International Law and the International System

This illuminating book explores a multitude of areas in which law and politics intersect on the international plane, providing a comprehensive analysis of the foundations on which both international law and politics rest. The book examines both disciplines' mutual interaction in more specific areas such as public authority, global space, and peace.

International Law and International Politics

This fully updated and revised edition explores the evolution, nature and function of international law in world politics.

International Law and International Relations

This text examines key concepts in international law in order to illuminate them in the context of international relations. The first part of the book covers theoretical issues. The second part examines international law in context, including case-study material and the Pinochet litigation.

International Law and International Relations

This unique volume examines the opportunities for, and initiates work in, interdisciplinary research between the fields of international law and international relations; disciplines that have engaged little with one another since the Second World War. Written by leading experts in the fields of international law and international relations, it argues that such interdisciplinary research is central to the creation of a knowledge base among IR scholars and lawyers for the effective analysis and governance of macro and micro phenomena. International law is at the heart of international relations, but due to challenges of codification and enforceability, its apparent impact has been predominantly limited to commercial and civil arrangements. International lawyers have been saying for years that 'law matters' in international affairs and now current events are proving them right. International Law and International Relations makes a powerful contribution to the theory and practice of global security by initiating a research agenda, building an empirical base and offering a multidisciplinary approach that provides concrete answers to real-world problems of governance. This book will be of great interest to all students of international law, international relations and governance.

International Law and International Relations

When studying international law there is often a risk of focusing entirely on the content of international rules (i.e. regimes), and ignoring why these regimes exist and to what extent the rules affect state behavior. Similarly, international relations studies can focus so much on theories based on the distribution of power among states that it overlooks the existence and relevance of the rules of international law. Both approaches hold their dangers. The overlooking of international relations risk assuming that states actually follow international law, and discounting the specific rules of international law makes it difficult for readers to understand the impact of the rules in more than a superficial manner. This book

unifies international law and international relations by exploring how international law and its institutions may be relevant and influence the course of international relations in international trade, protection of the environment, human rights, international criminal justice and the use of force. As a study on the intersection of power and law, this book will be of great interest and use to scholars and students of international law, international relations, political science, international trade, and conflict resolution.

Power and Law in International Society

One of the great paradoxes of post-medieval Europe, is why instead of bringing peace to a disorganised and violent world, modernity instead produced a seemingly endless string of conflicts and social upheavals. Why was it that the foundation and institutionalisation of secured peace and the rule of law seemed to go hand-in-hand with the proliferation of war and the violation of individual and collective rights? In order to try to better understand such profound questions, this volume explores the history and theories of political thought of international relations in the seventeenth century, a period in which many of the defining features and boundaries of modern Europe were fixed and codified. With the discovery of the New World, and the fundamental impact of the Reformation, the complexity of international relations increased considerably. Reactions to these upheavals resulted in a range of responses intended to address the contradictions and conflicts of the anarchical society of states. Alongside the emergence of "modern" international law, the equation of international relations with the state of nature, and the development of the "balance of power"

War, the State and International Law in Seventeenth-Century Europe

There has long been an advocacy for the sociology of international law, and yet it has never been constructed so systematically and axiomatically as in this book. Based on vital terms such as 'action' and 'system,' this book has conducted an investigation into the 'auspices' or the fundamental international sociological conditions over which international law is built, and accordingly, into how international law can control global relations. The significance of this work lies in its aim of showing by the application of a consistent logic, how complex observed phenomena can be explained and understood on the basis of certain shared fundamental perceptions drawn from common experience. By asking how a state acts in a complex system that consists of at least two subsystems having different goals and different logics, two specific issues are discussed: (1) The relationship between domestic and international law, namely, that between Article 9 of the Constitution of Japan and the UN Charter (especially the provisions for a collective security system as mentioned in chapter VII), (2) The relationship between international law and international politics, namely, the relationship between the prohibition of the use of nuclear weapons and the logic of nuclear deterrence.

A Social Theory of International Law

Since the creation of the United Nations in 1945, international law has sought to configure itself as a universal system. Yet, despite the best efforts of international institutions, scholars and others to assert the universal application of international law, its relevance and applicability has been influenced, if not directed, by political power. Today, the "decline of the West" and ascent of China and India pose particular challenges for international law and institutions. The international system appears to be moving towards multipolarity, with various sites of power competing to exert influence in the world today. With contributors from a variety of countries providing perspectives from the disciplines of international law and international relations theory, *International Law in a Multipolar World* addresses the implications that multipolarity poses for the international legal system. Contributors including Jean d'Aspremont, Jörg Kammerhofer, Alexander Orakhelashvili, Christian Pippan and Nigel White, explore issues such as the use of force, governance and democracy, regionalism and the relevance of the United Nations in a multipolar world, while considering the overarching theme of the relationship between power and law. *International Law in a Multipolar World* is of particular interest to academics and students of public international law, international relations theory and international politics.

International Law in a Multipolar World

Influential writers on international law and international relations explore the making, interpretation and enforcement of international law.

Interdisciplinary Perspectives on International Law and International Relations

This anthology brings together selections representative of the principal approaches to international legal theory. The volume is arranged according to the various theoretical concepts, and includes works from prominent authors like Hugo Grotius, H.L.A. Hart, Robert O. Keohane, Stephen Krasner, David Kennedy, Cristine Chinkin, and Hilary Charlesworth. The introductory notes to each chapter include definitions of key terms, fundamental assumptions, and a survey of the objectives of the particular theoretical approach. The book concludes with an appraisal of the present status of international legal theory in international law and political science.

International Rules

"In this fully updated and revised edition, the authors explore the evolution, nature and function of international law in world politics and situate international law in its historical and political context. They propose three interdisciplinary 'lenses' (realist, liberal and constructivist) through which to view the role of international law in world politics and suggest that the concept of an international society provides the overall context within which international legal developments occur. These theoretical perspectives offer different ways of looking at international law in terms of what it is, how it works and how it changes. Topics covered include the use of force, international crimes, human rights, international trade and the environment. The new edition also contains more material on non-western perspectives, international institutions and non-state actors and a new bibliography. Each chapter features discussion questions and guides to further reading"--Provided by publisher.

International Law and International Relations

Teaches how and why states make, break, and uphold international law using accessible explanations and contemporary international issues.

