Big Data Analytics for Cyber-Physical System in Smart City

This book gathers a selection of peer-reviewed papers presented at the first Big Data Analytics for Cyber-Physical System in Smart City (BDCPS 2019) conference, held in Shengyang, China, on 28–29 December 2019. The contributions, prepared by an international team of scientists and engineers, cover the latest advances made in the field of machine learning, and big data analytics methods and approaches for the data-driven co-design of communication, computing, and control for smart cities. Given its scope, it offers a valuable resource for all researchers and professionals interested in big data, smart cities, and cyber-physical systems.

Test Your Business Vocabulary in Use

Test Your Business Vocabulary in Use is a set of 66 tests based on the key corpus informed vocabulary highlighted in Business Vocabulary in Use. There is a clear one-page test for each unit of the parent book and a user-friendly answer key which enables learners to check their answers accurately. The scoring system provides the self-study learner with immediate feedback on their progress. The book contains both British and American English and is ideal for self-study or to complement classroom study.

Business English Language Practice

Corpus Applications in Applied Linguistics

Demonstrates the importance of corpus research to applied linguistics, covering a range of areas.

Modern business and public health: A value co-creation perspective

This third edition of Approaches and Methods in Language Teaching is an extensive revision of the popular and accessible text. Like previous editions, this book surveys the major approaches and methods in language teaching such as Grammar Translation, Audiolingualism, Communicative Language Teaching, and the Natural Approach. It examines each approach and method in terms of its theory of language and language learning, goals, syllabus, teaching activities, teacher and learner roles, materials, and classroom techniques. In addition, this third edition includes content on the teaching and learning environment, with chapters on learners and methods, teachers and methods, plus approaches, methods and the curriculum. Teachers and teachers-in-training will discover that this third edition is a comprehensive survey and analysis of teaching methods used around the world. The book seeks not only to clarify the assumptions behind these methods and their similarities and differences, but also to help teachers explore their own beliefs and practices in language teaching.

This book constitutes the refereed proceedings of the 5th Conference of the Association for Machine Translation in the Americas, AMTA 2002, held in Tiburon, CA, USA, in October 2002. The 18 revised full technical papers, 3 user studies, and 9 system descriptions presented were carefully reviewed and selected for inclusion in the book. Among the issues addressed are hybrid translation environments, resource-limited MT, statistical word-level alignment, word formation rules, rule learning, web-based MT, translation divergences, example-based MT, data-driven MT, classification, contextual translation, the lexicon building process, commercial MT systems, speech-to-speech translation, and language checking systems.

English for Everyone Business English Level 2

ESL Readers and Writers in Higher Education describes the challenges ESL students in U.S. post-secondary institutions face when studying in a second language, and offers suggestions for how teachers, advisors, tutors, and institutions might provide support that meets the reading and writing needs of this very important student population. Because the ESL profession as a whole, including what professionals are doing in the classroom, sits under the umbrella of an institutional response to a language-related challenge, some solutions aimed at helping students achieve optimal proficiency lie outside of the classroom. As such, this book is based on the assertion that language development support is not the sole responsibility of language teachers. Everyone on campuses that hosts ESL students bears some responsibility for these students' language development. Chapters are therefore, intentionally adapted to appeal to a wide variety of readers from classroom teachers, and teachers in training, to admissions officers, academic advisors, and international student advisors.

A Complete Self Study Programme

This book is for anyone is interested in the relationship between grammar and vocabulary. The introduction looks at recent developments in corpus linguistics and second language acquisition research, and outlines the important role which chunks play in textual cohesion and in fluency, as well as in grammar acquisition. The practical part of the book provides practitioners with a large number of classroom suggestions and activities for making grammar teaching more lexical, and for making vocabulary practice more grammatical. Activities move from receptive to productive and can be used on their own or to supplement and enhance coursebook content.

Machine Translation: From Research to Real Users

This volume is the second part of a four-volume set (CCIS 190, CCIS 191, CCIS 192, CCIS 193), which constitutes the refereed proceedings of the First International Conference on Computing and Communications, ACC 2011, held in Kochi, India, in July 2011. The 72 revised full papers presented in this volume were carefully reviewed and selected from a large number of submissions. The papers are organized in topical sections on database and information systems; distributed software development; human computer interaction and interface; ICT; internet and Web computing; mobile computing; multi agent systems; multimedia and video systems; parallel and distributed algorithms; security, trust and privacy.

