International Sports Law: An Introductory Guide

This book, written by an expert in the field, covers some of the following issues, namely high-profile WADA cases such as that of Maria Sharapova, the Bosman ruling, decisions by the Court of Arbitration for Sport (CAS), and footballers' employment contracts and transfers for enormous amounts. These issues have led to sport no longer being confined to the back pages of traditional media such as newspapers, but increasingly finding its way onto the front pages and into new media. Since ancient times sport has been practised but today it is a multi-billion dollar 'industry', and Sports Law as a discipline in its own right is developing apace and is increasingly being studied and practiced at all levels of interest and competency. Thereby creating a need amongst students, lawyers, accountants, sports marketers, promoters, agents, sports broadcasters, sports administrators and managers for some basic and general knowledge of the legal aspects of sport. This introductory guide to international sports law will serve to satisfy the needs currently not being met in present-day sports law literature, and should also be of interest to researchers and the general reader. Although the topics covered are necessarily selective, sports law being such a vast subject, they are representative of the main legal issues facing the world of sport today. Throughout the book, the reader is referred to articles, publications and other materials that provide further information on the various subjects treated in the text, thus enhancing its value and usefulness. The Law is stated as at 1 January 2017, according to the sources available at that date. Prof. Ian S. Blackshaw is an International Sports Lawyer, a Solicitor of the Supreme Court of England and Wales, and a Visiting Professor at several Universities, including Anglia Ruskin University, Cambridge, United Kingdom, and The University of Pretoria, South Africa. He is also a member of the Court of Arbitration for Sport, Lausanne, Switzerland.

Handbook on International Sports Law

Despite taking a wide variety of forms, sport is universal. Circumstances and events generating legal issues in sport are similarly universal, but sport operates under many legal systems worldwide. Fragmentation and inconsistency in legal outcomes often result. This innovative collection of essays by leading scholars of sports law addresses a gap in the literature. It advances understanding of how different legal systems respond to common issues and offers insights into the developing international system of sports law. Researchers will find this book of inescapable assistance and interest. Hayden Opie, Melbourne Law School, Australia Nafziger and Ross have provided an enormously useful collection of incisive and integrating essays that cover the gamut of important issues in the emerging field of international sport law. Andrew Zimbalist, Smith College, US This Handbook presents a comprehensive collection of essays by leading scholars and practitioners in the burgeoning field of international sports law. The authors address significant legal issues on two gradually converging tracks: the mainstream institutional framework of the law, primarily the International Olympic Committee, international sports federations, regional and national sports authority, and the Court of Arbitration for Sport; and the commercial sports industry. Topics include the institutional structure; fundamental issues, legal principles and decisions within those institutions; mediation, arbitration and litigation of disputes; doping, gambling

and the expanding use of technology in competition; athlete eligibility requirements; discrimination; and protection of athletes. The book also covers a broad range of commercial issues related to competition law and labor markets; media, image, and intellectual property rights; event sponsorships; and players' agents. Comparative analyses of young sports models and practices in North America, Europe and elsewhere supplement the general theme of international sports law. This major collection of essays on some of the most controversial, cutting-edge issues in international sports law, will be a captivating read for academics and students of sports law, sports management, international law and comparative law, as well as practicing lawyers and players agents. Senior executives and other professionals in the sports industry will also find much to interest them in this well-documented Handbook.

Introduction to International and European Sports Law

The book is an introduction to sports law, in particular International (worldwide) and European (EU) sports law. The chapters are all put in the perspective of the innovative sports law doctrine that is developed and presented in the opening chapter on what sports law is. After a general coverage of the core concept of "sport specificity" (that is whether private sporting rules and regulations can be justified notwithstanding they are not in conformity with public law), the book covers the following specific main themes of International and European Sports Law (*capita selecta*): comparative sports law; competition law and sport; the collective selling of TV rights; sports betting; Social Dialogue in sport; sport and nationality; professional football transfer rules; anti-doping law in sport; transnational football hooliganism in Europe; international sports boycotts. In this book association football ("soccer") is the sport that is by far most on the agenda. It is the largest sport in the world and most popular all over the globe. The elite football in Europe is a day-to-day commercialized and professionalized industry, which makes it a perfect subject of study from an EU Law perspective.

Sports Law in Switzerland

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Switzerland deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policymakers access to sports law at this specific level. Lawyers representing parties with interests in Switzerland will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law. International Sports Law and Business

This comprehensive, three-volume set focuses on the legal and business aspects of sports in the United States and abroad. The authors have presented the subject matter from a practical and pragmatic perspective, yet with analytical precision and attention to fine points of detail. This book is composed of five parts: Part I deals with the law and business of sports in the United States, with the primary emphasis on the legal aspects of professional sports. Part II deals with the internationalization of sports from various perspectives, principally North American team sports. Part III explores the law and business of sports in 18 non-U.S. jurisdictions--subject matter hardly covered in other sources, if at all. Part IV treats the legal and, to some extent, business aspects of broadcasting and sports, both in the United States and in selected foreign jurisdictions. Part V focuses upon sports marketing in its various forms in the United States, as well as its international perspectives. This easy-to-read work

is unmatched in that it covers subjects not addressed or only tangentially addressed in other works, presents insiders perspectives on the subject matter, and focuses extensively on international aspects of sports law and business in connection with many different subjects. Among its exhibits, International Sports Law and Business includes a World League of American Football Standard Player Contract form, a sample World League of American Football Acquisition and Operation Agreement, Statute of Court of Arbitration for Sport and Regulations. It also includes a comprehensive index.

