

## teaching resources for end of life and palliative care courses

[#palliative care teaching resources](#) [#end of life education materials](#) [#hospice care curriculum](#) [#death and dying courses](#) [#advanced care planning resources](#)

Discover comprehensive teaching resources meticulously designed for palliative care and end-of-life courses. Our materials empower educators to deliver essential education on compassionate end-of-life care, hospice principles, and advanced care planning, ensuring students gain vital knowledge and practical skills for this critical field.

You can freely download papers to support your thesis, dissertation, or project.

Thank you for visiting our website.

We are pleased to inform you that the document Palliative Care Teaching Resources you are looking for is available here.

Please feel free to download it for free and enjoy easy access.

This document is authentic and verified from the original source.

We always strive to provide reliable references for our valued visitors.

That way, you can use it without any concern about its authenticity.

We hope this document is useful for your needs.

Keep visiting our website for more helpful resources.

Thank you for your trust in our service.

This document is one of the most sought-after resources in digital libraries across the internet.

You are fortunate to have found it here.

We provide you with the full version of Palliative Care Teaching Resources completely free of charge.

### Teaching Resources for End-of-life and Palliative Care Courses

Provides professors with the resources they need to teach end-of-life care. The compendium gives a comprehensive view of end-of-life care as taught in MSW, BSW, continuing education, and post master's programmes. It is a valuable resource for new and seasoned faculty alike, providing concrete guidance that will enrich the classroom experience.

### Improving Palliative Care for Cancer

In our society's aggressive pursuit of cures for cancer, we have neglected symptom control and comfort care. Less than one percent of the National Cancer Institute's budget is spent on any aspect of palliative care research or education, despite the half million people who die of cancer each year and the larger number living with cancer and its symptoms. Improving Palliative Care for Cancer examines the barriers—scientific, policy, and social—that keep those in need from getting good palliative care. It goes on to recommend public- and private-sector actions that would lead to the development of more effective palliative interventions; better information about currently used interventions; and greater knowledge about, and access to, palliative care for all those with cancer who would benefit from it.

### Compassionate Communities

Compassionate communities are communities that provide assistance for those in need of end of life care, separate from any official health service provision that may already be available within the community. This idea was developed in 2005 in Allan Kellehear's seminal volume- Compassionate

Cities: Public Health and End of Life Care. In the ensuing ten years the theoretical aspects of the idea have been continually explored, primarily rehearsing academic concerns rather than practical ones. *Compassionate Communities: Case Studies from Britain and Europe* provides the first major volume describing and examining compassionate community experiments in end of life care from a highly practical perspective. Focusing on community development initiatives and practice challenges, the book offers practitioners and policy makers from the health and social care sectors practical discussions on the strengths and limitations of such initiatives. Furthermore, not limited to providing practice choices the book also offers an important and timely impetus for other practitioners and policy makers to begin thinking about developing their own possible compassionate communities. An essential read for academic, practitioner, and policy audiences in the fields of public health, community development, health social sciences, aged care, bereavement care, and hospice & palliative care, *Compassionate Communities* is one of only a handful of available books on end of life care that takes a strong health promotion and community development approach.

## NURSING CARE AT THE END OF LIFE

The teacher and gerontological social work scholar Mercedes Bern-Klug joins experts on nursing, law, medicine, sociology, and social work to provide a thorough understanding of nursing home palliative care. Their broad definition of palliative care treats comfort care as appropriate across the illness experience, not just at the end of life. Because a majority of nursing home residents are older adults facing multiple, advanced chronic conditions, this book is grounded in the provision of palliative care-especially palliative psychosocial care. Yet its practice recommendations can also be applied to other long-term care settings, such as assisted living. The contributors combine scholarship with practical wisdom in each chapter, mixing reviews of scholarly literature with insights gleaned from clinical practice. Chapter topics comply with the eight domains of palliative care developed by the National Consensus Project for Quality Palliative Care. Some focus on care of the resident, while others concern the resident's family. A special section addresses self-care for nursing home staff members, and another discusses nursing home rituals to mark the death of a resident. Bern-Klug concludes with an overview of the factors that will shape the future of palliative care for advanced chronic illness.

