Studies in Comparative Early Modern History

This volume examines encounters between Europeans and the other peoples of the world during the early modern era.

Implicit Understandings

Recent historical scholarship has shown the way towards a geographically capacious conception of the early modern world. Featuring essays by nine leading scholars of early modern Asia and Europe, Comparative Early Modernities casts aside the legacies of European exceptionalism to reveal the interconnected multiplicity of the early modern world and of the variety of unexpected pathways linking these histories to the evolving modernities of the 21st century. In their fresh and provocative examinations of topics in literature, philosophy, art history, and political economy, the authors transform our understanding of global early modernity and reassess the theoretical and methodological premises of comparative historical studies.

Special Notice to Mariners

How did state power impinge on the religion of the ordinary person? This perennial issue has been sharpened as historians uncover the process of 'confessionalization' or 'acculturation', by which officials of state and church collaborated in ambitious programs of Protestant or Catholic reform, intended to change the religious consciousness and the behaviour of ordinary men and women. In the belief that specialists in one area of the globe can learn from the questions posed by colleagues working in the same period in other regions, this volume sets the topic in a wider framework. Thirteen essays, grouped in themes affording parallel views of England and Europe, Tsarist Russia, and Ming China, show a spectrum of possibilities for what early modern governments tried to achieve by regulating religious life, and for how religious communities evolved in new directions, either in keeping with or in spite of official injunctions.

The Rise of Merchant Empires

This is a major new textbook, designed for students in all disciplines seeking an introduction to the very latest research on all aspects of women's lives in Europe from 1500 to 1750, and on the development of the notions of masculinity and femininity. The coverage is geographically broad, ranging from Spain to Scandinavia, and from Russia to Ireland, and the topics investigated include the female life-cycle, literacy, women's economic role, sexuality, artistic creations, female piety - and witchcraft - and the relationship between gender and power. To aid students each chapter contains extensive notes on further reading (but few footnotes), and the approach throughout is designed to render the subject in as accessible and stimulating manner as possible. Women and Gender in Early Modern Europe

is suitable for usage on numerous courses in women's history, early modern European history, and comparative history.

Comparative Early Modernities

This book focuses on why Europe became the dominant economic force in global trade between 1450 and 1750.

Religion and the Early Modern State

This collective volume examines the prevalence and variability of early modern discourses on Europe; it considers both Latin and vernacular texts from various fields of study in order to shed new light on how the concept of Europe evolved in its early days.

Women and Gender in Early Modern Europe

Imagining Culture, first published in 1996, discusses literature as a whole rather than a partisan interest in those who are in or out of favour, and how that literature relates to other arts as well as to philosophical, historical, and cultural contexts. This title will be of interest to students of literature and cultural studies.

The Political Economy of Merchant Empires

What is Early Modern History? offers a concise guide to investigations of the era from the fifteenth to eighteenth centuries and an entry-point to larger questions about how we divide and organize the past and how the discipline of history has evolved. Merry Wiesner-Hanks showcases the new research and innovative methods that have altered our understanding of this fascinating period. She examines various subfields and approaches in early modern history, and the marks of modernity that scholars have highlighted in these, from individualism to the Little Ice Age. Moving beyond Europe, she surveys the growth of the Atlantic World and global history, exploring key topics such as the Columbian Exchange, the slave trade, cultural interactions and blending, and the environment. She also considers popular and public representations of the early modern period, which are often how students – and others – first become curious. Elegantly written and passionately argued, *What is Early Modern History?* provides an essential invitation to the field for both students and scholars.

Contesting Europe

The future of English linguistics as envisaged by the editors of *Topics in English Linguistics* lies in empirical studies, which integrate work in English linguistics into general and theoretical linguistics on the one hand, and comparative linguistics on the other. The TiEL series features volumes that present interesting new data and analyses, and above all fresh approaches that contribute to the overall aim of the series, which is to further outstanding research in English linguistics. For further publications in English linguistics see also our *Dialects of English* book series. To discuss your book idea or submit a proposal, please contact Natalie Fecher.