Leading Cases in Sports Law

This book accounts for over 25 of the most influential cases in international sports law, as written by some of the leading authorities in the area. Authors from Europe, the United States, Australia, South Africa, Canada and New Zealand trace the evolution of this emerging discipline of law through an analysis of individual cases, as discussed under a number of key debates and themes in contemporary sports law, including: the “public” nature of legal disputes in sport; player employment mobility litigation; doping and the spirit of sport; TV rights holding proceedings; and enduring themes in sports law such as on-field violence, spectator safety, animal welfare and gender equality. Valuable for sports law academics, arbitrators and practitioners, sports administrators and governing bodies, but also for students (postgraduate and undergraduate) and all those with an interest in international sports law.

Advanced Introduction to Global Sports Law

Stephen F. Ross presents this succinct introduction to key topics of law specific to sports, comparing approaches to sports law across the globe, with particular focus on the United States, Europe, and common law jurisdictions. Contrasting the profit-maximizing approach of North American leagues with the global integrated approach of professional sports governed by national and international governing boards, the book offers a novel model for the latter.

European Sports Law

The important theme “What is Sports Law?” was the topic of the international Conference on “The Concept of Lex Sportiva Revisited”, which took place in Jakarta in late 2010. Academics and practitioners are still in debate to agree on this concept as is evident in this book. This book not only contains the worked out contributions of this Conference, but also other related chapters on the subject. It produces a reassessment of the content of Sports Law and its terminology keeping a close eye on the current literature. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

Sports Law in the European Union

Katarina Pijetlovic is the first author to address the issue of breakaway leagues in football and their treatment under EU law. In this book she guides the reader through EU sports law, the specificities of the sporting industry and the problems and power struggles in European football governance in the context of the breakaway threats by elite clubs. In order to analyse the legality of UEFA clauses that restrict the formation of such breakaway structures, the author first provides a progressive interpretation of the applicable EU sports law and an in-depth analytical review of EU sports cases decided under internal market and competition provisions, including a novel perspective on the UEFA home-grown rule and the Bosman case. Thereafter, she sets out an original theory of convergence between TFEU provisions on competition and the internal market in the light of sporting exceptions. Finally, in applying the legal principles thus outlined Katarina Pijetlovic explores the legality of the restrictive UEFA clauses and the case for the formation of alternative leagues in European football under EU sports law. A number of surprising outcomes emerge from this analytical process. Conversely, she also tests the largely neglected issue of the legality of forming a breakaway league by the European elite football clubs. The systematic way in which the reader is guided through EU sports law and the legal issues under consideration makes the book accessible for EU lawyers as well as non-EU sports lawyers, on both an academic and a practitioner's level. Katarina Pijetlovic holds licentiate and doctoral degrees in EU sports law from the University of Helsinki. The book appears in the ASSER International Sports Law Series, under the editorship of Dr. David McArdle, Prof. Ben Van Rompuy and Marco van der Harst LL.M.

Sport: Law and Practice

Match-fixing has become a widespread international problem in recent years. It includes everything from bribery of players, to putting undue influences on the owners of the soccer clubs, managers, coaches and others who have the ability to affect the final scores. In addition, match-fixing spills over

into the arena of illegal betting (in person and online), which creates a host of additional organized crime opportunities, including human trafficking, prostitution, drugs, extortion and even terrorism. This timely volume brings together international contributions with an aim is to increase awareness of the problems associated with match-fixing and the degree to which key agents in sport, particularly young people, are vulnerable. The contributions are based on INTERPOL's Global Experts Meeting in Singapore, in November 2012, which brought together key speakers to discuss issues surrounding match-fixing and how to combat corruption in football through channels of education. The purpose of this meeting was to identify ways that academia can play a role in developing and implementing training modules and academic courses, including certification procedures, to prevent match-fixing and develop lines of study at all educational levels. This unique work reflects the gravity of the situation around the world together with possible solutions.

Sports Law in India

With a Foreword by Dr Michal Krejza, Head of Sport Unit, Directorate-General for Education and Culture, European Commission, Brussels Much has changed since the publication of Professional Sport in the EU: Regulation and Re-regulation (edited by Andrew Caiger and Simon Gardiner, The Hague, T.M.C. Asser Press 2000). The present book explores new territory and its scope and tone

reflect the maturity of the discipline of EU sports law and policy. The book seeks to balance contributions from established authorities and the best of the new generation of sports law and policy academics. New theoretical insights are revealed which accompany in particular two further sections dealing first with governance and regulatory issues (also including freedom of movement and competition law issues) and second with questions of representation. The issue of the representation of stakeholders within sports governance structures (Social Dialogue between employers/clubs and employees/players) is arguably the most significant development in the last decade and the inclusion of the word 'Representation' in the title is merited. Contributions on anti-doping, football hooliganism and sports betting are added to the book. The editing team consisted of Simon Gardiner, Leeds Metropolitan University, United Kingdom, Richard Parrish, Edge Hill University, Ormskirk, United Kingdom, and Robert Siekmann, ASSER International Sports Law Centre, The Hague, The Netherlands. This book appears in the ASSER International Sports Law Series, under the editorship of Robert Siekmann and Janwillem Soek.

The Council of Europe and Sport: Basic Documents is the second volume in the Asser series of collections of documents on international sports law, containing material on the intergovernmental (inter-state) part of international sports law. The European Union and Sport: Legal and Policy Documents was the first volume devoted to the European Union. In previous other publications, non-governmental materials, i.e. statutes and constitutions, doping rules and regulations, arbitral and disciplinary rules and regulations of the international sports organisations were published. The book provides an invaluable source of reference for governmental and sports officials, legal practitioners and the academic world. With the increasing public interest in the legal aspects of sports, this collection of documents is a timely and welcome contribution to enhancing the accessibility of basic texts on international sports law and policy.