## Transforming Palliative Care in Nursing Homes

This is a definitive text on nursing care of the seriously ill and dying. It is a comprehensive work addressing all aspects of palliative care including physical, psychological, social and spiritual needs. The text is written by leaders in the field and includes an impressive section on international palliative care. Each chapter includes case examples and a strong evidence base to support the highest quality of care.

## Oxford Textbook of Palliative Nursing

Service providers are increasingly called upon to serve clients at home, a setting even a seasoned professional can find difficult to negotiate. From monitoring the health of older populations to managing paroled offenders, preventing child abuse, and reunifying families, home-based services require models that ensure positive outcomes and address the ethical dilemmas that might arise in such sensitive contexts. The contributors to this volume are national experts in diverse fields of social work practice, policy, and research. Treating the home as an ecological setting that guides human development and family interaction, they present rationales for and overviews of evidence-based models across an array of populations and fields of practice. Part 1 provides historical background and contemporary applications for home-based services, highlighting ethical, administrative, and supervision issues and summarizing the social policies that shape service delivery. Part 2 addresses home-based practice in such fields as child and adult mental health, school social work, and hospice care, detailing the particular population being treated, the policy and agency context, theories and empirical data, and practice guidelines. Part 3, the editors present a unifying framework and suggest future directions for home-based social work.

## Delivering Home-based Services

Written by an established, comprehensive, multidisciplinary focused, internationally-recognized team, the sixth edition has been fully revised and brought up to date with the inclusion of recent developments in the speciality, to ensure that it retains its reputation as the definitive reference on palliative care.

Written by and for Nurse Practitioners from a unique collaborative perspective, *Primary Care: A Collaborative Practice*, 4th Edition, prepares you to provide care for all of the major disorders of adults seen in the outpatient setting. Evidence-based content reflects the latest guidelines for primary care of hundreds of conditions, including hypertension, diabetes, and sexually transmitted infections. Now in full color, the 4th Edition includes chapters on emerging topics such as genetics, obesity, lifestyle management, and emergency preparedness. Combining a special blend of academic and clinical expertise, the author team provides a practical text/reference that promotes a truly collaborative primary care practice. Comprehensive, evidence-based content incorporates the latest standardized guidelines for primary care in today's fast-paced, collaborative environment. Unique! A collaborative perspective, reflecting the key roles of NPs, MDs, PAs, PharmDs, and others, promotes seamless continuity of care. A consistent format from chapter to chapters facilitates learning and clinical reference value. Diagnostics and Differential Diagnosis boxes provide a quick reference for diagnosing disorders and helping to develop effective management plans. Physician Consultation icons highlight situations or conditions in which consultation is either recommended or necessary. Emergency Referral icons identify signs and symptoms that indicate the need for immediate referral to an emergency facility. Co-management with Specialists discussions help you provide truly collaborative care in the outpatient setting. Complementary and alternative therapies are addressed where supported by solid research evidence.

### Advance Care Planning

The development of this inaugural *Handbook of Oncology Social Work: Psychosocial Care for People With Cancer* provides a repository of the scope of oncology social workers' clinical practice, education, research, policy and program leadership in the psychosocial care of people with cancer and their families. It focuses on the unique synergy of social work perspectives, values, knowledge, and skills with the psychosocial needs of cancer patients, their families, and the health care systems in which they are treated. It addresses both the science and art of psychosocial care and identifies the increasing specialization of oncology social work related to its unique knowledge base, skills, role, and the progressive complexity of psychosocial challenges for patients with cancer. This Handbook equips the reader with all that we know today in oncology social work about patient and family centered care, distress screening, genetics, survivorship, care coordination, sociocultural and economic diversity, legal and ethical matters, clinical work with adults living with cancer, cancer across the lifespan, their caregivers and families, pediatrics, loss and grief, professional career development, leadership, and innovation. Our hope is that in reading this Handbook you will identify new areas where each of you can leave your mark as innovators and change agents in our evolving field of practice.

