Professional Paper

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Professional Paper

This open access book provides an overview of the progress in landslide research and technology and is part of a book series of the International Consortium on Landslides (ICL). The book provides a common platform for the publication of recent progress in landslide research and technology for practical applications and the benefit for the society contributing to the Kyoto Landslide Commitment 2020, which is expected to continue up to 2030 and even beyond to globally promote the understanding and reduction of landslide disaster risk, as well as to address the 2030 Agenda Sustainable Development Goals.

International Journal of Indian Psychology, Volume 6, Issue 1, (No. 2)

Written by a teacher for teachers, *Teaching Resilience and Mental Health Across the Curriculum* is an integrative approach to pedagogy for educators at the high school and college level to survive, thrive, and sustain in the profession. Blending theory, research, and practice for a comprehensive program for teachers to incorporate well-being tools into the classroom, each of the book's five foundations includes engaging information, strategies, real-world examples, interactive reflection questions, and activities that can be directly applied to teaching and life. Practical guidance in designing real-world curriculum is offered alongside accessible strategies for engagement, investment, and active learning in student-centered classrooms. An essential guide for teachers, it includes techniques for incorporating well-being that are grounded in culturally responsive teaching, trauma-informed instruction, mental health, resilience, and emotional literacy. Teachers will also gain insight on how to make the career sustainable through practices for self-compassion and authentic self-care so they can not only survive, but flourish in and out of school. For all the challenges that students and teachers face, this book defines what it means, and what it takes, to teach in today's classrooms.

EJEL Volume 10 Issue 1

There are varieties of books in the market, easily available for the researchers in Ayurveda but no book is still designed having a stepwise approach for writing a research paper in Ayurveda. Furthermore, every beginner should be acquainted with the different components of a research paper like introduction, abstract, conclusion etc. The skill of writing a research paper is not acquired just by reading books or by mere learning in classrooms. The book serves the purpose of giving a conceptual idea of writing a research paper in Ayurveda. The stepwise aspect makes the learners easy to understand the components of a research paper. The book has been added a number of examples to make it clear 'what is right' and 'what is wrong'.

The International Journal of Indian Psychology, Volume 7, Issue 1, Version 1

First multi-year cumulation covers six years: 1965-70.

Progress in Landslide Research and Technology, Volume 1 Issue 1, 2022

Focusing on the integral role of the researcher, *Qualitative Research for the Social Sciences* uses a conversational writing style that draws readers into the excitement of the research process. Lichtman offers a balanced and nuanced approach, covering the full range of qualitative methodologies and viewpoints about the field, including coverage of social media as a tool to facilitate research or as a venue for study. After presenting theoretical concepts and a historical overview, Lichtman guides readers, step by step, through the research process, addressing issues of analyzing data, presenting completed research, and evaluating research. Real-world examples from across the social sciences provide both practical and theoretical information, helping readers understand abstract ideas and apply them to their own research.

EJBRM Volume 9 Issue 1

Research Laboratory Safety explains the most important prerequisite when working in a laboratory: Knowing the potential hazards of equipment and the chemical materials to be employed. Students learn how to assess and control risks in a research laboratory and to identify a possible danger. An approach on the hazard classes such as physical, chemical, biological and radiation hazards is given and exercises to each class prepare for exams.

Professional Paper, Issues 1-2

"This book provides chapters describing in more detail the structure of information systems pertaining to enabling technologies, aspects of their implementations, IT/IS governing, risk management, disaster management, interrelated manufacturing and supply chain strategies, and new IT paradigms"--Provided by publisher.