EU, Sport, Law and Policy

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Adopting a distinctive legal and political analysis, this book argues that the EU is receptive to the sports sectors claims for special treatment before the law. The book investigates the birth of EU sports law and policy by examining significant court decisions, the possibility of exempting sport from EU law, sport and the EU treaty, and more.

The Council of Europe and Sport

During the past decade, the media landscape and the coverage of sports events have changed fundamentally. Sports fans can consume the sports content of their choice, on the platform they prefer and at the time they want. Furthermore, thanks to electronic devices and Internet, content can now be created and distributed by every sports fan. As a result, it is argued that media regulation which traditionally contains rules safeguarding access to information and diversity would become redundant. Moreover, it is sometimes proposed to leave the regulation of the broadcasting market solely to competition law. This book, illustrates that media law is still needed, even in an era of abundance, to guarantee public's access to live and full sports coverage. Dealing with the impact of new media on both media and competition law this book will greatly appeal to academics and stakeholders from various disciplines, such as legal and public policy, political science, media and communications studies, journalism and European studies. Additionally it contains valuable information and points of view for policy makers, lawyers and international and intergovernmental organisations, active in media development. The book contains an up-to-date analysis and overview of the different competition authorities' decisions and media provisions dealing with the sale, acquisition and exploitation of sports broadcasting rights. Katrien Lefever is Senior Legal Researcher at IBBT - The Interdisciplinary Centre for Law and ICT (ICRI), KU Leuven, Belgium. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

Sports law and policy in the European Union

Sport: Law and Practice, Fourth Edition is the leading legal title covering sports law and practice in the UK, and at the Court of Arbitration for Sport. It serves both as a comprehensive statement of applicable law and precedent, and as a very practical guide to circumnavigating a complex sector. The new edition

retains and updates all of the key chapters from previous editions, including the extended sections on challenges to the actions of sports governing bodies, and on anti-doping regulation and enforcement (with an introduction to the new 2021 World Anti-Doping Code). There are important updates to the chapters on Regulating Financial Fair Play, Misconduct, Safeguarding in Sport, the Court of Arbitration for Sport, and Media Rights and Sport. The Fourth Edition also adds brand new chapters dealing with: -Effective sports regulation (including the first ever comprehensive discussions of the 'general principles of law' applied by CAS panels in determining challenges to sports regulations, as well as of the principles of interpretation of sports regulations). -Best practice in sports governance (describing developments such as the strengthening of the competence and independence of boards and the emergence of independent integrity units). -Data protection law and sport (including discussion of the provisions of the Data Protection Act 2018 that facilitate the sharing of personal data by sports bodies for integrity-related purposes). -Exploiting commercially valuable sports data (explaining how sports rights-holders can fashion commercial agreements to meet the demand for sports data from the betting industry and others). -ESports (the first comprehensive treatment of the legal and practical principles underlying the regulation and commercial exploitation of the increasingly important ESports sector). Readers will also benefit from practice tips, precedent clauses, detailed explanations of key practical issues, and step-by-step analysis. This is an essential title for all sports law practitioners (solicitors and barristers, common law and civil lawyers), sports governing bodies, event organisers, clubs, participants, sports agencies and commercial partners, arbitrators, universities, and students.

New Media and Sport

This book takes a close look at the Court of Arbitration for Sport (CAS), challenging existing claims and answering previously unanswered questions, by considering all of its publicly available decisions, both in its entirety as a body of jurisprudence and on a case-by-case level. It also investigates the actors involved in adjudication before the CAS, both the parties that bring disputes before the CAS and the arbitrators that resolve them, and in so doing establish precedents that govern sports generally. While the book relies upon and includes more traditional legal theory and analysis, it combines this with an empirical analysis of a large portion of the CAS's decisions. Hereby it relies upon and relates to the theory of the development of a transnational legal order in sports, the *lex sportiva*. The publication is targeted at and will benefit those professionally working in or interested in the fields of sports law, arbitration law, transnational law, or empirical legal studies. Johan Lindholm is a Professor of Law at Umeå University in Sweden.

Sport: Law and Practice

This comprehensive collection of leading articles covers legal issues that have arisen out of international sports competition and its management. These papers trace the burgeoning field of international sports law from its origins about a half-century ago, through the course of complex challenges ranging from political boycotts of competition to doping of athletes, corruption, discrimination, players' rights and commercial influences such as broadcast rights. Within a unique institutional framework of national, international, non-governmental and inter-governmental authority, the emerging regime of public law is of fundamental importance not only to the sports industry and bar but, quite obviously, to a global public. This authoritative collection puts particular emphasis on the central role of the Olympic Movement and affiliated sports federations, the regional mechanism of the European Union and the characteristics of the European and North American sports models. The collection, along with an original introduction, will be of interest and value to students, researchers, academics and practitioners interested in international sports law.

The Court of Arbitration for Sport and Its Jurisprudence

The Textbook was prepared in accordance with the Federal State Educational Standard for Higher Education as applied to specialisation 40.03.01 "Jurisprudence" (Bachelor (degree) qualification) and the syllabus of the academic discipline "International Sports Law", approved by the International Law Department of the Kutafin Moscow State Law University in January 2017. The Textbook consists of 17 chapters. They correspond to the themes of the syllabus of the academic discipline. In its General part, the history, object, subjects, sources, special principles of international sports law, the process of regulation of international sports relations at the universal level within the framework of the United Nations, its specialised agencies and programs, at the regional level within the Council of Europe and the European Union, at the bilateral level are considered. The Author makes a corresponding

distinction with the object, subjects, sources, special principles of *lex sportiva*, a set of corporate norms elaborated by the International Olympic Committee, the International Paralympic Committee, international and national sports federations. Special attention is paid to the study of ways of resolving sports disputes through arbitration and appeal proceedings in the Court of Arbitration for Sport (CAS), by means of judicial proceedings in the European Court of Human Rights (ECtHR) and the Court of Justice of the European Union (CJEU). The Special Part of the Textbook identifies problem areas that require additional efforts to implement international legal and corporate regulations: the use of doping in sport, violence and hooligan behaviour of spectators and fans, environmental protection when organising international sports competitions, economic crimes and discrimination in international sports, protection of property rights with regard to television and radio broadcasts of international sports competitions, the use of Olympic symbols, countering threats to a healthy lifestyle. International instruments and acts of the Russian legislation are as of May 2018. The Textbook will be of interest for Bachelor students of law, lecturers of higher education institutions, practicing lawyers, staff members of organizations of the Olympic and Paralympic movements, as well as for all those whose academic interests and practical activities are connected with international law, sports law and *lex sportiva*.