### Handbook of Oncology Social Work

Palliative Care is the first book to provide a comprehensive understanding of the new field that is transforming the way Americans deal with serious illness. Diane E. Meier, M.D., one of the field's leaders and a recipient of a MacArthur Foundation "genius award" in 2009, opens the volume with a sweeping overview of the field. In her essay, Dr. Meier examines the roots of palliative care, explores the key legal and ethical issues, discusses the development of palliative care, and presents ideas on policies that can improve access to palliative care. Dr. Meier's essay is followed by reprints of twenty-five of the most important articles in the field. They range from classic pieces by some of the field's pioneers, such as Eric Cassel, Balfour Mount, and Elizabeth Kübler-Ross, to influential newer articles on topics such as caregiving and cost savings of palliative care. The reprints cover a wide range of topics including: Why the care of the seriously ill is so important Efforts to cope with advanced illness Legal and ethical issues Pain management Cross-cultural issues Philosophical perspective The demand for palliative care has been nothing short of stunning—largely because of palliative care's positive impact on both the quality and the cost of care provided to seriously ill individuals. By providing a wide-ranging perspective on this growing field, this book will serve as a guide for developing meaningful approaches that will lead to better health care for all Americans.

### Palliative Care

Enhanced Palliative Care A Handbook for Paramedics, Nurses and Doctors. Specifically designed to enhance your knowledge and skills within generalist palliative care, this informative textbook provides a comprehensive overview of the principle areas you may encounter whilst working with adult palliative and end-of-life patients, and their families. The development of the text has been backed by Macmillan Cancer Support and each chapter has been written by a range of specialist and generalist authors. The topics covered include approaches to palliative care and symptom management in a wide range of conditions and populations, with chapters linked to case studies to encourage interactive learning and understanding. Communication skills are also highlighted to help aid confidence when engaging in open and difficult conversations. The text is in line with the Scottish Palliative Care Guidelines and the NES Framework for Palliative and End of Life Care. The book may either be used as course reading for relevant training programmes, such as the Enhanced Palliative Care course, as well as by healthcare professionals hoping to develop their skills and practice. It is aimed at anyone involved in management and prescribing within non-specialist palliative care, both in hospitals and in the community, including paramedics, nurses, doctors, pharmacists, and other key health professionals.

### Enhanced Palliative Care

In a unique and student-friendly package, Ethics and Values in Social Work offers a series of learning modules that will ensure graduates receive a comprehensive ethics and values education. Designed to be easily incorporated into any curriculum, each module helps students integrate the knowledge, skills, self-awareness, and critical thinking abilities required for dealing with ethical issues. From applying basic ethical standards of practice to managing complex ethical dilemmas, this textbook equips readers with a range of tools and strategies for responding to ethical questions and concerns. Traditional ethics textbooks provide students with a model for ethical decision making. This breakthrough textbook goes beyond ethical decision making by providing students with a strategic framework for managing ethical issues that includes guidelines for engaging others in ethical discussions and using conflict resolution theory to promote collaborative solutions. Some textbooks introduce students to ethical theories, such as deontology, teleology, and virtue ethics. This textbook goes beyond describing these theories by providing students with opportunities to apply, compare, and contrast these approaches as they relate to various contexts of social work practice. A wealth of case scenarios, discussion questions, and role-play exercises make this an engaging, thought-provoking teaching and learning tool. At a basic level, this textbook teaches students the essential principles and standards that define ethical practice. At a more profound level, Ethics and Values in Social Work inspires students to reach for the highest values of profession: service, dignity and worth of the person, human relationships, integrity, competence, social justice, human rights, and scientific inquiry.

### Ethics and Values in Social Work

Advanced Practice Palliative Nursing is the first text devoted to advanced practice nursing care of the seriously ill and dying. This comprehensive work addresses all aspects of palliative care including physical, psychological, social, and spiritual needs. Chapters include: symptoms common in serious illness, pediatric palliative care, spiritual and existential issues, issues around the role and function of the advanced practice nurse (APN), reimbursement, and nursing leadership on palliative care teams. Each chapter contains case examples and a strong evidence base to support the highest quality of care. The text is written by leaders in the field and includes authors who have pioneered the role of the advanced practice nurse in palliative care. This volume offers advanced practice content and practical resources for clinical practice across all settings of care and encompassing all ages, from pediatrics to geriatrics.

