Text book of fortification and military engineering, for use at the Royal military academy, Woolwich

This anthology is the second in a series published by the International Poetry Fellowship (IPF). This volume is about the changing seasons, represented as "The Four Corners of the Moon". It is written by a number of amateur and professional poets who are all members of AllPoetry.com and the IPF. It is a cross-cultural look at the world from many poets from many countries, and you can enjoy the mystery of the world over from the comfort of your chair.

These Human Shores: The Four Corners of the Moon

Su Shi (1037-1101) is the greatest poet of the Song Dynasty, a man whose writings and image defined some of the enduring central themes of the Chinese cultural tradition. Su Shi was not only the best poet of his time, he was also a government official, a major prose stylist, a noted calligrapher, an avid herbalist, a dabbler in alchemy, and a broadly learned scholar. The author shows how this complex personality was embodied in Su Shi's work and traces the evolution of his poems from juvenilia to the poems written in exile in Huangzhou, where Su settled on a farm at East Slope.

The Coming Day

This book brings a new spatial analysis to gang territories through the concept of the gang assemblage—the variety of actors, contexts, and practices that create and maintain these spaces. This conceptualization helps overcome the tendency of gang literature to succumb to the gang territorial trap, the tendency to assume gang territories are fixed and static containers of gang life. Drawing on multi-sited qualitative fieldwork in central Canada, interviews with gang and non-gang-affiliated residents, police, and administrators show gang territories being made material through a wide variety of daily embodied practices. Recognizing the role of multiple actors encourages a relational ethics of accountability between bodies, practices, and place that challenges the often-naturalized connections between race, space, and crime. Understanding gang space as enacted through embodied material practices provides an alternative way to think through, trace, and disrupt these associations.

Modern Tactics

E-artnow presents to you this meticulously edited collection of the complete novels by one of the greatest writers of Russian literature. This edition includes: Anna Karenina War and Peace Resurrection The Death of Ivan Ilyich Childhood Boyhood Youth The Cossacks: A Tale of 1852 Family Happiness The Kreutzer Sonata The Forged Coupon Hadji Murad The Dekabrists A Morning of a Landed Proprietor Count Lev Nikolayevich Tolstoy or Leo Tolstoy (1828-1910) was a Russian writer who is regarded as one of the greatest authors of all time. Born to an aristocratic Russian family in 1828, he is best known for the novels War and Peace (1869) and Anna Karenina (1877) which are often cited as pinnacles of realist fiction. He also wrote plays and numerous philosophical essays.

The Road to East Slope

It has become highly desirable to provide users with flexible ways to query/search information over databases as simple as keyword search like Google search. This book surveys the recent developments on keyword search over databases, and focuses on finding structural information among objects in a database using a set of keywords. Such structural information to be returned can be either trees or subgraphs representing how the objects, that contain the required keywords, are interconnected in a relational database or in an XML database. The structural keyword search is completely different from finding documents that contain all the user-given keywords. The former focuses on the interconnected object structures, whereas the latter focuses on the object content. The book is organized as follows. In Chapter 1, we highlight the main research issues on the structural keyword search in different contexts. In Chapter 2, we focus on supporting structural keyword search in a relational database management system using the SQL query language. We concentrate on how to generate a set of SQL queries that can find all the structural information among records in a relational database completely, and how to evaluate the generated set of SQL queries efficiently. In Chapter 3, we discuss graph algorithms for structural keyword search by treating an entire relational database as a large data graph. In Chapter 4, we discuss structural keyword search in a large tree-structured XML database. In Chapter 5, we highlight several interesting research issues regarding keyword search on databases. The book can be used as either an extended survey for people who are interested in the structural keyword search or a reference book for a postgraduate course on the related topics. Table of Contents: Introduction / Schema-Based Keyword Search on Relational Databases / Graph-Based Keyword Search / Keyword Search in XML Databases / Other Topics for Keyword Search on Databases

Scottish Field Sports

James Maddox must face the demons of his past and question everything he thought was real; even his own memory. James was used to living without emotion after losing his Emilia unexpectedly; he gave up on happiness the day she died. His plans for their future, of marriage and kids, died right along

with her. He preferred feeling numb, rather than feeling the pain of losing his dreams. That all changed the day he received an anonymous letter in the mail with just three words: I am innocent. James began dreaming of Emilia that same night. However, his dream quickly becomes his nightmare as she haunts his sleep, demanding he knows the truth, that he faces the unseen. And what is hidden threatens to change James' life forever.

