"Fans of Scottish lore or bookstore mysteries like Lorna Barrett's and Carolyn Hart's will enjoy this one."—Booklist Thanks to the Western Maine Highland Games, Moosetookalook, Maine, has never seen so many bare legs walking its streets. But instead of wondering who'll win the hammer throw, everyone's asking who got kilt. Especially Liss MacCrimmon, purveyor of the town's Scottish Emporium, since it's also her wedding weekend. And nothing scotches up nuptial bliss like a dead body. But who'd go medieval on a professor, no matter how nutty? As much as Liss tries to keep her fingers out of the sleuthing cake, she finds herself again dead center of a Moosetookalook murder mystery. If Liss doesn't solve this one, and quick, she might never say "I do," let alone "'til death do us part"... "Filled with gems of Scottish history and culture, this intelligent entry will appeal to newcomers and established fans alike."—Publishers Weekly

Forthcoming Books

Visitors to the Arctic enter places that have been traditionally imagined as otherworldly. This strangeness fascinated audiences in nineteenth-century Britain when the idea of the heroic explorer voyaging through unmapped zones reached its zenith. The Spectral Arctic re-thinks our understanding of Arctic exploration by paying attention to the importance of dreams and ghosts in the quest for the Northwest Passage. The narratives of Arctic exploration that we are all familiar with today are just the tip of the iceberg: they disguise a great mass of mysterious and dimly lit stories beneath the surface. In contrast to oft-told tales of heroism and disaster, this book reveals the hidden stories of dreaming and haunted explorers, of frozen mummies, of rescue balloons, visits to Inuit shamans, and of the entranced female clairvoyants who travelled to the Arctic in search of John Franklin's lost expedition. Through new readings of archival documents, exploration narratives, and fictional texts, these spectral stories reflect the complex ways that men and women actually thought about the far North in the past. This revisionist historical account allows us to make sense of current cultural and political concerns in the Canadian Arctic about the location of Franklin's ships.

Face Down in the Marrow-Bone Pie

Do Muslim Women Need Saving? is an indictment of a mindset that has justified all manner of foreign interference, including military invasion, in the name of rescuing women from Islam. It offers a detailed, moving portrait of the actual experiences of ordinary Muslim women, and of the contingencies with which they live.

Bagpipes, Brides and Homicides

When her husband becomes one of the suspects in the murder of several Southwark prostitutes (known as Winchester Geese), Lady Appleton vows to uncover the identity of the real killer in order to prove her husband's innocence. The year is 1563. Historical mystery by Kathy Lynn Emerson; originally published by St. Martin's Press and Kensington Books

Spectral Arctic

For nearly two decades, including after its independence, Algeria was named as a part of the European Economic Community. Megan Brown unearths this forgotten history, showing that early visions of European unity were not limited to the "natural" geographic boundaries on which many today insist.

Do Muslim Women Need Saving?

Susanna, Lady Appleton, learns that her dead husband's former mistress, Constance Crane, will be tried as a witch for causing the death of a man. Susanna suspects the victim was poisoned, and aided by her suitor, Nick Baldwin, and her servant Jennet, she uncovers a plot involving a forgotten will and the canceled vow of a nun. Face Down among the Winchester Geese

Galton founded the science of Eugenics and coined the word in 1883. He investigated the families of great men and thought genius was hereditary.

The Seventh Member State

Life imprisonment has replaced the death penalty as the most common sentence imposed for heinous crimes worldwide. Consequently, it has become the leading issue of international criminal justice reform. In the first survey of its kind, Dirk van Zyl Smit and Catherine Appleton argue for a human rights-based reappraisal of this harsh punishment.

Face Down under the Wych Elm

What legitimate form can history take when faced by the severe challenges issued in recent years by literary, rhetorical, multiculturalist, and feminist theories? That is the question considered in this pathbreaking book. Robert Berkhofer addresses the essential practical concern of contemporary historians.