Politics and International Law

This scarce antiquarian book is a facsimile reprint of the original. Due to its age, it may contain imperfections such as marks, notations, marginalia and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving, and promoting the world's literature in affordable, high quality, modern editions that are true to the original work.

International Law and International Relations: An Attempt to Ascertain the Best Method of Discussing the Topics of International Law (1884)

This text provides students with comprehensive coverage that maps out the different ways to approach the study of international law. It explains the institutions and main sources of international law-making and identifies the key topics.

International Law for International Relations

This text provides students with comprehensive coverage that maps out the different ways to approach the study of international law. It explains the institutions and main sources of international law-making and identifies the key topics.

International Law for International Relations

The space occupied by international law in shaping political action is subject to continuing debate and controversy. This book aims to answer the question of how and why international law impacts the behaviour of actors on the international stage in the absence of central authority and faced with asymmetric power. At a time when the role of normative restraints in international relations, and international law in particular, has come under renewed questioning, it advances an analytical framework for understanding the effect of norms on behaviour that is not contingent on material restraints or a given political constellation, while being informed by the practical realities and practice of international organisation. In doing so, this book draws on an interdisciplinary range of sources, including international law, political theory, cognitive psychology and behavioural economics to explore a communicative action-based approach of how norms and ideas persuade actors to engage in a course of action consonant with international law to achieve a particular outcome. In probing the role of norms on questions such as the use of force and accountability, and issues of equity and justice, it examines the challenges international law faces and what the way forward may look like.

The International Legal Order in Global Governance

Politics and law appear deeply entwined in contemporary international relations. Yet existing perspectives struggle to understand the complex interplay between these aspects of international life. In this path-breaking volume, a group of leading international relations scholars and legal theorists advance a new constructivist perspective on the politics of international law. They reconceive politics as a field of human action that stands at the intersection of issues of identity, purpose, ethics, and strategy, and define law as an historically contingent institutional expression of such politics. They explain how liberal politics has conditioned modern international law and how law 'feeds back' to constitute international relations and world politics. This new perspective on the politics of international law is illustrated through detailed case-studies of the use of force, climate change, landmines, migrant rights, the International Criminal Court, the Kosovo bombing campaign, international financial institutions, and global governance.

The Politics of International Law

This concise book is an introduction to the role of international law in international relations. Written for lawyers and non-lawyers alike, the book first appeared in 1928 and attracted a wide readership. This new edition builds on Brierly's scholarship and his idea that law must serve a social purpose. Previous editions of *The Law of Nations* have been the standard introduction to international law for decades, and are widely popular in many different countries due to the simplicity and brevity of the prose style. Providing a comprehensive overview of international law, this new version of the classic book retains the original qualities and is again essential reading for all those interested in learning what role the law plays in international affairs. The reader will find chapters on traditional and contemporary topics such as: the basis of international obligation, the role of the UN and the International Criminal Court, the emergence of new states, the acquisition of territory, the principles covering national jurisdiction and immunities, the law of treaties, the different ways of settling international disputes, and the rules on resort to force and the prohibition of aggression.

Brierly's Law of Nations

A bridge is constructed by this volume between the separate professions and disciplines of international lawyers and social scientists. The authors attempt to restate international law, both its jurisprudence and its rules, in social science terms. The authors then explicitly set forth the reciprocal relationships between international law and the findings, perspectives, and literature of the social sciences—showing how the insights and concepts of political science, sociology, psychology, and other disciplines can illuminate the field of international law. The limits as well as utility of social science materials in the comprehension, teaching, and practice of international law are evaluated. Originally published in 1970. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

International Law and the Social Sciences

"This book brings together the most influential contemporary writers in the fields of international law and international relations to take stock of what we know about the making, interpretation and enforcement of international law"--

'Interdisciplinary Perspectives on International Law and International Relations'

This 2004 book aims at advancing our understanding of the influences international norms and international institutions have over the incentives of states to cooperate on issues such as environment and trade. Contributors adopt two different approaches in examining this question. One approach focuses on the constitutive elements of the international legal order, including customary international law, soft law and framework conventions, and on the types of incentives states have, such as domestic incentives and reputation. The other approach examines specific issues in the areas of international environment protection and international trade. The combined outcome of these two approaches is an understanding of the forces that pull states toward closer cooperation or prevent them from doing so, and the impact of different types of international norms and diverse institutions on the motivation of states. The insights gained suggest ways for enhancing states' incentives to cooperate through the design of norms and institutions.

The Impact of International Law on International Cooperation

International Relations and International Law have developed in parallel but distinctly throughout the 20th Century. However in recent years there has been recognition that their shared concerns in areas as diverse as the environment, transnational crime and terrorism, human rights and conflict resolution outweigh their disciplinary and methodological divergences. This concise and accessible volume focuses on collaborative work within the disciplines of international law and international relations, and highlights the need to develop this collaboration further, describing the value for individuals, states, IGOs, and other non-state actors in being able to draw on the cross-pollination of international relations and international legal scholarship. This book: examines how different elements of governance are interacting and shifting from one actor to another analyses the cumulative effect of these shifts, and evaluates how they both enhance and challenge the worlds governing capacity considers how the characteristics of an architecture for a globalized governance are emerging. Helping readers to examine and understand how accumulated actions over time have given rise to system-wide changes, this work is essential reading for all students of international law, international relations and global governance.

International Law, International Relations and Global Governance

An introduction to international law for politics and IR studentsThis textbook introduction to international law and justice is specially written for students studying law in other departments, such as politics and IR. Written by a lawyer and a political theorist, it shows how international politics has influenced international law.Edwin Egede and Peter Sutch show that neglected questions of justice and ethics are essential to any understanding of the institutions of international society. They walk students through the most crucial questions and critical debates in international law today: sovereignty and global governance, sovereign and diplomatic immunity, human rights, the use of force, sanctions and the domestic impact of international law.

Politics of International Law and International Justice

The international legal system has weathered sweeping changes over the last decade as new participants have emerged. International law-making and law-enforcement processes have become increasingly multi-layered with unprecedented numbers of non-State actors, including individuals, insurgents, multinational corporations and even terrorist groups, being involved. This growth in the importance of non-State actors at the law-making and law-enforcement levels has generated a lot of new scholarly studies on the topic. However, while it remains uncontested that non-State actors are now playing an important role on the international plane, albeit in very different ways, international legal scholarship has remained riddled by controversy regarding the status of these new actors in international law. This collection features contributions by renowned scholars, each of whom focuses on a particular theory or tradition of international law, a region, an institutional regime or a particular subject-matter, and considers how that perspective impacts on our understanding of the role and status of non-State actors. The book takes a critical approach as it seeks to gauge the extent to which each conception and understanding of international law is instrumental in the perception of non-State actors. In doing so the volume provides a wide panorama of all the contemporary legal issues arising

in connection with the growing role of non-state actors in international-law making and international law-enforcement processes.

