The Ancient Near East

This anthology brought together the most important historical, legal, mythological, liturgical, and secular texts of the ancient Near East, with the purpose of providing a rich contextual base for understanding the people, cultures, and literature of the Old Testament. A scholar of religious thought and biblical

archaeology, James Pritchard recruited the foremost linguists, historians, and archaeologists to select and translate the texts. The goal, in his words, was "a better understanding of the likenesses and differences which existed between Israel and the surrounding cultures." Before the publication of these volumes, students of the Old Testament found themselves having to search out scattered books and journals in various languages. This anthology brought these invaluable documents together, in one place and in one language, thereby expanding the meaning and significance of the Bible for generations of students and readers. As one reviewer put it, "This great volume is one of the most notable to have appeared in the field of Old Testament scholarship this century." Princeton published a follow-up companion volume, *The Ancient Near East in Pictures Relating to the Old Testament* (1954), and later a one-volume abridgment of the two, *The Ancient Near East: An Anthology of Texts and Pictures* (1958). The continued popularity of this work in its various forms demonstrates that anthologies have a very important role to play in education--and in the mission of a university press.

Ancient Near East in Pictures

This volume of Collected Essays brings together for the first time the range of Winter's pioneering studies related to Neo-Assyrian relief sculpture and seals, Phoenician and Syrian ivory and bronze production, and inter-polity connections across the various cultures of first millennium B.C.E. from the Aegean to Iran. Consistent threads are an emphasis on the potential for art historical analysis to yield 'history' in the broadest sense; the importance of making the theoretical frame of interpretation explicit; and the necessity of textual evidence being brought to bear on upon elements of formal analysis and archaeological context.

The Ancient Near East

The Ancient Near East reveals three millennia of history (c. 3500–500 bc) in a single work. Liverani draws upon over 25 years' worth of experience and this personal odyssey has enabled him to retrace the history of the peoples of the Ancient Near East. The history of the Sumerians, Hittites, Assyrians, Babylonians and more is meticulously detailed by one of the leading scholars of Assyriology. Utilizing research derived from the most recent archaeological finds, the text has been fully revised for this English edition and explores Liverani's current thinking on the history of the Ancient Near East. The rich and varied illustrations for each historical period, augmented by new images for this edition, provide insights into the material and textual sources for the Ancient Near East. Many highlight the ingenuity and technological prowess of the peoples in the Ancient East. Never before available in English, *The Ancient Near East* represents one of the greatest books ever written on the subject and is a must read for students who will not have had the chance to explore the depth of Liverani's scholarship.

The Ancient Near East: A Very Short Introduction

This brief survey text tells the story of Judaism. Through the lens of modern biblical scholarship, Christine Elizabeth Hayes explores the shifting cultural contexts-the Babylonian exile, the Roman Empire, the Byzantine period, the rise of Christianity-that affected Jewish thought and practice, and laid the groundwork for the Talmudic era and its modern legacy. Thematic chapters explore the evolution of Judaism through its beginnings in biblical monotheism, the Second Temple Period in Palestine, the interaction of Hellenism and Judaism, the spread of rabbinic authority, and the essence of ethno-religious Jewish identity.

A Companion to the Ancient Near East

The Ancient Near East embraces a vast geographical area, from the borders of Iran and Afghanistan in the east to the Levant and Anatolia, and from the Black Sea in the north to Egypt in the south. It was a region of enormous cultural, political and linguistic diversity. In this authoritative new study, Amélie Kuhrt examines its history from the earliest written documents to the conquest of Alexander the Great, c.3000-330 BC. This work dispels many of the misapprehensions which have surrounded the study of the region. It provides a lucid, up-to-date narrative which takes into account the latest archaeological and textual discoveries and deals with the complex problems of interpretation and methodology. The Ancient Near East is an essential text for all students of history of this region and a valuable introduction for students and scholars working in related subjects. Winner of the AHO's 1997 James Henry Breasted Award.