Imagining Culture (Routledge Revivals)

Understanding Early Modern Primary Sources is an introduction to the rich treasury of source material available to students of early modern history. During this period, political development, economic and social change, rising literacy levels, and the success of the printing press, ensured that the State, the Church and the people generated texts and objects on an unprecedented scale. This book introduces students to the sources that survived to become indispensable primary material studied by historians. After a wide-ranging introductory essay, part I of the book, 'Sources', takes the reader through seven key categories of primary material, including governmental, ecclesiastical and legal records, diaries and literary works, print, and visual and material sources. Each chapter addresses how different types of material were produced, whilst also pointing readers towards the most important and accessible physical and digital source collections. Part II, 'Histories', takes a thematic approach. Each chapter in this section explores the sources that are used to address major early modern themes, including political and popular cultures, the economy, science, religion, gender, warfare, and global exploration. This collection of essays by leading historians in their respective fields showcases how practitioners research the early modern period, and is an invaluable resource for any student embarking on their studies of the early modern period.

The Political Economy of Merchant Empires

This essay collection aims to bring together new comparative research studies on the place of the Bible in early modern Europe. It focuses on lay readings of the Bible, showing their central contribution to modernity, and interrogates established historical paradigms.

What is Early Modern History?

This study contains twenty-two essays by leading historians on the Tokugawa Period (1600-1868), eight of which have never before been published. The Tokugawa Period has long been seen as one of Eastern feudalism, awaiting the breakthrough that came with the Meiji enlightenment and the opening of Japan to the West. The general thrust of these papers is to show that in many institutional aspects Japan was far from backward before the Meiji Period, and that many of the preconditions of modernization were present and developing much earlier than has generally been believed. This collection will be particularly valuable to students and scholars of comparative and Japanese modernization. Originally published in 1968. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Studies in Early Modern English

In its various European contexts, the invention and spread of newspapers in the seventeenth century had a profound effect on early modern culture and politics. While recent research has explored the role of the newspaper in transforming information into ideology in various European countries, this book is the first to bring this work together into a comprehensive and comparative survey.

Understanding Early Modern Primary Sources

Over the past three decades scholars have transformed the study of women and gender in early modern Europe. This Ashgate Research Companion presents an authoritative review of the current research on women and gender in early modern Europe from a multi-disciplinary perspective. The authors examine women's lives, ideologies of gender, and the differences between ideology and reality through the recent research across many disciplines, including history, literary studies, art history, musicology, history of science and medicine, and religious studies. The book is intended as a resource for scholars and students of Europe in the early modern period, for those who are just beginning to explore these issues and this time period, as well as for scholars learning about aspects of the field in which they are not yet an expert. The companion offers not only a comprehensive examination of the current research on women in early modern Europe, but will act as a spark for new research in the field.

Lay Readings of the Bible in Early Modern Europe

This groundbreaking book examines the complex relationships between individuals and communities in the profound transitions of the early modern period. Taking a global and comparative approach to historical issues, the distinguished contributors show that individual and community created and recreated one another in the major structures, interactions, and transitions of early modern times. Offering an important contribution to our understanding both of the early modern period and of its historiography, this volume will be an invaluable resource for scholars working in the fields of medieval, early modern, and modern history, and on the Renaissance and Reformation.

Studies in the Institutional History of Early Modern Japan

This collection of eleven essays furthers the dialogue between early modern history and the social sciences through an analysis of Fernand Braudel's *The Mediterranean and the Mediterranean World of Philip II*. The contributors review various historiographical traditions to arrive at conclusions on contemporary theory and practice in the exchange between history and the disciplines of geography, economics, sociology, anthropology, politics (diplomatic history and the study of revolutions), psychology (law), religion, and area studies (China and the Americas). Contributors Peter Burke, Emmanuel College, University of Cambridge Jan de Vries, University of California, Berkeley Mark Elvin, Australian National University, Canberra Jack A. Goldstone, University of California, Davis Antonio Manuel Hespanha, Universidade Nova de Lisboa Henry Kamen, Consejo Superior de Investigaciones Científicas, Institució Milà i Fontanals, Barcelona John A. Marino, University of California, San Diego Ottavia Niccoli, Università degli Studi di Trento Anthony Pagden, University of California, Los Angeles M. J. Rodríguez-Salgado, London School of Economics Bartolomé Yun Casalilla, Universidad Pablo de Olavide de Sevilla

The Politics of Information in Early Modern Europe

This book explores how wall-building traditions throughout the world illustrate universal themes of defensive strategy and the symbolism of power.

