Dope in the Age of Innocence

Ibiza, 1960: on the beautiful Mediterranean island, the high-rise resorts are still decades away. By chance, Damien Enright, twenty-one-years old and Irish, arrives there with his wife and two children and finds a handful of down-at-heel foreign Bohemians leading wild, hedonistic lives. He and his wife get involved; their marriage quickly breaks down and he spends two heartbroken years in London before returning to Ibiza with a new partner and another child. They take LSD and inspired by dreams of a brave new world, cross to the remote island of Formentera to lead alternative lives. This is a decade before Howard Marks became Mr. Nice: the embryonic drug culture in the west motivated not by profit but by idealism. Sometimes, that early search for freedom ventured not just beyond the mind but beyond the law. To sustain their families on Formentera, Enright and two desperado pals head to London in a beat-up car and do some risky travellers cheque scams. Then, restless and unsure of his love for his partner, he makes a hair-raising trek to Turkey in the depths of winter to find hashish for the group. Things go badly awry and he find himself a fugitive, at the mercy of unreliable friends. Part road story, drug story, love story, Dope in the Age of Innocence is fundamentally a parable about drug enlightenment, the loss and rediscovery of love and the tempering of innocence.

The Age of Innocence

"As the scion of one of New York's leading families, Newland Archer has been born into a life of sumptuous privilege and strict duty. Sensitive and intelligent, he respects the rigid social codes of his class, and is thankful that his forthcoming marriage to May Welland is to 'one of his own kind'. But the arrival of the Countess Olenska, a free spirit who breathes clouds of European sophistication, makes him question the path on which his upbringing has set him. As his fascination with her grows he discovers how difficult it is to escape the bounds of the society that has shaped him. Wharton's

Pulitzer Prize-winning novel is at once a poignant story of frustrated love and an extraordinarily vivid, delightfully satirical portrait of a vanished world."--Publisher's website.

Rave On

Peace, Love, Unity, and Respect. Cultural liberation and musical innovation. Pyrotechnics, bottle service, bass drops, and molly. Electronic dance music has been a vital force for more than three decades now, and has undergone transformation upon transformation as it has taken over the world. In this searching, lyrical account of dance music culture worldwide, Matthew Collin takes stock of its highest highs and lowest lows across its global trajectory. Through firsthand reportage and interviews with clubbers and DJs, Collin documents the itinerant musical form from its underground beginnings in New York, Chicago, and Detroit in the 1980s, to its explosions in Ibiza and Berlin, to today's mainstream music scenes in new frontiers like Las Vegas, Shanghai, and Dubai. Collin shows how its dizzying array of genres—from house, techno, and garage to drum and bass, dubstep, and psytrance—have given voice to locally specific struggles. For so many people in so many different places, electronic dance music has been caught up in the search for free cultural space: forming the soundtrack to liberation for South African youth after Apartheid; inspiring a psychedelic party culture in Israel; offering fleeting escape from—and at times into—corporatization in China; and even undergirding a veritable “independent republic” in a politically contested slice of the former Soviet Union. Full of admiration for the possibilities the music has opened up all over the world, Collin also unflinchingly probes where this utopianism has fallen short, whether the culture maintains its liberating possibilities today, and where it might go in the future.

