Fat Loss in Its Entirety

This is not your typical diet book. Weight loss books have historically been riddled with errors. A conveyor belt of diet books ostensibly containing the most recent revolutionary weight loss "hacks," all vying for your attention with whatever weight loss diet is currently popular. Which diet is best for you? Is this a ketogenic diet? Is it fasting on and off? Is it the 5:2 plan? Is it a low-carb diet, a low-fat diet, or one of the many rapid weight loss plans promising astronomical weight loss in a short period? What is it that doesn't make sense? Everyone should follow the same weight loss diet, period. Diets do not come in one size fits all. We are all unique, and a diet plan that works for your friend might not work for you. There is no such thing as a "best" weight loss diet for everyone. We are all unique individuals with unique biology, preferences, and life circumstances. Here are a few hard facts: - It is estimated that half of all adults make at least one attempt to lose weight each year. - Fat loss is the most desired goal in the fitness industry. - Despite the prevalence of diet attempts, global body weights have risen over the last 50 years. - Most people who begin a weight loss diet see only short-term results and are unable to keep the weight off in the long run. - Many of you are perplexed by the vast amount of contradictory weight loss information and are tired of hopping from one diet to the next, losing and regaining the same amount of weight. Rather than claiming to have a one-size-fits-all solution, fat loss in its entirety thoroughly explains and summarizes what the research says about every major fat loss topic to assist you in developing a plan that works for you. There are no gimmicks. There will be no over-the-top marketing. There will be no cookie-cutter diets. There will be no false promises. This is the ultimate scientific fat loss resource, written to cut through the BS. Everything you need to know about fat loss has been compiled into one convenient resource. It works by slowly introducing subtle changes to your eating and lifestyle habits, one at a time, so that you acquire the habits and mindset necessary to lose weight and keep it off. During each week of the programme, you simply change one element of your eating habits. For example, in week 1 replace your usual breakfast with one of the Change One breakfasts, and continue to eat what you normally do for lunch and dinner. In week 2, in addition to eating the Change One breakfasts, you will replace your usual lunch with one of the recipes offered in the book. At the end of 4 weeks, you will have replaced all your usual meals with the healthy, calorie-counted options in Change One and will have built up the habit of healthier eating. Change One is not like other diets. Instead of concentrating on not eating, the emphasis here is on following a healthy eating plan that means you can still eat your favourite foods and you don't need to go hungry. Change One is positive and encouraging: it doesn't say you can never eat out again but instead offers advice on how to eat healthily.

Dump the Diets, Ditch the Scales, Drop the Inches

(You can be forgiven for looking at the book cover and thinking: "mmm.... 50 shades of fat loss!") So...you want to lose some weight? (You're perusing the diet book section - it's hardly a Sherlock Holmes deduction.) But which diet do you go for: low carbs; low fat; meal replacements; protein only; points; blood group; soup; fasting; double choc muffins? (Okay, we made the last one up.) Chances are you've already tried a few but they've not worked (otherwise you wouldn't be looking for another diet). But why turn your life upside down by trying to follow someone else's complicated diet plan and end up either starving hungry or eating things you don't like, when the 'rules' of weight loss are so incredibly simple to understand. Why not just design your own eating plan that fits perfectly into your life? After all, you know yourself better than anyone else. So just how do you do this? (Easy - buy this book!!) Lifelong personal trainers and nutritionists, Paul Lonsdale and Ann Hirst, have the answers. They have spent the last 30 years successfully teaching these 'rules' to thousands of their clients, helping them to not only achieve the shape they were looking for, but more importantly, to keep it as well. "The true success of a weight loss plan is not measured in days, weeks or even months but in a lifetime - once it's off, it's got to stay off!" Using simple lessons from humanity's early evolution, mixing them with unarguable bits

of biology and physiology, then adding a liberal sprinkling of common sense and finally topping it all off with a dash of humour, their brand new book brings all of their knowledge and experience together in one, complete volume. It doesn't pull punches and challenges much of the conventional thinking about weight loss. 'Dump the Diets, Ditch the Scales, Drop the inches' is written in three distinct parts: Part 1: 'An Uncomfortable Truth' provides all the answers, in clear, no-nonsense terms, how to easily overcome the problem as to why your body gains fat and then stubbornly refuses to lose it. In Part 2: 'You don't need to live like a saint to have the body of an angel' you'll learn everything you need to know about proteins, carbs, fats, etc. and it will demonstrate how easy it is to design your very own eating plans. In Part 3: Train Smarter, Not Harder it's all about exercise; explaining how to put an effective training programme together and you may be surprised when you learn that it's not how much you need to do, but how little! 'Dump the Diets, Ditch the Scales, Drop the inches' has its foundations laid solidly in logic and science but its unarguable success is built purely from experience and results in the 'real world'. Very simply, it will teach your head the 'rules' that your body has always known!

