How to develop a strategy that wins in competitive markets | Roger Martin - How to develop a strategy that wins in competitive markets | Roger Martin by Growth Manifesto Podcast 168,133 views 2 years ago 1 hour, 20 minutes - This episode is with Roger Martin, writer, **strategy**, advisor and in 2017 was named the #1 **management**, thinker in the world, he is ...

Roger Martin's introduction to the Growth Manifesto Podcast

How do you define strategy?

Strategy does not always assume that there is a competitive landscape or that you have a competitor

How do you define your "where to play" in your strategy?

Roger unpacks the confusion between "strategy" and "planning"

How the military definition of strategy relates to the business definition of strategy

What do you need to create a winning strategy?

Roger explains the "How might we?" questions in strategy

How many possibilities should a strategy session come up with?

Should companies try to win in just one area with their strategy or can they play across many different areas?

According to Roger, you need to pick a "where" in which you aspire to be number 1 in share for a successful strategy

In strategy, you need to have a winning aspiration that helps you pick a "where to play" and a "how to win"

How Roger sees good business strategy as a positive force for humanity

How do we choose the one idea that has the best likelihood of success amongst all the possibilities in our strategy?

How long does the process of choosing the best idea in our strategy usually take?

Roger talks about how clever entrepreneurs can enable the world to "de-risk" from whatever it is that they're doing or selling

Strategy is an exercise in shortening your odds

Roger explains why it's a tricky time for big companies these days in terms of taking risks due to smaller companies trying to disrupt industries

Roger and Alex talk about some of the measures big companies can take to protect themselves from

the small disruptors

Once you've established what to do or which direction to take your strategy, how do you actually win? When you find out that your strategy doesn't fit, do you simply adjust the strategy or go through the whole process again?

How can management systems help with your strategy?

Roger talks about how management systems are the hardest and most boring part to work on to ensure your strategy succeeds

According to Roger, when you're the market leader in your industry, you always have to be on the lookout for different kinds of competitors

How do you measure strategy?

Roger believes that companies that are trying to make the world a better place by being good to the rest of humanity are more likely to create shareholder value

What's the one thing you'd want our listeners to do?