Participants in the International Legal System

The Routledge Handbook of International Law provides a definitive global survey of the interaction of international politics and international law. Each chapter is written by a leading expert and provides a state of the art overview of the most significant areas within the field. This highly topical collection of specially commissioned papers from both established authorities and rising stars is split into four key sections: The Nature of International Law including the interaction between the disciplines of International Law and International Relations The Evolution of International Law progressing from the ancient world to present day. Law and Power in International Society discussing topical issues such as the war in Iraq and the international criminal court Key Issues in International Law including international refugee law, indigenous rights, intellectual property, trade and the challenges presented by "new terrorism". A comprehensive survey of the state of the discipline, The Routledge Handbook of International Law is an essential work of reference for scholars and practitioners of international Law.

Routledge Handbook of International Law

As our society becomes more global, international law is taking on an increasingly significant role, not only in world politics but also in the affairs of a striking array of individuals, enterprises, and institutions. In this comprehensive study, David J. Bederman focuses on international law as a current, practical means of regulating and influencing international behavior. He shows it to be a system unique in its nature—nonterritorial but secular, cosmopolitan, and traditional. Part intellectual history and part contemporary review, *The Spirit of International Law* ranges across the series of cyclical processes and dialectics in international law over the past five centuries to assess its current prospects as a viable legal system. After addressing philosophical concerns about authority and obligation in international law, Bederman considers the sources and methods of international lawmaking. Topics include key legal actors in the international system, the permissible scope of international legal regulation (what Bederman calls the "subjects and objects" of the discipline), the primitive character of international law and its ability to remain coherent, and the essential values of international legal order (and possible tensions among those values). Bederman then measures the extent to which the rules of international law are formal or pragmatic, conservative or progressive, and ignored or enforced. Finally, he reflects on whether cynicism or enthusiasm is the proper attitude to govern our thoughts on international law. Throughout his study, Bederman highlights some of the canonical documents of international law: those arising from famous cases (decisions by both international and domestic tribunals), significant treaties, important diplomatic correspondence, and serious international incidents. Distilling the essence of international law, this volume is a lively, broad, thematic summation of its structure, characteristics, and main features.

States and the Global System

Paul F. Diehl and Charlotte Ku's new framework for international law divides it into operating and normative systems. The authors provide a theory of how these two systems interact, which explains how changes in one system precipitate changes and create capacity in the other. A punctuated equilibrium theory of system evolution, drawn from studies of biology and public policy studies, provides the basis for delineating the conditions for change and helps explain a pattern of international legal change that is often infrequent and sub-optimal, but still influential.

The Spirit of International Law

This text challenges students to understand the concepts of international law in order to apply these concepts to specific cases for the purpose of taking a position on existing political and legal debates within the fields of international law and international studies.

The Dynamics of International Law

This volume derives from a series of lectures delivered as the 'general course' at the Hague Academy of International law in July 1989. Like those lectures, this volume does not pretend to provide a complete treatise covering all international law. Rather, it offers a particular perspective on the principal subjects of traditional international law, elaborates new developments, and dares reexamine assumptions and

premises. The book is built on three themes. The first addresses law as politics, and international law as the law of a political system, now comprised of more than 180 separate, independent states. The essential autonomy of states accounts for the political (as well as economic and cultural) heterogeneity in a pluralist and fragmented system, and international law as its common denominator of normative expression. A second theme explores change in international law as reflecting change in the values and purposes of the international political system. It traces the pursuit through law of the traditional ideal of the state system to secure every state's right to realize its own agenda through its own institutions, and the superimposed contemporary purpose to promote individual human rights and welfare in every society. The third theme perceives a movement in the law from 'conceptualism' to 'functionalism', from logical deduction out of abstract principles to pragmatic attention to practical needs and solutions to new and old human problems. Each of these themes dominates in several chapters but the other themes are not absent from any of them. Each will add a fresh perspective and contribute to understanding the nature and operation of international law in the international political system at the turn of a new century.

International Law and National Behavior

These collected essays deal with the evolutions and immutabilities of international society and international law during the last 25 years, a period during which these fields of study have undergone many changes. The starting point is that far from operating at different levels or being in conflict, international law and politics are closely intertwined. The book addresses the many different aspects of international law: the role and concept of the State, and the position of States in the international system; the bases, principles and evolution of public international law; questions of international security that still govern international relations; classic and current systems of peace and security maintenance; the standing, role and actions of the UN Security Council; arms control and limitation of armaments; unilateral uses of armed force and the legality of war; and humanitarian law and international criminal justice. The perspective of these essays is not a theoretical or dogmatic vision of international law and politics; rather they are based upon the practices of States in the international arena, and the ways in which the guiding legal rules are elaborated and implemented. These texts have been selected from Professor Sur's various books and numerous articles on international law and relations.

Is International Law Even Law?

Until recently, the fundamental link between two basic concepts in international law, namely the right to self-help and the obligation to settle disputes by peaceful means, has been neglected in doctrine and practice. The main issue is that international law traditionally recognizes the right of states to safeguard their own rights by resorting to countermeasures as well as the obligation to settle their disputes by accepted and recognized diplomatic and judicial procedures. Both concepts are based on their own merits, which are assumed to be valid in contemporary international law. It is the primary purpose of this study to determine which rules and principles govern the relationship between the two concepts. The book's major findings arise from an analysis of scholarly work, supported by examples from five different case studies. Drawing insights from legal as well as political science, it will be a valuable resource for students, academics and policy makers in international law, international relations and related areas.

Developments in International Law Vol 18

This interdisciplinary volume examines the highly topical issue of the role international law plays in international politics today.

International Law, Power, Security and Justice

By approaching an important foreign policy issue from a new angle, Jonathan Mercer comes to a startling, controversial discovery: a nation's reputation is not worth fighting for. He presents the most comprehensive examination to date of what defines a reputation, when it is likely to emerge in international politics, and with what consequences. Mercer examines reputation formation in a series of crises before World War I. He tests competing arguments, one from deterrence theory, the other from social psychology, to see which better predicts and explains how reputations form. Extending his findings to address recent crises such as the Gulf War, he also considers how culture, gender, and nuclear weapons affect reputation. Throughout history, wars have been fought in the name of

reputation. Mercer rebuts this politically powerful argument, shows that reputations form differently than we thought, and offers policy advice to decision-makers.