When did weight loss get so complicated? Today, it feels like there are a million different apps, tools, workouts, and eating plans designed to help you lose weight. Some promise success via drastic, unlivable restrictions, others are so complex they turn losing weight into a second job. In Target 100, celebrity weight-loss coach Liz Josefsberg shows you don't have to be a slave to your weight-loss program. You don't have to count every gram of every nutrient and every calorie you eat at every meal. Believe it or not, weight loss can be simple. It can even be . . . fun. A 15-year veteran of the weight-loss industry and who lost—and kept off—65 pounds herself, Liz has accrued a high-profile clientele. She helped Oscar-winner Jennifer Hudson lose weight and transform her life and coached Jessica Simpson to shed over 50 pounds of baby weight (twice!). But along with the likes of Charles Barkley and Katie Couric, Josefsberg has also coached thousands of others, everyone from stay-at-home moms to office jockeys. Along the way, she's learned what works—and what doesn't—when it comes to lasting weight loss, and she's ready to share her secrets with the rest of us. Target 100 streamlines the weight-loss process into six easy-to-follow guidelines and shows you how to adjust them to fit your lifestyle, personalizing the program so that it works for you. Josefsberg offers tips, worksheets, and powerful insights to help you fine-tune a range of weight-related behaviors, from battling stress to getting more sleep, setting the stage for permanent, long-term weight loss. Instead of counting calories, you'll learn how simple changes come together to jumpstart your health and wellbeing, such as:

- Drinking 100 ounces of water a day
- Exercising for 100 minutes a week
- Adding 100 minutes of Sleep a week
- De-Stressing for 100 minutes a week
- And more!

Warm and no-nonsense, encouraging and informative, Target 100 is a holistic and revolutionary wellness book

with a simple message: You don't need to be perfect to lose weight, or transform yourself into someone you're not. You can lose weight for good, with the world's simplest weight loss program.

Forever Weight Loss

About the author of this book: L.B. Daniels currently resides in Charlotte, North Carolina. He is very knowledgeable in Fitness, Nutrition, and the Weight Loss industries for over 15 years. He has earned a B.S in Public Health and a B.A in Psychology from UNC. He is also a Certified Fitness Trainer via ISSA. Learning how to Lose Weight successfully and to keep it off is something of a skill that can be used for a lifetime to keep your body in tip-top shape for your health and well-being. Once you know how to Lose Weight, you can teach friends and family to the point that their fat loss goals will be very easy to strive for. This book was designed to point you in the right direction with a no-nonsense approach to losing weight using a Low Carbohydrate Diet. Since this book is based on a Low Carb approach, you may want to keep track of your Blood Sugar as it may take a dip during the day, in which a handful of nuts will keep you in tip-top shape until another Keto Diet type meal. Be it a Low Carb or even some type of Ketogenic Diet, Weight Loss always seems to come down to the food you eat in certain quantities from personal experience. Once you take a look inside, you'll understand. But a low carb diet really makes it easy. I have personally spent 15 years eating different types of foods and seeing how my body reacts to it as well as researching every food and supplement possible before trying it out on myself. I personally have lost over 100 pounds in my teens and over 150 pounds in my twenties. I sustain a lean body year-round now for over 15 years with my self-learned and researched techniques to the point that I love to teach others. This is exactly why I became a Certified Fitness Trainer via ISSA and a self-proclaimed Weight Loss Expert. Once you read this book you will understand and it will be fun!! I hope you gain an excellent new view point when it comes to food ingestion and your body. Eating a Low Carbohydrate Diet is something that will give you sustainable energy because you won't have to deal with spikes in blood sugar and dips in blood sugar, which makes you want to take many naps. Also, exercise is not necessarily required to lose weight, actually it might make you even more hungry in which you will eat more. Take note of how your body responds to this type of diet and lose weight and keep it off! This book also helps if you are Dieting for Beginners or even How to Diet. Some might call this diet a Quick Keto Diet, or even a Keto Diet Plan. What it really is, is a High Fat Diet that let's you also eat a moderate amount of protein. This should be one of your more favorite Low Carb Diet Books after reading this book. Friends like to call this a Fast Metabolism Diet or even a Metabolism Plan as the weight just seems to come right off. In any case, this book will teach you How to Lose Weight and How to Lose Fat. My Mother likes to call it a Fast Diet Book because it's simplicity. This book is meant to be enjoyed as a paperback due to it's formatting and book layout, hence why the eBook is priced so low compared to the paperback price. If you intend to read the eBook, please acquire a high-quality notebook to write in as well as you'll need to take some notes each day to make sure you succeed as well as it increases your weight loss successes greatly. There is something special about writing down everything you eat and drink and looking and recording it down. When it comes to losing weight, you

can journey on many different diets, but ultimately it all results in the grams of fat, carbohydrate, and protein you intake. Any diet that likes to talk about eating an unlimited amount of food loves to sidestep that acknowledgment because they tend to believe that you will be full before you eat too much, therefore you did eat an unlimited amount of food, but did you? As always, good luck! - L.B. Daniels
