Iron Will lays bare the role of extractivist policies and efforts to resist these policies through a deep ethnographic exploration of globally important iron ore mining in Brazil and India. Markus Kröger addresses resistance strategies to extractivism and tracks their success, or lack thereof, through a comparison of peaceful and armed resource conflicts, explaining how different means of resistance arise. Using the distinctly different contexts and political systems of Brazil and India highlights the importance of local context for resistance. For example, if there is an armed conflict at a planned mining site, how does this influence the possibility to use peaceful resistance strategies? To answer such questions, Kröger assesses the inter-relations of contentious, electoral, institutional, judicial, and private politics that surround conflicts and interactions, offering a new theoretical framework of "investment

politics” that can be applied generally by scholars and students of social movements, environmental studies, and political economy, and even more broadly in Social Scientific and Environmental Policy research. By drawing on a detailed field research and other sources, this book explains precisely which resistance strategies are able to influence both political and economic outcomes. Kröger expands the focus of traditionally Latin American extractivism research to other contexts such as India and the growing extractivist movement in the Global North. In addition, as the book is a multi-sited political ethnography, it will appeal to sociologists, political scientists, anthropologists, geographers, and others using field research among other methods to understand globalization and global political interactions. It is the most comprehensive book on the political economy and ecology of iron ore and steel. This is astonishing, given the fact that iron ore is the second-most important commodity in the world after oil.

Men of Iron

In this deeply learned book, poet and translator Robert Bly offers nothing less than a new vision of what it is to be a man. Bly's vision is based on his ongoing work with men and reflections on his own life. He addresses the devastating effects of remote fathers and mourns the disappearance of male initiation rites in our culture. Finding rich meaning in ancient stories and legends, Bly uses the Grimm fairy tale "Iron John," in which the narrator, or "Wild Man," guides a young man through eight stages of male growth, to remind us of archetypes long forgotten-images of vigorous masculinity, both protective and emotionally centered. Simultaneously poetic and down-to-earth, combining the grandeur of myth with the practical and often painful lessons of our own histories, Iron John is a rare work that will continue to guide and inspire men-and women-for years to come.

Men of Iron

From the voyage of the Argonauts to the Tailhook scandal, seafaring has long been one of the most glaringly male-dominated occupations. In this groundbreaking interdisciplinary study, Margaret

Creighton, Lisa Norling, and their co-authors explore the relationship of gender and seafaring in the Anglo-American age of sail. Drawing on a wide range of American and British sources—from diaries, logbooks, and account ledgers to songs, poetry, fiction, and a range of public sources—the authors show how popular fascination with seafaring and the sailors' rigorous, male-only life led to models of gender behavior based on "iron men" aboard ship and "stoic women" ashore. Yet *Iron Men, Wooden Women* also offers new material that defies conventional views. The authors investigate such topics as women in the American whaling industry and the role of the captain's wife aboard ship. They explore the careers of the female pirates Anne Bonny and Mary Read, as well as those of other women—"transvestite heroines"—who dressed as men to serve on the crews of sailing ships. And they explore the importance of gender and its connection to race for African American and other seamen in both the American and the British merchant marine. Contributors include both social historians and literary critics: Marcus Rediker, Dianne Dugaw, Ruth Wallis Herndon, Haskell Springer, W. Jeffrey Bolster, Laura Tabili, Lillian Nayder, and Melody Graulich, in addition to Margaret Creighton and Lisa Norling.

The Men Of Iron

Describes the collapse of the traditional cavalry unit and the beginning of the armored truck as "iron-ponies". Also, goes into detail about the possible complications that the cavalry must face for future wars.

Iron Men, Wooden Women

Myles Falworth was but eight years of age at that time, and it was only afterwards, and when he grew old enough to know more of the ins and outs of the matter, that he could remember by bits and pieces the things that afterwards happened; how one evening a knight came clattering into the court-yard upon a horse, red-nostrilled and smeared with the sweat and foam of a desperate ride—Sir John Dale, a dear friend of the blind Lord.

Men on Iron Ponies

When a massive force of Space Marine Iron Warriors invades the planet Hydra Cordatus and lays siege to the Imperial citadel, how long can the defenders possibly hold out, and what do their enemies truly seek? Reissue.

Men of Iron

The Iron Man

Families with boys often find the world reacts to them in mock horror. Even though parents love their sons, privately they admit that boys can be a handful to raise--they are boisterous, competitive, reckless, distractable. The challenge of wills between parent and son starts early, and the quest to civilize young bulls may seem hopeless some days. Yet believers know that God has given them children as a gift of heaven, specially chosen for their particular families and marked as a blessing. If that's so, why does it seem so hard? How can we prepare these boys to serve God when it's all we can do to make it through another day? Isn't there a better way? Raising Real Men: Surviving, Teaching and Appreciating Boys shows the answer is emphatically yes. Written by the parents of six boys, Raising Real Men provides hope and encouragement to families with sons. Starting from the premise that God made boys to become men, Hal and Melanie Young offer Biblical principles and tested, practical ideas for training the manly virtues that can drive parents and teachers up the wall. This is a practical guide to equipping the hearts and minds of boys without breaking or losing your own. "...earthly, realistic, humorous, and scriptural ..." -- Douglas Wilson, author, Future Men "This is just what the doctor ordered for parents who want to raise capable Christian men of character." -- John Rosemond, author, Parenting By The Book

