Good Morning

Good Night

How are you? (informal)

How's it going?

Goodbye (formal)

Bye bye (informal)

And you? (formal)

Nice to meet you!

Take care.

You're Welcome.

Excuse me, what time is it?

Do you speak Arabic?

Do you speak English?

Do you speak German?

Just a little.

I don't speak German.

I don't know.

Do you understand?

I don't understand.

What is this?

What do you do for a living?

I want to learn English.

How much does it cost?

What's your name? (formal)

My name is John.
What's your nationality?
Where do you live? (formal)
What's the weather like today?
Where is the bathroom?
How old are you?
What's your address?
What's your phone number?
Where are you going?
What's your email address?
Good Luck!

Good Job!
Merry Christmas!
Happy Birthday!
Cheers!

Congratulations!
Bless you! (after sneeze)
Have a nice trip!

Tuesday
Wednesday
Friday
Saturday

Don't worry about it.
I don't know how to explain.
For example
When do you leave?
I am leaving tomorrow.
Here is my business card.
How is the weather today?
It is going to rain.
How do you feel?

I'm hot.
I'm tired.
I'm thirsty.

What do you want to drink?
Good Evening

Java EE Security in Practice with Java EE 6 and GlassFish - Java EE Security in Practice with Java EE 6 and GlassFish by Oracle Learning 5,431 views 11 years ago 1 hour, 1 minute - The hottest topic related to enterprise **Java**, applications is security, for which **Java EE**, provides a fair amount of flexibility.

Sanitize the input Escape/Quotesafe the input • Use bound parameters (the PREPARE statement) Limit database permissions and segregate users • Use stored procedures for database access (might work) • Isolate the webserver • Configure error reporting

Authentication over http • Custom security filter • Not using Container Functionality • No password strength requirements • No HttpSession binding • Way of saving Passwords • Not testing security Use the latest version (3.1.2.2) • Enable secure admin (TLS/https) • Use password aliasing • Enable security manager and put forth a proper security policy file • Set correct file system permissions Policy files precedence order • Remove unused grants • Add extra permissions only to applications or modules that require them, not to all applications deployed to a domain. • Document your changes! Protect the keystore • Protect GlassFish accounts - Use aliasing to protect the password and keep the master password safe to protect the aliases • Ignoring digest authentication/hashed password storage
