Stonehenge

Before he became familiar to many more of us as the presenter of the TV series Meet the Ancestors , Julian Richards directed the Stonehenge Environs Project which aims to promote a better understanding of Stonehenge's prehistoric landscape. This stunning book comprises an anthology of photographs, which recall 150 years of day trippers, royal picnickers, custodians, archaeologists, politicians (notably Churchill), romantics, experimental archaeologists, African warriors, druids, hippies, protestors and hooligans who have all been drawn to Britain's most famous monument. Almost as interesting as the people are the photographs of the modes of transport that brought them to the stones which were then unceremoniously parked among the stones, including steam engines, caravans, horses and the very first cars. The photos demonstrate above all the sheer contrast in visitor numbers between 1853 and the present day. Throughout, the photographs are accompanied by a fascinating narrative in which Julian Richards the events that have shaped Stonehenge over the last 150 years and the reasons for its continuing hold over the human imagination.

In these early 20th century literary essays, Stefan Zweig offers a Central European view of the writers he believed to be the "three greatest novelists" of the 19th century: Balzac, Dickens, and Dostoevsky. In Zweig's view, Balzac set out to emulate his childhood hero Napoleon. Writing 20 hours a day, Balzac's literary ambition was "tantamount to monomania in its persistence, its intensity, and its concentration." His characters, each similarly driven by one desperate urge, were more vital to Balzac than people in his daily life. In Zweig's reading, Dickens embodied Victorian England and its "bourgeois smugness". His characters aspire to "A few hundred pounds a year, an amiable wife, a dozen children, a well-appointed table and succulent meats to entertain their friends with, a cottage not too far from London, the windows giving a view over the green countryside, a pretty little garden, and a modicum of happiness." The ideal of middle-class respectability suffuses Dickens' fiction. Dostoevsky drew on the struggles of his own life to illuminate the contradictions of the human soul. In Zweig's view, his heroes had no desire to be citizens or ordinary human beings. While Balzac's heroes "would gladly have subjugated the world, Dostoevsky's heroes wished to transcend it."

Polaris And the Goddess Glorian

It was a pleasant little town in the Northeast. It had never been hurricane country. When they heard that Diane was coming, they couldn't really believe it would harm them. And the hurricane itself didn't touch them. But the rains caused by the hurricane ravaged their little town as viciously as the worst artillery attack could have done. This is a powerful and tremendously graphic novel of people trapped in that town: and how they learned what a flood really means. And how they found out what they themselves were like.

As he grapples with non-public picks and the effects of frontier justice, Tuttle weaves a story that explores subject matters of morality, loyalty, and the harsh realities of survival within the unforgiving West.