Enforcing International Law

In this concise introduction to international law, students gain a clear appreciation for how politics shapes the development of international law, and how international law shapes political relations between states. Throughout the book, Rochester takes this complex subject and makes it accessible with his vibrant, easy-to-read prose.

International Law and International Relations

This book explores the impacts of global economic, political and cultural shifts on various international legal frameworks and legal norms. The economic growth of states throughout Asia, South and Central America and Africa is having a profound effect on the dynamics of international relations, with a resulting impact on the operation and development of international law. This book examines the influence of emerging economies on international legal rules, institutions and processes. It describes recent and predicted changes in economic, political and cultural powers, flowing from the growth of emerging economies such as China, India, Brazil, South Africa and Russia, and analyses the influence of these changes on various legal frameworks and norms. Expert contributors drawn from a variety of fields, including international law, politics, environmental law, human rights, economics and finance, provide a broad analysis of the nature of the shifting global dynamic in its historical and contemporary contexts, and a range of perspectives on the impact of these changes as they relate to specific regimes and issues, including climate change regulation, collective security, indigenous rights, the rights of women and girls, environmental protection and foreign aid and development. The book provides a fresh and comprehensive analysis of an issue with extensive implications for international law and politics. Shifting Global Powers and International Law will be of interest to students and scholars of international relations; international law; international political economy, human rights; and development.

The Principles and Practice of International Commercial Arbitration

This book explains how and why arbitration works. offering comprehensive coverage of the basic requirements, including recent changes in arbitration laws, rules, and guidelines.

The Principles and Practice of International Commercial Arbitration

This title provides the reader with immediate access to understanding the world of international arbitration. Arbitration has become the dispute resolution method of choice in international transactions. This book explains how and why arbitration works. It provides the legal and regulatory framework for international arbitration, as well as practical strategies to follow and pitfalls to avoid. It is short and readable, but comprehensive in its coverage of the basic requirements, including changes in arbitration laws, rules, and guidelines. In the book, the author includes insights from numerous international arbitrators and counsel, who tell firsthand about their own experiences of arbitration and their views of the best arbitration practices. Throughout the book, the principles of arbitration are supported and explained by the practice, providing a concrete approach to an important means of resolving disputes.

The Principles and Practice of International Commercial Arbitration

The Principles and Practice of International Commercial Arbitration provides the reader with immediate access to understanding the world of international arbitration. Arbitration has become the dispute resolution method of choice in international transactions. This book explains how and why arbitration works. It provides the legal and regulatory framework for international arbitration, as well as practical strategies to follow and pitfalls to avoid. It is short and readable, but comprehensive in its coverage of the basic requirements, including the most recent changes in arbitration laws, rules, and guidelines. Throughout the book, the principles of arbitration are supported and explained by the practice, providing a concrete approach to an important means of resolving disputes.

International Arbitration: Law and Practice

International Arbitration: Law and Practice (Third Edition) provides comprehensive and authoritative coverage of the basic principles and legal doctrines, and the practice, of international arbitration. The book contains a systematic, but concise, treatment of all aspects of the arbitral process, including international arbitration agreements, international arbitral proceedings and international arbitral awards. The Third Edition guides both students and practitioners through the entire arbitral process, beginning with drafting, enforcing and interpreting international arbitration agreements, to selecting arbitrators and conducting arbitral proceedings, to recognizing, enforcing and seeking to annul arbitral awards. The book is written in clear, accessible language, suited for both law students and non-specialist practitioners, as well as more experienced readers. This highly regarded work addresses both international commercial arbitration and the related fields of investment and state-to-state arbitration and is essential reading for any student of international arbitration and any practitioner seeking a complete introduction to the field. The Third Edition has been comprehensively updated to include recent legislative amendments, judicial decisions and arbitral awards. Among other things, the book provides detailed treatment of the New York Convention, the UNCITRAL Model Law on International Commercial Arbitration, all leading institutional arbitration rules (including ICC, SIAC, LCIA, AAA and others), the ICSID Convention and ICSID Arbitration Rules, and judicial decisions from leading jurisdictions. The Third Edition is integrated with the author's classic International Commercial Arbitration and with the online Born International Arbitration Lectures, enabling students, teachers and practitioners to explore particular topics in more detail. About the Author: Gary B. Born is the world's leading authority on international arbitration and litigation. He has practiced extensively in both fields in Europe, the United States, Asia and elsewhere. He is the author of International Commercial Arbitration (Kluwer Law International 3rd ed. 2021), International Arbitration and Forum Selection Agreements: Drafting and Enforcing (Kluwer Law International 6th ed. 2021), International Commercial Arbitration: Cases and Materials (Aspen 3rd ed. 2021) and International Civil Litigation in United States Courts (Aspen 6th ed. 2018).

International Commercial Arbitration

There has been an exponential rise in the use of ICA for resolving international business disputes, yet international arbitration is a scarcely regulated, specialty industry. *International Commercial Arbitration: An Asia Pacific Perspective* is the first book to explain ICA topic by topic with an Asia Pacific focus. Written for students and practising lawyers alike, this authoritative book covers the principles of ICA thoroughly and comparatively. For each issue it utilises academic writings from Asia, Europe and elsewhere, and draws on examples of legislation, arbitration procedural rules and case law from the major Asian jurisdictions. Each principle is explained with a simple statement before proceeding to more technical, theoretical or comparative content. Real-world scenarios are employed to demonstrate actual application to practice. *International Commercial Arbitration* is an invaluable resource that provides unique insight into real arbitral practice specific to the Asia Pacific region, within a global context.

International Commercial Arbitration

International Commercial Arbitration Third Edition is an authoritative treatise providing the most complete available commentary and analysis on all aspects of the international commercial arbitration process. This completely revised and expanded edition of Gary Born's authoritative work is divided into three main parts, dealing with the International Arbitration Agreement, International Arbitral Procedures and International Arbitral Awards. The Third Edition provides a systematic framework for both current analysis and future developments, as well as exhaustive citations from all leading legal systems.

