La Vera Storia dei Templari

Finalmente disponibile il primo libro completo per sapere tutto, ma proprio tutto, sulla storia dei Cavalieri Templari. In questo libro mettiamo nero su bianco la vera storia dei templari, senza perdersi in leggende e mezze verità. I templari erano un ordine monastico votato all'uso delle armi per garantire la sicurezza e la libertà del pellegrinaggio dei Cristiani in tutta la Terra Promessa, al tempo delle Crociate. Non contro i Musulmani in quanto non Cristiani, ma in quanto carnefici dell'incolumità dei pellegrini. Sono stati i salvatori della Cristianità per diversi secoli, fino quando, per invidia e risentimento, il loro ordine venne sciolto. Da allora si sono spesi fiumi d'inchiostro per infangare l'ordine dei Templari o, anche se in buona fede, per incensarli con astruse teorie usate per raffigurarli come una sorta di casta che regna sovrana nel mondo. La verità sta nel mezzo? Non proprio. I Templari hanno una grande storia, ma dalla fine del Medioevo in poi, l'ordine è stato sciolto. In altre parole, i Templari fanno parte del passato, un glorioso e mitico passato, ma non c'è nessuna dietrologia che ne possa ipotizzare, nei nostri giorni, una loro esistenza. In questo libro troverete quindi solamente la verità, niente diramazioni e ipotesi fondate sul nulla. Fra gli altri argomenti, nel libro si parlerà anche dell'Ideale Cavalleresco, della nascita della Cavalleria, dei Misteri Templari e del Processo Infame. In più, ci sarà una sezione bonus dedicata ad un altro ordine cavalleresco! Compra il libro adesso! Cosa stai aspettando? Non vuoi finalmente gustarti la storia e il mito della Cavalieri Templari? The passions have long been condemned as a creator of disturbance and purveyor of the temporary loss of reason, but as Remo Bodei argues in *Geometry of the Passions*, we must abandon the perception that order and disorder are in a constant state of collision. By means of a theoretical and historical analysis, Bodei interprets the relationship between passion and reason as a conflict between two complementary logics. *Geometry of the Passions* investigates the paradoxical conflict-collaboration between passions and reason, and between individual and political projects. Tracing the roles passion and reason have played throughout history, including in the political agendas of Descartes, Hobbes, and the French Jacobins, *Geometry of the Passions* reveals how passion and reason may be used as a vehicle for affirmation rather than self-enslavement.

Carta archeologica della provincia di Siena

"With contributions by Amid/Cero9, Aristide Antonas, Behemoth, Dogma, Didier Faustino, FORA+ Beth Hughes, MAPOffice, Alex Maymind, Microcities, Miniatura, Philippe Morel, and Raumlabor. In 1971, Superstudio published their twelve Ideal Cities, "the supreme achievement of twenty thousand years of civilization, blood, sweat and tears". The Superstudio piece was less about imagining the Future than it was about re-imagining Architecture as a form of knowledge and as a platform for thinking rather than mere practice. After 44 years, Black Square and Roman gallery CAMPO asked twelve groups of architects to give their own answer to the original brief. The Ideal City genre insinuates the possibility that space and bodily presence might not matter anymore in the future, while at the same time providing an ironic commentary on the architect's curse: our need to be projective and optimistic by default, even (or maybe especially) when civilization seems in fact to have come to an end. While Superstudio's response was intentionally dystopian, there might be other ways to interpret today the same brief: in The Supreme Achievement, a group of contemporary architects try to put forward not only ideas for new forms of life, but also new possibilities for our political imagination"--Publisher's site.

Encounters with Islam in German Literature and Culture

Does the remote Baltic island of Bornholm hold the key to an ancient secret? A secret that links it to the enigmatic village of Rennes-le-Chateau in the French Pyrennes and the tunnels beneath Mount Sion in Jerusalem? What is its connection with the Templar Knights, and what were they trying to hide on such a distant isle?THE TEMPLARS' SECRET ISLAND is a journey of awe-inspiring breadth and complexity, a journey that spans Europe and reaches into ancient Palestine, that first takes us thousands of years into the past and then back to our own time. It is a journey that casts new light on some of the most important enigmas of modern science.

Here are the complete prophecies of Nostradamus. Nostradamus is the best known and most accurate mystic and seer of all times. There are those who say that he predicted Napoleon and even the attack on the World Trade Center. Read the prophecies and judge for yourself.

The Medieval Woman

Loisy's book was originally written as a response to Adolf von Harnack's What is Christianity? Its importance revolves around both the crucial debate with Harnack and the intrinsic merit of its own scholarly position. Loisy's The Gospel and the Church serves to remind Catholics of their own inherited past and offers a view of the Protestant past from the point of view of an outsider. For the Protestant reader in particular, it offers an alternative view to Protestant understanding of the relationship of Jesus to the Church.

The Delphic Oracle: The history

This volume is dedicated to Taddeo di Bartolo (c. 1362-1422), painter of Sienese origin who, as the travelling master he was, spent a good part of his career moving between Tuscany, Liguria and Umbria, serving politically and economically powerful families, public authorities, large religious orders and brotherhoods. He was responsible for imposing altar polyptychs, a sacred art form of which he was the undisputed master: the re-composition of some of these apparatuses, such as the now dismembered altarpiece of San Francesco al Prato in Perugia, constitutes the fulcrum of the studies gathered in these pages. The book also documents Taddeo's other fields of activity: from the creation of processional banners to small tables of private devotion, up to the important role as fresco painter with the decoration of the chapel of the Palazzo Pubblico in Siena. With historical essays and documentary apparatuses, the volume edited by Marco Pierini and Gail Solberg - the painter's most accredited scholar - is therefore a complete and updated monograph on the figure of the artist.