Sports Law

The aim of this book is to provide an account of how the law influences the operation, administration and playing of modern sports. Although the book focuses on legal doctrine it has been written bearing in mind sport's historical, cultural, social and economic context, including the drama and colour of sport's major events and leading personalities. And although it is inevitably very much concerned with elite professional sports it is not dominated by them, and seeks to cover the widest possible range of sports, professional and amateur. Initially, the book addresses practical issues such as the structures of national and international sport, and examines the evolution of the body of law known as 'sports law'. Thereafter three main themes are identified: regulatory; participatory; and financial aspects of modern sport. The regulatory theme is dealt with in chapters considering the manner in which decisions of sports governing bodies may be challenged in the ordinary courts and the development of alternative dispute resolution mechanisms in sport. The participatory theme includes the legal regulation of doping and violence in sport, as well as the broader topic of tortious liability for sporting injuries. The financial theme, reflecting the enhanced commercialisation of sport at all levels, is developed in chapters concerning issues in applied contract and employment law for players and legal matters surrounding

the organisation of major sports events. The conclusion summarises modern sport's experience of EU law, pointing the way to the future direction of sports law more generally. While the book is aimed primarily at students, and is designed to cover fundamental and topical areas of sports law (sports law in general; sports bodies and the courts; arbitration in sport; corruption; doping; violence; civil liability; discrimination; the commodification of modern sport; and the likely future of sports law), it should also prove of wider interest to practitioners, sports administrators and governing bodies; and though focused primarily on UK law it will also appeal to readers in Australia, Canada, New Zealand and the USA.

Sports Law in Italy

This book addresses the most important judicial aspects in relation to the FIFA Dispute Resolution Chamber (DRC), as well as the different categories of disputes, inter alia, the termination of player contracts, the amount of compensation, sporting sanctions, training compensation and the solidarity mechanism. The DRC was established in 2001 by FIFA for the purpose of resolving disputes regarding the international status and transfer of players. Since then the DRC has developed into a major and influential alternative resolution body, with an impressive and everincreasing caseload. In this updated and revised Second Edition the most important decisions of the DRC as of the date of its establishment in 2001 until 2016 are analysed. It is a reference work for those with a legal and financial interest in professional football, such as lawyers, agents, managers and administrators, but is also aimed at researchers and academics. Michele Bernasconi, Attorney-at-law in Zurich, Switzerland, Arbitrator at CAS and President of the Swiss Sports Law Association provided a foreword for the book. Frans M. de Weger is senior legal counsel working for the Dutch Federation of Professional Football Clubs (FBO). In 2015 he was, at the proposal of the European Club Association (ECA), appointed as an arbitrator for the Court of Arbitration for Sport (CAS). As a legal counsel and a CAS arbitrator he is involved in several national and international football-related legal disputes. This book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Ben Van Rompuy and Dr. Antoine Duval. "Frans de Weger's work on the jurisprudence of the DRC is a "must-have" for anybody dealing with sports law and, in particular, dealing with football issues under the FIFA Regulations on the Status and Transfer of Players." Massimo Coccia Professor of International Law and Attorney-at-Law in Rome and CAS Arbitrator "Where to go when trying to understand the FIFA Regulations on the Status and Transfer of Players? Now Frans de Weger has the answer with his new version of the much-awaited and needed Jurisprudence of the FIFA Dispute Resolution Chamber." Juan de Dios Crespo Pérez Sports Lawyer "The second edition of this book, which is systematic and practical at the same time, will surely be of great interest to both specialists active in the world of "football law" and aspiring individuals." Wouter Lambrecht Attorney-at-law, Head of Legal at the European Club Association, FIFA Dispute Resolution Chamber Member and Mediator at the CAS

Modern Sports Law

FIFA has accepted the jurisdiction of the CAS as from 11 November 2002. This date does not mark the beginning of the arbitration of the CAS in football matters, however it has to be stated, that from this date on football disputes in front of the CAS increased enormously. This book is dedicated to the most important decisions of the CAS in football disputes. These awards are analyzed by experts, practicing all over the world. Most of the authors have been directly involved in the proceedings before the CAS. The commentaries cover a broad spectrum of disputes, inter alia, disputes concerning the contractual stability, protection of young football players, doping, football hooliganism, match fixing, players release, multiple club ownership, player agents and the stays of execution. This book provides a wide range of valuable information and is a useful tool for those whose main concern is professional football, such as sports lawyers, sports managers and sports agents, but also academics and researchers. The book appears in the ASSER International Sports Law Series, under the editorship of Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

The Jurisprudence of the FIFA Dispute Resolution Chamber

I am very pleased and proud to write the Foreword to this Book on the occasion of the Court of Arbitration for Sport (CAS) having completed its first twenty years of operations. And I warmly congratulate the ASSER International Sports Law Centre and the Editors, Ian Blackshaw, Rob Siekmann and Janwillem Soek – in cooperation with Andrew Gibson, Griffith University, Brisbane, Australia, and Steve Cornelius, University of Johannesburg, South Africa –, on their joint initiative in putting together and publishing this Book. The CAS has come a long way since the idea of establishing it was first mentioned by Juan

Antonio Samaranch, the former IOC President. His vision and confidence in its future have been truly vindicated. Since its creation and up to 31 December 2003, 576 cases have been submitted, of which 550 were requests for arbitration and 26 for an advisory opinion. In 2004, there was a sharp rise in the number of cases handled by the CAS and this trend continues apace. Thus, the CAS goes from strength to strength and has a great future, having, in the words of the Swiss Federal Tribunal in its landmark judgement of 27 May 2003, "built up the trust of the sporting world [and] . . . now widely recognised . . . [as] . . . one of the principal mainstays of organised sport.