Drug War

Drug War is a landmark modern history: the first ever full account of the United Kingdom's fight against the illegal importation of drugs. Packed with remarkable revelations and thrilling anecdotes, it tells for the first time the story of the high-level traffickers who drugged Britain, and the secretive organisation that tried to stop them: the Investigation Division of HM Customs and Excise. The ID's elite officers waged a fifty-year battle to stem the tide of cannabis, cocaine and heroin arriving by land, air and sea, and to track, arrest and prosecute the smuggling gangs, both organised and chaotic, who turned an amateur pastime into a multi-billion-pound trade. The result of more than 100 unique interviews, many with insiders who have never spoken publicly, it is a ground-breaking account of one of the most vital subjects of our times. It begins with the UN Single Convention of 1961, intended to enshrine a worldwide ban on narcotics. Yet within five years the UK was on the cusp of a narco-boom, driven by immigrants from its former colonies and by the eruption of the youth counterculture. The insidious effect was to corrupt key areas of British life, including airport baggage and freight handlers at Heathrow Airport, dockers at the major ports and even the Drug Squad at New Scotland Yard. Drug War chronicles: the first major 'barons', including the brilliant laser scientist Dr Gurdev Singh Sangha; the rise of hippie traffickers such as the legendary Howard Marks, and the violent gangland syndicates that ultimately brushed them aside; the ongoing rivalry between police and Customs and how this often blighted the law enforcement response; the emergence of London's first heroin godfather, Gigi Bekir, and how the Turkish state was complicit in flooding the country with smack; the heavyweight 'untouchables' who eventually streamlined the drug business, and the extraordinary covert methods employed against them; and how secret liaison with British and American spy agencies led to the biggest cocaine seizures ever, the motherships of the Colombian cartels. Concluding with the series of mishaps and scandals that ushered in the Serious Organised Crime Agency, Drug War is a ground-breaking account packed with unique revelations, personal testimony and fresh analysis.

Psychonauts

A provocative and original history of the scientists and writers, artists and philosophers who took drugs to explore the hidden regions of the mind. Until the twentieth century, scientists investigating the effects of drugs on the mind did so by experimenting on themselves. Vivid descriptions of drug experiences sparked insights across the mind sciences, pharmacology, medicine, and philosophy. Accounts in journals and literary fiction inspired a fascinated public to make their own experiments—in scientific demonstrations, on exotic travels, at literary salons, and in occult rituals. But after 1900 drugs were increasingly viewed as a social problem, and the long tradition of self-experimentation began to disappear. From Sigmund Freud's experiments with cocaine to William James's epiphany on nitrous oxide, Mike Jay brilliantly recovers a lost intellectual tradition of drug-taking that fed the birth of

psychology, the discovery of the unconscious, and the emergence of modernism. Today, as we embrace novel cognitive enhancers and psychedelics, the experiments of the original psychonauts reveal the deep influence of mind-altering drugs on Western science, philosophy, and culture.

Dope in a Time of Innocence

Since the Stone Age, drugs have been sniffed to induce sleep, mixed to cure ills, swallowed to stimulate creativity, snorted to increase sexuality, popped for the hell of it and smoked to see God. Natural or synthesized, they have been smuggled for all kinds of reasons from saving the world to becoming stinking rich. Blamed for deaths, wars, suicides, collapses of governments, multiple crashes, individual crises, anarchy and chaos, they have also been praised for opening minds and expanding consciousness. Worshipped and demonised, venerated and chastised, force-fed and forbidden. Every society has had its intoxicant, be it sacrament or scourge. They have also become irreversibly interwoven with politics, sex, business, religion, and rock and roll, providing writers, whether emerging from the ancient classical world or the street laboratory of today, with both inspiration and challenge. An unforgettable, once-in-a-lifetime trip, The Howard Marks Book of Dope Stories includes his favourite drugs writings from Alexander Dumas to Aleister Crowley via Hunter S. Thompson and Charles Baudelaire, as well as unpublished works and many new and compelling pieces from Mr Nice himself.

Howard Marks' Book Of Dope Stories

One hundred years on from the Dangerous Drugs Act of 1920, this book examines the money, politics and exploitation behind drugs and raises the question nobody asks: 'What kind of drugs policy do we actually want in the UK?'

Focusing on Thomas Burke's bestselling collection of short stories, Limehouse Nights (1916), Anne Witchard's interdisciplinary book contextualises the burgeoning cult of Chinatown in turn-of-the-century London. Witchard shows that Burke's immensely popular Chinatown stories destabilize social orthodoxies in highly complex ways, forcing us to rethink his influence on both sides of the Atlantic. She shows that China and chinoiserie served as mirrors that reveal the disquietudes of western art and culture.