### Advanced Practice Palliative Nursing

Communication in Palliative Nursing unites complementary work in communication studies and nursing research to present a theoretically grounded curriculum for teaching palliative care communication to nurses. The chapters outline the COMFORT curriculum, comprised of these elements: Communication, Orientation and opportunity, Mindful presence, Family, Openings, Relating, and Team communication. Central to this curriculum is the need for nurses to practice self-care. Based on a narrative approach to communication, which addresses communication skills development holistically, this volume teaches nurses to consider a holistic model of communication that aligns with the holistic nature of palliative care. This work moves beyond the traditional and singular view of the nurse as patient and family teacher, to embrace more complex communication challenges present in palliative care -- namely,

providing care and comfort through communication at a time when patients, families, and nurses themselves are suffering. In addition to collaborating with physicians, the nurse's role involves speaking with patients and families after they have received bad news and often extends to discussions of spiritual and religious concerns. This book covers communication theory, clinical tools, and teaching resources to help nurses enhance their own communication and create comfort for themselves, as well as for patients and their families.

### Communication in Palliative Nursing

The definitive Oxford Textbook of Palliative Medicine, now in its fifth edition, has again been thoroughly updated to offer a truly global perspective in this field of extraordinary talent and thoughtfulness. Updated to include new sections devoted to assessment tools, care of patients with cancer, and the management of issues in the very young and the very old, this leading textbook covers all the new and emerging topics since its original publication in 1993. In addition, the multi-disciplinary nature of palliative care is emphasized throughout the book, covering areas from ethical and communication issues, the treatment of symptoms and the management of pain. This fifth edition of the Oxford Textbook of Palliative Medicine is dedicated to the memory of Professor Geoffrey Hanks, pioneer in the field of palliative medicine, and co-editor of the previous four editions. Winner in the Medicine category of the British Medical Association Book Awards, this is a truly comprehensive text, no hospital, hospice, palliative care service, or medical library should be without this essential source of information.

### Oxford Textbook of Palliative Medicine

Emphasising the multi-disciplinary nature of palliative care, the fourth edition of this text also looks at the individual professional roles that contribute to the best-quality palliative care.

### Oxford Textbook of Palliative Medicine

Originally published in 2001, the Textbook of Palliative Nursing has become the standard text for the field of hospice and palliative care nursing. In this new edition, the authors and editors have updated each chapter to ensure that the content is evidence-based and current references are included. They also have retained the important focus on case studies throughout the text and practical, clinically-relevant tables, figures, and other resources. Like the previous edition, this text has an introductory section of the general principles of palliative care followed by a comprehensive section on symptom assessment and management encompassing twenty-one different symptoms. Other key sections include psychosocial support and spiritual care, providing holistic perspective on care of patients facing advanced disease. The text also includes an innovative section on special populations addressing those most in need of palliative care. The textbook is a useful resource for all nurses with the excellent section on end-of-life care across settings. In this new edition, the pediatric palliative care section has been greatly expanded and includes seven separate chapters on pediatric care. It includes a section on "special issues" addressing topics such as ethical considerations, nursing research, and public policy perspectives and concludes with a section presenting models of excellence including six international models. This edition also offers a narrative on dying based on a spouse's perspective. The text includes an appendix with an extensive list of resources for nurses in the field.

### Textbook of Palliative Nursing

The death of a child is a special sorrow. No matter the circumstances, a child's death is a life-altering experience. Except for the child who dies suddenly and without forewarning, physicians, nurses, and other medical personnel usually play a central role in the lives of children who die and their families. At best, these professionals will exemplify "medicine with a heart." At worst, families' encounters with the health care system will leave them with enduring painful memories, anger, and regrets. When *Children Die* examines what we know about the needs of these children and their families, the extent to which such needs are—and are not—being met, and what can be done to provide more competent, compassionate, and consistent care. The book offers recommendations for involving child patients in treatment decisions, communicating with parents, strengthening the organization and delivery of services, developing support programs for bereaved families, improving public and private insurance, training health professionals, and more. It argues that taking these steps will improve the care of children who survive as well as those who do not—and will likewise help all families who suffer with their seriously ill or injured child. Featuring illustrative case histories, the book discusses patterns of

childhood death and explores the basic elements of physical, emotional, spiritual, and practical care for children and families experiencing a child's life-threatening illness or injury.