Looking at key aspects such as TV and radio broadcasting, the print press, the music industry, online news and entertainment and social networking sites, this textbook provides students with detailed coverage of the key principles, cases and legislation as well as a critical analysis of regulatory bodies such as the Press Complaints Commission and OFCOM. Media and Entertainment Law is also the first book to discuss superinjunctions and the phone-hacking scandal involving News of the World.

The V-chip is a highly significant part of the discussion about whether television (or broadcasting in general) deserves some special attention in terms of its accessibility to children, its particular power to affect conduct, and its invasiveness. But as this notion of filtering and labeling has caught the imagination of the regulator, the legislator, and all those who wish to consider new ways to alter bargaining over imagery in society, the very idea of the V-chip or its equivalent is moving across other technologies, including the Internet. The V-chip issue has also fueled the ongoing debate about violence and sexual practices in society, and how representations on television relate to those practices. Although the initial concept of the V-chip is simple, its flow into the public realm raises so many extraordinary questions that the introduction and production of the chip virtually serves as a case study in problems of law and public policy. The very conceptualization of speech in society is being affected by this issue. Accordingly, the place of the V-chip in this debate is increasingly important; indeed, it may be argued that the V-chip's contribution to legal argumentation may be greater than its ultimate contribution to the relationship between children and imagery. Among the questions the contributors address are: *What research basis is necessary to require a framework for labeling and rating? *What relationship between government and the image-producing industries can be characterized--for constitutional and other reasons--as voluntary as opposed to coercive? *Who should evaluate these images? *To what extent should the evaluation process be centralized and/or distributed? *What assessment is appropriate to evaluate whether the experiment is "successful?" In addition to the V-chip's origin's in Canada and its further evolution in the United States, this book discusses the development of the V-chip and television rating systems in Europe, Australia, and throughout the world. It also includes essays which contrast the very different approaches in Canada and the United States in terms of the role of regulatory agency, industry, and government.

The V-chip Debate

Media and Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industry both in terms of its practical application and its theoretical framework. It provides a clear, current and comprehensive account of this exciting subject. Fully updated and revised, this second edition is one of the first texts to contain a full analysis of the Leveson Inquiry and the implications for our press and media that are arising from it. The new edition contains; a new chapter analysing the Defamation Act 2013; the Digital Economy Act 2010 which aimed to toughen up against copyright infringement online and has been subject to parliamentary review since coming into power; and the liability of internet service providers, including recent cases such as Tamiz vs Google 2012, which goes some way to define the extent to which an ISP may or may not be found liable for their bloggers content. With integrated coverage of Scots and Northern Irish law, Media and Entertainment Law also highlights comparisons with similar overseas jurisdictions, such as with the liability of ISPs where there are differences in both US and European law, in order to help students demonstrate an awareness of media laws, which may then influence UK legislation. Looking at key aspects such as TV and radio broadcasting, the print press, the music industry, online news and entertainment and social networking sites, this text provides detailed coverage of the key principles, cases and legislation as well as a critical analysis of regulatory bodies such as OFCOM and the new regulator for the UK's newspapers and magazines (and online editions), the Independent Press Standards Organisation (Ipso). The text also provides the most comprehensive and up to date coverage of the law relating to Intellectual Property law for the entertainment industry with recent changes in EU law relating to performers' rights. Media & Entertainment Law 2/e

Media & Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industries both in terms of its practical application and its theoretical framework, providing a broad and comprehensive coverage of these fast changing branches of the law. Fully restructured to complement how media law is taught today in the digital age, this third edition explores recent updates in the law including the outcomes of the Google Spain case and the 'right to be forgotten', the use of drones in breach of privacy laws, internet libel and the boundaries of media freedom and press regulation following the Leveson inquiry. Media & Entertainment Law uses the most up-to-date authorities to explore privacy and confidentiality subjects, such as the Prince Charles 'black spider' letters, the Maximilian Schrems and the celebrity superinjunction PJS v Newsgroup Newspapers cases. The book also covers defamation, contempt of court and freedom of information, plus Scots law. New to this edition: A brand new chapter is dedicated to exploring technology and the media, including contemporary issues such as the dark web, the surveillance state, internet censorship and the law and social media, including bloggers, vloggers and tweeters. Global Sport Management

This work takes a look at the cases that have had a significant influence on the game of baseball, such as *Flood v. Kuhn* and *Garvey v. MLB*, which either made it to the U.S. Supreme Court or brought up major legal issues in baseball. Also included are cases that explore legal issues in baseball but are not as well known and cases that appear in most sports law books. For each case, the historical and legal significance of the decision is discussed.

