Known Facts of Time Travel

Do you know, time traveler, the impact of time traveling over your personal life? This book discusses this question and of course, it will continue building our hypothetical time travel machine based upon General Relativity Theory and Special Relativity Theory. Because I wanted my last book "Virtual Reality and Augmented Reality Safety Rules" to be as simple as possible, I couldn't continue building such time travel machine. As you know the Relativity Theory is quite complex! I had to write another book to take off some of "Virtual Reality and Augmented Reality Safety Rules" book's complexity. This book begins with explaining some known methods for time travel. It also explains "Humanity Timeline Theory" in more details. It also describes the relationship between "Humanity Timeline Theory" and Relativity Theory. Then it starts our journey to build a time travel machine by discussing the available technology nowadays that suits time travel. Then it moves to discuss the characteristics of time travel, so we can understand time travel better. Why you failed to solve a problem? Because you need a better understanding for that problem, so you can solve it! After that it discusses a hypothetical time travel machine model based upon both some known methods of time travel and Relativity Theory! Finally, if you feel that your head is spinning right now, you may not continue reading this book.

Together the three begin a voyage through time and space, aided by nothing more than a sense for adventure and the desire to make the universe a better place. While doing so, the three destroy all records of time, uncannily release aliens on Earth, lose Adam and Eve, discover parallel universes, and find that United States Marines never truly die. They also find that women, love, and life are not things easily attainable or manageable. In the end, the three are able to answer some of life's most elusive questions. Are we alone in the cosmos? How did we get here? Is there a God?

A Story of Steve the Hermit

A Dual-Language Book (Dover Dual Language Russian) An Epic Adventure Steve the Hermit Story. Part 2 A Minecraft-Inspired Book: "The Story of Steve the Hermit: How It All Began . Part Two. Steve the Traveler" A long time had passed since Steve's last adventures. At least, that's what he thought. The sun had already gone around the world of Minecraft for more than a dozen times. Steve hadn't known yet what the calendar was because he lived in the back of beyond by himself, and during all this time he hadn't met a single soul. Except for creepers and scary long-legged 'fluid' creatures, of course. Nevertheless, Steve doubted they could be called 'living'. The conversation with them somehow failed to start, and our hero usually had to flee. Steve came up with his own idea of how to keep track of time-lapse. He made notches on a wall in his underground dwelling. Four short sharp notches, which he stroked through at the end of every fourth day and proceeded to the new four-day cycle. Four because it was for this long that he made food and resource supplies last, and once in four days, having summoned up his courage, he set off for a new hike. No, it wasn't like the following three days he buried himself in his dugout. Quite the contrary; Steve had a bunch of other entertaining pastimes. Follow Steve on this new Minecraft Traveler. Time Travel

From the Jurassic period and the dark ages to feudal Japan or the Victorian era - this book contains everything you ever needed to know about surviving any time, any place, anywhere.

Timelike Infinity

Timelike Infinity: the strange region at the end of time where the Xeelee, owners of the universe, are waiting... The second novel in Stephen Baxter's Xeelee sequence. First there were good times: humankind reached glorious heights, even immortality. Then there were bad times: Earth was occupied by the faceless, brutal Qax. Immortality drugs were confiscated, the human spirit crushed. Earth became a vast factory for alien foodstuffs. Into this new dark age appears the end of a tunnel through time. Made from exotic matter, it is humanity's greatest engineering project in the pre-Qax era, where the other end of the tunnel remains anchored near Jupiter. When a small group of humans in a makeshift craft outwit the Qax to escape to the past through the tunnel, it is not to warn the people of Earth against the Qax, who are sure to follow them. For these men and women from the future are themselves dangerous fanatics in pursuit of their own bizarre quantum grail. Michael Poole, architect of the tunnel, must boldly confront the consequences of his genius.

Mighty Morphin Power Rangers #1

Based on the long-running Power Rangers franchise, five teens from Angel Grove High are granted superpowers and giant robot dinosaur Zords to defend Earth against the alien villain Rita Repulsa. When Repulsa creates an evil Green Power Ranger by brainwashing recent transfer student Tommy, the team is able to free him from her grasp and get him on their side. But with remnants of Repulsa's control still stirring in the back of Tommy's mind, he must confront the fact he may be more of a danger to his new team than a help. This is "Green Ranger: Year One."

A Gift of Time

When Micajah Fenton discovers a crater in his front yard with a broken time glider in the bottom and a naked, virtual woman on his lawn, he delays his plans to kill himself. While helping repair the marooned time traveler's glider, Cager realizes it can return him to his past to correct a mistake that had haunted him his whole life. In gratitude for his help, the virtual creature living in the circuitry of the marooned glider, sends Cager back in time as his ten-year-old self, knowing everything he'd known at eighty. As a bonus, it also gives him access to advanced equations of space and time. But living life over knowing the future isn't as easy as Cager anticipated, and he bungles his chance at correcting the most serious mistake of his life. Now he must use his new knowledge of advanced math to build his own time machine to go back and try again. Meanwhile Cager's repairs to the creature's glider fail,

keeping it stranded near earth. In desperation, the whale-like creature sends, Ell, a near-human, female copy containing it's consciousness to help Cager. While perfecting time travel, Cager and Ell overcome enormous problems, even being hunted by dinosaurs in the Cretaceous, and Cager falls in love with this indomitable anthropomorphic copy of a creature from across the galaxy.

Second Paradigm

Second Paradigm, Peter J. Wacks' first time travel novel, introduces a new literary structure. Time travel is not linear in nature and therefore cannot be written in a linear fashion. After six years in the works, Peter was able to develop a literary structure which allows his book to be read in several different orders, after designing and utilizing a unique 'spider web' concept as a new plot structure. The human brain is wired to perceive things in a linear fashion. A leads to B which leads to C. Not only in the art of storytelling, but in everyday life, we stumble across nonlinear concepts (like the idea of time travel.) Second Paradigm presents the 'spiderweb' and 'ghost' plot structures he invented to tell nonlinear stories

Danny Dunn - Time Traveller

Since the dawn of humanity, men have attempted to divine the nature of the heavens. The first astronomers mapped the movement of the seasons and used the positions of the constellations for augurs and astrology. Today, the search goes ever deeper into the nature of reality and life itself. In this accessible overview, astrophysicist J.P. McEvoy tells the story of how our knowledge of the cosmos has developed. He puts in context many of the greatest discoveries of all time and many of the dominant personalities: Aristotle, Copernicus, and Isaac Newton, and as we approach the modern era, Einstein, Eddington, and Hawking.