INTERNATIONAL ARBITRATION AGREEMENTS Legal Framework for International Arbitration Agreements International Arbitration Agreements and the Separability Presumption Choice-of-Law Governing International Arbitration Agreements Formation, Validity and Legality of International Arbitration Agreements International Arbitration Agreements and Competence-Competence Effects and Enforcement of International Arbitration Agreements Interpretation of International Arbitration Agreements INTERNATIONAL ARBITRAL PROCEDURES AND PROCEEDINGS Legal Framework for International Arbitral Proceedings Selection, Challenge and Replacement of Arbitrators in International Arbitration Rights and Duties of International Arbitrators Selection of Arbitral Seat in International Arbitration Procedures in International Arbitration Disclosure and Discovery in International Arbitration Provisional Measures in International Arbitration Consolidation, Joinder and Intervention in International Arbitration Choice of Substantive Law in International Arbitration Confidentiality in International Arbitration Legal Representation and Professional Conduct in International Arbitration INTERNATIONAL ARBITRAL AWARDS Legal Framework for International Arbitral Awards Form and Content of International Arbitral Awards Correction, Interpretation and Supplementation of International Arbitral Awards Annulment of International Arbitral Awards Recognition and Enforcement of International Arbitral Awards Preclusion, Lis Pendens and Stare Decisis in International Arbitral Awards

International Commercial Arbitration

The second edition of Gary Born's *International Commercial Arbitration* is an authoritative 4,408 page treatise, in three volumes, providing the most comprehensive commentary and analysis, on all aspects of the international commercial arbitration process, that is available. The first edition of *International Commercial Arbitration* is widely acknowledged as the preeminent commentary in the field. It was awarded the 2011 Certificate of Merit by the American Society of International Law and was voted the International Dispute Resolution Book of the Year by the Oil, Gas, Mining and Infrastructure Dispute Management list serve in 2010. The first edition has been extensively cited in national court decisions and arbitral awards around the world. The treatise comprehensively examines the law and practice of contemporary international commercial arbitration, thoroughly explicating all relevant international conventions, national arbitration statutes and institutional arbitration rules. It focuses on both international instruments (particularly the New York Convention) and national law provisions in all leading jurisdictions (including the UNCITRAL Model Law on International Commercial Arbitration). Practitioners, academics, clients, institutions and other users of international commercial arbitration will find clear and authoritative guidance in this work. The second edition of *International Commercial Arbitration* has been extensively revised, expanded and updated, to include all material legislative, judicial and arbitral authorities in the field of international arbitration prior to January 2014. It also includes expanded treatment of annulment, recognition of awards, counsel ethics, arbitrator independence and impartiality and applicable law. Overview of volumes: Volume I, covering International Arbitration Agreements, provides a comprehensive discussion of international commercial arbitration agreements. It includes chapters dealing with the legal framework for enforcing international arbitration agreements; the separability presumption; choice of law; formation and validity; nonarbitrability; competence-competence and the allocation of jurisdictional competence; the effects

of arbitration agreements; interpretation and non-signatory issues. Volume II, covering International Arbitration Procedures, provides a detailed discussion of international arbitral procedures. It includes chapters dealing with the legal framework for international arbitral proceedings; the selection, challenge and replacement of arbitrators; the rights and duties of international arbitrators; selection of the arbitral seat; arbitration procedures; disclosure and discovery; provisional measures; consolidation, joinder and intervention; choice of substantive law; confidentiality; and legal representation and standards of professional conduct. Volume III, dealing with International Arbitral Awards, provides a detailed discussion of the issues arising from international arbitration awards. It includes chapters covering the form and contents of awards; the correction, interpretation and supplementation of awards; the annulment and confirmation of awards; the recognition and enforcement of arbitral awards; and issues of preclusion, *lis pendens* and *stare decisis*.

Law and Practice of International Commercial Arbitration

Highly acclaimed by practitioners all over the world, *Law & Practice of International Commercial Arbitration* has deservedly become the leading text in its field. With its comprehensive review of the legal context within which international commercial arbitration operates, Redfern & Hunter is the ultimate user-friendly explanation of how arbitration, and in particular international commercial arbitration, works. The 4th edition has been expanded to give a wider global scope to the work. Readers can also benefit from the expert insight and advice of world-renowned international practitioners.

- international practitioner
- * Contains a comprehensive review of the international commercial arbitration process from start to finish
- * Includes commentary on suitable places of arbitration, developments in international trade law and the increasing harmonisation of national laws governing international arbitration
- * Appendices include the major international rules of arbitration and conventions
- * Explains how arbitration should be conducted to be cost effective and profitable
- * Fully updated to take account of the latest developments all over the world - including a new chapter on investment arbitrations

Commercial Arbitration in Australia

Commercial Arbitration Law in Australia provides an essential and timely guide to domestic commercial arbitration in Australia following the 2010 decision by the Standing Committee of Attorneys-General (SCAG) to enact new uniform commercial arbitration acts in each jurisdiction. The new uniform legislation uses the UNICTRAL Model Law as its basis with deviations necessary for the Australian domestic setting and has already been enacted in New South Wales. These substantive and procedural changes to Australia's existing domestic arbitration law make a new and comprehensive text on this topic essential. *Commercial Arbitration Law in Australia* will provide the reader with: a background to the reform process, in-depth consideration of relevant case law from around the world, as influenced by the UNCITRAL Model Law, Australian jurisprudence on arbitration law and practice, A section-by-section commentary on the new Commercial Arbitration Act 2010 (NSW), which follows the SCAG's model provisions, and discussion of alternative forms of dispute resolution. This work is a 'must have' for anyone involved in commercial dispute resolution in Australia whether as a party to the arbitration, counsel, neutral or student.

International Commercial Arbitration: Commentary and Materials

International Commercial Arbitration contains detailed commentary, case analyses, and practice pointers. Full annotations and footnotes provide invaluable research assistance, while clearly-written analyses identify and discuss critical issues. Representative international arbitral awards and national court decisions are excerpted, and detailed reference is made to leading institutional rules. Detailed appendices, an easy-to-use Table of Contents, and an extensive index to aid research and provide ready access to key materials. Co-publication with Kluwer Law International. North American sales rights only. Published under the Transnational Publishers imprint. For class adoption a student edition is available for

International Commercial Arbitration

A comprehensive reference to the international legal context within which commercial arbitration operates together with a detailed guide to the law and practice of international commercial arbitration.