Consumers, Competition, and Consolidation in the Video and Broadband Market

Two of the objectives of the Chinese Copyright Law are to protect the copyright of authors to their literary and artistic works and encourage the creation and dissemination of works. In practice, however, in spite of the existence of the Music Copyright Society of China ('MCSC') that was established to assist with exercising copyright, music creators in China remain in need of help to protect and manage their fragmented copyright. The MCSC was the first collective management organisation ('CMO') in mainland China and is the only CMO in the field of musical works. While there is a large music industry and copyright business in China, the MCSC only had 11,356 members at the end of 2021. The third amendment of the Chinese Copyright Law was initiated in 2011 and came into effect in June 2021 after a long debate for almost ten years. The discussion of the third amendment has highlighted the controversial topic of collective management of copyright. This book explores the adequacy of the MCSC as an intermediary representing rights for music creators. The main argument developed in this study is that the work of the MCSC for individual composers and lyricists is hampered by shortcomings in the regulatory regime as well as by a lack of members' rights to participate in the management of their own rights and by the ineffective international cooperation between the MCSC and other musical CMOs overseas. The analysis is undertaken through a case study approach, comparing the collective management systems of music copyright in China, the United States and Australia and addressing the question of how musical CMOs operate in these countries. Specifically, three perspectives are examined: the regulatory systems designed to limit the misuse of those CMOs' monopoly, members' rights in the organisations, and international cooperation between these CMOs. Overall, the main findings of this book suggest that the MCSC in China could work more effectively to protect music creators' interests. In contrast, although the operational frameworks of the American Society of Composers, Authors and Publishers ('ASCAP') and the Broadcasting Broadcast Music, Inc. ('BMI') in the United States and the Australasian Performing Right Association ('APRA') in Australia are not perfect models, the systems in these two countries may at least provide reference points for potential improvement of the regime of the MCSC. The research recommends three courses of action: strengthening the regulatory design overseeing the MCSC's monopoly, clarifying the relationship between the MCSC and its members while providing the members with the right to manage their own copyright, and improving the international cooperation between the MCSC and CMOs in other countries.

Legal Decisions That Shaped Modern Baseball

This book offers an original analysis of private copying and determines its actual scope as an area of end-user freedom. The basis of this examination is Article 5(2)(b) of the Copyright Directive. Despite the fact that copying for private and non-commercial use is permitted by virtue of this article and the national laws that implemented it, there is no mandate that this privilege should not be technologically or contractually restricted. Because the legal nature of private copying is not settled, users may consider

that they have a 'right' to private copying, whereas rightholders are in position to prohibit the exercise of this 'right'. With digital technology and the internet, this tension has become prominent: the conceptual contours of permissible private copying, namely the private and non-commercial character of the use, do not translate well, and tend to be less clear in the digital context. With the permissible limits of private copying being contested and without clarity as to the legal nature of the private copying limitation, the scope of user freedom is being challenged. Private use, however, has always remained free in copyright law. Not only is it synonymous with user autonomy via the exhaustion doctrine, but it also finds protection under privacy considerations which come into play at the stage of copyright enforcement. The author of this book argues that the rationale for a private copying limitation remains unaltered in the digital world and maintains there is nothing to prevent national judges from interpreting the legal nature of private copying as a 'sacred' privilege that can be enforced against possible restrictions. Private Copying will be of particular interest to academics, students and practitioners of intellectual property law.

Private Copying

An impassioned, darkly amusing look at how corporations misuse copyright law to stifle creativity and free speech. If you want to make fun of Mickey or Barbie on your Web site, you may be hearing from some corporate lawyers. You should also think twice about calling something "fair and balanced" or publicly using Martin Luther King Jr.'s "I Have a Dream" speech. It may be illegal. Or it may be entirely legal, but the distinction doesn't matter if you can't afford a lawyer. More and more, corporations are grabbing and asserting rights over every idea and creation in our world, regardless of the law's intent or the public interest. But beyond the humorous absurdity of all this, there lies a darker problem, as David Bollier shows in this important new book. Lawsuits and legal bullying clearly prevent the creation of legitimate new software, new art and music, new literature, new businesses, and worst of all, new scientific and medical research. David Bollier (Amherst, MA) is cofounder of Public Knowledge and Senior Fellow at the Norman Lear Center, USC Annenberg School for Communication. His books include *Silent Theft*.

Global Perspectives In Information Security

This book examines the challenges posed to Australian copyright law by streaming, from the end-user perspective. It compares the Australian position with the European Union and United States to draw lessons from them, regarding how they have dealt with streaming and copyright. By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses, it argues for strengthening end-user rights. The rising popularity of streaming has resulted in a revolutionary change to how digital content, such as sound recordings, cinematographic films, and radio and television broadcasts, is used on the internet. Superseding the conventional method

of downloading, using streaming to access digital content has challenged copyright law, because it is not clear whether end-user acts of streaming constitute copyright infringement. These prevailing grey areas between copyright and streaming often make end-users feel doubtful about accessing digital content through streaming. It is uncertain whether exercising the right of reproduction is appropriately suited for streaming, given the ambiguities of “embodiment” and scope of “substantial part”. Conversely, the fair dealing defence in Australia cannot be used aptly to defend end-users’ acts of streaming digital content, because end-users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review, news reporting, parody or satire, or research or study. When considering a temporary copy exception, end-users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content, even if they lack any knowledge about the content’s infringing nature. Moreover, the grey areas in circumventing geo-blocking have made end-users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo-blocking. End-users have a severe lack of knowledge about whether they can use circumvention methods, such as virtual private networks, to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content, the recently implemented website-blocking laws have emboldened copyright owners while suppressing end-users’ access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website-blocking injunctions.

Protection of Broadcasters' Rights

This collection of scholarly essays examines reality television. The first show, *Survivor*, inspired a national craze when it aired in the summer of 2000. Ever since, successors and copycats have been on each of the four largest networks. The basics stay the same: put a group of people into situations bound to cause conflict, and watch them squirm. Rather than criticize the series' voyeuristic appeal, this work evaluates what goes on within the text of such shows and how they reflect or affect our larger culture. Contributors include researchers from communications, sociology, political science, and psychology. The contributions cover such topics as reality television's relationships with cultural identity, publicity rights, historical perspectives, trust, decision-making strategies, political rationality, office politics, and primitivism. Each chapter includes a bibliography. Instructors considering this book for use in a course may request an examination copy [here](#).