The Ashgate Research Companion to Women and Gender in Early Modern Europe

This volume is the first to adopt systematically a comparative approach to the role of ancient texts and traditions in early modern scholarship, science, medicine, and theology. It offers a new method for understanding early modern knowledge.

Between the Middle Ages and Modernity

The author of *The Footnote* reflects on scribes, scholars, and the work of publishing during the golden age of the book. From Francis Bacon to Barack Obama, thinkers and political leaders have denounced humanists as obsessively bookish and allergic to labor. In this celebration of bookmaking in all its messy and intricate detail, renowned historian Anthony Grafton invites us to see the scholars of early modern Europe as diligent workers. Meticulously illuminating the physical and mental labors that fostered the golden age of the book—the compiling of notebooks, copying and correction of texts and proofs, preparation of copy—he shows us how the exertions of scholars shaped influential books, treatises, and forgeries. *Inky Fingers* ranges widely, tracing the transformation of humanistic approaches to texts in the seventeenth and eighteenth centuries and examining the simultaneously sustaining and constraining effects of theological polemics on sixteenth-century scholars. Grafton draws new connections between humanistic traditions and intellectual innovations, textual learning and craft knowledge, manuscript and print. Above all, Grafton makes clear that the nitty-gritty of bookmaking has had a profound impact on the history of ideas—that the life of the mind depends on the work of the hands.

Early Modern History and the Social Sciences

This book includes most of the contributions presented at a conference on “Universities and Science in the Early Modern Period” held in 1999 in Valencia, Spain. The conference was part of the “Five Centuries of the Life of the University of Valencia” (Cinc Segles) celebrations, and from the outset we had the generous support of the “Patronato” (Foundation) overseeing the events. In recent decades, as a result of a renewed attention to the institutional, political, social, and cultural context of scientific activity, we have witnessed a reappraisal of the role of the universities in the construction and development of early modern science. In essence, the following conclusions have been reached: (1) the attitudes regarding scientific progress or novelty differed from country to country and follow different trajectories in the-

course of the early modern period; (2) institutions of higher learning were the main centers of education for most scientists; (3) although the universities were sometimes slow to assimilate new scientific knowledge, when they did so it helped not only to remove the suspicion that the new science was intellectually subversive but also to make science a respectable and even prestigious activity; (4) the universities gave the scientific movement considerable material support in the form of research facilities such as anatomical theaters, botanical gardens, and expensive instruments; (5) the universities provided professional employment and a means of support to many scientists; and (6) although the relations among the universities and the academies or scientific societies were sometimes antagonistic, the two types of institutions often worked together in harmony, performing complementary rather than competing functions; moreover, individuals moved from one institution to another, as did knowledge, methods, and scientific practices.

City Walls

This book of original essays explores three important areas in comparative literature and history and in cultural studies: the boundaries between history and fiction; women as writers and subjects; and the connection between the early modern, modern and postmodern. New history and new literary studies look at innovative ways to see past cultures in a new light. Traditional methods are used to new ends and writers who are familiar within their cultures are translated to other cultures. This study promotes an expanded understanding of our cultural artifacts in a rapidly changing present. It discusses English-speaking culture in the early modern period in the context of other European cultures and relates Europe to other parts of the world, most notably America. After grounding the discussion of culture in history, identity, dialogue as a genre that crosses the boundaries between philosophy and fiction, the rhetoric of prefaces to historical collections, cosmographies and histories that share something with the techniques of literary and forensic rhetoric, the book proceeds to discuss two central issues in cultural studies today: gender and postmodernity. The final section of the book provides a general assessment through early modern texts of modernity and postmodernity.