### When Children Die

Preceded by *Transitions in dying and bereavement: a psychosocial guide for hospice and palliative care* / by Victoria Hospice Society and Moira Cairns, Marney Thompson, Wendy Wainwright. c2003.

### Transitions in Dying and Bereavement

2007 AJN Book of the Year Award Winner Now you can get back to the part of your job that matters most...caring for your patients! *Primary Care: A Collaborative Practice*, 3rd Edition is a focused and thorough primary care reference that covers a multitude of adult disorders and related issues. It presents disorders alphabetically so you can quickly find what you're looking for and it addresses disorders and issues not usually found in other primary care books — including barotrauma, rehabilitation, and domestic violence. Plus, each disorder is discussed from a primary care perspective, so you are given the information you need to treat your adult patients in a caring, cost-effective manner. Diagnostic and Differential Diagnosis Boxes aid in test selection and diagnosis. Includes easy-to-find special icons for Emergency and Physician Referral Boxes to indicate conditions that require immediate referral to a specialist or emergency room. Health Promotion Content in many sections highlight the importance of health teaching and health promotion in the care of patients. Management sections incorporate evidence-based recommendations including specialty organization guideline recommendations and current, ongoing research findings. Collaborative format recognizes the importance of comprehensive, cost-effective collaborative patient care. Features a 10-page, 4-color plate section with high-quality photos of physical findings. Thoroughly covers cardiac conditions and office emergencies, areas not usually discussed in detail in other primary care texts. Includes a new introductory unit concerning the business and practical aspects of nurse practitioner practice. New Collaboration in Research chapter contains information regarding the clinical partnership or collaboration with academic colleagues. New Population-Based Care chapter addresses the fact that health care systems are beginning to become more community focused. The role of the health care provider is expanding to provide programs that focus on community needs. New Chronic Disease Management Teams chapter provides current research-based information regarding a team-oriented approach to care of the patient with chronic health issues. New Reimbursement chapter addresses the financial issues facing the NP in private practice. New Infectious Diseases unit addresses the most current health care issues in primary care, including mutating infections and emerging infectious diseases.

### Primary Care

This volume examines crucial concerns in palliative care, including the proper balance between comfort and cure for the patient, the integration of spiritual well-being, and the challenges of providing care in the absence of basic medical services and supplies. In the first section, palliative-care pioneers Constance Dahlin, Eduardo Bruera, Neil MacDonald, and Declan Walsh recount the early history of the discipline. Part 2 discusses the role of poetry, prose, plays, and other aspects of the humanities in the practice of palliative care. Part 3 explores essential current issues in the field, including autonomy, the use of opioids, and the impact of artificial intelligence on the evolution of palliative care. The final section focuses on the spiritual dimensions of pain and suffering. Rich with anecdotes and personal stories and featuring contributions from pioneers and current practitioners, *The Pursuit of Life* is an essential assessment of the past, present, and future of palliative care. In addition to the editors, the contributors include W. Andrew Achenbaum, Stacy L. Auld, Elena Pagani Bagliacca, Costantino Benedetti, Courtenay Bruce, Eduardo Bruera, Joseph Calandrino, Jim Cleary, Constance Dahlin, Andrea Ferrari, Mauro Ferrari, Joseph J. Fins, Bettie Jo Tennon Hightower, Kathryn B. Kirkland, Robin W. Lovin, Neil MacDonald, Charles Millikan, Dominique J. Monlezun, Tullio Proserpio, Giovanna Sironi, Daniel P. Sulmasy, and Declan Walsh.