Readings from the Ancient Near East

'This volume is a massive leap forward over any previous synthesis of the subject and includes at the very minimum so much information that its academic and scientific value is self evident. The freshness and profundity of Dumbrill's approach to the subject exceeds anything attempted before.' 'The mythology of ancient Mesopotamia proves readable as tonal allegory when its numerology is decoded as tuning theory. By the third millennium BC both pentatonic and heptatonic tunings were quantified throughout the entire 12-tone gamut. Richard Dumbrill has documented the massive empirical experience with strings and pipes that makes this early musicalization of the universe believable.' The volume consists in 4 parts with foreword by Prof. Ernest McClain. The first is about the decipherment, translation and interpretation of the few theoretical cuneiform texts dating from the Old Babylonian period, about 2000 BC, to Neo Assyrian up to the mid first millennium BC. Dumbrill undertakes comparative analyses and criticism of various interpretations having preceded his own and introduces new material. The second part is about the Hurrian hymns, the earliest music ever written, circa 1400 BC, and are

produced in their integrality. Attempts to the interpretation of Hymn H.6 are compared and followed by Dumbrill's methodology and interpretation. Each fragment of the collection is analyzed separately. The part concludes with statistical analyses attempting at the reconstruction of some Hurrian rules of composition. The third part consists in the organology with relevant philology and is the largest collection of the Mesopotamian instrumentarium. The last part is a unique lexicon of all known Mesopotamian terminology, with quotation of texts in which the philology appears. The book had been previously published under the title of 'The Musicology and Organology of the Ancient Near East' and now appears under its new title.

A History of the Ancient Near East, ca. 3000-323 BC

Have you ever wondered what it was like to live in the past? Did they experience reality in a much different way than we do now with our media, our fast travel, our fast food, and our leisure? Do you especially think about what it might have been like to have lived in Bible times? What would your childhood have been like? How would you have chosen a marriage partner? How would you probably have made a living? What sort of house would you have lived in? What diseases would have threatened your daily existence? How long would you have lived? How would you have practiced your religion? These are a few of the intriguing questions answered by this study. The book takes you on a journey into the past to view daily life through the lenses of not only texts but archaeological finds. The information from the past is also filtered through ethnographic studies of more contemporaneous, yet traditional, societies in the Middle East. The result is a presentation that may surprise you--even shock you--at times, but always will interest you.

Bible Believer's Archaeology - Volume 2

"God our Savior desires everyone to be saved" (1Tim 2:4). Does God get what God wants? "Yes, but--" depending on how we read the Bible. The Bible is universal: One God, Sovereign Creator of everything, especially humanity in God's image, God's partner to manage creation. Science and evolution say humanity evolved, gradually acquiring superior capabilities. We have yet to transcend animal nature and acknowledge oneness of creation under God. Humans exploited our semi-divine status, becoming alienated. God chose Israelites/Jews for blessing and reconciling humanity. They exploited chosenness, so God sent the Jew Jesus to reveal God's gracious concern for all people. Roman political and Jewish religious power killed Jesus, but he appeared resurrected to his disciples, who proclaimed him Savior. God gave another Jew, Paul, a vision of Jesus resurrected and appointed him to proclaim God's reconciliation to Gentiles. Paul taught that through the faithfulness of Jesus, Gentiles too become God's people and share Israel's blessings without becoming Jews. All who experience reconciliation share Jesus's partnership with God. "We toil and struggle, because we have our hope set on the living God, who is the Savior of all people, especially of those who believe" (1 Tim 4:10).