EJEL Volume 9 Issue 1

The International Student's Guide to Writing a Research Paper is a reference text for undergraduate students and those in ESL or bridge courses who are writing a research paper for the first time. This book is partly an update of Writing a Research Paper (by Lionel Menasche, 1998) and partly a companion to The ESL Writer's Handbook. Each section of the book includes a discrete task called a Building Block, which requires students to apply the skills learned toward the development of their own paper. This step-by-step approach allows students to construct knowledge as they become more familiar with the process, making writing a research paper a less intimidating task. Special features: This guide uses simple direct language for those for whom writing a research paper is new. Most example writing is from international students in an ESL program or first-year writing class, including two sample papers—one in APA and one in MLA. A section on responding to instructor feedback to provide students with the tools to read and understand comments and use them to improve the first draft. A subsection dedicated to constructing clear and cohesive paragraphs and sentences. The guide includes citation and style examples in MLA 8th edition.

Technical Paper

Professor Bill Faulkner was the father of tourism research in Australia, having spent 20 years in the field, first within government and then in academe. He was a visionary whose impact on the tourism research field extended well beyond Australia. This work contains a collection of Faulkner's publications grouped thematically under the headings Methods, Events, Destinations and Research Agenda. The sections demonstrate how his thinking evolved over time and influenced the intellectual development of the field itself. An introductory chapter describes Faulkner's life and the contribution that he made to the field of tourism research.

Technical Paper (United States. Bureau of the Census).

International Journal of Indian Psychology, Volume 6, Issue 1, (No. 4)

Index of Conference Proceedings

Appropriate for sociology, psychology, and nursing students, this textbook examines the biological and physiological changes that affect older people's daily functioning, their risk of chronic diseases, the psychological changes that can occur, and the social implications of aging.

Cumulative Author Index to Psychological Abstracts

Includes recommended citation format styles for journals, books, conference publications, patents, audio visuals, electronic information, maps, legal materials, newspaper articles, bibliographies, dissertations, and scientific reports.

Social Gerontology

Heritage stones are building and ornamental stones that have special significance in human culture. The papers in this volume discuss a wide variety of such materials, including stones from Europe, Asia, North and South America, Africa and Australia. Igneous (basalt, porphyry, granite), sedimentary (sandstone, limestone) and metamorphic (marble, quartzite, gneiss, soapstone, slate) stones are featured. These have been utilized over long periods of time for a wide range of uses contributing to the historic fabric of the built environment. Many of these stones are of international significance, and so are potential Global Heritage Stone Resources, that is stones that have the requisite qualities for international recognition by the Heritage Stones Subcommittee of the International Union of Geological Sciences. The papers bring together diverse information on these stones ranging from their geological setting and quarry locations to mechanical properties, current availability, and uses over time. As such the papers can serve as an entry into the literature on these important stones.

National Library of Medicine Recommended Formats for Bibliographic Citation

Increasing employment and supporting people into work are key elements of the Government's public health and welfare reform agendas. This independent review, commissioned by the Department for Work and Pensions, examines scientific evidence on the health benefits of work, focusing on adults of working age and the common health problems that account for two-thirds of sickness absence and long-term incapacity. The study finds that there is a strong evidence base showing that work is generally good for physical and mental health and well-being, taking into account the nature and quality of work and its social context, and that worklessness is associated with poorer physical and mental health. Work can be therapeutic and can reverse the adverse health effects of unemployment, in relation to healthy people of working age, for many disabled people, for most people with common health problems and for social security beneficiaries.

Global Heritage Stone

Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition. Gerontological Nursing: Competencies for Care, Second Edition is a comprehensive and student-accessible text that offers a holistic and inter-disciplinary approach to caring for the elderly. The framework for the text is built around the Core Competencies set forth by the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Building upon their knowledge in prior medical surgical courses, this text gives students the skills and theory needed to provide outstanding care for the growing elderly population. It is the first of its kind to have more than 40 contributing authors from many different disciplines. Some of the key features include chapter outlines, learning objectives, discussion questions, personal reflection boxes, and case studies.

African Newsletter on Occupational Health and Safety

Statistical Power Analysis is a nontechnical guide to power analysis in research planning that provides users of applied statistics with the tools they need for more effective analysis. The Second Edition includes: * a chapter covering power analysis in set correlation and multivariate methods; * a chapter considering effect size, psychometric reliability, and the efficacy of "qualifying" dependent variables and; * expanded power and sample size tables for multiple regression/correlation.

