Learning Mandarin Chinese Characters Volume 1

"The approach that has helped thousands of learners memorize Japanese kanji has been adapted to help students with Chinese characters. Remembering Simplified Hanzi covers the writing and meaning of the 1,000 most commonly used characters in the traditional Chinese writing system, plus another 500 that are best learned at an early stage." "Of critical importance to the approach found in these pages is the systematic arranging of characters in an order best suited to memory. In the Chinese writing system, strokes and simple components are nested within relatively simple characters, which can, in turn, serve as parts of more complicated characters and so on. Taking advantage of this allows a logical ordering, making it possible for students to approach most new characters with prior knowledge that can greatly facilitate the learning process."--BOOK JACKET.

Remembering Simplified Hanzi 1

This user-friendly book is aimed at helping students of Mandarin Chinese learn and remember Chinese characters. At last—there is a truly effective and enjoyable way to learn Chinese characters! This book helps students to learn and remember both the meanings and the pronunciations of over 800 characters. This otherwise daunting task is made easier by the use of techniques based on the psychology of learning and memory. Key principles include the use of visual imagery, the visualization of short "stories," and the systematic building up of more complicated characters from basic building blocks. Although Learning Chinese Characters is primarily a book for serious learners of Mandarin Chinese, it can be used by anyone with an interest in Chinese characters, without any prior knowledge of Chinese. It can be used alongside (or after, or even before) a course in the Chinese language. All characters are simplified (as in mainland China) but traditional characters are also given, when available. Key features: Specially designed pictures and stories are used in a structured way to make the learning process more enjoyable and effective, reducing the need for rote learning to the absolute minimum. The emphasis throughout is on learning and remembering the meanings and pronunciations of the characters. Tips are also included on learning techniques and how to avoid common problems. Characters are introduced in a logical sequence, which also gives priority to learning the most common characters first. Modern simplified characters are used, with pronunciations given in pinyin. Key information is given for each character, including radical, stroke-count, traditional form, compounds, and guidance on writing the character. This is a practical guide with a clear, concise and appealing layout, and it is well-indexed with easy look-up methods. The 800 Chinese characters and 1,033 compounds specified for the original HSK Level A proficiency test are covered.

This is a complete, logical, and comprehensive book for learning Chinese-character simplification. It makes mastering both Traditional and Simplified Chinese characters very easy. This book fills a vacuum in the marketplace, alleviating the troubles of the people who need to learn. In the first chapter, the author makes a concise narrative about the simplification of Chinese characters, allowing the reader to gain an overall understanding of the subject. The author discusses the two simplification measures, and the structure of "General Tables of Simplified Characters" that consists of three tables. Chapters 2 and 3 analyze the two simplification measures, namely, reducing the number of strokes in a character and reducing the number of characters, respectively. The author systematically classifies the characters in detailed groupings based on their simplification characteristics. Then in Chapters 4 and 5, the author summarizes Tables 1 and 2 of the "General Tables of Simplified Characters" according to these classifications, explaining the simplification characteristics character by character. Chapter 6 discusses Table 3; these characters are derived by the analogies of simplified characters and simplified radicals of Table 2. All the data in the book are presented in tabular form - simple, clear, and easy to understand. In addition, the "General Tables of Simplified Characters" are listed in the Appendices. Therefore, this is an essential reference book. Regarding the measure of reducing the number of characters, for the more than two hundred characters that have been combined, numerous vocabularies are listed as examples for each character, and thus illuminating their meanings in great detail. Therefore, it is also a good book for learning Chinese characters. This book has 3 language versions: English, Traditional Chinese, and Simplified Chinese.

In this way, learners will get familiar with HSK by using the course books alone rather than spending extra time in trying to get used to the form of the test.

Second 100 Chinese Characters: Simplified Character Edition

The Character Book provides the Chinese characters for the core vocabulary in every lesson. It shows the following for each character:

1. Character with its stroke order indicated by numbers
2. Traditional & Simplified forms of the character
3. Pinyin pronunciation, grammatical usage, and sample sentences or phrases
4. Stroke order illustrated by writing the character progressively
5. Radical of the character with its Pinyin pronunciation and meaning
6. Ghosted images for students to trace over and dotted graph lines to aid students' practice

Blank boxes are also included for students to practice writing the character. As a handy reference, three types of indices are provided in the Character Book: (1) By number of strokes; (2) By Lesson number; (3) Alphabetic by Pinyin.

Go Far with Chinese Volume 1b Textbook

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.