Global Communication

This book explores the impact of the Internet on scholarly research across and beyond the social sciences. The contributors - leading figures in a broad spectrum of disciplines - explain how their fields of inquiry are being redefined, and what issues of social change are salient as new information technologies increasingly become the subject of scholarly analysis. They have rendered a conceptual photograph of how their disciplines are coping with the impact of information technology by covering policy approaches, empirical research, and theoretical questions. *Academy & the Internet* highlights significant zones of inquiry and provides a critical perspective on the direction each discipline is traveling.

Inhaltsangabe:Abstract: With the coming into force of Directive 97/55/EC, one of the issues that arose was as to how EU Member States will choose to implement the provisions concerning admissibility of comparative advertising. This dissertation will focus on the Directive's transposition into English and German law with special regard to price comparisons, each model of implementation being situated at the extreme end of the scale. English law, having traditionally supported comparative advertising now has had to face a much stricter approach put forward by the Directive. We shall enquire into the extent to which, in absence of an English law of unfair competition, s.10(6) of the 1994 Trade Marks Act, the torts of passing off and injurious falsehood, and the British Code of Advertising provide for compliance in that sphere. German law, on the other hand, having long opposed comparative advertising, has readily incorporated Directive 97/55 into §§2 and 3 of its 1909 Act Against Unfair Competition (UWG). German literature on the Act's compliance with the Directive has been widespread and the respective analysis will thus be limited to assessing opinions of academics, lawyers, judges, and members of the German government. I then compared those two models of implementation from the wider angle of the civil law/common law divide and general principles underlying Community law, before finally making proposals for amendments and assessing the impact the Directive had on each national law system. Effectively, German law has thus, in my view, provided for implementation to a fuller extent, as well as being the Member State which has felt the Directive's impact much more strongly than England. **Inhaltsverzeichnis:**Table of Contents: Introduction1 Chapter 1.The Law of Comparative Advertising in England7 1.1Rejection of a Law of Unfair Competition9 1.2The Law of Comparative Advertising11 1.3Implementation of Directive 97/55/EC14 Chapter 2.The Law of Comparative Advertising in Germany22 2.1The Law of Unfair Competition under the 1909 Act Against Unfair Competition22 2.2Implementation of Directive 97/55/EC26 Chapter 3.Analysis: Implementation of Directive 97/55/EC in England and Germany compared33 Conclusion43 Annex47 Bibliography47 Table of cases52 Statutory material53

Cultural diversity, in all its forms, poses a challenge to traditional cultural policy. This report discusses the issues of citizenship and the nature of democratic public policy in culturally diverse societies. It takes a comparative international perspective, and focuses on ethnic-based cultural differences. The report considers five policy contexts which have a significant bearing on the general direction of cultural policy, and identifies four principles of cultural entitlements based on heterogeneity. It recommends a number of steps that the Council of Europe and its member states should take in order to further promote cultural diversity.

The text provides a breadth of coverage that is specifically written for Sport Management majors who need to understand the relationship between sport administration and the law and as such provides an accessible level of detail. It urges students to think critically about course material and apply material to an in-depth study of legal aspects of sport through the use of cases to real-world scenarios and questions at the end of each chapter. The Second Edition has been reorganized to improve the flow of content and all case studies have been added to Navigate 2 to help students stay organized and prepare for class. The topic of discrimination in sports has been updated and expanded to include age, race, religion, and gender discrimination.

Differing Diversities

Tort law is a good thing (whatever it is...).

The Trade-mark Reporter

An examination of subjectivity in copyright law, analyzing authors, users, and pirates through a relational framework. In current debates over copyright law, the author, the user, and the pirate are almost always invoked. Some in the creative industries call for more legal protection for authors; activists and academics promote user rights and user-generated content; and online pirates openly challenge the strict enforcement of copyright law. In this book, James Meese offers a new way to think about these three central subjects of copyright law, proposing a relational framework that encompasses all three. Meese views authors, users, and pirates as interconnected subjects, analyzing them as a relational triad. He argues that addressing the relationships among the three subjects will shed light on how the key conceptual underpinnings of copyright law are justified in practice. Meese presents a series of historical and contemporary examples, from nineteenth-century cases of book abridgement to recent controversies over the reuse of Instagram photos. He not only considers the author, user, and pirate in terms of copyright law, but also explores the experiential element of subjectivity—how people understand and construct their own subjectivity in relation to these three subject positions. Meese maps the emergence of the author, user, and pirate over the first two centuries of copyright's existence; describes how regulation and technological limitations turned people from creators to consumers; considers relational authorship; explores practices in sampling, music licensing, and contemporary art; examines provisions in copyright law for user-generated content; and reimagines the pirate as an innovator.