Is Work Good for Your Health and Well-being?

With the world's population getting increasingly older, there has never been a more pressing need for the study of old age and ageing. An Introduction to Gerontology provides a wide-ranging introduction to this important topic. By assuming no prior expert knowledge and avoiding jargon, this book will guide students through all the main subjects in gerontology, covering both traditional areas, such as biological and social ageing, and more contemporary areas, such as technology, the arts and sexuality. An Introduction to Gerontology is written by a team of international authors with multidisciplinary backgrounds who draw evidence from a variety of different perspectives and traditions.

Gerontological Nursing: Competencies for Care

"Sexual assault continues to be a pervasive problem, both for society in general and within the military community. To assist the Air Force in its continued efforts to combat sexual assault within its ranks, we reviewed the existing empirical literature on the characteristics and behaviors of adult perpetrators who commit sexual assault against other adults. Our search was not limited to studies of military populations. While a vast majority of the existing literature has focused on sole male perpetrators who assault female victims, we identified some research on other types of perpetrators, including female sexual assault perpetrators, men who perpetrate assault against other men, and perpetrators who participate in group sexual assault. This body of research indicates that adult perpetrators are diverse in terms of their demographics, background characteristics, and motivations. Moreover, research indicates that sexual assault perpetration is likely influenced by a combination of factors, including an individual's developmental and family history; his or her personality, including attitudes/cognitions; and environmental factors, including peer attitudes and alcohol consumption. The complexity of factors that influence sexual assault perpetration and the multiple pathways that lead to an attack make it difficult to predict whether an individual is prone to commit sexual assault. While predicting sexual assault perpetration is problematic, we identified a number of factors related to perpetration that may be relevant for intervention efforts and offer recommendations for the Air Force"--Publisher's web site.

Journal of the California Dental Association

Vols. for 1963- include as pt. 2 of the Jan. issue: Medical subject headings.

C D A Journal

Digital technology has revolutionized modern television but what exactly has changed? The history of the digital transition is one of great scientific achievement, expensive failures, and significant political and industrial power struggles. In *Shut Off: The Canadian Digital Television Transition*, Gregory Taylor examines the technology, institutional players, and the policies that have shaped Canada's efforts to switch from analogue to digital television broadcasting. Taylor shows how digital television is part of a global media movement by comparing the Canadian experience with the ways in which the digital transition has been managed worldwide. *Shut Off* is about more than television - the digital transition is also a precursor for new developments in mobile digital media. The wireless spectrum freed by the move to digital television is a multi-billion dollar public resource, whose auction is impending. The book reveals how digital broadcasting has been the site of dramatic change in the political economy of Canadian media, and questions the market-driven process through which the still incomplete transition has unfolded. Considering wide-ranging issues such as equal access and television as a public good, Taylor highlights public and institutional actors in the policy process to provide an analysis of government and industry. Succinct and insightful, *Shut Off* is a timely assessment of a period of technological and economic upheaval in Canadian broadcasting.

Statistical Power Analysis for the Behavioral Sciences

Drawing on interdisciplinary, cross-national perspectives, this open access book contributes to the development of a coherent scientific discourse on social exclusion of older people. The book considers five domains of exclusion (services; economic; social relations; civic and socio-cultural; and community and spatial domains), with three chapters dedicated to analysing different dimensions of each exclusion domain. The book also examines the interrelationships between different forms of exclusion, and how outcomes and processes of different kinds of exclusion can be related to one another. In doing so, major cross-cutting themes, such as rights and identity, inclusive service infrastructures, and displacement of marginalised older adult groups, are considered. Finally, in a series of chapters written by international policy stakeholders and policy researchers, the book analyses key policies relevant to social exclusion and older people, including debates linked to sustainable development, EU policy and social rights, welfare and pensions systems, and planning and development. The book's approach helps to illuminate the comprehensive multidimensionality of social exclusion, and provides insight into the relative nature of disadvantage in later life. With 77 contributors working across 28 nations, the book presents a forward-looking research agenda for social exclusion amongst older people, and will be an important resource for students, researchers and policy stakeholders working on ageing.