### The Pursuit of Life

*Curriculum Development for Medical Education* is designed for use by curriculum developers and others who are responsible for the educational experiences of medical students, residents, fellows, and clinical practitioners. Short, practical, and general in its approach, the book begins with a broad overview of the subject. Each succeeding chapter covers one of the six steps: problem identification and general needs assessment, targeted needs assessment, goals and objectives, educational strategies,

implementation, and evaluation. Additional chapters address curriculum maintenance, enhancement, and dissemination. The six-step approach outlined here has evolved over the past twenty years, during which time the authors have taught curriculum development and evaluation skills to faculty and fellows in the Johns Hopkins University Faculty Development Program for Clinician-Educators. Program participants have used the techniques described to develop curricula on such diverse topics as preclerkship skills building, clinical reasoning and shared decision making, outpatient internal medicine, musculoskeletal disorders, office gynecology for the generalist, chronic illness and disability, geriatrics for nongeriatric faculty, surgical skills assessment, laparoscopic surgical skills, cross-cultural competence, and medical ethics. This thoroughly revised edition includes a broad discussion of competencies mandated by the Accreditation Council for Graduate Medical Education and other bodies, current information on education technology, increased emphasis on scholarships related to curriculum development, and advice on obtaining institutional review board approval. Updated examples throughout the book illustrate major points. The expanded appendixes include samples of complete curricula and information on funding, faculty development, and curricular resources.

### Curriculum Development for Medical Education

This comprehensive text provides complete details on caring for patients with urologic disorders in any setting: acute adult or pediatric care, long-term care, outpatient, and home care settings. Inside you'll find balanced coverage of urologic conditions affecting infants, children, adults and the elderly along with practical information on assessment, diagnostic procedures and pharmacology specifically aimed at advanced practice urologic nurses. It is also a valuable reference for Wound, Ostomy, and Continence (WOC) nurses and enterostomal therapists because of its emphasis on urologic cancers and the continent and incontinent urinary diversions frequently used to treat specific urologic cancers. Detailed chapters on urinary incontinence will also be appealing to neurologic nurses, continence advisers and physical therapists. UNIQUE! Provides balanced coverage of urologic conditions affecting infants, children, adults and the elderly. UNIQUE! Features atlases of genitourinary embryology, anatomy and physiology with useful illustrations and clear, accessible explanations of complex concepts. UNIQUE! Offers multiple symptom assessment tools in the assessment chapter. UNIQUE! Provides a diagnostic test review including information on interpreting results to identify individual disorders. Presents practical information on assessment, diagnostic procedures, and pharmacology specifically for urologic nurses, including expert and advanced practice nurses. Features detailed chapters on urinary incontinence, urologic cancers, and the continent and incontinent urinary diversions frequently used to treat specific cancers.

### Urologic Disorders

Find out all you need to know about providing high-quality care to patients with serious illnesses from the 2nd edition. Drs. Linda L. Emanuel and S. Lawrence Librach, leaders in the field, address the clinical, physical, psychological, cultural, and spiritual dimensions that are integral to the care of the whole patient. They give you a broad understanding of the core clinical skills and competencies needed to effectively approach patient assessment, care of special populations, symptom control, ethical issues, and more. Better understand and manage the common and unique challenges associated with delivering palliative care in various social settings, such as the ICU, hospice, and the home; and to diverse populations, such as children, elders, and vulnerable members of society. Emanuel and Librach provide a practical guide that covers all aspects of the palliative care spectrum.

### Palliative Care

As a palliative medicine physician, you struggle every day to make your patients as comfortable as possible in the face of physically and psychologically devastating circumstances. This new reference equips you with all of today's best international approaches for meeting these complex and multifaceted challenges. In print and online, it brings you the world's most comprehensive, state-of-the-art coverage of your field. You'll find the answers to the most difficult questions you face every day...so you can provide every patient with the relief they need. Equips you to provide today's most effective palliation for terminal malignant diseases • end-stage renal, cardiovascular, respiratory, and liver disorders • progressive neurological conditions • and HIV/AIDS. Covers your complete range of clinical challenges with in-depth discussions of patient evaluation and outcome assessment • ethical issues • communication • cultural and psychosocial issues • research in palliative medicine • principles of drug use • symptom control • nutrition • disease-modifying palliation • rehabilitation • and special interventions. Helps you implement

unparalleled expertise and global best practices with advice from a matchless international author team. Provides in-depth guidance on meeting the specific needs of pediatric and geriatric patients. Assists you in skillfully navigating professional issues in palliative medicine such as education and training • administration • and the role of allied health professionals. Includes just enough pathophysiology so you can understand the "whys" of effective decision making, as well as the "how tos." Offers a user-friendly, full-color layout for ease of reference, including color-coded topic areas, mini chapter outlines, decision trees, and treatment algorithms. Comes with access to the complete contents of the book online, for convenient, rapid consultation from any computer.

