Facilities Management Manuals

One of the recurrent themes in facilities management is the failure of the design team to understand the needs of the building users. The end-user frequently feels aggrieved at the perceived lack of foresight applied by the design team. There have been moves to bridge the gap between construction needs and end-user needs, with the introduction of the CDM Regulations, and various research initiatives. This has been primarily aimed at the construction industry rather than the building user. CIRIA has produced this guide to focus on the needs of the building user. The framework presented brings a clear understanding of the capabilities of premises, performance limits, costs, servicing maintenance and breakdown procedures, and the long-term management strategy. This guide provides facility managers and other property operators with an improved understanding of the information required to successfully operate and maintain their facilities. Clear and specific guidelines are provided for a standard structure and content for the facilities management manual, which can be regularly updated during the life of the facility. Templates are provided for data presentation, together with a sample manual and a model specification for preparing a manual.

The Jungle Survival Pocket Manual brings together the official manuals and information that enabled the Allies to fight in Burma, Malaya, Thailand, Indochina, Singapore and the Pacific Islands and win the war. During the Second World War, British and American soldiers were sent to new and challenging theatres, fighting to survive not only encounters with the enemy but the landscape they found themselves in. Being posted to South-East Asia and the Pacific to fight the Japanese meant soldiers had to learn to survive in the tropics, fighting and living in endless steamy jungle and perilous swamps. In this environment, men had to be able to take care of themselves rather than relying on their unit to supply their needs, something which did not come naturally to the many soldiers born and raised in cities. To help them in this completely alien environment, the British and US armies produced a number of official training manuals and guides to explain to the men how to identify and fight the Japanese and avoid their deadly panji traps, but also jungle lore : how to find and cook plants that were safe to eat; which animals and insects could kill them; how to identify and treat tropical illnesses and diseases; and avoid the dangers of polluted water and cannibals. The Jungle Survival Pocket Manual brings together the official manuals and information that enabled the Allies to fight in Burma, Malaya, Thailand, Indochina, Singapore and the Pacific Islands and win the war. Clothbound and presented in the Pool of London Press retro-styling, this volume will appeal to those interested in the South-East Asian and Pacific theatres of WWII as well as those researching their family history. It makes a unique gift for all those interested in survival techniques, and those of travelling to Asia. 20 diagrams and drawings reproduced from the original guides.

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life

course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Affective Health and Masculinities in South Africa

Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be considered art.

Architecture's growing intimacy with new types of art Kissing Architecture explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of "kissing" to describe the growing intimacy between architecture and new types of art—particularly multimedia installations that take place in and on the surfaces of buildings—and to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by Pipilotti Rist, Doug Aitken, the firm Diller Scofidio + Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. Kissing Architecture is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design. These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, Kissing Architecture is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing--and experiencing--architecture in the age after representation.

Joan Crawford

An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column "Store-Bought Is Fine" Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to "good" taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, Sex and the City, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in "You Wanna Be On Top," Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with clarity, heartfelt honesty, and Rax King's trademark humor.