International Arbitration Law and Practice, Third Edition

This third edition of International Arbitration Law and Practice has been largely enriched by covering international commercial arbitrations, investment treaty arbitrations, arbitrations between public bodies, between states and individuals, the UNCITRAL model law and Iran-US Tribunal proceedings as well as commodity arbitration, online arbitration and sports arbitral proceedings. International Arbitration Law and Practice, 3rd edition elaborates new concepts such as a definition of international arbitration based on procedural law (different from transnational law) and a doctrine (the *tronc commun* doctrine) to identify the applicable substantive law on disputes between parties belonging to different countries. It further suggests that a law of international arbitration has arisen from the various conventions and laws. Besides dealing with all the aspects of arbitration on a topic by topic basis, the writer presents a third generation arbitration which builds on analysis of major obstacles to a smooth running arbitration. International Arbitration Law and Practice, 3rd edition is a work that anyone involved in arbitral proceedings will find to be absolutely indispensable.

International Arbitration: Law and Practice in Switzerland

This third edition, and the first in English, of the globally-cited *Arbitrage International-Droit et Pratique à la Lumière de la LDIP*, provides complete guidance on arbitration law and practice relating to Switzerland from two of the leading authorities on Swiss practice.

Third Parties in International Commercial Arbitration

Third Parties in International Commercial Arbitration addresses the role and the interests of third parties in international arbitration. Through a clear overview and in-depth critical commentary, the book explores existing case law and its related academic literature as well as offering an insight into more practical concerns.

Redfern and Hunter on International Arbitration

Reviewing the legal context within which international commercial arbitration operates, this text has been updated to reflect recent developments in international law.

Comparative International Commercial Arbitration

This treatise describes the practice of international commercial arbitration with reference to the major international treaties and instruments, arbitration rules and national laws. It provides an analysis of the interaction between party autonomy and arbitration practice.

Leading Arbitrators' Guide to International Arbitration - Third Edition

The Leading Arbitrators' Guide to International Arbitration Third Edition offers thoughtful advice and insights into the world of international arbitration from some of the most prominent and experienced international arbitrators in the world. The contributors are arbitrators from Australia, Belgium, Canada, Chile, Denmark, England, France, Germany, Italy, The Netherlands, Italy, Spain, Sweden, Switzerland and the USA. The contributors offer insights and advice on the way in which international arbitrations are carried out from the point of view of arbitrators reading pleadings and memorials and listening to witnesses and hearing arguments. The authors' discussions are intended to be thoughtful, insightful and useful - and perhaps, occasionally, iconoclastic. As a result, there may be instances in which the authors disagree with one another on certain points. This is to be expected for there are often many routes that can be taken to achieve a result. The book will be useful not only to persons who may serve as arbitrators in international arbitral proceedings but also to those who may, in their position as advocates, wish to persuade persons -- including, perhaps, the authors.

Practitioner's Handbook on International Arbitration

International Arbitration: Law and Practice (Second Edition) provides a comprehensive coverage of the basic principles and legal doctrines, and the practice, of international arbitration. It contains a systematic and concise treatment of all aspects of the arbitral process, including international arbitration agreements, international arbitral proceedings and international arbitral awards. The book addresses both international commercial arbitration and the related fields of investment and state-to-state arbitration, and is essential reading for any student of international arbitration and any practitioner seeking a complete introduction to the field. Accolades for Gary B. Bornand's International Commercial Arbitration (2009 and 2nd ed. 2014), recipient of the American Society of International Law and's

2010 Certificate of Merit: and “An unparalleled book on the law, practice and theory of international commercial arbitration and... indispensable for both practitioners and academics.” Professor Jack L. Goldsmith III, Harvard Law School and “Stunningly comprehensive, accessible, and bristling with insights: the definitive text on international arbitration.” Professor Harold Hongju Koh, Yale Law School and “A monumental work of legal scholarship.” Professor Campbell McLachlan, Victoria University of Wellington and “An extraordinary combination of both practical experience and academic analysis.” Professor Dr. Daniel Girsberger, University of Lucerne

International Arbitration

This volume provides a detailed review of the process of international commercial arbitration, from the drafting of the arbitration agreement to the enforcement of the arbitral tribunal's award. It has been revised to include appendices which describe the arbitration rules of various countries.

Law and Practice of International Commercial Arbitration

Since fall 2006: a new, revised edition of *Unidroit Principles in Practice*, featuring approximately 120-130 cases. The *UNIDROIT Principles of International Commercial Contracts*, published in 1994, were an entirely new approach to international contract law. Prepared by a group of eminent experts from around the world as a “restatement” of international commercial contract law, the Principles are not a binding instrument but are referred to in many legal matters. They are widely recognized now as a balanced set of rules designed for use throughout the world irrespective of the legal traditions and the economic and political conditions of the countries in which they are applied.

The UNIDROIT Principles in Practice

This new work provides a useful and accessible reminder of the principles of agency law for experienced practitioners, as well as an invaluable guide for students looking for an approachable text on this topic.

Agency

Considers the vitality of the international arbitral process through an updated examination of three salient problems.

International Arbitration

Overriding Mandatory Rules in International Commercial Arbitration discusses the applicability of mandatory rules of law in international commercial arbitration and addresses the concerns of the arbitrators and judges at various stages of arbitration and the enforcement of the award.

Overriding Mandatory Rules in International Commercial Arbitration

This volume on the *UNIDROIT Principles of International Commercial Contracts* provides quick access to all case law and legal literature for specific problems, paired with in-depth scholarly analysis.

Commentary on the UNIDROIT Principles of International Commercial Contracts (PICC)

ADR: Principles and Practice is an essential Alternative Dispute Resolution title. The third edition will cover theory, principles and practice of ADR especially mediation, providing understanding, guidance and authority. It will explore and integrate models of practice; examine strategies; provide precedents; assist practitioners, policy makers and the judiciary in addressing the issues affecting practice; and generally provide an encyclopaedic work of reference for practitioners and students.

