And Tango Makes Three

Roy and Silo are just like the other penguin couples at the zoo - they bow to each other, walk together and swim together. But Roy and Silo are a little bit different - they're both boys. Then, one day, when Mr Gramzay the zookeeper finds them trying to hatch a stone, he realises that it may be time for Roy and Silo to become parents for real.

Charles Stewart Parnell

"Charles Stewart Parnell[1] (27 June 1846? 6 October 1891) was an Irish landlord, nationalist political leader, land reform agitator, and the founder and leader of the Irish Parliamentary Party. He was one of the most important figures in 19th century Great Britain and Ireland, and was described by Prime Minister William Gladstone as the most remarkable person he had ever met."--Wikipedia.

Parnell and his Times

Marked by names such as W. B. Yeats, James Joyce and Patrick Pearse, the decade 1910–1920 was a period of revolutionary change in Ireland, in literature, politics and public opinion. What fed the creative and reformist urge besides the circumstances of the moment and a vision of the future? The leading experts in Irish history, literature and culture assembled in this volume argue that the shadow of the past was also a driving factor: the traumatic, undigested memory of the defeat and death of the charismatic national leader Charles Stewart Parnell (1846-1891). The authors reassess Parnell's impact on the Ireland of his time, its cultural, religious, political and intellectual life, in order to trace his posthumous influence into the early twentieth century in fields such as political activism, memory culture, history-writing, and literature.

Parnell: A Novel

Dublin, March 1874. Charles Stewart Parnell, only twenty-six years old, speaks in public for the first time as a candidate for Ireland's Home Rule Party. Hesitant and nervous, he stumbles through his speech to the sound of booing and leaves the platform humiliated. He vows that in future he will find his voice – and make it heard. Within three years of this speech, Parnell made the House of Commons unworkable; within six years he had destroyed the landlords in Ireland; and within a decade he controlled the House of Commons and put English Prime Ministers in and out of government at will. Parnell: A Novel charts the life of this most enigmatic and remarkable of men, as seen through the eyes of his loyal secretary James Harrison. From the Houses of Parliament to the blighted villages of the West of Ireland, from the courtrooms of the Royal Courts of Justice to the cells of Kilmainham Gaol, this is the story of how the character of one man could alter the fate of two nations.

Ulysses

This is a guide to over 100 years of Irish history. It is a sustained analysis of its constitutional and revolutionary politics and contributes to our understanding of the causes and consequences of constitutional and revolutionary politics there.

From Parnell to Paisley

"[R]eading this book has given me a whole host of new ideas about working with complex and dissociative clients... Clear and engaging, peppered with relevant case histories, this book would make an important addition to anyone's EMDR-related book collection." -- Dr. Robin Logie, EMDR UK & Ireland This book is the first to bring together in one volume an overview of the principal issues in treatment of dissociative disorders in complex PTSD, and a description of the integration of specific EMDR-related interventions or "tools" with other psychotherapeutic treatments. These tools can significantly extend the therapeutic power of EMDR-related methods. Each intervention is examined in detail with accompanying transcripts illustrating the nuances and variations in how the intervention is applied. It is written by a highly esteemed EMDR scholar, trainer, international speaker, and author who is an EMDRIA-designated "Master Clinician." The book discusses how the concepts and vocabulary of other models of dissociation (particularly the Theory of Structural Dissociation of the Personality, and the Internal Family Systems model) translate directly into EMDR's Adaptive Information Processing language. It presents detailed descriptions of specific EMDR-related tools that are useful in facilitating and safely accelerating therapeutic progress with clients suffering from Complex PTSD. These include such standard EMDR procedures as Trauma Processing and Resource Installation, several conceptual/cognitive/phenomenological models of dissociative personality structures and symptoms, and specific EMDR interventions for resolving dysfunctionally stored post-traumatic elements. The book will be of great value to therapists who wish to extend their use of basic EMDR with "easier" clients to using it effectively with more complex clients. Key Features: Provides a theoretical framework to guide assessment and treatment of clients with Complex PTSD Serves as a "hands-on" resource for using specific EMDR procedures Describes each intervention in detail, illustrating the nuances and variations in different applications Includes specific "AIP" tools, actual therapy scripts, and client drawings Covers DSM-V PTSD criteria

""The White People"" is a horror short story by Welsh author Arthur Machen. Written in the late 1890s, it was first published in 1904 in Horlick's Magazine, edited by Machen's friend A. E. Waite, then reprinted in Machen's collection The House of Souls (1906). The story has since been described as an important example of horror fiction, influencing generations of later writers."