The Worlds of Knowledge and the Classical Tradition in the Early Modern Age

This book breaks with three common scholarly barriers of periodization, discipline and geography in its exploration of the related themes of heresy, magic and witchcraft. It sets aside constructed chronological boundaries, and in doing so aims to achieve a clearer picture of what 'went before', as well as what 'came after'. Thus the volume demonstrates continuity as well as change in the concepts and understandings of magic, heresy and witchcraft. In addition, the geographical pattern of similarities and diversities suggests a comparative approach, transcending confessional as well as national borders. Throughout the medieval and early modern period, the orthodoxy of the Christian Church was continuously contested. The challenge of heterodoxy, especially as expressed in various kinds of heresy, magic and witchcraft, was constantly present during the period 1200-1650. Neither contesters nor followers of orthodoxy were homogeneous groups or fractions. They themselves and their ideas changed from one century to the next, from region to region, even from city to city, but within a common framework of interpretation. This collection of essays focuses on this complex.

Inky Fingers

During the First World War, mass media achieved an enormous and continuously growing importance in all belligerent countries. Newspaper, illustrated magazines, comics, pamphlets, and instant books, fictional works, photography, and the new-born "theater of imagery", the cinema, were crucial in order to create a heroic vision of the events, to mobilize and maintain the consensus on the war. But their role was pivotal also in creating the image of the war's end and finally, together with a widespread, new literary genre, the war memoirs, to shape the collective memory of the conflict for the next generations. Even before November 1918, the media raised high expectations for a multifaceted peace: a new global order, the beginning of a peaceful era, the occasion for a regenerating apocalypse. Likewise, in the following decades, particularly war literature and cinema were pivotal to reverse the icon of the Great War as an epic crusade and a glorious chapter of the national history and to create the hegemonic image of a senseless carnage. The Mediatization of War and Peace focalizes on the central role played by mass media in the tortuous transition to the post-war period as well as on the profound disenchantment generated by their prophecies.

Universities and Science in the Early Modern Period

This Handbook re-examines the concept of early modern history in a European and global context. Volume II engages with philosophy, science, art and architecture, music, and the Enlightenment, and examines the military and political developments within and beyond the boundaries of Europe.

Imagining Culture

This Handbook re-examines the concept of early modern history in a European and global context. The term 'early modern' has been familiar, especially in Anglophone scholarship, for four decades and is securely established in teaching, research, and scholarly publishing. More recently, however, the unity implied in the notion has fragmented, while the usefulness and even the validity of the term, and the historical periodisation which it incorporates, have been questioned. The Oxford Handbook of Early Modern European History, 1350-1750 provides an account of the development of the subject during the past half-century, but primarily offers an integrated and comprehensive survey of present knowledge, together with some suggestions as to how the field is developing. It aims both to interrogate the notion of 'early modernity' itself and to survey early modern Europe as an established field of study. The overriding aim will be to establish that 'early modern' is not simply a chronological label but possesses a substantive integrity. Volume I examines 'Peoples and Place', assessing structural factors such as climate, printing and the revolution in information, social and economic developments, and religion, including chapters on Orthodoxy, Judaism and Islam.

Contesting Orthodoxy in Medieval and Early Modern Europe

Early modern globalization was built on a highly labour intensive infrastructure. This book looks at the millions of workers who were needed to operate the ships, ports, store houses, forts and factories crucial to local and global exchange. These sailors, soldiers, craftsmen and slaves were crucial to globalization but were also confronted with the process of globalization themselves. They were often migrants who worked, directly or indirectly, for trading companies, merchants and producers that tried to discipline and control their labour force. The contributors to this volume offer an integrated, thematic study of the global history of desertion in European, Atlantic and Asian contexts. By tracing and comparing acts and patterns of desertion across empires, economic systems, regions and types of workers, *Desertion in the Early Modern World* illuminates the crucial role of practices of desertion among workers in shaping the history of imperial and economic expansion in the early modern period.

