-breaking text is a call for more engaged, interventional and applied anthropologies. It is essential reading for students and researchers in anthropology, sociology, cultural studies, design and research methods.

A Hermeneutics of Poetic Education

A Hermeneutics of Poetic Education: The Play of the In-Between explores the ways in which both play and poetry orient us toward what surpasses us. Catherine Homan develops an original account of poetic education that builds on Friedrich Hölderlin's idea of poetry as a teacher of humanity. Whereas aesthetic education emphasizes judgments of taste and rational autonomy, poetic education foregrounds self-formation and openness to the other. Critically engaging the works of Eugen Fink, Hans-Georg Gadamer, and Paul Celan, this book argues that poetry and play call for a particular stance in the world and with others. Open toward the infinite while simultaneously reaching toward its own finitude, the poetic work addresses us and invites our response. Poetry reveals the human condition as "in-between" and dialogical, even at the limits of language. Although many philosophers mistakenly view play as frivolous, Homan takes play seriously. Play--spontaneous and creative--resists mastery and instead requires an active attunement to the to-and-fro movement of the world, of others, and ourselves. *A Hermeneutics of Poetic Education* demonstrates that poetic education, as learning to listen, provides vital resources for responding to alterity in meaningful ways that resist totalization.

International Handbook of Inter-religious Education

This Handbook is based on the conviction of its editors and contributing authors that understanding and acceptance of, as well as collaboration between religions has essential educational value. The development of this Handbook rests on the further assumption that interreligious education has an important role in elucidating the global demand for human rights, justice, and peace. Interreligious education reveals that the creeds and holy books of the world's religions teach about spiritual systems

that reject violence and the individualistic pursuit of economic and political gain, and call their followers to compassion for every human being. It also seeks to lead students to an awareness that the followers of religions across the world need to be, and to grow in, dialogical relationships of respect and understanding. An essential aim of interreligious education is the promotion of understanding and engagement between people of different religions and, therefore, it has great potential to contribute to the common good of the global community. Interreligious education has grown from the interfaith movement, whose beginning is usually identified with the World Parliament of Religions held in Chicago in 1893. This was the first time in history that leaders of the eastern and western religions had come together for dialogue, and to consider working together for global unity.

Generosity and the Christian Future

Based on the 1995 Henson Lectures, delivered in the University of Oxford, this study takes as its theme the Christian future, and the development of a theology of generosity in response to the challenges likely to face Christian faith in the twenty-first century. In particular, Professor Newlands wishes to explore the suggestion that Christ represents the ultimate generosity of God for humankind. This leads him to concentrate on the contribution made by Christian doctrine to public issues, and especially the relationship between Christology and human rights. The author is centrally concerned that faith should remain in the public square, and that the circle of faith should always be outward facing. The result is a liberal, pluralistic theology, which regards the generous love of God, in incarnation and reconciliation, as a powerful stimulus to imaginative Christian thought and action. In its robust portrayal of what Christianity ought properly to look like, this book--which emerges from the pen of the leading Scottish liberal theologian of his generation--will be sure to stimulate and engage a wide variety of readers.

Africa's Future: Darkness to Destiny

Many seek to "fix" Africa - economists, experts, politicians, gurus, cognoscenti and glitterati. But the continent conceals multiple secrets, including the Holy Grail: explanations of its saga over the previous centuries. Africa's Future tells the tale of Africa's economic evolution, revealing unique prisms for understanding the continent's panoramic story, one of triumph over the lasting influences of nature and multiple political tragedies. Modern Africa developed diverse economic pathways to betterment - yet survivalist economies litter the landscape. Its paradox of "subsistence with many faces" coexists amidst the tiny middle class, growing rich, and many more poor expected in the future. Clarke provides fresh and challenging insights into Africa's economies and future, offering seasoned views on a continent of unlocked potential which has witnessed many false dawns. Not "poor" but poorly managed, Africa holds greater promise, its destiny revealed by its history.

Air University Review

This work focuses on a reality central to each human life and basic to every branch of theology; namely, the immanent transcendence of God. This study begins by exploring that theme of mystery hidden yet revealed from the perspective of the interrelationship of transcendence, self-actualization and creative expression. The book goes on to describe the interplay of those three elements in the lives and the works of, Thomas Merton, monk and writer, and Georgia O'Keeffe, artist. People from a wide variety of backgrounds and traditions will find this study a stimulating source of insight for their spiritual quest.

