Aca notes Tutorial

Conducted throughout the acquisition process • Assist in engineering design and development .

Verify that technical performance • Conducted by the contractor Encompasses the use of models, simulations, testbeds, and prototypes

Definition: Developmental Test & Evaluation (DT&E) is a test used to compare a system or components against requirements and specifications to reduce risk and inform developers of current performance status

Provides information to the Program Manager (PM) on the progress • Compliance with contractual requirements • DoD test organization will conduct independent evaluations / assessments

Purpose • Provide the Program Manager with information to measure a project's progress • Manage & reduce risks • Verify that the system can meet all contractual and technical requirements . Can continue into further development

Main Activities Demonstrate that the engineering design and development process is complete .

Demonstrate that the design risks have been minimized • Demonstrate that the system will meet specifications Estimate the system's military utility when introduced Evaluate supportability goals
