Natural Herbal Remedies from Medicinal Plants & Herbs

I wrote this book to share with you how I discovered natural, herbal remedies for my depression and anxiety. Mainstream medications came with nasty side effects, but I found that herbalism offered the same relief with minimal side effects. These plants and herbs can be used to treat most common maladies, including migraines, depression, insomnia, infertility, and so much more. These are the best herbs you'll learn to use in your personal healthcare routine. I was clinically depressed. I was fighting with daily anxiety with episodes of panic attacks. The medicine that I was prescribed left me with a painful ulcer. I turned to herbalism to seek natural solutions. What I found opened the possibilities for clean, natural healing remedies. I no longer take an over the counter analgesic for a headache; instead, I scoop out some dried aniseed and make a nice, refreshing hot tea. My depression has subsided (although I still have my days), but I am confident that I can use herbal medicines when I see fit without the crazy side effects. Learn safe and effective treatments you can apply at home. In the past few years, I have become my family's personal herbalist. While I don't have a degree in herbal medicine, and I can't exactly call myself a licensed herbalist, I have immersed myself in everything I can learn about herbal medicine and using plants and medications. Some herbs are topically applied, while others are

ingested, while still others are best used as a tincture or tea. I will teach you the proper dosages and preparations to make your herbal medicine as effective as it can be. No matter the illness or symptom you're suffering from, there's an herb for that! You will learn all about how to find, prepare, and use herbal medications - most can be found in an ordinary kitchen garden or backyard! Herbs are a natural medicine, part of our inheritance. An interest in plants may begin in childhood when we learn quickly to distinguish garden plants from weeds and may return from a walk in the country clutching a handful of wild flowers. Enlightened education may open our eyes to the profound wonder of plant life, and if we are more fortunate we may incorporate in this wonder an understanding of the medicinal uses of plants. We should make a study of plant remedies, although it must be said that the use of herbs is a skill and an art, and the most successful herbalist, in addition to studying intensively, must surely have some inherited gift of healing. Plants draw sustenance from the soil and manufacture chlorophyll from sunlight. They contain many constituents: essential oils which give the plant its perfume and have medicinal properties (i.e., to aid digestion, to stimulate the nervous system, or if used as liniments, to increase the flow of blood to a given area); tannins, which have an astringent action on the mucosa; glycosides, some of which are anti-inflammatory, while some have -a regulating influence on heart action; mucilage's, which are used to soothe irritation and inflammation in the digestive tract; bitter principles which stimulate the secretion of digestive juices and improve the appetite. Numerous other constituents include resins, gums, minerals (notably sodium, potassium and silica), acids, vitamins and hormone precursors."