Hereditary Genius

Spanning three years in the life of the writer Katherine Mansfield during the First World War, this novel follows the ups and downs of her relationship with Jack Middleton Murry and her struggle to write the "new kind of fiction" which she felt the times demanded. She is restless, constantly on the move, in and out of London, to and from France, even, once, into the war zone to be with her French lover, novelist Francis Carco. For a short time, Mansfield is able to behave as though the war is merely "background"

Life Imprisonment

In this engrossing account, footnotes to history give way to footnotes as history, recounting in their subtle way the curious story of the progress of knowledge in written form.

Beyond the Great Story

Everywhere we hear talk of decline, of a world that was better once, maybe fifty years ago, maybe centuries ago, but certainly before modernity drew us along its dubious path. While some lament the slide of Western culture into relativism and nihilism and others celebrate the trend as a liberating sort of progress, Charles Taylor calls on us to face the moral and political crises of our time, and to make the most of modernity's challenges. "The great merit of Taylor's brief, non-technical, powerful book...is the vigor with which he restates the point which Hegel (and later Dewey) urged against Rousseau and Kant: that we are only individuals in so far as we are social... Being authentic, being faithful to ourselves, is being faithful to something which was produced in collaboration with a lot of other people... The core of Taylor's argument is a vigorous and entirely successful criticism of two intertwined bad ideas: that you are wonderful just because you are you, and that 'respect for difference' requires you to respect every human being, and every human culture--no matter how vicious or stupid." --Richard Rorty, London Review of Books

Mansfield

This groundbreaking study explores the later lives and late-life writings of more than two dozen British women authors active during the long eighteenth century. Drawing on biographical materials, literary texts, and reception histories, Devoney Looser finds that far from fading into moribund old age, female literary greats such as Anna Letitia Barbauld, Frances Burney, Maria Edgeworth, Catharine Macaulay, Hester Lynch Piozzi, and Jane Porter toiled for decades after they achieved acclaim -- despite seemingly concerted attempts by literary gatekeepers to marginalize their later contributions. Though these remarkable women wrote and published well into old age, Looser sees in their late careers the necessity of choosing among several different paths. These included receding into the background as authors of "classics," adapting to grandmotherly standards of behavior, attempting to reshape masculinized conceptions of aged wisdom, or trying to create entirely new categories for older women writers. In assessing how these writers affected and were affected by the culture in which they lived, and in examining their varied reactions to the prospect of aging, Looser constructs careful portraits of each of her Subjects and explains why many turned toward retrospection in their later works. In illuminating the powerful and often poorly recognized legacy of the British women writers who spurred a marketplace revolution in their earlier years only to find unanticipated barriers to acceptance in later life, Looser opens up new scholarly territory in the burgeoning field of feminist age studies.

The Footnote

Here is a book that challenges the very basis of the way psychologists have studied child development. According to Urie Bronfenbrenner, one of the world's foremost developmental psychologists, laboratory studies of the child's behavior sacrifice too much in order to gain experimental control and analytic rigor. Laboratory observations, he argues, too often lead to "the science of the strange behavior of children in strange situations with strange adults for the briefest possible periods of time." To understand the way children actually develop, Bronfenbrenner believes that it will be necessary to observe their behavior in natural settings, while they are interacting with familiar adults over prolonged periods of time. This book offers an important blueprint for constructing such a new and ecologically valid psychology of development. The blueprint includes a complete conceptual framework for analysing the layers of the environment that have a formative influence on the child. This framework is applied to a variety of settings in which children commonly develop, ranging from the pediatric ward to daycare, school, and various family configurations. The result is a rich set of hypotheses about the developmental consequences of various types of environments. Where current research bears on these hypotheses, Bronfenbrenner marshals the data to show how an ecological theory can be tested. Where no relevant data exist, he suggests new and interesting ecological experiments that might be undertaken to resolve current unknowns. Bronfenbrenner's groundbreaking program for reform in developmental psychology is certain to be controversial. His argument flies in the face of standard psychological procedures and challenges psychology to become more relevant to the ways in which children actually develop. It is a challenge psychology can ill-afford to ignore.

The Ethics of Authenticity

From 1894 to 1924 three waves of violence swept across Anatolia, targeting the region's Christian minorities. Benny Morris and Dror Ze'evi's impeccably researched account is the first to show that the three were actually part of a single, continuing, and intentional effort to wipe out Anatolia's Christian population and create a pure Muslim nation.