Nobel Laureate and two-time Booker prize-winning author of Disgrace and The Life and Times of Michael K, J. M. Coetzee tells the remarkable story of a nation gripped in brutal apartheid in his Sunday Express Book of the Year award-winner Age of Iron. In Cape Town, South Africa, an elderly classics professor writes a letter to her distant daughter, recounting the strange and disturbing events of her dying days. She has been opposed to the lies and the brutality of apartheid all her life, but now she finds herself coming face to face with its true horrors: the hounding by the police of her servant's son, the burning of a nearby black township, the murder by security forces of a teenage activist who seeks refuge in her house. Through it all, her only companion, the only person to whom she can confess her mounting anger and despair, is a homeless man who one day appears on her doorstep. In Age of Iron, J. M. Coetzee brings his searing insight and masterful control of language to bear on one of the darkest episodes of our times. 'Quite simply a magnificent and unforgettable work' Daily Telegraph 'A superbly realized novel whose truth cuts to the bone' The New York Times 'A remarkable work by a brilliant writer' Wall Street Journal South African author J. This volume is the newest release in the authoritative series issued by the National Academy of Sciences on dietary reference intakes (DRIs). This series provides recommended intakes, such as Recommended Dietary Allowances (RDAs), for use in planning nutritionally adequate diets for individuals based on age and gender. In addition, a new reference intake, the Tolerable Upper Intake Level (UL), has also been established to assist an individual in knowing how much is "too much" of a nutrient. Based on the Institute of Medicine's review of the scientific literature regarding dietary micronutrients, recommendations have been formulated regarding vitamins A and K, iron, iodine, chromium, copper, manganese, molybdenum, zinc, and other potentially beneficial trace elements such as boron to determine the roles, if any, they play in health. The book also: Reviews selected components of food that may influence the bioavailability of these compounds. Develops estimates of dietary intake of these compounds that are compatible with good nutrition throughout the life span and that may decrease risk of chronic disease where data indicate they play a role. Determines Tolerable Upper Intake levels for each nutrient reviewed where adequate scientific data are available in specific population subgroups. Identifies research needed to improve knowledge of the role of these micronutrients in human health. This book will be important to professionals in nutrition research and education.

Wrath of Iron

The classic account of an unforgettable endurance test, now updated with a new introduction The 1989 Ironman World Championship was the greatest race ever in endurance sports. In a spectacular duel that became known as the Iron War, the world's two strongest athletes raced side by side at world-record pace for a grueling 139 miles. Driven by one of the fiercest rivalries in triathlon, Dave Scott and Mark Allen raced shoulder to shoulder through Ironman's 2.4-mile swim, 112-mile bike race, and 26.2-mile marathon. After 8 punishing hours, both men would demolish the previous record--and cross the finish line a mere 58 seconds apart. In Iron War, sports journalist Matt Fitzgerald writes a riveting epic about how Allen and Scott drove themselves and each other through the most awe-inspiring race in sports history. Iron War goes beyond the pulse-pounding race story to offer a fascinating exploration of the lives of the world's two toughest men and their unquenchable desire to succeed. Weaving an examination of mental resolve into a gripping tale of athletic adventure, Iron War is a soaring narrative of two champions and the paths that led to their stunning final showdown.

Ships of Wood and Men of Iron

In the barren lands of Canada far north of the Arctic circle, summers are quick and cool, mere short interruptions in the true business of the polar regions, winter. Winters there can be dangerous with temperatures that plunge to awesome depths during the long, lonely hours of Arctic darkness. Powerful blizzards shriek across the land for days at a time, causing all animal life to seek shelter from the cutting blast, essentially putting a temporary end to normal activities of life, such as travelling and eating. It is an unforgiving land that does not easily suffer fools. Over 100 years ago, in June 1898, Captain Otto Sverdrup and 15 crewmen put out to sea aboard the schooner Fram from the Norwegian city today known as Oslo. When they returned to Norway four years later, they came back with a record of geographic and scientific discovery, the richness of which is unparalleled in the annals of Arctic exploration. The first section of this book is the story of those four heroic years spent in the High Arctic and their impact on Canada's subsequent efforts to ensure Canadian sovereignty in the area of the Norwegian discoveries. The second section of the book deals with the Canadian Arctic expeditions between 1903 and 1948, led by intrepid men such as A.P. Low, Joseph E. Bernier, Vilhjalmur Stefansson and Henry Larsen. "For anyone interested in the recent history of the Canadian North and why we even call it the Canadian North Ships of Wood and Men of Iron is a must read. Kenney persuasively nominates a shortlist of new national heroes for a country badly in need of them." - Randy Boswell, CanWest News Service "In my view, this book will be an important document about Canada-Norway relations in the North, especially considering the increased international emphasis now on circumpolar relations in the North." - Shirley Wolff Serafini, Canadian Ambassador to Norway "This book is a well deserved recognition of one of Norway's most famous polar explorers and his invaluable contributions to the exploration and development of science in the Canadian Arctic. Gerard Kenney's book also sheds an interesting new light on the history of the final settlement of Norway's territorial claim of the Sverdrup Islands." - Ingvard Havnen, former Norwegian Ambassador to Canada
