Occupy Spoon River

The dead arise from their sleep in the cemetery of a small town to tell their individual stories about an entire community caught in a web of scandal, sin, and vice in the early twentieth century

Spoon River Anthology

As the first full-length critical study of Edgar Lee Masters, *Beyond Spoon River* is important not only for its reevaluation of this American poet and his work but also for its valuable insights into central questions of aesthetics, regionalism, and the nature and meaning of literary influence. The inordinate popularity of *Spoon River Anthology* has for many years unfairly restricted Masters' reputation as a "one-book phenomenon," although between 1911 and 1942 he wrote over fifty other books—most of which were neglected or misinterpreted precisely because they attempted a large-scale rewriting of what he felt had been obscured or distorted in the Anglo-American tradition. Masters' wide reading in the whole of western literature shaped his own attitudes, themes, and style, and his detailed accounts of that reading and its effect on his work form the basis for this reinterpretation of his place in American poetry in this century. After reviewing Masters' own statements on literary influence and his role as a critic, Primeau devotes the main body of his study to the major influences on Masters' work—the Greeks, Goethe, Emerson, Whitman, Shelley, and Browning. For Masters, the composite of all these influences provided a corrective to the poetry and criticism of his time, which he little admired. Primeau concludes by exploring Masters' midwestern heritage in the light of recent reinterpretations of regionalism.

Soil Report

From the fall of Cahokia in the early fourteenth century to the ascendancy of the young United States in the early nineteenth century, Jacob Lee reinterprets the history of early North America by tracing the key role major midcontinental rivers and social networks played in linking Indian nations and European empires in a long, shared history of conquest and resistance. Long before Europeans set foot on the shores of North America, Siouan peoples from the Great Plains, Algonquians from the Great Lakes, and Muskogean from the South traded with and fought each other in the heart of the midcontinent. Starting in the early 1600s, the Illinois became the dominant power in the region, constructing a network of allies that stretched from Lake Superior to Arkansas. They were at the height of their power in 1673 when the first French explorers, Jolliet and Marquette, appeared in the region. Between the seventeenth and nineteenth centuries, the major empires in North American history--France, Britain, Spain, and the US--claimed part or all of the region. When Americans came on the scene and began to remake the midcontinent, they overturned the patterns of 150 years of interaction between Indians and Europeans.--

Beyond Spoon River

Covering topics as diverse as economic modeling, craft specialization, settlement patterns, agricultural and subsistence systems, and the development of social ranking, *Cahokia and the Hinterlands* explores cultural interactions among Cahokians and the inhabitants of other population centers, including Orens Dorf and the Dickson Mounds in Illinois and Aztalan in Wisconsin, as well as sites in Minnesota, Iowa, and at the confluence of the Mississippi and Ohio rivers. Proposing sophisticated and innovative models for the growth, development, and decline of Mississippian culture at Cahokia and elsewhere, this volume also provides insight into the rise of chiefdoms and stratified societies and the development of trade throughout the world.

Spoon River Area Assessment: Geology

Relazioni preparate per il 9. International congress of anthropological and ethnological sciences, tenuto a Chicago, Ill., nel 1973.

I Hear America ...

Edited and produced by university students, *The New Star Chamber and Other Essays* offers a compelling critique of corporate capitalism and American imperialism. In print again for the first time since 1904, this edition includes an introduction and historical annotations throughout.

Masters of the Middle Waters

Drawn from all of Edgar Lee Masters's diaries correspondence, and the unpublished chapters of his 1936 autobiography, this is the first full-length biography of the celebrated author of "Spoon River Anthology"

Cahokia and the Hinterlands

The orthodox view of the Mississippian social world hinges on the ideas that chiefdoms--dominance based hierarchical societies in the Eastern Woodlands of North America--vied for power, often violently but at times cooperatively, through political and economic avenues. These chiefdoms represented something of a feudal state in prehistoric North America, which lasted up to the contact period with Europeans around 1500 A.D. In *From Cahokia to Larson to Moundville*, noted archaeologist A. Martin Byers challenges these assumptions and offers a contrasting view by deconstructing the chiefdom model and offering instead an autonomous social world that focused on spiritual renewal and sacred rituals. Byers presents his case through the archaeological record of Cahokia, Larson, and Moundville's monumental earthworks and, in doing so, reveals the Mississippian social community to be more complex, and more cooperative, than previously envisioned. A. Martin Byers, now retired, was a research associate in the Department of Anthropology at McGill University in Montreal.

Early Native Americans

Archaeologists across the Midwest have pooled their data and perspectives to produce this indispensable volume on the Native cultures of the Late Woodland period (approximately A.D. 300?1000). Sandwiched between the well-known Hopewellian and Mississippian eras of monumental mound construction, the Late Woodland period has received insufficient attention from archaeologists, who have frequently characterized it as consisting of relatively drab artifact assemblages. The close connections between this period and subsequent Mississippian and Fort Ancient societies, however, make it especially valuable for cross-cultural researchers. Understanding the cultural processes at work during the Late Woodland period will yield important clues about the long-term forces that stimulate and enhance social inequality. *Late Woodland Societies* is notable for its comprehensive geographic coverage; exhaustive presentation and discussion of sites, artifacts, and prehistoric cultural practices; and critical summaries of interpretive perspectives and trends in scholarship. The vast amount of information and theory brought together, examined, and synthesized by the contributors produces a detailed, coherent, and systematic picture of Late Woodland lifestyles across the Midwest. The Late Woodland can now be seen as a dynamic time in its own right and instrumental to the emergence of complex late prehistoric cultures across the Midwest and Southeast.

Comprehensive Master Plan for the Management of the Upper Mississippi River Basin

In ancient Roman times rituals were performed to sanctify the ground on which new cities were founded. With this invocation, space could then be occupied. In her brilliant new collection, Alice Major's poems concern themselves with human occupation: how we occupy cities; how we occupy ourselves as citizens, workers and thinkers; how we occupy mythologies and metaphors; and how we occupy the passage of our lives. Written largely in a public voice, these poems invoke human preoccupations that resonate through landscapes of time and space.

The New Star Chamber and Other Essays

The richness and the range of Native American spirituality has long been noted, but it has never been examined so thoroughly, nor with such an eye for the amazing interconnectedness of Indian tribal ceremonies and practices, as in *An Archaeology of the Soul*. In this monumental work, destined to become a classic in its field, Robert Hall traces the genetic and historical relationships of the tribes of

the Midwest and Plains--including roots that extend back as far as 3,000 years. Looking beyond regional barriers, *An Archaeology of the Soul* offers new depths of insight into American Indian ethnography. Hall uncovers the lineage and kinship shared by Native North Americans through the perspectives of history, archaeology, archaeoastronomy, biological anthropology, linguistics, and mythology. The wholeness and panoramic complexity of American Indian belief has never been so fully explored--or more deeply understood.

Edgar Lee Masters

Surveys the homes and birthplaces of famous Americans, including Mark Twain, Abraham Lincoln, John Wayne and John F. Kennedy.