Michael Kulikowski traces two hundred years of Roman history during which the Empire became ungovernable and succumbed to turbulence and change. A sweeping political narrative, *The Tragedy of Empire* tells the story of the Western Roman Empire's downfall, even as the Eastern Empire remained politically strong and culturally vibrant.

The Ecology of Human Development

Twenty years as an outsider scouring the underbelly of American culture has made Howard Hampton a uniquely hard-nosed guide to the heart of pop darkness. Bridging the fatalistic, intensely charged space between *Apocalypse Now Redux* and Nirvana's "Smells Like Teen Spirit," his writing breaks down barriers of ignorance and arrogance that have segregated art forms from each other and often from the world at large. In the freewheeling spirit of Pauline Kael, Lester Bangs, and Manny Farber, Hampton calls up the extremist, underground tendencies and archaic forces simmering beneath the surface of popular forms. Ranging from the kinetic poetry of Hong Kong cinema and the neo-New Wave energy of *Irma Vep* to the punk heroines of *Sleater-Kinney* and *Ghost World*, *Born in Flames* plays odd couples off one another: pitting *Natural Born Killers* against *Forrest Gump*, contrasting Jean-Luc Godard with Steven Spielberg, defending David Lynch against aesthetic ideologues, invoking *The Curse of the Mekons* against Fredric Jameson's Postmodernism, and introducing D. H. Lawrence to *Buffy the Vampire Slayer*. "We are born in flames," sang the incandescent Lora Logic, and here those flames are a source of illumination as well as destruction, warmth as well as consumption. From the scorched-earth works of action-movie provocateurs Seijun Suzuki and Sam Peckinpah to the cargo cult soundscapes of Pere Ubu and the Czech dissidents *Plastic People of the Universe*, *Born in Flames* is a headlong plunge into the passions and disruptive power of art.

The Thirty-Year Genocide

Today most Americans, black and white, identify slavery with cotton, the deep South, and the African-American church. But at the beginning of the nineteenth century, after almost two hundred years of African-American life in mainland North America, few slaves grew cotton, lived in the deep South, or embraced Christianity. *Many Thousands Gone* traces the evolution of black society from the first arrivals in the early seventeenth century through the Revolution. In telling their story, Ira Berlin,

a leading historian of southern and African-American life, reintegrates slaves into the history of the American working class and into the tapestry of our nation. Laboring as field hands on tobacco and rice plantations, as skilled artisans in port cities, or soldiers along the frontier, generation after generation of African Americans struggled to create a world of their own in circumstances not of their own making. In a panoramic view that stretches from the North to the Chesapeake Bay and Carolina lowcountry to the Mississippi Valley, *Many Thousands Gone* reveals the diverse forms that slavery and freedom assumed before cotton was king. We witness the transformation that occurred as the first generations of creole slaves—who worked alongside their owners, free blacks, and indentured whites—gave way to the plantation generations, whose back-breaking labor was the sole engine of their society and whose physical and linguistic isolation sustained African traditions on American soil. As the nature of the slaves' labor changed with place and time, so did the relationship between slave and master, and between slave and society. In this fresh and vivid interpretation, Berlin demonstrates that the meaning of slavery and of race itself was continually renegotiated and redefined, as the nation lurched toward political and economic independence and grappled with the Enlightenment ideals that had inspired its birth.

The Tragedy of Empire

Revolution on My Mind is a stunning revelation of the inner world of Stalin's Russia, showing us the minds and hearts of Soviet citizens who recorded their lives in diaries during an extraordinary period of revolutionary fervor and state terror. Jochen Hellbeck brings us face to face with gripping and unforgettably poignant life stories. This book brilliantly explores the forging of the revolutionary self in a study that speaks to the evolution of the individual in mass movements of our own time.