#### Palliative Medicine E-Book

Essential Resuscitation Skills for Medical Students -- Teaching Internal Medicine Residents to Incorporate Prognosis in the Care of Older Patients with Multimorbidity -- Longitudinal Program in Curriculum Development -- Appendix B: Curricular, Faculty Development, and Funding Resources -- Index -- A -- B -- C -- D -- E -- F -- G -- H -- I -- J -- K -- L -- M -- N -- O -- P -- Q -- R -- S -- T -- U -- V -- W

#### Curriculum Development for Medical Education

Textbook of Palliative Medicine provides an alternative, truly international approach to this rapidly growing specialty. This textbook fills a niche with its evidence-based, multi-professional approach and global perspective ensured by the international team of editors and contributing authors. In the absence of an international curriculum for the study of palliative medicine, this textbook provides essential guidance for those both embarking upon a career in palliative medicine or already established in the field, and the structure and content have been constructed very much with this in mind. With an emphasis on providing a service anywhere in the world, including the important issue of palliative care in the developing nations, Textbook of Palliative Medicine offers a genuine alternative to the narrative approach of its competitors, and is an ideal complement to them. It is essential reading for all palliative care physicians in training and in practice, as well as palliative care nurses and other health professionals in the palliative care team

#### Textbook of Palliative Medicine

This open access book aims to provide a comprehensive but practical overview of the knowledge required for the assessment and management of the older adult with or at risk of fragility fracture. It considers this from the perspectives of all of the settings in which this group of patients receive nursing care. Globally, a fragility fracture is estimated to occur every 3 seconds. This amounts to 25 000 fractures per day or 9 million per year. The financial costs are reported to be: 32 billion EUR per year in Europe and 20 billion USD in the United States. As the population of China ages, the cost of hip fracture care there is likely to reach 1.25 billion USD by 2020 and 265 billion by 2050 (International Osteoporosis Foundation 2016). Consequently, the need for nursing for patients with fragility fracture across the world is immense. Fragility fracture is one of the foremost challenges for health care providers, and the impact of each one of those expected 9 million hip fractures is significant pain, disability, reduced quality of life, loss of independence and decreased life expectancy. There is a need for coordinated, multi-disciplinary models of care for secondary fracture prevention based on the increasing evidence that such models make a difference. There is also a need to promote and facilitate high quality, evidence-based effective care to those who suffer a fragility fracture with a focus on the best outcomes for recovery, rehabilitation and secondary prevention of further fracture. The care community has to understand better the experience of fragility fracture from the perspective of the patient so that direct improvements in care can be based on the perspectives of the users. This book supports these needs by providing a comprehensive approach to nursing practice in fragility fracture care.

#### Primer of Palliative Care

Essentials of Palliative Care is a to-the-point, clinically oriented resource for all members of the multi-disciplinary palliative care team and trainees. It covers practical clinical topics, including assessment of the patient and pain and symptom management, and practical non-medical topics central to providing effective palliative care, including psychological management, guidance on how to help patients and their families through the many healthcare decision points they face, and sensitivity to the goals and culture of the patient. Review questions, with detailed answers, provide a convenient way for readers to test their knowledge. Features: · Concise, comprehensive, clinically focused · Multiple choice review

questions, with detailed answers · Expert contributors from leading institutions · Coordination of care by palliative care team a major focus

### Fragility Fracture Nursing

Holland Frei Cancer Medicine serves as a quick reference to current information on an extensive list of cancers, including breast, lung, thyroid, colorectal, ovarian, prostate, and gastric cancer, to name but a few. Presented as an accessible pocket-sized handbook, the chapters are organized in an outline format, offering only the most essential information on the etiology, staging (including TNM staging) and treatment for each cancer type. Individual chapters are devoted to the molecular biology of cancer, cancer prevention, cancer screening, the mechanisms of chemotherapy, and diagnostic imaging in cancer. Additionally, each chapter lists all the major phase III clinical trials, and therefore, serves as an excellent reference of the major randomized controlled trials for each cancer reported to date. Specific chapters are also dedicated to the discussion of oncologic emergencies, pain and palliation, and prescription complications. At the conclusion of the book, a glossary of oncologic terms and chemotherapeutic drug programs, a table of common cancer incidences, and an overview of the mechanisms, common uses, and related toxicities of various anti-cancer agents are featured. In addition, performance status tables, mathematical formulas and a listing of common biomedical / cancer web sites are highlighted.