The Crusades: A History is a comprehensive, single-volume history of the Crusades, from their beginnings in the eleventh century through to their decline and eventual ending at the close of the eighteenth century. As well as providing an account of the major Crusades, the book describes the organization of a Crusade, the experience of crusading and the Crusaders themselves.

The Templars' Secret Island

Discusses when recognition or non-recognition plays a part in the Parzival of Wolfram von Eschenbach.

The Complete Prophecies of Nostradamus

Dissatisfied with the explanations of previous researchers, Richard Andrews and Paul Schellenberger applied mathematical logic to the enduring mystery of Rennes-le-Château and the "treasure" alleged to be buried there. Beginning with a healthy skepticism, they assumed the enigma would wither under scrutiny. The quest began with an investigation into the activities of a group of 19th-century priests, but as the trail was pursued, it became apparent that the mystery's scope stretched far beyond the mountains of southern France. A series of paintings, maps, and tombstones pointed to one very specific location. The authors combined their knowledge of archaeology, theology, and surveying to produce a startling account of what they believe to be the true events surrounding the burial of Jesus.

The Ante-purgatorio of Dante Alighieri

The time of Carnival represents a "wild" time at the end of winter and pointing to the beginning of a new season. It is characterized by the irruption of border figures, animal masks, characters which recall the world of the dead and which bring within themselves the germ of a vital force, of the energy that produces the reawakening of nature and announces the growth and fertility of the new crops. This wild domain shows itself under the shapes of a contiguity between human and animal: the costumes, the masks, refer to a world in which the characteristics of the human and those of the animal are fused and intertwined. Among these figures, in particular, emerge those of the Wild Man, the human being who takes on animal-like attributes and aspects, and of the Bear, the animal that, more than all the others, gets as close as possible to the human and seems to reflect a deformed image of it. Such symbolic images come from far off times and places to tell a story that belongs to our common origins. The bear assumes attributes and functions alike in very different cultural contexts, such as the Sámi of Finland

or North-American hunter-gatherers, and represents a boundary between the world of nature and the human world, between the domain of animals and the difficult construction of humanity: a process continued for centuries, perhaps millennia, and which cannot still be said complete.

The Gospel and the Church

The city was the nexus of the Roman Empire in its early centuries. The *City in Late Antiquity* charts the change undergone by cities as the Empire was weakened by the third-century crisis, and later disintegrated under external pressures. The old picture of the classical city as everywhere in decline by the fourth century is shown to be far too simple, and John Rich seeks to explain why urban life disappeared in some regions, while elsewhere cities survived through to the Middle Ages and beyond.

Taddeo di Bartolo

The Aramaic papyri found on the island of Elephantine, Egypt (ancient Yeb, opposite Syene) come from the fifth century BC. They include letters, personal archives, public archives, the 'Words of Ahikar,' the Behistun inscription, accounts, and lists. Cowley provides here the Aramaic transcriptions and English translations for all the texts available to him. In this edition, an updated bibliography is provided.

De Iside et Osiride

These images, which reached a broad and socially varied audience across Western Europe, appeared in virtually all artistic media, including illuminated manuscripts, stained glass, sculpture, metalwork, and tapestry."

Logo Mondo

Early this century Enrico, a young intellectual, leaves the city of Gorizia with its abundant population and culture, to spend several years living on the Patagonian pampas, alone with his ancient Greek texts, his flocks and, every now and then, a woman. He has been taught by his closest friend, Carlo, a philosopher/poet who commits suicide in his early twenties, to search for an authentic life, free of social falsehoods. But in his search for this unattainable goal, Enrico destroys every chance he has of a normal existence. This is portrait of a world in ferment, a decaying empire shaken by war and revolution, and a life-long search for meaning.

Ecstatic Confessions

In recent years there has been an intensifying debate within the religious studies community about the validity of religion as an analytical category. In this book Fitzgerald sides with those who argue that the concept of religion itself should be abandoned. On the basis of his own research in India and Japan, and through a detailed analysis of the use of religion in a wide range of scholarly texts, the author maintains that the comparative study of religion is really a form of liberal ecumenical theology. By pretending to be a science, religion significantly distorts socio-cultural analysis. He suggest, however, that religious studies can be re-represented in a way which opens up new and productive theoretical connections with anthropology and cultural and literary studies.

Excerpta cypria

`A wise, learned, gracefully written account of the Anglo-Norman world and its most remarkable chronicler.' *SPECULUM* Orderic Vitalis, born near Shrewsbury in 1075 and sent as a child oblate to the Norman abbey of Saint-Evroult, wrote one of the most vivid and important medieval chronicles. His world encompassed Shropshire in the aftermath of the Conquest, Normandy in civil war and at peace, and, briefly, the wider French perspective of the priory of Maule. Saint-Evroult was open to all the cross-currents of a changing society, and Orderic witnessed fundamental changes in church organisation, patterns of aristocratic inheritance, attitudes towards knighthood, and Christian militancy towards non-Christians. This book is concerned with monastic life and culture and its interaction with the life of courts and Norman families. It also describes the life of Orderic himself, and an appendix gives a translation of his own moving account of his life, an epilogue to the *Historia*. MARJORIE CHIBNALL is a Fellow of Clare Hall, Cambridge. She has written many books and articles about the Anglo-Norman world, including an edition of Orderic's *Ecclesiastical History*.