Born in Flames

In 1913, Russian imperial marines stormed an Orthodox monastery at Mt. Athos, Greece, to haul off monks engaged in a dangerously heretical practice known as Name Worshipping. Exiled to remote Russian outposts, the monks and their mystical movement went underground. Ultimately, they came across Russian intellectuals who embraced Name Worshipping—and who would achieve one of the biggest mathematical breakthroughs of the twentieth century, going beyond recent French achievements. Loren Graham and Jean-Michel Kantor take us on an exciting mathematical mystery tour as they unravel a bizarre tale of political struggles, psychological crises, sexual complexities, and ethical dilemmas. At the core of this book is the contest between French and Russian mathematicians who sought new answers to one of the oldest puzzles in math: the nature of infinity. The French school chased rationalist solutions. The Russian mathematicians, notably Dmitri Egorov and Nikolai Luzin—who founded the famous Moscow School of Mathematics—were inspired by mystical insights attained during Name Worshipping. Their religious practice appears to have opened to them visions into the infinite—and led to the founding of descriptive set theory. The men and women of the leading French and Russian mathematical schools are central characters in this absorbing tale that could not be told until now. *Naming Infinity* is a poignant human interest story that raises provocative questions about science and religion, intuition and creativity.

Many Thousands Gone

No political parties of present-day Germany are separated by a wider gulf than the two parties of labor, one democratic and reformist, the other totalitarian and socialist-revolutionary. Social Democrats and Communists today face each other as bitter political enemies across the front lines of the Cold War; yet they share a common origin in the Social Democratic Party of Imperial Germany. How did they come to go separate ways? By what process did the old party break apart? How did the prewar party prepare the ground for the dissolution of the labor movement in World War I, and for the subsequent extension of Leninism into Germany? To answer these questions is the purpose of Carl Schorske's study.

Revolution on My Mind

The greatest dilemma our planet faces is the tradeoff between poverty alleviation, inequality reduction, and climate change. In *Unsustainable Inequalities*, economist Lucas Chancel confronts how to share prosperity without furthering environmental harm, arguing for policies that would direct the benefits of environmental protection to the poor.

Reminiscences of lawyers, economists, and public administrators who worked in Washington during the thirties offer a detailed look at the Roosevelt Administration.

German Social Democracy, 1905-1917

In the wake of the black civil rights movement, other disadvantaged groups of Americans began to make headway--Latinos, women, Asian Americans, and the disabled found themselves the beneficiaries of new laws and policies--and by the early 1970s a minority rights revolution was well underway. In the first book to take a broad perspective on this wide-ranging and far-reaching phenomenon, John D. Skrentny exposes the connections between the diverse actions and circumstances that contributed to this revolution--and that forever changed the face of American politics. Though protest and lobbying played a role in bringing about new laws and regulations--touching everything from wheelchair access to women's athletics to bilingual education--what Skrentny describes was not primarily a bottom-up story of radical confrontation. Rather, elites often led the way, and some of the most prominent advocates for expanding civil rights were the conservative Republicans who later emerged as these policies' most vociferous opponents. This book traces the minority rights revolution back to its roots not only in the black civil rights movement but in the aftermath of World War II, in which a world consensus on equal rights emerged from the Allies' triumph over the oppressive regimes of Nazi Germany and Imperial Japan, and then the Soviet Union. It also contrasts failed minority rights development for white ethnics and gays/lesbians with groups the government successfully categorized with African Americans. Investigating these links, Skrentny is able to present the world as America's leaders saw it; and so, to show how and why familiar figures--such as Lyndon Johnson, Richard Nixon, and, remarkably enough, conservatives like Senator Barry Goldwater and Robert Bork--created and advanced policies that have made the country more egalitarian but left it perhaps as divided as ever.

Face Down before Rebel Hooves

This major novel merges contemporary headlines with stories of a heartfelt family history. 'Do you hear the people calling?' 'No.' 'See there, dummy, you're nowhere near dead.' 'Well, I don't believe you. How would you know?' 'Of course I know, I do, I do, I know all about it . . .' Tawera and his sister are inseparable, in a relationship that is impossible for others to share. In fact his whole whanau is bonded by secrets, a genealogy stitched together by shame, joy, love and sometimes grief. This is an account of the mysteries that operate at many levels between generations, where the present is the pivot, the centre of the spiral, looking outward to the past and future that define it. There's a way the older people have of telling a story, a way where the beginning is not the beginning, the end is not the end . . .