The Mediatization of War and Peace

Gender and Political Culture in Early Modern Europe investigates the gendered nature of political culture across early modern Europe by exploring the relationship between gender, power, and political authority and influence. This collection offers a rethinking of what constituted 'politics' and a reconsideration of how men and women operated as part of political culture. It demonstrates how underlying structures could enable or constrain political action, and how political power and influence could be exercised through social and cultural practices. The book is divided into four parts - diplomacy, gifts and the politics of exchange; socio-economic structures; gendered politics at court; and voting and political representations – each of which looks at a series of interrelated themes exploring the ways in which political culture is inflected by questions of gender. In addition to examples drawn from across Europe, including Austria, the Dutch Republic, the Italian States and Scandinavia, the volume also takes a transnational comparative approach, crossing national borders, while the concluding chapter, by Merry Wiesner-Hanks, offers a global perspective on the field and encourages comparative analysis both chronologically and geographically. As the first collection to draw together early modern gender and political culture, this book is the perfect starting point for students exploring this fascinating topic.

The Oxford Handbook of Early Modern European History, 1350-1750: Cultures and power

The Routledge Handbook of Material Culture in Early Modern Europe marks the arrival of early modern material culture studies as a vibrant, fully-established field of multi-disciplinary research. The volume provides a rounded, accessible collection of work on the nature and significance of materiality in early modern Europe – a term that embraces a vast range of objects as well as addressing a wide variety of human interactions with their physical environments. This stimulating view of materiality is distinctive in asking questions about the whole material world as a context for lived experience, and the book considers material interactions at all social levels. There are 27 chapters by leading experts as well as 13 feature object studies to highlight specific items that have survived from this period (defined broadly as c.1500–c.1800). These contributions explore the things people

acquired, owned, treasured, displayed and discarded, the spaces in which people used and thought about things, the social relationships which cluster around goods – between producers, vendors and consumers of various kinds – and the way knowledge travels around those circuits of connection. The content also engages with wider issues such as the relationship between public and private life, the changing connections between the sacred and the profane, or the effects of gender and social status upon lived experience. Constructed as an accessible, wide-ranging guide to research practice, the book describes and represents the methods which have been developed within various disciplines for analysing pre-modern material culture. It comprises four sections which open up the approaches of various disciplines to non-specialists: 'Definitions, disciplines, new directions', 'Contexts and categories', 'Object studies' and 'Material culture in action'. This volume addresses the need for sustained, coherent comment on the state, breadth and potential of this lively new field, including the work of historians, art historians, museum curators, archaeologists, social scientists and literary scholars. It consolidates and communicates recent developments and considers how we might take forward a multi-disciplinary research agenda for the study of material culture in periods before the mass production of goods.

The Oxford Handbook of Early Modern European History, 1350-1750

What did it mean to be 'civilized' in Early Modern England? Keith Thomas's seminal studies *Religion and the Decline of Magic*, *Man and the Natural World*, and *The Ends of Life*, explored the beliefs, values and social practices of the years between 1500 and 1800. *In Pursuit of Civility* continues this quest by examining what the English people thought it meant to be 'civilized' and how that condition differed from being 'barbarous' or 'savage'. Thomas shows how the upper ranks of society sought to distinguish themselves from their social inferiors by developing distinctive forms of moving, speaking and comporting themselves - and how the common people in turn developed their own forms of civility. The belief of the English in their superior civility shaped their relations with the Welsh, the Scots and the Irish. By legitimizing international trade, colonialism, slavery, and racial discrimination, it was fundamental to their dealings with the native peoples of North America, India, and Australia. Yet not everyone shared this belief in the superiority of Western civilization. *In Pursuit of Civility* throws light on the early origins of anti-colonialism and cultural relativism, and goes on to examine some of the ways in which the new forms of civility were resisted. With all the author's distinctive authority and brilliance - based as ever on wide reading, abounding in fresh insights, and illustrated by many striking quotations and anecdotes from contemporary sources - *In Pursuit of Civility* transforms our understanding of the past. In so doing, it raises important questions as to the role of manners in the modern world.

Desertion in the Early Modern World

This edited collection examines different aspects of the experience and significance of childhood, youth and family relations in minority religious groups in north-west Europe in the late medieval, Reformation and post-Reformation era. It aims to take a comparative approach, including chapters on Protestant, Catholic and Jewish communities. The chapters are organised into themed sections, on 'Childhood, religious practice and minority status', 'Family and responses to persecution', and 'Religious division and the family: co-operation and conflict'. Contributors to the volume consider issues such as religious conversion, the impact of persecution on childhood and family life, emotion and affectivity, the role of childhood and memory, state intervention in children's religious upbringing, the impact of confessionally mixed marriages, persecution and co-existence. Some chapters focus on one confessional group, whilst others make comparisons between them.