Jerry Kamstra has been smuggling marijuana from Mexico into the United States since the early 1960s. In 1966, which smuggling 200 kilos of mota (the choicest part of the marijuana plant) into Arizona

from Michoaca, he was arrested by U.S. Customs. He was sentenced to two years in the federal penitentiary. His sentence was suspended and he was placed on five years' probation. Sometime thereafter, while Kamstra was living in San Francisco, he was approached by Life magazine to take one of their photographers, Eugene Anthony, into the heart of Mexico to do what no gringo had ever accomplished--to go up into the mountains where marijuana fields flourish and to photograph them and the campesinos who tend them the offer was too attractive from Kamstra to reject, although he knew the journey was fraught with danger. He sneaked out of San Francisco to avoid his probation officer and returned to Mexico. This highly readable book is about marijuana and marijuana smuggling but it is also about Mexico itself. What started out as a simple photographic expedition turned into a major smuggling operation involving a ton of marijuana and the hair-raising means--ocean and air--used to bring the weed into the States. This absorbing story reads like an adventure novel--but it's all true.--From jacket flap

An Evening's Entertainment

Like earlier editions of *The Deviance Process*, the purpose of this thoroughly revised and updated text is to offer students a perspective for studying deviance that will help them make sense of their everyday lives. The perspective used by Pfuhl and Henry is identified early as social constructionist, one that includes elements of interactionist and phenomenological sociology. Unlike the numerous texts that view deviance as the "essence" of things, independent of the mind of the observer, the authors perceive deviance, and its opposite, "normality," as impermanent, human creations resulting from people interacting with one another. Such a view regards deviance as the outcome of the antagonisms, contradictions, and conflicts in society. It pays serious attention to people's explanations for their actions, to the creation of moral meanings, and to the labeling, stigmatizing, and banning of one or another kind of behavior. Pfuhl and Henry's perspective requires that deviance be studied, at least in part, in political terms, i.e., as a fundamental part of the business of making and enforcing public rules, as an outgrowth of social policy. Above all, it requires that deviance be understood not as a static element, but as a sequential process, a series of events and actions occurring over time.

America has steadily regressed from a Republic under the Sign of the Cross towards a mobacracy under the Sign of the Scorpion. Social responsibility and the ethics of conscience have vacated the Field of Dreams like a Baroid tater -- an all about me cult of celebrity has evolved. Reclaiming the Strike Zone traces the metaphorical cleat marks through forbidden history. The Inside Baseball version of the Soviet Socialist Paradise and Nazi Germany is pitched shekel free. Sub-systems of the American superstructure featuring education, entertainment, youth activities and family are explored in-depth. The search for something that has been lost -- the secret of the American Dream and American Exceptionalism -- is pursued. All base paths lead to the Christian Church and Jewish Nation. Wise Christian philosophy has been Billy-Goated off the playing field -- secular humanism has taken The Hill. Karl Marx and Sigmund Freud have taken a turn at-bat and gone long. Red tide has been harnessed into Economic Determinism by the F&F Boys. The hidden ball trick has been pulled on the sheeple. Disciples of General Zod lack American patriotism. Time is of the essence to restore what has been taken -- its the bottom of the 9th with two away. DO IT AMERICAN and dont give up the ship are battle cries. Intellectual Millenials must step up to the plate and reclaim what their baby booming Spock baby parents baptized in Dewey waters booted. Identifying the proton pseudos and resetting is the task. Restoring sub-systems [especially education] while playing small ball is the answer. Truth and patriotic leadership are catalysts. A burning desire to be an American -- free and independent -- without getting JFKd is the secret. There is a happy ending -- it is certain. The Good News delivers that promise.

The Deviance Process

It's a life to be envied and desired, filled with private jets, millions of dollars, and tons of cocaine. It is also a life many would kill for-literally. After paying his debt to society, Kilo fights to reclaim his place in that life. Fresh out of prison, he's back on the streets as lethal as ever. As the number one drug lord, he is the head of one of the most notorious cocaine and heroin operations in America. Kilo's power and wealth surpasses even that of Q, a man who is feared by all. But Q is much more than Kilo's rival-he

Desperate to protect his place and power, Q coerces Derrick, a lethal, young fifth-degree black belt into becoming an enforcer in his empire. Now, no one is safe. Derrick quickly builds his reputation by kicking ass from Baltimore to Philly to Virginia. Just as quickly, his honesty, loyalty, and respect earn Q's loyalty in return-and this brings him no small amount of animosity from the other drug lords. Big R, Q's right-hand man, has put his new rival in his sights. Can both survive in this bloody society? Spanning decades tainted by murder, deception, lies, and greed, *Street Certified* continues the saga of *Hustler's Greed*.