An Introduction to Gerontology

This is the first book to introduce the new statistics - effect sizes, confidence intervals, and meta-analysis - in an accessible way. It is chock full of practical examples and tips on how to analyze and report

research results using these techniques. The book is invaluable to readers interested in meeting the new APA Publication Manual guidelines by adopting the new statistics - which are more informative than null hypothesis significance testing, and becoming widely used in many disciplines. Accompanying the book is the Exploratory Software for Confidence Intervals (ESCI) package, free software that runs under Excel and is accessible at www.thenewstatistics.com. The book's exercises use ESCI's simulations, which are highly visual and interactive, to engage users and encourage exploration. Working with the simulations strengthens understanding of key statistical ideas. There are also many examples, and detailed guidance to show readers how to analyze their own data using the new statistics, and practical strategies for interpreting the results. A particular strength of the book is its explanation of meta-analysis, using simple diagrams and examples. Understanding meta-analysis is increasingly important, even at undergraduate levels, because medicine, psychology and many other disciplines now use meta-analysis to assemble the evidence needed for evidence-based practice. The book's pedagogical program, built on cognitive science principles, reinforces learning: Boxes provide "evidence-based" advice on the most effective statistical techniques. Numerous examples reinforce learning, and show that many disciplines are using the new statistics. Graphs are tied in with ESCI to make important concepts vividly clear and memorable. Opening overviews and end of chapter take-home messages summarize key points. Exercises encourage exploration, deep understanding, and practical applications. This highly accessible book is intended as the core text for any course that emphasizes the new statistics, or as a supplementary text for graduate and/or advanced undergraduate courses in statistics and research methods in departments of psychology, education, human development, nursing, and natural, social, and life sciences. Researchers and practitioners interested in understanding the new statistics, and future published research, will also appreciate this book. A basic familiarity with introductory statistics is assumed.

A Review of the Literature on Sexual Assault Perpetrator Characteristics and Behaviors

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need to know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)." - online AHRQ blurb, <http://www.ahrq.gov/qual/nurseshdbk/>

Dissertation Abstracts International

This book discusses the crisis of caregiving as it affects parents seeking to provide good care for their children and people who care for their aged or disabled relatives. Discussed are alternatives to the present welfare system, a description of the current safety net programs, and an analysis of the privatization of social services.

Cumulated Index Medicus

Proceedings of the Third Jenner International Glycoimmunology meeting held in Il Ciocco, Tuscany, Italy, October 11-14, 1994

Index Medicus

This book looks at the symbolic side of globalization, development, and aging. Many of the dimensions that are discussed represent updates of past debates but some are entirely new. In particular, globalization is accompanied by subtle social imagery that profoundly shapes the way institutions and identities are imagined. The process of aging and persons' sense of identity is no exception. The underlying assumptions that pervade globalization inform how critical dimensions of aging are discussed and institutionalized. The application of marketplace imagery, for example, may impact attempts for holism in how aging is studied and the prospects for human agency during the aging process. This book offers a special look into how temporality, technology, normativity, and empiricism structure the symbolic side of globalization and influence dominant images of the aging process. Current debates about globalization and aging are expanded by helping readers see the social imagery that is both subtly behind globalization and at the forefront of shaping the aging experience.

