An Introduction to Geology

GEOLOGY the study of the Earth's physical structure, its history, and the processes that act on it.

Molten rock LAVA

There are over 1500 volcanoes active on the Earth today, and many more ancient inactive volcanos Igneous rocks are constantly being recycled and formed in the Rock Cycle, and this has been going on since the beginning of Earth's history

The Rock Cycle exists because the Earth has three dynamic parts; the Crust, the Mantle and the Core

Because of the interaction of these three parts Igneous rocks can be formed from volcanic eruptions