Reclaiming the Strike Zone

It Was Going to Be The Perfect Wedding - Until He Showed Up... The *Age of Innocence* centers on an upper-class couple's impending marriage, and the introduction of the bride's cousin, plagued by scandal, whose presence threatens their happiness. Though the novel questions the assumptions and morals of 1870s New York society, it never develops into an outright condemnation of the institution. The novel is noted for Wharton's attention to detail and its accurate portrayal of how the 19th-century East Coast American upper class lived, and the social tragedy of its plot. Wharton was 58 years old at publication; she had lived in that world and had seen it change dramatically by the end of World War I. The *Age of Innocence* was a softer and more gentle work than *The House of Mirth*, set in the time of her childhood. Wharton wrote, "'I found a momentary escape in going back to my childish memories of a long-vanished America...'" [Get Your Copy Now](#).

How the drug war transformed American political culture Since the 1950s, the American war on drugs has positioned white middle-class youth as sympathetic victims of illegal drug markets who need rehabilitation instead of incarceration whenever they break the law. *The Suburban Crisis* traces how politicians, the media, and grassroots political activists crusaded to protect white families from perceived threats while criminalizing and incarcerating urban minorities, and how a troubling legacy of racial injustice continues to inform the war on drugs today. In this incisive political history, Matthew Lassiter shows how the category of the "white middle-class victim" has been as central to the politics and culture of the drug war as racial stereotypes like the "foreign trafficker," "urban pusher," and "predatory ghetto addict." He describes how the futile mission to safeguard and control white suburban youth shaped the enactment of the nation's first mandatory-minimum drug laws in the 1950s, and how soaring marijuana arrests of white Americans led to demands to refocus on "real criminals" in inner cities. The 1980s brought "just say no" moralizing in the white suburbs and militarized crackdowns in urban centers. *The Suburban Crisis* reveals how the escalating drug war merged punitive law enforcement and coercive public health into a discriminatory system for the social control of teenagers and young adults, and how liberal and conservative lawmakers alike pursued an agenda of racialized criminalization.

Widely regarded as the finest poet of his generation, Seamus Heaney is the subject of numerous critical studies; but no book-length portrait has appeared until now. Through his own lively and eloquent reminiscences, *Stepping Stones* retraces the poet's steps from his early works, through to his receipt of the 1995 Nobel Prize for Literature and his post-Nobel life. It is supplemented with a large number of photographs, many from the Heaney family album and published here for the first time. In response to firm but subtle questioning from Dennis O'Driscoll, Seamus Heaney sheds a personal light on his work (poems, essays, translations, plays) and on the artistic and ethical challenges he faced, providing an original, diverting and absorbing store of reflections, opinions and recollections.

Hollywood has long been associated with scandal--with covering it up, with managing its effects, and, in some cases, with creating and directing it. In putting together *Headline Hollywood*, Adrienne McLean and David Cook approach the relationship between Hollywood and scandal from a fresh perspective. The contributors consider some of the famous transgressions that shocked Hollywood and its audiences during the last century, and explore the changing meaning of scandal over time by zeroing in on issues of power: Who decides what crimes and misdemeanors should be circulated for public consumption and titillation? What makes a Hollywood scandal scandalous? What are the uses of scandal? The essays are arranged chronologically to show how Hollywood scandals have evolved relative to changing moral and social orders. This collection will prove essential to the field of film studies as well as to anyone interested in the character and future direction of American culture. Contributors are Mark Lynn Anderson, Cynthia Baron, James Castonguay, Nancy Cook, Mary Desjardins, Lucy Fischer, Lee Grieveson, Erik Hedling, Peter Lehman, William Luhr, Adrienne L. McLean, Susan McLeland, and Sam Stoloff. Adrienne L. McLean is an assistant professor of film studies at the University of Texas at Dallas. David A. Cook is a professor of film and media studies at Emory University. He is the author of *A History of Film Narrative*.