Mystery Hidden Yet Revealed

The Garden of Reality addresses urgent questions around the relativity of religious truth, religious pluralism, transreligious discourse, postmodern cosmology, and interspiritual mysticism in order to argue that relativity and multiplicity are inevitable for the multireligious conviviality and peace of the humanity of the future.

The Garden of Reality

Essays about ruination, resilience, reading, and religion generated by a reflection on a fourth-century hagiography. In Jerome's Life of Saint Hilarion, a fourth-century saint briefly encounters the ruins of an earthquake-toppled city and a haunted garden in Cyprus. From these two fragmentary passages, Virginia Burrus delivers a series of sweeping meditations on our experience of place and the more-than-human worlds—the earth and its gods—that surround us. Moving between the personal

and geological, *Earthquakes and Gardens* ruminates on destruction and resilience, ruination and resurgence, grief and consolation in times of disaster and loss. Ultimately, Burrus's close readings reimagine religion as a practice that unsettles certainty and develops mutual flourishing.

Earthquakes and Gardens

Genetic research and testing is not limited to individuals and their families. Increasingly, there is focus on communities and even whole populations. This raises legal and socio-ethical and issues that have not been addressed. In this age of international biobanking involving populations, are current legal and ethical approaches sufficient? This book of selected papers covers population research and banking as well as accompanying confidentiality, and governance concerns. Possible commercialization, patents, benefit sharing, discrimination, and the role of patient organizations and of developing countries are also discussed. New perspectives and models are provided. The book concludes with a Statement of Principles on the Ethical Conduct of Human Genetic Research Involving Populations. Policymakers, academics, legislators and researchers will find this book to be current and controversial. The human genome may be mapped but the legal and socio-ethical debate is far from over.

Populations and Genetics

The Internet is a remarkable catalyst for creativity, collaboration and innovation providing us with amazing possibilities that just two decades ago would have been impossible to imagine. This work includes a peer-reviewed collection of scientific papers addressing some of the challenges that shape the Internet of the future.

Towards the Future Internet

Heaven's Jewel: Aaron, Patrick, and Christine Wallace are trying to find a way home after surviving the plane crash that killed their parents and marooned them on a mysterious island. Thanks to the manipulative antics of the Time Entity, their quest will take many months and span many lands. Their journey is full of the unexpected. However, events such as encountering trolls and dragons in a magical garden, seeking the mythical Spidersong to free Jewel Trees from a curse, visiting a futuristic city, sailing beneath the Glacier of Dreams, and witnessing the birth of the Time Entity are nothing compared to the surprise of discovering that their actions hold the key to the survival of all of mankind. *The Eternity Stone*: As the time nears for the people of the planet to take refuge in the protected place known as Heaven's Jewel, the exact location of the mysterious island is as yet unknown. In order to buy time, the four grandchildren of the original travelers search for the Eternity Stone, the only object capable of stopping time worldwide. However, before the search for the stone can even begin, the four are called upon to tackle a set of challenges on Elmara Lodes in which they must survive encounters with phantasms, gooleegungs, and other foul creatures. Amidst the many twists and turns of their journey, the new travelers form unusual alliances and make difficult decisions that actually end up changing the events of the past for their ancestors. Once the stone is found, they must piece together an unusual puzzle in order to finally locate the safe haven for mankind. *Futures Sown*: What if Spidersong and the Jewel Trees never existed? Events might have taken a very different turn, and the place of refuge for mankind might never exist. In this final segment of the Time Entity Trilogy, the travelers must once again face a series of difficult and bizarre challenges in order to finally secure the safe haven. With the Time Entity still engaged in his quest to outmaneuver Death, the double twins once again traverse the Circles of Time to lay the foundation for the future. Joined by new friends, and familiar faces, their path takes them to a valley of clouds, through a deserted underwater city, and into a realm riddled by fire tornadoes and earth tremors. They must also pass an unusual test in a candy factory in order to complete their quest to locate the seeds to plant the Jewel Trees. Similar to their bargain to obtain the Eternity Stone, the travelers once again feel conflicted when called upon to help create Mirrorseed, the evil fortress of elf enchantments and experiments. However, under the guidance of the Fate Entity, they are eventually able to understand that even some very unpleasant things are meant to be.

The Time Entity Trilogy

There are many books about theological exegesis; there are far fewer books of theological exegesis. This volume on the Pentateuch begins a six-volume work of theological exegesis that will span select passages from the whole of the Christian Bible. The aim is to read Scripture according to its theological shape as a witness to the living claim of God upon church and world, made known in Jesus Christ. The theological frame of the Pentateuch is grounded in the freely given promise of God, which gathers

not only the people of God but humanity—and the whole creation—into the one purpose of God's redemptive love. Indeed, we live by that selfsame promise today and must struggle to understand and act in our world in light of it. The book and the series are intended for teachers, pastors, students, and readers attentive to the theological and spiritual dimensions of the biblical witness in all its brilliance and mystery.

