Chapters thoroughly describe the etiology, DSM-5 classification, symptoms and clinical features, course, epidemiology, and associated comorbidities of prevalent psychological disorders. Instructor's Resource Manual, Abnormal Psychology, Second Edition [by] Thomas F. Oltmanns, Robert E. Emery

A paradigm-shifting model of parenting children in two homes from an internationally recognized expert. A researcher, therapist, and mediator, Robert Emery, Ph.D., details a new approach to sharing custody with children in two homes. Huge numbers of children are affected by separation, divorce, cohabitation breakups, and childbearing outside of marriage. These children have two homes. But their parents have only one chance to protect their childhood. Building on his 2004 book *The Truth About Children and Divorce* and a strong evidence base, including his own research, Emery explains that a parenting plan that lasts a lifetime is one that grows and changes along with children's—and families'—developing needs. Parents can and should work together to renegotiate schedules to best meet the changing needs of children from infancy through young adult life. Divided into chapters that address the specific needs of children as they grow up, Emery:

- Introduces his Hierarchy of Children's Needs in Divorce
- Provides specific advice for successful parenting, starting with infancy and reaching into emerging adulthood
- Advocates for joint custody but notes that children do not count minutes and neither should parents
- Highlights that there is only one "side" for parents to take in divorce: the children's side

Himself the father of five children, one from his first marriage, Emery brings a rare combination of personal and professional insight and guidance for every parent raising a child in two homes.

Abnomal Psychology

Nationally recognized expert Robert Emery applies his twenty-five years of experience as a researcher, therapist, and mediator to offer parents a new road map to divorce. Dr. Emery shows how our powerful emotions and the way we handle them shape how we divorce—and whether our children suffer or thrive in the long run. His message is hopeful, yet realistic—divorce is invariably painful, but parents can help promote their children's resilience. With compassion and authority, Dr. Emery explains:

- Why it is so hard to really make divorce work
- How anger and fighting can keep people from really separating
- Why legal matters should be one of the last tasks
- Why parental love—and limit setting—can be the best "therapy" for kids
- How to talk to children, create workable parenting schedules, and more

Revel for Abnormal Psychology Combo Access Card

"Most textbooks on abnormal psychology include short descriptions of actual clinical cases. However, those presentations are necessarily brief and too fragmented for students to gain a clear understanding of the unique complexities of a person's troubled life. *Case Studies in Abnormal Psychology*, Ninth Edition takes mental disorders from the realm of theory into the complex reality of human lives. This casebook presents comprehensive coverage of 23 high interest cases that include topics such as eating disorders, gender identity disorder, borderline personality, and posttraumatic stress disorder. Each study (1) provides detailed descriptions of a range of clinical problems, (2) illustrates some of the ways in which these problems can be viewed and treated, and (3) discusses some of the evidence that is available concerning the prevalence and causes of the disorders in question"--

Abnormal Psychology Plus NEW MyPsychLab with Pearson EText -- Access Card Package

Is depression simply the result of chemical imbalances, or Schizophrenia a wholly biological disorder? What role do the broader circumstances of an individual's social, cultural and heuristic world play in the wider scheme of their psychological wellbeing? In this ground-breaking and highly innovative text, Cromby et al deliver an introduction to the biopsychosocial paradigm for understanding and treating psychological distress, taking into consideration the wider contexts that engender the onset of mental illness and critiquing the limitations in the sole use of the biomedical model in psychological practice. Rather than biologically determined or clinically measurable, readers are encouraged to consider mental illness as a subjective experience that is expressed according to the individual experiences of the sufferer rather than the rigidity of diagnostic categories. Similarly, approaches to recovery expand beyond psychiatric medication to consider the fundamental function of methods such as psychotherapy, community psychology and service-user movements in the recovery process. Offering a holistic account of the experience of psychological distress, this text draws upon not only statistical evidence but places an integral emphasis on the service-user experience; anecdotal accounts of which feature throughout in order to provide readers with the perspective of the mental health sufferer. Taking an integrative approach to the psychology of mental health, the authors draw from a wealth of experience, examples and approaches to present this student-friendly and engaging text. This is core reading for anyone serious about understanding mental health issues and is suitable for undergraduate students taking introductory courses in psychology and abnormal psychology.

Focusing on moral, social and legal responsibilities as opposed to rights or obligations, this volume explores the concept of responsibility in family life, law and practice. Divided into four parts, the study considers the nature of family responsibility; constructions of children's responsibilities; shifting conceptions of family responsibilities; and family, responsibility and the law. The collection brings together leading experts from the disciplines of sociology, socio-legal studies and law to discuss responsibilities prior to birth, responsibilities for children, as well as responsibilities of children and of the state towards family members. The volume informs and challenges the developing conceptualization of responsibilities which arise in interdependent, intimate and caring relationships and their legal regulation. It will be of great interest to researchers and practitioners working in this complex field.