ESL Readers and Writers in Higher Education

A guide for language teachers, showing how the insights into language chunks can lead to learners acquiring natural and fluent English. It draws from three factors: the use of corpus data; an increased interest by linguists in word partnerships; and the availability of computational tools that can sort the data.

Practical Papers in English Language Education

The workshop series on Text, Speech and Dialogue originated in 1998 with the 1st TSD1998 held in Brno, Czech Republic. This year's TSD2000, already the third in the series, returns to Brno and to its organizers from the Faculty of Informatics at the Masaryk University. As shown by the ever growing interest in TSD series, this annual workshop developed into the prime meeting of speech and language researchers from both sides of the former Iron Curtain, which provides a unique opportunity to get acquainted with the current activities in all aspects of language communication and to witness the amazing vitality of researchers from the former East Block countries. Thanks need to be extended to all who continue to make the TSD workshop series such a success: 1st, to the authors themselves, without whom TSD2000 would not exist; next, to all organizations that support TSD2000, among them the International Speech Communication Association, the Faculty of Informatics at the Masaryk University in Brno and the Faculty of Applied Sciences, West Bohemia University in Plzen; 2nd and last but not least, to the organizers and members of the Program Committee who spent much effort to make TSD2000 success and who reviewed 131 contributions submitted from all corners of the world and accepted 75 out of them for presentation at the workshop. This book is evidence of the success of all involved.

Lexical Grammar

Winner - British Council Innovation in English Language Teaching Award 2006 This book was written for language teachers by language teachers, with a view to encouraging readers to use more tasks in their lessons, and to explore for themselves various aspects of task-based teaching and learning. It gives insights into ways in which tasks can be designed, adapted and implemented in a range of teaching contexts and illustrates ways in which tasks and task-based learning can be investigated as a research activity. Practising language teachers and student professionals on MA TESOL/Applied Linguistics courses will find this a rich resource of varied experience in the classroom and a stimulus to their own qualitative studies.

Advances in Computing and Communications, Part II

This book contains substantially extended and revised versions of the best papers from the 13th International Conference on Enterprise Information Systems (ICEIS 2011), held in Beijing, China, June 8-11, 2011. The 27 papers included (plus one invited paper) in this volume were carefully reviewed and selected from 57 full papers presented at the conference (out of 402 submissions). They reflect state-of-the-art research that is often driven by real-world applications, thus successfully relating the academic with the industrial community. The topics covered are: databases and information systems integration, artificial intelligence and decision support systems, information systems analysis and specification, software agents and Internet computing, and human-computer interaction.

The Company Words Keep

Discourse in English Language Education is designed to introduce students to the major concepts and issues in discourse analysis and its applications to language education, drawing on the key research

from a range of approaches. This will be essential reading for upper undergraduates and postgraduates with interests in applied linguistics, TESOL and mother tongue language education.

Text, Speech and Dialogue

2012 International Conference on Affective Computing and Intelligent Interaction (ICACII 2012) was the most comprehensive conference focused on the various aspects of advances in Affective Computing and Intelligent Interaction. The conference provided a rare opportunity to bring together worldwide academic researchers and practitioners for exchanging the latest developments and applications in this field such as Intelligent Computing, Affective Computing, Machine Learning, Business Intelligence and HCI. This volume is a collection of 119 papers selected from 410 submissions from universities and industries all over the world, based on their quality and relevancy to the conference. All of the papers have been peer-reviewed by selected experts.

Teachers Exploring Tasks in English Language Teaching

This book investigates the current EFL market in East Asia, focusing on K-12, university, and cram school English education in Japan, China, and Korea. It explores prevailing educational practices by both Asian learners and teachers of English, contrasting them with Western practices, and illuminating why Western pedagogical methods have often encountered tremendous resistance from teachers, administrators, parents, and students in the East Asian classroom context. After establishing this cultural contrast of pedagogical norms, the book presents a series of practical means for adapting Western teaching practices and philosophies to better suit the learning styles of East Asian students and the cultural context and practical realities of the East Asian classroom, offering both Western teachers working in East Asia and native East Asian teachers realistic plans for turning theory into successful practice. These plans are divided by subsections, focusing on the linguistic subskills being taught: listening/speaking, reading, and writing. Each section includes two contrasting lesson plans to demonstrate how the educational theories and practices promoted by the author can often be implemented by making relatively simple changes to existing practices that incorporate a fuller understanding of how to actively assist students in developing new learning styles and behaviors.