Nutrition Abstracts and Reviews

The population of the United States is growing inexorably older. With birth rates historically low and life expectancy continuing to rise, the age distribution of the population in the United States is growing steadily older. This demographic shift is occurring at a time of major economic and social changes, which have important implications for the growing elderly population. Other changes, such as the move away from defined-benefit toward defined-contribution retirement plans, changes in some corporate and municipal pension plans as a result of market pressures, and the 2008 financial crisis precipitated by the crash of the housing market, all have economic implications for older people. They are also likely to make it more difficult for certain groups of future retirees to find their retirements at the level that they had planned and would like. To deal effectively with the challenges created by population aging, it is vital to first understand these demographic, economic, and social changes and, to the extent possible, their causes, consequences, and implications. Sociology offers a knowledge base, a number of useful analytic approaches and tools, and unique theoretical perspectives that can be important aids to this task. The Panel on New Directions in Social Demography, Social Epidemiology, and the Sociology of Aging was established in August 2010 under the auspices of the Committee on Population of the National Research Council to prepare a report that evaluates the recent contributions of social demography, social epidemiology, and sociology to the study of aging and seeks to identify promising new research in these fields. *Perspectives on the Future of the Sociology of Aging* provides candid and critical comments that will assist the institution in making the final published volume as sound as possible and to ensure that the volume meets institutional standards for objectivity, evidence, and responsiveness to the study charge.

Shut Off

Designed for courses in Marriage and the Family, and Sociology of the Family. This Canadian text provides a comprehensive overview of the nature, structure, history, and future of the family. It examines up-to-the-minute topics such as the effects of evolving gender roles and attitudes toward sexual orientation.

Social Exclusion in Later Life

Written in a detailed and fascinating manner, this book is ideal for general readers interested in the English language.

Understanding The New Statistics

A respected resource for decades, the Guide for the Care and Use of Laboratory Animals has been updated by a committee of experts, taking into consideration input from the scientific and laboratory animal communities and the public at large. The Guide incorporates new scientific information on common laboratory animals, including aquatic species, and includes extensive references. It is organized around major components of animal use: Key concepts of animal care and use. The Guide sets the framework for the humane care and use of laboratory animals. Animal care and use program. The Guide discusses the concept of a broad Program of Animal Care and Use, including roles and responsibilities of the Institutional Official, Attending Veterinarian and the Institutional Animal Care and Use Committee. Animal environment, husbandry, and management. A chapter on this topic is now divided into sections on terrestrial and aquatic animals and provides recommendations for housing and environment, husbandry, behavioral and population management, and more. Veterinary care. The Guide discusses veterinary care and the responsibilities of the Attending Veterinarian. It includes recommendations on animal procurement and transportation, preventive medicine (including animal biosecurity), and clinical care and management. The Guide addresses distress and pain recognition and relief, and issues surrounding euthanasia. Physical plant. The Guide identifies design issues, providing construction guidelines for functional areas; considerations such as drainage, vibration and noise control, and environmental monitoring; and specialized facilities for animal housing and research needs. The Guide for the Care and Use of Laboratory Animals provides a framework for the judgments required in the management of animal facilities. This updated and expanded resource of proven value will be important to scientists and researchers, veterinarians, animal care personnel, facilities managers, institutional administrators, policy makers involved in research issues, and animal welfare advocates.

Patient Safety and Quality

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The Crisis of Caregiving

How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

Glycoimmunology

The aging of the population of the United States is occurring at a time of major economic and social changes. These economic changes include consideration of increases in the age of eligibility for Social Security and Medicare and possible changes in benefit levels. Furthermore, changes in the social context in which older individuals and families function may well affect the nature of key social relationships and institutions that define the environment for older persons. Sociology offers a knowledge base, a number of useful analytic approaches and tools, and unique theoretical perspectives that can facilitate understanding of these demographic, economic, and social changes and, to the extent possible, their causes, consequences and implications. *The Future of the Sociology of Aging: An Agenda for Action* evaluates the recent contributions of social demography, social epidemiology and sociology to the study of aging and identifies promising new research directions in these sub-fields. Included in this study are nine papers prepared by experts in sociology, demography, social genomics, public health, and other fields, that highlight the broad array of tools and perspectives that can provide the basis for further advancing the understanding of aging processes in ways that can inform policy. This report discusses the role of sociology in what is a wide-ranging and diverse field of study; a proposed three-dimensional conceptual model for studying social processes in aging over the life cycle; a review of existing databases, data needs and opportunities, primarily in the area of measurement of

interhousehold and intergenerational transmission of resources, biomarkers and biosocial interactions; and a summary of roadblocks and bridges to transdisciplinary research that will affect the future directions of the field of sociology of aging.