Professional Papers of the Corps of Royal Engineers

The field of pattern recognition has seen enormous progress since its beginnings almost 50 years ago. A large number of different approaches have been proposed. Hybrid methods aim at combining the advantages of different paradigms within a single system. Hybrid Methods in Pattern Recognition is a collection of articles describing recent progress in this emerging field. It covers topics such as the combination of neural nets with fuzzy systems or hidden Markov models, neural networks for the processing of symbolic data structures, hybrid methods in data mining, the combination of symbolic and subsymbolic learning, and so on. Also included is recent work on multiple classifier systems. Furthermore, the book deals with applications in on-line and off-line handwriting recognition, remotely sensed image interpretation, fingerprint identification, and automatic text categorization.

All young women, many of them long missing, almost all forgotten. Until now.

Professional Papers by the Corps of Royal Engineers ... Royal Engineers Institute

A compelling account of the courageous standoff between 150 British troops and more than 3,000 Zulu warriors during the Anglo-Zulu War. Thanks to newly discovered letters and documents, *A Handful of Heroes, Rorke's Drift* updates the history of the Defense of Rorke's Drift, which will forever be one of the most celebrated British feats of arms. Remarkably after such prolonged historical scrutiny, the author's research proves that there is yet more to discover about this famous incident of the Zulu War in 1879, and her superbly researched book reveals a number of myths that have distorted what happened during the gallant defense of the small Mission Station. This fascinating and highly readable account goes on to examine in detail the famous Chard Report, which has long been relied on by historians and authors. Doubts emerge as to its accuracy, and evidence is provided which suggests the report's author was coerced by a senior officer in order to protect the latter's reputation. Likewise the letters of August Hammar, a young Swedish visitor to the Mission, put Reverend Otto Witt's false account into perspective. These and other revelations make *A Handful of Heroes, Rorke's Drift* a fresh and important addition to the bibliography of this legendary Zulu War engagement. "Though the book reviewed here should not be your first dip into the history of the Zulu War, it is an essential one. It provides readers with a wider understanding of the events and their aftermath . . . The author does the job here with style and grace." —War History Online

Professional Papers by the Corps of Royal Engineers ... Royal Engineers Institute

A self-contained introduction to general relativity that is based on the homogeneity and isotropy of the local universe. Emphasis is placed on estimations of the densities of matter and vacuum energy, and on investigations of the primordial density fluctuations and the nature of dark matter.

Slipping the Line

This carefully crafted ebook: "RIDING IN THE WILD WEST" is formatted for your eReader with a functional and detailed table of contents: Excerpt: "The town lay sprawled over half a square mile of alkali plain, its main Street depressing in its width, for those who were responsible for its inception had worked with a generosity born of the knowledge that they had at their immediate and unchallenged disposal the broad lands of Texas and New Mexico on which to assemble a grand total of twenty buildings, four of which were of wood. As this material was scarce, and had to be brought from where the waters of the Gulf...." (Bar-20) Bar-20 The Orphan The Coming of Cassidy and Others Hopalong Cassidy Bar-20 Days Buck Peters, Ranchman The Man from Bar-20 The Bar-20 Three Tex Bring Me His Ears Clarence E. Mulford (1883–1956) was a prolific author whose short stories and 28 novels were adapted to radio, feature film, television, and comic books, often deviating significantly from the original stories, especially in the character's traits. Many of his stories depicted Cassidy and other men

of the Bar-20 ranch. But more than just writing a very popular series of Westerns, Mulford recreated an entire detailed and authentic world filled with characters drawn from his extensive library research.