ADR Principles and Practice

The *Unidroit Principles of International Commercial Contracts* provide an excellent and practice proven tool for cross-border contracts: They constitute a neutral and pragmatic business oriented contractual regime for cross-border contracts. They contain multiple solutions to typical contractual questions regarding the life of a contract, often by way of a compromise between civil and common law. They have been referenced in hundreds of decisions of arbitral tribunals or national state courts. They have been endorsed inter alia by the United Nations Commission on International Trade Law (last in 2021) and the Union Internationale des Avocats (2020) bringing together through its bar association and individual members approximately two million lawyers in more than 110 countries. Thirty years after their first

publication, it is arguably malpractice to ignore them. In this fully revised and enlarged 2nd edition, the commentary continues to analyse the Unidroit Principles article by article from a practical perspective, while always discussing alternative courses of action, where they apply. The commentary includes proposals for choice of the Unidroit Principles' clauses and practical guidance for their use as template, or to supplement the CISG or national law. In addition to arbitral and state court decisions and recent literature, the 2nd edition includes an in-depth analysis of extensive legislative material. The author is a German practitioner with international training and familiarity with both common and civil law. He has been admitted to the New York Bar and also teaches at the University of Hamburg as a Professor of Law. The author is using the Unidroit Principles for more than 20 years in his commercial and arbitration practice, in recent years on a daily basis in multiple industries. As he shares his experience under the Unidroit Principles, the commentary can also be used as a practical guide and checklist of issues to consider in international contracting. Die Unidroit Principles of International Commercial Contracts sind das ideale Instrument für grenzüberschreitende Verträge: sie bilden ein neutrales, pragmatisches und wirtschaftsorientiertes Regime für grenzüberschreitende Verträge sie enthalten zahlreiche praxisnahe Lösungen für übliche Vertragsfragen und versöhnen dabei Civil Law und Common Law Unidroit Principles werden in zahlreichen Entscheidungen von Schiedsgerichten oder nationalen Gerichten zitiert u.a. befürwortet von der Kommission der Vereinten Nationen für internationales Handelsrecht (zuletzt 2021) und der Union Internationale des Avocats (2020), die über ihre Anwaltskammern und Einzelmitglieder rund zwei Millionen Anwälte in mehr als 110 Ländern vereinen. Nach dreißig Jahren Anwendung in der Praxis kann es sich rächen, die Unidroit Principles zu ignorieren! Die vollständig überarbeiteten und erweiterte 2. Auflage des Kommentars analysiert weiterhin die Unidroit Principles, Artikel für Artikel, aus Sicht des Praktikers. Alternative Handlungsmöglichkeiten werden dort erörtert, wo sie sinnvoll und anwendbar sind. Der Kommentar enthält Vorschläge für die Wahl der Klauseln der Unidroit Principles und praktische Anleitungen für deren Verwendung, auch als Vorlage oder zur Ergänzung des CISG oder des nationalen Rechts. Neben Schiedsgerichts- und staatlichen Gerichtsentscheidungen sowie aktueller Literatur enthält die 2. Auflage eine eingehende Analyse des umfangreichen Gesetzesmaterials. Als deutscher Praktiker mit internationaler Ausbildung ist der Autor mit dem Common Law und dem Civil Law bestens vertraut. Er ist als Rechtsanwalt in New York zugelassen und lehrt als Professor für Rechtswissenschaften an der Universität Hamburg. Der Autor wendet die Unidroit Principles seit 20 Jahren in seiner täglichen Handels- und Schiedsgerichtspraxis an. Aufgrund zahlreicher Berichterstattung aus der Praxis bietet der Kommentar zugleich ein Handbuch und Checklisten zum allgemeinen Schuldrecht in grenzübergreifenden Fällen.

International Commercial Arbitration

Until now, the resolution of international commercial and investment disputes has been dominated almost exclusively by international arbitration. But that is changing. Whilst they may be complementary mechanisms, international mediation and conciliation are now coming to the fore. Mediation rules that were in disuse gather momentum, and dispute settlement centres are introducing new mediation rules. The European Union is encouraging international mediation in both the commercial and investment spheres. The 2019 Singapore Mediation Convention of the United Nations Commission on International Trade Law (UNCITRAL) is aiming to ensure enforcement of international commercial settlement agreements resulting from mediation. The first investor-State disputes are mediated under the International Bar Association (IBA) rules. The International Centre for Settlement of Investment Disputes (ICSID)'s conciliation mechanism is resorted to more often than in the past. The International Chamber of Commerce (ICC) has recently administered its first mediation case based on a bilateral investment treaty, and a new training market on mediation is flourishing. Mediation in Commercial and Investment Disputes brings together a line-up of outstanding, highly-qualified experts from academia, mediation and arbitration institutions, and international legal practice, to address this highly topical, complex subject from a variety of angles.

UNIDROIT Principles of International Commercial Contracts. An Article-by-Article Commentary

Transnational commercial law represents the outcome of work undertaken to harmonize national laws affecting domestic and cross-border transactions and is upheld by a diverse spectrum of instruments. Now in its second edition, this authoritative work brings together the major instruments in this field, dividing them into thirteen groups: Treaty Law, Contracts, Electronic Commerce, International Sales, Agency and Distribution, International Credit Transfers and Bank Payment Undertakings, International Secured Transactions, Cross-Border Insolvency, Securities Custody, Clearing and Settlement and Securities Collateral, Conflict of Laws, Civil Procedure, Commercial Arbitration, and a new section on

Carriage of Goods. Each group of instruments is preceded by linking text which provides important context by identifying the key instruments in each group, discussing their purposes and relationships, and explaining the major provisions of each instrument, thus setting them in their commercial context. This volume is unique in providing the full text of international conventions, including the preamble - which is important for interpretation - and the final clauses and any annexes. In addition, each instrument is accompanied by a complete list of dates of signature and ratification by all contracting states, all easily navigated through the detailed tables of contents which precedes it. This fully-indexed work provides an indispensable guide for the practitioner or academic to the primary transnational commercial law instruments.

Mediation in International Commercial and Investment Disputes

This important casebook is based upon one of the leading books in the field Born's treatise, International Commercial Arbitration. It offers a comprehensive approach to international commercial arbitration (focused on the New York Convention and UNCITRAL Model Law), while providing comparative examples drawn from state-to-state and investment arbitration. An easy-to-use chronological structure follows the course of an international arbitration. Features: Thoroughly revised to reflect amendments to UNCITRAL Rules, ICC Rules and other institutional arbitration rules New sections addressing IBA Guidelines on Party Representation in International Arbitration Revised to reflect amendments to representative national arbitration legislation in France, Singapore and elsewhere Streamlined excerpts of cases and awards; added excerpts of new arbitral awards on selected topics.