Gender and Political Culture in Early Modern Europe, 1400-1800

From the late fifteenth century onwards, scholars across Europe began to write books about how to read and evaluate histories. These pioneering works grew from complex early modern debates about law, religion and classical scholarship. Anthony Grafton's book is based on his Trevelyan Lectures of 2005, and it proves to be a powerful and imaginative exploration of some central themes in the history of European ideas. Grafton explains why so many of these works were written, why they attained so much insight – and why, in the centuries that followed, most scholars gradually forgot that they had existed. Elegant and accessible, *What Was History?* is a deliberate evocation of E. H. Carr's celebrated Trevelyan Lectures, *What Is History?*.

The Routledge Handbook of Material Culture in Early Modern Europe

In an era defined by daily polls, institutional rankings, and other forms of social quantification, it can be easy to forget that comparison has a long historical lineage. Presenting a range of multidisciplinary perspectives, this volume investigates the concepts and practices of comparison from the early modern period to the present. Each chapter demonstrates how comparison has helped to drive the seemingly irresistible dynamism of the modern world, exploring how comparatively minded assessors determine their units of analysis, the criteria they select or ignore, and just who it is that makes use of these comparisons—and to what ends.

In Pursuit of Civility

Historical comparison as a method of historical analysis goes back to Herodotus in antiquity, yet it was not until the 1920s through the work of historian Marc Bloch that it was recognised as a solid historical method. Even today, some historians are wary of applying a comparative lens to their work. Why is this, Mikhail Krom asks, when historical comparison can be an incredibly insightful approach to history? Designed as a helpful resource for historians, *An Introduction to Historical Comparison* aims to teach scholars how to develop the skills needed to successfully employ a comparative methodology. It begins by tracing the intellectual history of comparative history writing and then examines the practice of historical comparison. The result is a clear and engaging analysis of historical thinking and a useful guide to main methodological techniques, successes, and pitfalls of comparative research. *An Introduction to Historical Comparison* is the first comprehensive study of the theory and practice of comparative-historical research. Combining a wide range of case-studies from the best practitioners of historical comparison with an innovative interdisciplinary perspective, this book is thus a meaningful contribution to current debates on historiography. As such, this resource will be of immense value to both students reading historiography and methodology and to historians looking to apply a comparative approach to their own research.

Childhood, Youth and Religious Minorities in Early Modern Europe

The social, political and cultural factors determining conformity and obedience as well as dissidence and revolt are traced in sixteenth and early seventeenth century England.

What Was History?

The European World 1500-1800 provides a concise and authoritative textbook for the centuries between the Renaissance and the French Revolution. It presents early modern Europe not as a mere transitional phase, but a dynamic period worth studying in its own right. Written by an experienced team of specialists, and derived from a perennially successful undergraduate course, it offers a student-friendly introduction to all major themes and processes of early modern history. Structured in four parts dealing with socio-economic, religious, cultural and political issues, it adopts a deliberately broad geographical perspective: Western and Central Europe receive particular attention, but dedicated chapters also explore the wider global context. For this thoroughly revised and improved second edition, the authors have added three new chapters on 'Politics and Government', 'Impact of War' and 'Revolution'. Specially designed to assist learning, *The European World 1500-1800* features: state-of-the-art surveys of key topics written by an international team of historians suggestions for seminar discussion and further reading extracts from primary sources and generous illustrations, including maps a glossary of key terms and concepts a chronology of major events a full index of persons, places and subjects a fully-featured companion website, enhanced for this new edition *The European World 1500-1800* will be essential reading for all students embarking on the discovery of the early modern period.

The Force of Comparison

The volume explores the relationship between religion and violence in Europe from the Middle Ages to the Early modern period, involving European and Japanese scholars. It investigates the ideological foundations of the relationship between violence and religion and their development in a varied corpus of sources (political and theological treatises, correspondence of missionaries, pamphlets, and images).