Like taking a private lesson with the best teacher in the business Over 40 casts covered in step-by-step detail with thousands of full-color photographs Casting should be nearly effortless. If you understand fly-casting mechanics and how to adapt them to various fishing conditions, your casting will greatly improve. That has been Lefty's philosophy since he began teaching fly casting over fifty years ago. Lefty shows how to get rid of a tailing loop, throw a slack-line cast, and roll cast better, as well as casts for tight quarters, in wind, casting with weighted flies and lines, and distance casts. A section on the physical movements explains how to prevent injuries to the rotator cuff and elbow. Whether you fish salt water or streams, heavy rods or light, you'll learn everything from small changes in movements that greatly improve your casting to totally new takes on traditional casts from this book. Lefty is the master, and this book captures his lifetime of wisdom on the subject of casting.

The Unseen Face

A study of the 100,000-year-old spiritual science of ancient Egypt • Examines the metaphysical structure of our universe as seen by the ancient Egyptians, Greeks, and Celts, showing that each is based on the same central concepts from time immemorial • Reveals that the ancient Egyptians believed in reincarnation and a spiritual evolutionary process • Explains the connections between the movements of Orion and Sirius and the story of Osiris and Isis, the importance of the Pleiades and circumpolar stars to the Egyptians, and the fundamental unity of the Egyptian pantheon • Investigates the people who colonized greater Egypt 100,000 years ago, descendants of the Atlanteans In Esoteric Egypt, J. S. Gordon reveals how the sacred science and wisdom tradition of ancient Egypt--the Land of Khem--stems from an advanced prehistoric worldwide civilization. Examining the metaphysical structure of our universe as seen by the ancient Egyptians, Greeks, and Celts, he shows that each tradition is merely a variation on the central concepts of the precession of the equinoxes and the obliquity of the ecliptic pole. He explores the connections between the cyclical movements of Orion and Sirius and the story of Osiris and Isis, the importance of the Pleiades and the circumpolar stars, and the ancient tradition of man as a divine being "born from the substance of the stars." He investigates the people who colonized greater Egypt 100,000 years ago, the progenitors of ancient Egyptian civilization descended from the 4th- and 5th-Root Race Atlanteans. Gordon explores the magical and esoteric meanings behind Egyptian sacred ritual and temple art, drawing parallels to the Mystery School process of initiation. Explaining the fundamental unity of the Egyptian pantheon and the structure of the after-death state, he shows that the Egyptians clearly believed in reincarnation and a spiritual evolutionary process. Revealing the ancient sacred science of the Land of Khem, teachings passed down from the earliest times, he examines the psychospiritual nature of the human being and the function of our spiritual identity and our souls.

Hybrid Methods in Pattern Recognition

Reprint of the original, first published in 1859. The publishing house Anatiposi publishes historical books as reprints. Due to their age, these books may have missing pages or inferior quality. Our aim is to preserve these books and make them available to the public so that they do not get lost.

The Unseen

Official records produced by the armies of the United States and the Confederacy, and the executive branches of their respective governments, concerning the military operations of the Civil War, and prisoners of war or prisoners of state. Also annual reports of military departments, calls for troops, correspondence between national and state governments, correspondence between Union and Confederate officials. The final volume includes a synopsis, general index, special index for various military divisions, and background information on how these documents were collected and published. Accompanied by an atlas.

A Handful of Heroes, Rorke's Drift

Reprint of the original, first published in 1870.

The Index

An exploration of fly fishing for bass, panfish, catfish, carp and other species in the warmwater freestone streams and rivers of the midwest and central United States

The Index ...

The fictional exploits of sailors in the Royal Navy have thrilled readers around the world. This title covers various aspects of the Royal Navy including the workings of the admiralty, the designs and building of ships, life on board, food and drink, discipline, seamanship, merchant fleets, and opposing navies.

Fundamentals of Cosmology

In 1864, George Eliot began writing her longest poem, "The Spanish Gypsy". This project exhausted her, and her partner took the manuscript away from her for fear it was making her ill. This work explains what Eliot read to research the poem, which parts caused her particular problems and summarises the poem's critical reception.

The Church in the House

This is book I of the "Augsburg's Drawing" series, a three-book course designed to teach children how to draw. Book I is the teacher's handbook, showing simple and effective methods of teaching drawing, including colouring, to children in the first, second, and third grades. Highly recommended for teachers and parents alike. Contents include: "First Years of Drawing"