Enterprise Information Systems

Chinese students are the largest international student group in UK universities today, yet little is known about their undergraduate writing and the challenges they face. Drawing on the British Academic Written English corpus - a large corpus of proficient undergraduate student writing collected in the UK in the early 2000s - this study explores Chinese students' written assignments in English in a range of university disciplines, contrasting these with assignments from British students. The study is supplemented by questionnaire and interview datasets with discipline lecturers, writing tutors and students, and provides a comprehensive picture of the Chinese student writer today. Theoretically framed through work within academic literacies and lexical priming, the author seeks to explore what we know about Chinese students' writing and to extend these findings to undergraduate writing more generally. In a globalized educational environment, it is important for educators to understand differences in writing styles across the student body, and to move from the widespread deficit model of student writing towards a descriptive model which embraces different ways of achieving success. Chinese Students' Writing in English will be of value to researchers, EAP tutors, and university lecturers teaching Chinese students in the UK, China, and other English or Chinese-speaking countries.

Implementing the Lexical Approach

This book constitutes the thoroughly refereed proceedings of the 22nd International Conference on Computer Processing of Oriental Languages, ICCPOL 2009, held in Hong Kong, in March 2009. The 25 revised full papers and 15 revised poster papers presented were carefully reviewed and selected from 63 submissions. The papers address a variety of topics in natural language processing and its applications, including word segmentation, phrase and term extraction, chunking and parsing, semantic labelling, opinion mining, ontology construction, machine translation, information extraction, document summarization, and so on.

Resources in Education

Spanish Vocabulary Learning in Meaning-Oriented Instruction is the first comprehensive overview of current research and instructional practices into Spanish vocabulary acquisition through the lens of Meaning-Oriented Instruction (MOI). Key features: • a breadth of topics including language variation, input, tasks and processing specificity, incidental learning, idiomatic language, lexicographic perspectives, lexicosemantic representation, vocabulary testing, and receptive and productive vocabulary; • a combination of theory and practical guidance highlighting pedagogical best practices in the teaching of vocabulary; • guidance on the difficulties teachers face when teaching vocabulary in the classroom; • clear explanations with plenty of examples and useful references; • tasks and activities that help teachers move from a traditional curricular approach to a more innovative and engaging one focused on communicating, completing tasks, and learning content. Written by an international cohort of scholars in a succinct and accessible manner, Spanish Vocabulary Learning in Meaning-Oriented Instruction is an essential resource for teachers of Spanish at all levels. It is also an excellent reference book for researchers and both undergraduate and graduate students interested in Spanish vocabulary acquisition.

GRE 5-Hour Quick Prep For Dummies

For the first time four workshops have been held in conjunction with the 8th Object-Oriented Information Systems conference, OOIS 2002, to encourage interaction between researchers and practitioners. Workshop topics are, of course, inline with the conference's scientific scope and provide a forum for groups of researchers and practitioners to meet together more closely and to exchange opinions and advanced ideas, and to share preliminary results on focused issues in an atmosphere that fosters interaction and problem solving. The conference hosted four one-day workshops. The four selected workshops were fully in the spirit of a workshop session hosted by a main conference. Indeed, OOIS deals with all the topics related to the use of object-oriented techniques for the development of information systems. The four workshops are very specific and contribute to enlarging the spectrum of the more general topics treated in the main conference. The first workshop focused on a very specific and key concept of object-oriented development, the specialization/generalization hierarchy. The second one explored the use of "non-traditional" approaches (at the edge of object-oriented techniques, such as aspects, AI, etc.) to improve reuse. The third workshop dealt with optimization in Web-based information systems. And finally the fourth workshop investigated issues related to model-driven software development.
