Elements of Literature, Grade 7

When Edgar Roberts taught literature and composition he dedicated a substantial amount of his class time explaining to students how they should prepare their writing assignments. The more time he spent describing the assignment, the better the final essays. However, these explicit essay-writing directions

were taking up too much of his classroom time. At that point, Professor Roberts started to write and hand out directions, thus saving him valuable classroom time. Over the years, he tried and tested each assignment in his own classes. In addition to writing coverage, Professor Roberts recognized that literature classrooms needed both writing about literature instruction and an anthology to meet the needs of the literature and composition course. Literature: An Introduction to Reading and Writing, Ninth Edition is founded on the principles of writing about literature. It is not an afterthought and it is not treated as a separate chapter or appendix; it is the carefully integrated philosophy of Professor Roberts' approach to teaching literature and composition. --Publisher description.

Elements of Literature, Grade 12

This is an open access book. The rapid advancement of technology has created new civilization in this digital era which affects almost all aspects of life including language, literature, culture, and education. The digital era brings opportunities as well as challenges that people have to deal with. Thus, some adjustments need to be done in order to keep up with those changes. Studies on language, literature, culture, and education need to be continuously conducted and developed to revitalize those aspects in facing the dynamic changes of the digital era. In relation to this, Faculty of Language and Literature Education, Universitas Pendidikan Indonesia (FPBS UPI) hosts this year's International Conference on Language, Literature and Culture (ICOLLITE) with the theme "Revitalization of Language, Literature, Culture, and Education in the Digital Era" as a forum for experts and professionals to share their research, ideas, and experiences on this issue. Presenters and participants are welcome to discuss and disseminate current issues and offer solutions to the challenges of our time. Discussions on current trends in digital literacies are expected to pave way to learn from each other for betterment as one big society of humankind, regardless of their social, economic, and cultural backgrounds.

Elements of Literature, Grade 8

This book is based on the author's practice in teaching and learning literature. It approaches this subject as a privileged context for critical thinking, knowledge construction, and autonomy both for teachers and learners. It emphasizes practice though linking it with theory. Readers will find many examples to clarify explanations. It presents concept mapping as a powerful tool to facilitate one's expression of thinking+feeling+acting when experiencing a literary text. The book offers the opportunity of a hands-on participation in working with concept maps and of interacting with the author through email, if the reader feels like doing it. The aim here is to suggest ways to achieve a context of freedom and autonomy in literature classes as well as to encourage more readers to love reading and literature.

Elements of Literature

Adventures in Literature is a lower-level introduction to literature for ESL learners. The literature used is unique -- the authors draw on dialogue (mostly from short stories) to help less-proficient students develop an interest and understanding of literature. The authors whose work appears in this text include O. Henry, Oscar Wilde, George Orwell, Mona Gardner, James Thurber, Saki, Sir Arthur Conan Doyle, Colette, Alphonse Daudet, and Kate Chopin. Adventures in Literature includes a focus on vocabulary and a review of grammar. Each reading is accompanied by: pre-reading exercises grammar lessons vocabulary development exercises writing exercises discussion topics.
