Cheap Insurance for Your Home, Automobile, Health, & Life

Insurance takes a huge bite out of the average American's monthly budget, and as stated above, many Americans simply forgo insurance because they consider it out of reach. Shopping for insurance requires more effort than many people want to devote to it. They simply grab the first price they come across or accept routine rate increases when it is important to compare not only the price but also coverage and exclusions among carriers. In this easy to read and comprehensive new book you will learn hundreds of ways to secure and or reduce your health, automobile, life, and home insurance costs. If you do not have or cannot afford insurance, we will show you how to get it at a price you can afford. The Internet and technology have opened up a great new way to search for low cost insurance services; we will give you the Web sites, tell you what to look for and to look out for. There is a great deal you can do right now to cut insurance costs. For example, did you know that installing a theft tracking device in your car can save you up to 35% on your auto insurance and that your credit history can dramatically affect your auto insurance premium. Recent studies have shown that more than 90% of insurers use credit information to create an "insurance risk score," which they then use as a factor to determine your insurance rate. Add a simple home security system to monitor your home, and your insurance rates may be discounted up to 30%, depending upon where you live. Your insurance could end up costing you more if you choose to make monthly payments rather than pay the entire premium annually. Notify your agent if you retire, your children go to school, or you start working from home (when you're not traveling as much your rates will go down). Have you stopped smoking? Lost weight? Started exercising? All of these efforts can have a dramatic effect on your insurance rates. Insurance topics covered in this book are How Insurance Works, Insurance Company Rating, National and Local Firms, Auto, Health, and Disability Insurance, along with work sheets and forms to assist you in your search for the best coverage at the lowest price. Atlantic Publishing is a small, independent publishing company based in Ocala, Florida. DON'T RELY SOLELY ON AGENTS OR SALES REPS TO TELL YOU HOW TO SAVE ON, OR BUY INSURANCE! Insurance is a serious topic and the truth of the matter is that most people don't have a clue as to what they're getting or what they should be asking for when talking to an insurance agent. Not knowing what to buy or what type of policy is best for your situation can cost you and your family BIG TIME by leaving you at the mercy of an insurance salesperson's lack of experience, knowledge and/or concern. To be honest, you have a right to know all you can without being an insurance agent yourself. This is why this information is now being revealed, so consumers like yourself can be put on a level playing field, compared to people that just blindly buy insurance everyday, pay more than they have to, and walk away with inadequate protection. Friend, don't let a lack of knowledge keep you from empowering yourself! This is the type of straight-up information that you need, "real world" info that will tell you like it really is, (something rarely found elsewhere). Now is the time to stop being vulnerable and seize control by becoming an informed buyer! Get your copy today! Kiplinger's Personal Finance

Effective financial planning for executives and entrepreneurs is complex, dense, and impossible to reduce to a single, easy-to-understand formula. Designed to emphasize the importance of effective, targeted financial planning, this book begins by telling a story about a fictional, but plausible, power couple and their family who (spoiler alert!) do pretty much everything wrong in securing their financial future. In most cases, they don't do the things needed because they don't know what they are. Using this story as a case study of executives and entrepreneurs, the book breaks down the case into chapters and offers practical discussions of all the key financial planning pillars—investment planning, tax planning, estate planning, philanthropic planning, risk management, and equity-based compensation to name a few—with the tools needed to tailor a plan for virtually every circumstance and need. While there is no single plan that works for everybody, this book will provide a guide with complicated, technical information alongside specific guidance on how to build an effective financial plan.