Creation Stories of the Middle East

Children were an important part of the ancient Near Eastern household. This idea seems straightforward, but it can be understood in many ways. On a basic level, children are necessary for the perpetuation of a household. On a deeper level, the definitions of child and member of the household are far from categorical. This book begins to explore the multiple definitions of child and the way the child fits within a household. It examines what membership in the household looks like for children and what factors contribute to it. A study addressing what a child is and how a child's gender and social status affect her place in the household is vital to a proper understanding of the ancient Near Eastern household. Despite their importance, children have long been marginalized in discussions of ancient societies. Only recently has this trend begun to change within biblical and ancient Near Eastern scholarship. A recent wave of studies, especially in relation to the Hebrew Bible, has started to address children in their own right. In light of the current state of scholarship on children, the purpose of this book is threefold. First, Garroway continues to fill out the picture of the child in the ancient Near East by compiling child-centric texts and archaeological realia. In analyzing these materials, she surveys the relationship between children and ancient Near Eastern society by examining the extent to which structuring forces in a community, such as social status and gender, contribute to the process of a child's becoming a member of his household and society. Finally, this information provides a base for future research, for example, a cross-cultural study of children in the ancient Near East in Classical Antiquity.

Moon-o-theism, Volume II of II

Covers the major languages, language families, and writing systems attested in the Ancient Near East Filled with enlightening chapters by noted experts in the field, this book introduces Ancient Near Eastern (ANE) languages and language families used during the time period of roughly 3200 BCE to the second century CE in the areas of Egypt, the Levant, eastern Anatolia, Mesopotamia, and Iran. In addition to providing grammatical sketches of the respective languages, the book focuses on socio-linguistic questions such as language contact, diglossia, the development of literary standard languages, and the development of diplomatic languages or "linguae francae." It also addresses the interaction of Ancient Near Eastern languages with each other and their roles within the political and cultural systems of ANE societies. Presented in five parts, *The Companion to Ancient Near Eastern Languages* provides readers with in-depth chapter coverage of the writing systems of ANE, starting with their decipherment. It looks at the emergence of cuneiform writing; the development of Egyptian writing in the fourth and early third millennium BCI; and the emergence of alphabetic scripts. The book also covers many of the individual languages themselves, including Sumerian, Egyptian, Akkadian, Hittite, Pre- and Post-Exilic Hebrew, Phoenician, Ancient South Arabian, and more. Provides an overview of all major language families and writing systems used in the Ancient Near East during the time period from the beginning of writing (approximately 3200 BCE) to the second century CE (end of cuneiform writing) Addresses how the individual languages interacted with each other and how they functioned in the societies that used them Written by leading experts on the languages and topics *The Companion to Ancient Near Eastern Languages* is an ideal book for undergraduate students and scholars interested in Ancient Near Eastern cultures and languages or certain aspects of these languages.

A Companion to the Archaeology of the Ancient Near East

This volume describes how the rhetorical devices used in Judges inspire its readers to support a divinely appointed Judahite king who endorses the deuteronomic agenda to rid the land of foreigners, to maintain inter-tribal loyalty to YHWH's cult, and to uphold social justice. Matters of rhetorical concern interpreted here include the superimposed cycle-motif and tribal-political schemata, concerns reflected in the plot-layers of each hero story, the force of narrative analogy for characterization, the strategy of entrapment which foreshadows portrayals of Saul and David in 1 Samuel, and the relation between Judges' implied situation of composition and its compiler's intention. In addition to offering new insights into the rhetorical strategy of the Judges compiler, this book illustrates a new method for understanding how plot-layered stories work.

A Companion to Ancient Near Eastern Languages

This introduction to the Ancient Near East includes coverage of Egypt and a balance of political, social, and cultural coverage. Organized by the periods, kingdoms, and empires generally used in Near Eastern political history, the text interlaces social and cultural history with the political narrative. This combination allows students to get a rounded introduction to the subject of Ancient Near Eastern history. An emphasis on problems and areas of uncertainty helps students understand how evidence is used to create interpretations and allows them to realize that several different interpretations of the same evidence are possible. This introduction to the Ancient Near East includes coverage of Egypt and a balance of political, social, and cultural coverage.