British Education Index

Emerging and currently available technologies offer great promise for helping older adults, even those without serious disabilities, to live healthy, comfortable, and productive lives. What technologies offer the most potential benefit? What challenges must be overcome, what problems must be solved, for this promise to be fulfilled? How can federal agencies like the National Institute on Aging best use their resources to support the translation from laboratory findings to useful, marketable products and services? *Technology for Adaptive Aging* is the product of a workshop that brought together distinguished experts in aging research and in technology to discuss applications of technology to communication, education and learning, employment, health, living environments, and transportation for older adults. It includes all of the workshop papers and the report of the committee that organized the workshop. The committee report synthesizes and evaluates the points made in the workshop papers and recommends priorities for federal support of translational research in technology for older adults.

organisational behaviour in Southern Africa, 2nd edition

This volume and its companion, *The new dynamics of ageing volume 2*, provide comprehensive multi-disciplinary overviews of the very latest research on ageing. It reports the outcomes of the most concerted investigation ever undertaken into both the influence shaping the changing nature of ageing and its consequences for individuals and society. This book concentrates on three major themes: active ageing, design for ageing well and the relationship between ageing and socio-economic development. Each chapter provides a state of the art topic summary as well as reporting the essential research findings from *New Dynamics of Ageing* research projects. There is a strong emphasis on the practical implications of ageing and how evidence-based policies, practices and new products can produce individual and societal benefits.

The Symbolism of Globalization, Development, and Aging

Why do engineers "report" while philosophers "argue" and biologists "describe"? In the Michigan Classics Edition of *Disciplinary Discourses: Social Interactions in Academic Writing*, Ken Hyland examines the relationships between the cultures of academic communities and their unique discourses. Drawing on discourse analysis, corpus linguistics, and the voices of professional insiders, Ken Hyland explores how academics use language to organize their professional lives, carry out intellectual tasks, and reach agreement on what will count as knowledge. In addition, *Disciplinary Discourses* presents a useful framework for understanding the interactions between writers and their readers in published academic writing. From this framework, Hyland provides practical teaching suggestions and points out opportunities for further research within the subject area. As issues of linguistic and rhetorical expression of disciplinary conventions are becoming more central to teachers, students, and researchers, the careful analysis and straightforward style of *Disciplinary Discourses* make it a remarkable asset. The Michigan Classics Edition features a new preface by the author and a new foreword by John M. Swales.

International Books in Print

The Institute of Medicine study *Crossing the Quality Chasm* (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and patient safety. *Health Professions Education: A Bridge to Quality* is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators, administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system.

Perspectives on the Future of the Sociology of Aging

This second edition has been revised and updated to reflect key methodological developments in health research. It is a comprehensive, easy to read, guide to the range of methods used to study and evaluate health and health services. It describes the concepts and methods used by the main disciplines involved in health research, including: demography, epidemiology, health economics, psychology and sociology.

Close Relations

"Practitioners and patients are called upon to make numerous health care decisions and, in doing so, need to weigh various types of information before taking action. This information comes from a myriad of sources, including the results of well-designed research; information related to the preferences of patients/clients and their relevant others; the practitioner's own experiences; and the nature and norms of the setting and culture in which the care is being delivered. Methods to synthesize qualitative evidence are now emerging and this text examines the methodological bases to qualitative synthesis and describes the processes involved in the conduct of a rigorous synthesis of qualitative evidence, with a particular focus on Meta-Aggregation."--[source inconnue].