Campus Hate Speech on Trial

Information Security is usually achieved through a mix of technical, organizational and legal measures. These may include the application of cryptography, the hierarchical modeling of organizations in order to assure confidentiality, or the distribution of accountability and responsibility by law, among interested parties. The history of Information Security reaches back to ancient times and starts with the emergence of bureaucracy in administration and warfare. Some aspects, such as the interception of encrypted messages during World War II, have attracted huge attention, whereas other aspects have remained largely uncovered. There has never been any effort to write a comprehensive history. This is most unfortunate, because Information Security should be perceived as a set of communicating vessels, where technical innovations can make existing legal or organisational frame-works obsolete and a breakdown of political authority may cause an exclusive reliance on technical means. This book is intended as a first field-survey. It consists of twenty-eight contributions, written by experts in such diverse fields as computer science, law, or history and political science, dealing with episodes,

organisations and technical developments that may be considered to be exemplary or have played a key role in the development of this field. These include: the emergence of cryptology as a discipline during the Renaissance, the Black Chambers in 18th century Europe, the breaking of German military codes during World War II, the histories of the NSA and its Soviet counterparts and contemporary cryptology. Other subjects are: computer security standards, viruses and worms on the Internet, computer transparency and free software, computer crime, export regulations for encryption software and the privacy debate. - Interdisciplinary coverage of the history of Information Security - Written by top experts in law, history, computer and information science - First comprehensive work in Information Security

Bonded Repair and Retrofit of Concrete Structures Using FRP Composites

The global response to COVID-19 has demonstrated the importance of vigilance and preparedness for infectious diseases, particularly influenza. There is a need for more effective influenza vaccines and modern manufacturing technologies that are adaptable and scalable to meet demand during a pandemic. The rapid development of COVID-19 vaccines has demonstrated what is possible with extensive data sharing, researchers who have the necessary resources and novel technologies to conduct and apply their research, rolling review by regulators, and public-private partnerships. As demonstrated throughout the response to COVID-19, the process of research and development of novel vaccines can be significantly optimized when stakeholders are provided with the resources and technologies needed to support their response. Vaccine Research and Development to Advance Pandemic and Seasonal Influenza Preparedness and Response focuses on how to leverage the knowledge gained from the COVID-19 pandemic to optimize vaccine research and development (R&D) to support the prevention and control of seasonal and pandemic influenza. The committee's findings address four dimensions of vaccine R&D: (1) basic and translational science, (2) clinical science, (3) manufacturing science, and (4) regulatory science.

From Territorial Defeat to Global ISIS: Lessons Learned

When Islamic State (ISIS) forces were driven out of the territories they had acquired in Syria and Iraq, there remained a concern that the threat posed by ISIS was far from over. It was clear that significant long-term strategies would be needed to establish and maintain security and stability if the potential for further radical Islamist threats in the Middle East and among NATO countries was to be eradicated. This book presents papers from the NATO Advanced Research Workshop (ARW) entitled The Post ISIS-Era: Regional and Global Implications, held in Washington DC, USA, from 6-8 September 2019. The ARW brought together participants from NATO member nations and Partner countries, and from diverse backgrounds, including academia, security, law enforcement, intelligence, military, foreign affairs, media, think tanks, international organizations and embassies. Topics covered included: the future of ISIS after the loss of its territories; maintaining security and stability; analysis of ISIS recruitment and propaganda activities; the returnee problem and the plight of refugees; the processes

of radicalization; response to the changing nature of violent extremism; policy recommendations to mitigate the consequences of new threats; and dealing with the exploitation of public fear of terrorism. The book also discusses how the lessons learned can be implemented, and offers specific policy recommendations for the future. It will be of interest to all those involved in combating the international terror threat.

In recent years, the fabrication technologies for the production of advanced polymer composites have been revolutionised by sophisticated manufacturing techniques. These methods have enabled polymer composite materials to produce good quality laminates with minimal voids and accurate fibre alignment. This book familiarises and provides a background to the understanding and use of advanced polymer composites in the civil infrastructure; numerous examples have been provided to illustrate the use and versatility of the material. Furthermore, the book discusses the current fabrication techniques, design methods and formulae for the design of structural composite systems. In addition it discusses the fundamentals of geosynthetics used in geotechnical engineering. The book introduces the fibres and matrices that are used to manufacture composites, their mechanical and in-service properties and their long term loading characteristics; all these properties are specifically associated with the construction industry. The chapters then discuss the design aspects for 'all composite' units, as well as systems used for the renewal of civil infrastructure. Finally, the book demonstrated the unique possibilities of combining composites with conventional materials to form units in which the various materials making up the unit are loaded in the mode that specifically suits their mechanical characteristics.

Continually increasing demands on infrastructures mean that maintenance and renewal require timely, appropriate action that maximizes benefits while minimizing cost. To be as well informed as possible, decision-makers must have an optimal understanding of an infrastructure's condition—what it is now, and what it is expected to be in the future. Written by two highly respected engineers, the second volume, *Infrastructure Health in Civil Engineering: Applications and Management*, integrates the decision making concept into theoretical and practical issues. It covers: State-of-the-art practice and future directions Use of probability and statistics in areas including structural modeling Specific practical applications, including retrofitting and rehabilitation in response to earthquake damage, corrosion, fatigue, and bridge security Use of IHCE for management and maintenance of different types of structures using pre-stressed and reinforced concrete, and fiber-reinforced polymers (FRPs) Numerous practical case studies, as well as coverage of the latest techniques in the use of sensors for damage detection and load testing Built to correspond to the ideas presented in its companion volume, *Theory and Components*, this is an invaluable guide to optimized, cost-saving methods that will help readers meet safety specifications for new projects, as well as the aging infrastructure at great risk of failure.

Monthly Catalog of United States Government Publications

Recruitment is key to a terrorist network's survival strategy. Steady enrollment is needed, not just to fight against perceived injustice, but to keep the network's grand strategy alive. When a weak state fails to protect its territory and implement the rule of law because of corruption or incapacity, it results in the creation of power vacuums. Terrorist networks thrive within power vacuums and opportunistically fill the space where a weak state could not maintain control. This destabilizes the international system and forces great powers to intervene. Historically, interventions are ineffective in combatting terrorism and have actually increased recruitment through regional political destabilization. Further, interventions have drained the capabilities of states, allowing for shifts in the distribution of power, thus changing the international order. Understanding recruitment mechanisms is key to developing strategies to combat recruitment in the short and long term.