Theological Exegesis of Scripture, Volume I

As both a scholar of Buddhism and a Christian priest, John P. Keenan engages with the New Testament letter to the Ephesians, written by a member of the Pauline school likely near the end of the first century—a time when both the cultural world and the cosmos were much narrower than for us today. In pondering this scripture's significance for residents of the twenty-first century, Keenan looks to the work of scholars and thinkers both ancient and modern, Eastern and Western, scientists and philosophers. Particular attention is given to Chinese Buddhist master Zhiyi's explanation of a threefold truth, which resonates with an early trinitarian theme in Ephesians and suggests the riches to be discovered upon the global theological commons.

The Religion of the Future

The Sacrament of the Future is a contemporary examination of the theory and praxis of sacraments undertaken in the belief that a renewed understanding of them will shape the survival of the faith in the changed circumstances of the twenty-first century. This new perspective is the eschatological character of the sacraments: by retaining the tension between time and eternity in our present life, sacraments anticipate the future fulfilment of salvation in heaven. The association of the two classical treatises of Sacramental Theology and the doctrine of Last Things will alter our approach not only to the sacraments, but also to other important tenets of Christian theology. This book is the result of half a lifetime's work in presenting and critically analysing Karl Rahner's theological thought. Professor George Vass has not confined himself to the detailed exposition of the thought of his predecessor but, through a critical analysis of his views, tries to enter into dialogue with him. Professor Vass, Fellow of Heythrop College, University of London, and for twenty years holder of Karl Rahner's chair at the University of Innsbruck, entered the Society of Jesus in 1946, and obtained his qualifications in Philosophy and Theology at various European universities. He taught at Heythrop College, Oxon, and the University of London, before his call to the University of Innsbruck in 1976. In 1996 he became Professor Emeritus of the chair of Dogmatic and Ecumenical Theology. Since then he has been Parish Priest within the diocese of Tyrol, Austria.

The Future Life

As the world faces many serious challenges informed, courageous and mindful leadership is needed for a better future. The Tourism Education Futures Initiative (TEFI) is the collective effort of a group of innovative, thoughtful and committed scholars and industry leaders seeking to provide vision, knowledge, and a framework for tourism education programs that promote global citizenship and optimism for a better world. This book consolidates some of TEFI's work as it seeks to be the leading, forward-looking network that inspires, informs and supports tourism educators and students to passionately and courageously transform the world for the better. It makes the case for why change is needed, and how tourism educators can respond to that change with strategies and values-based tools. The book contains papers published in special TEFI issues of the Journal of Teaching in Travel & Tourism (JTTT), which question and explore some of the most important theoretical, conceptual and practical issues facing tourism education now and into the future. The book concludes by integrating the special issues' key contributions with a brief conceptualisation of education futures before it outlines TEFI's framework for action over the coming years. Tourism educators worldwide will find that this volume serves two important purposes. On the one hand, it challenges educators to think both critically and proactively about tourism education, while on the other sharing examples of teaching and learning tools that seek to prepare our students for the future and to be global citizens that live lives of consequence. This book is a collection of articles from the Journal of Teaching in Travel and Tourism.

Earthing the Cosmic Christ of Ephesians--The Universe, Trinity, and Zhiyi's Threefold Truth, Volume 3

This book presents a collection of chapters—both empirical and conceptual—that challenge existing paradigms of learning and teaching, provides examples of pedagogical spaces and practices that

nurture future-oriented learners, explicates identities and transitions in learning, and offers alternative frames for moving forward. Educational structures have proven remarkably resilient. More often than not, pedagogical designs still privilege the lecture-tutorial format, front-end loading and the positioning of the 'teacher' as expert. In a similar vein, pedagogical spaces tend to privilege the formal educational institution and its discourses, rather than productively engage with naturally-occurring learning spaces at work and in communities. To better prepare and support learners for dynamically changing futures, we need to truly flip the lens from teaching to learning, positioning at the core, the learner in contexts where learning and becoming occurs. This means considering what counts as a future-oriented learner and educator, recognising the importance of evolving identities, transitions and pathways that facilitates the processes of being and becoming. Equally important is the design and appropriation of pedagogical spaces and practices that are in themselves dynamic and future-oriented. This book questions the current delineation between the spaces of work, learning and communities.

The Sacrament of the Future