### Essentials of Palliative Care

This issue of Anesthesiology Clinics brings the reader up to date on the most important advances in surgical palliative care for anesthesiology intensivists. Topics covered include recent trends and developments, palliative care of patients on high doses of narcotics, trauma in the surgical ICU, care of family in the surgical ICU, communication skills in palliative surgery, surgical palliative care in Haiti, and much more.

### Holland-Frei Cancer Medicine 8

Print+CourseSmart

### Surgical Palliative Care and Pain Management, An Issue of Anesthesiology Clinics - E-Book

This volume presents the most comprehensive, balanced, and up-to-date coverage of theory and research on cognitive, thinking, and learning styles, in a way that: \* represents diverse theoretical perspectives; \* includes solid empirical evidence testing the validity of these perspectives; and \* shows the application of these perspectives to school situations, as well as situations involving other kinds of organizations. International representation is emphasized, with chapters from almost every major leader in the field of styles. Each chapter author has contributed serious theory and/or published empirical data--work that is primarily commercial or that implements the theories of others. The book's central premise is that cognitive, learning, and thinking styles are not abilities but rather preferences in the use of abilities. Traditionally, many psychologists and educators have believed that people's successes and failures are attributable mainly to individual differences in abilities. However, for the past few decades research on the roles of thinking, learning, and cognitive styles in performance within both academic and nonacademic settings has indicated that they account for individual differences in performance that go well beyond abilities. New theories better differentiate styles from abilities and make more contact with other psychological literatures; recent research, in many cases, is more careful and conclusive than are some of the older studies. Cognitive, learning, and thinking styles are of interest to educators because they predict academic performance in ways that go beyond abilities, and because taking styles into account can help teachers to improve both instruction and assessment and to show sensitivity to cultural and individual diversity among learners. They are also of interest in business, where instruments to assess styles are valuable in selecting and placing personnel. The state-of-the-art research and theory in this volume will be of particular interest to scholars and graduate students in cognitive and educational psychology, managers, and others concerned with intellectual styles as applied in educational, industrial, and corporate settings.

### Care of the Dying

Palliative and End-of-Life Care, 2nd Edition provides clinicians with the guidelines and tools necessary to provide quality, evidenced-based care to patients with life-limiting illness. This text describes the care

and management of patients with advanced disease throughout the disease trajectory, extending from diagnosis of advanced disease until death. Four units provide the general principles of palliative and end-of-life care, important concepts, advanced disease management, and clinical practice guidelines. Clinical practice guidelines offer in-depth discussions of the pathophysiology of 19 different symptoms, interventions for specific symptom management (including in-depth rationales), and suggestions for patient and family teaching. Defines dying as a normal, healthy process aided by the support of an interdisciplinary team. Provides in-depth pathophysiology, assessment, and intervention information based upon the disease trajectory. Highlights opportunities for patient and family teaching. Describes psychosocial issues experienced by patients and their families. Reviews uncomplicated and complicated grief and mourning, providing suggestions to help the family after a patient's death. Includes case studies at the end of chapters to reinforce key concepts of compassionate care. New chapters including Advance Care Planning, Ethical Issues, Spiritual Care Across Cultures, Pharmacology, Sleep, and Nutrition. Includes a new appendix on Assessment Tools and Resources for more comprehensive coverage of palliative and end-of-life care.

### Palliative Care Nursing

'Pediatric Palliative Care', the fourth volume in the 'HPNA Palliative Nursing Manuals' series, addresses paediatric hospice, symptom management, paediatric pain, the neonatal intensive care unit, transitioning goals of care between the emergency department and intensive care unit, and grief and bereavement in paediatric palliative care.