Transnational Commercial Law: International Instruments and Commentary

Advanced notion of the Creeping Codification which is based on the 'TransLex Principles', operated by the Center for Transnational Law (CENTRAL) of Cologne University at www.trans-lex.org. The Trans-Lex Principles are based on the 'List of Principles, Rules and Standards of the Lex Mercatoria' which was reproduced in the Annex of the first edition of this book. This Internet-based codification method realized through the TransLex Principles corresponds to the unique character of the Creeping Codification of the New Lex Mercatoria which is an ongoing, spontaneous, and dynamic process which is never completed.

International Arbitration

Comprehensive introductory textbook on the law and practice of international arbitration.

The Creeping Codification of the New Lex Mercatoria

The Unidroit Principles of International Contracts, first published in 1994, have met with extraordinary success in the legal and business community worldwide. Prepared by a group of eminent experts from all major legal systems of the world, they provide a comprehensive set of rules for international commercial contracts. This new edition of An International Restatement of Contract Law is the first comprehensive introduction to the Unidroit Principles 2004. In addition, it provides an extensive survey and analysis of the actual use of the Unidroit Principles in practice with special emphasis on the different ways in which they have been interpreted and applied by the courts and arbitral tribunals in the hundred or so cases reported worldwide. The book also contains the full text of the Preamble and the 180 articles of the Unidroit Principles 2004 in Chinese, English, French, German, Italian and Russian as well as the 1994 edition in Spanish.

An Introduction to International Arbitration

International arbitration has developed into a global system of adjudication, dealing with disputes arising from a variety of legal relationships: between states, between private commercial actors, and between private and public entities. It operates to a large extent according to its own rules and dynamics - a transnational justice system rather independent of domestic and international law. In response to its growing importance and use by disputing parties, international arbitration has become increasingly institutionalized, professionalized, and judicialized. At the same time, it has gained significance beyond specific disputes and indeed contributes to the shaping of law. Arbitrators have therefore become not only adjudicators, but transnational lawmakers. This has raised concerns over the legitimacy of international arbitration. Practising Virtue looks at international arbitration from the 'inside', with an emphasis on its transnational character. Instead of concentrating on the national and international law

governing international arbitration, it focuses on those who practice international arbitration, in order to understand how it actually works, what its sources of authority are, and what demands of legitimacy it must meet. Putting those who practice arbitration into the centre of the system of international arbitration allows us to appreciate the way in which they contribute to the development of the law they apply. This book invites eminent arbitrators to reflect on the actual practice of international arbitration, and its contribution to the transnational justice system.

An International Restatement of Contract Law: The UNIDROIT Principles of International Commercial Contracts

Guides practitioners through the international arbitration process from beginning to end. This work covers each step of arbitral procedure, from the conclusion of the arbitration agreement to the enforcement of the arbitral award, from a comparative standpoint, helping practitioners decide which jurisdiction's rules they wish to be bound by

Practising Virtue

Baker & McKenzie, has one of the world's largest and most successful international arbitration practices. This book, written by members of the International Dispute Resolution Practice Group of Baker & McKenzie and others, provides a practical, experience-based guide to international arbitration. Each chapter begins with a "checklist" of issues to be considered at each stage of arbitration. Topics include drafting arbitration clauses, commencement of the case, staying court proceedings, compelling arbitration, selection of the tribunal, provisional relief, conduct of hearings and enforcement of awards, among many others. Law and practice in each of the world's major arbitration centers is discussed. Appendices provide ready access to arbitration treaties, statutes and rules. This book will be a standard reference for in-house counsel and outside practitioners.

Comparative Law of International Arbitration

International arbitration is a remarkably resilient institution, but many unresolved and largely unacknowledged ethical quandaries lurk below the surface. Globalization of commercial trade has increased the number and diversity of parties, counsel, experts and arbitrators, which has in turn lead to more frequent ethical conflicts just as procedures have become more formal and transparent. The predictable result is that ethical transgressions are increasingly evident and less tolerable. Despite these developments, regulation of various actors in the system arbitrators, lawyers, experts, third-party funders and arbitral institutions remains ambiguous and often ineffectual. Ethics in International Arbitration systematically analyses the causes and effects of these developments as they relate to the professional conduct of arbitrators, counsel, experts, and third-party funders in international commercial and investment arbitration. This work proposes a model for effective ethical self-regulation, meaning regulation of professional conduct at an international level and within existing arbitral procedures and structures. The work draws on historical developments and current trends to propose analytical frameworks for addressing existing problems and reifying the legitimacy of international arbitration into the future.

International Arbitration Checklists - Second Edition

This is the first publication to identify a universal procedural code for international commercial arbitration. This informative and well-argued discussion of a uniform code for due process is a useful aid for both practitioners and scholars. More than just a useful desk reference, this publication uncovers a unifying arbitration principle in light of the diversity of national traditions. The authors demonstrate how this unifying principle might establish a new standard procedure in arbitration law. Guiding the reader through a step-by-step analysis of due process in international commercial arbitration, the book is comprehensive without being esoteric. Due Process in International Commercial Arbitration, Second Edition thus helps both practitioners new to arbitration procedure and experienced attorneys looking for a cutting-edge discussion of due process issues. It can be used as a handbook for lawyers engaged in arbitral disputes. To provide the necessary guidance for lawyers in need of quick, reliable information, authors Matti Kurkela and Santtu Turunen update readers on the numerous changes made to arbitration law since the book's 2005 edition. Even more helpfully, Kurkela and Turunen have added two new chapters to show lawyers what to expect in the midst of an arbitration proceeding: a chapter on procedural rules from the New York Convention and a chapter on jurisdiction arising from sources outside the arbitration agreement. As corporations engage in more globalized commerce, and as arbitrators resolve more international legal disputes, this resource provides both the broad background

and the quick reference information necessary to understand the complexities of arbitration procedure. A thorough Table of Contents, Index, and Appendix of primary documents facilitate practitioners' research in this vital book. This new edition's balance of comprehensiveness and concision make it a one-stop resource for arbitration attorneys around the world.

Ethics in International Arbitration

This is a practical and concise guide to London maritime arbitrations that sets out the procedures and problems that may arise at each stage of an arbitration. By reference to individual cases and statutory provisions, it provides guidance on how to approach in practice such problems as the appointment of arbitrators, fees, costs of arbitration, security for costs, mareva injunctions, and dismissal of claims for want of prosecution. This work has been structured to reflect the far-reaching effects that the Arbitration Bill may have on London maritime arbitrations.