FIVE YEARS IN A PERSIAN TOWN

Excerpt from Five Years in a Persian Town I feel that this short sketch of a Persian town needs an apology. It will not improbably be mistaken for a book of travel. Stopping five years in one place is not travelling, and the experience of such a stay is not a traveller's experience. The descriptions that will be found in this volume refer to a very small area, and consequently a good deal of minute work has been attempted that would have been out of place in the painting of a larger sphere. The Strangling of Persia

Out of a lifetime of study of the ancient Near East, Professor Olmstead has gathered previously unknown material into the story of the life, times, and thought of the Persians, told for the first time from the Persian rather than the traditional Greek point of view. "The fullest and most reliable presentation of the history of the Persian Empire in existence."—M. Rostovtzeff

The Strangling of Persia; Story of the European Diplomacy and Oriental Intrigue That Resulted in the Denationalization of Twelve Million Mohammedans, a Personal Narrative - Scholar's Choice Edition

"In this book, Hyland examines the international relations of the First Persian Empire (the Achaemenid Empire) as a case study in ancient imperialism. He focuses in particular on Persian's relations with the Greek city-states and its diplomatic influence over Athens and Sparta. Previous studies have emphasized the ways in which Persia sought to protect its borders by playing the often warring Athens and Sparta off each other, prolonging their conflicts through limited aid and shifts of alliance. Hyland proposes a new model, employing Persian ideological texts and economic documents to contextualize the Greek narrative framework, that demonstrates that Persian Kings were less interested in control of the Ionian region where Greece bordered the empire than in displays of universal power through the acquisition of Athens or Sparta as client states. On the other hand, the establishment of "Pax Persica" beyond the Aegean was delayed by Persian efforts to limit the interventions' expense, and missteps in dealing with fractious Greek allies. This reevaluation of Persia's Greek relations marks an important contribution to scholarship on the Achaemenid empire and Greek history, and has value for the broader study of imperialism in the ancient world."--Provided by publisher.

History of the Persian Empire

The Greco-Roman world is identified in the modern mind by its cities. This includes both specific places such as Athens and Rome, but also an instantly recognizable style of urbanism wrought in marble and lived in by teeming tunic-clad crowds. Selective and misleading this vision may be, but it speaks to the continuing importance these ancient cities have had in the centuries that followed and the extent to which they define the period in subsequent memory. Although there is much that is mysterious about them, the cities of the Roman Mediterranean are, for the most part, historically known. That the names and pasts of these cities remain known to us is the product of an extraordinary process of remembering and forgetting stretching back to antiquity that took place throughout the former Roman

world. This volume tackles this subject of the survival and transformation of the ancient city through memory, drawing upon the methodological and theoretical lenses of memory studies and resilience theory to view the way the Greco-Roman city lived and vanished for the generations that separate the present from antiquity. This book analyzes the different ways in which urban communities of the post-Antique world have tried to understand and relate to the ancient city on their own terms, examining it as a process of forgetting as well as remembering. Many aspects of the ancient city were let go as time passed, but those elements that survived, that were actively remembered, have shaped the many understandings of what it was. In order to do so, this volume assembles specialists in multiple fields to bring their perspectives to bear on the subject through eleven case studies that range from late Antiquity to the mid-twentieth century, and from the Iberian Peninsula to Iran. Through the examination of archaeological remains, changing urban layouts and chronicles, travel guides and pamphlets, they track how the ancient city was made useful or consigned to oblivion.

Persian Interventions

This book reveals how, for well over a millennium and across three continents - Asia, Africa, and Europe - non-Muslims who were vanquished by jihad wars became forced tributaries (called dhimmi in Arabic) in lieu of being slain. Under the dhimmi religious caste system, non-Muslims were subjected to legal and financial oppression, as well as social isolation. Extensive primary and secondary source materials, many translated here for the first time into English, are presented, making clear that jihad conquests were brutal, imperialist advances, which spurred waves of Muslims to expropriate a vast expanse of lands and subdue millions of indigenous peoples. Finally, the book examines how jihad war, as a permanent and uniquely Islamic institution, ultimately regulates the relations of Muslims with non-Muslims to this day. Scholars, educators, and interested lay readers will find this collection an invaluable resource.

Remembering and Forgetting the Ancient City

Located along the busy trade routes between Asia and Europe, Afghanistan was for centuries a place where a diverse set of cultures met and exchanged goods and ideas.

The Legacy of Jihad

For centuries Iran hosted numerous travellers and visitors of diverse nationalities and backgrounds. Many of these travellers left behind documents in which they recorded their observations during their residence in Iran, and these embody a vast range of firsthand information about the land and its people at different periods of time. This book, first published in 1990, takes as its subjects the nature and history of Iranian folk narrative scholarship. The contributions of travellers are given their due recognition as important source documents.

The Nation

This nine volume set provides an overview of many aspects of Middle Eastern language and literature. These books range from discussions of the Arabic language and its publications, to translations of some of the region's most important early works, to a survey of folk tales and modern literature.

The Congregationalist and Christian World

Topics such as the compatibility of Islam and democracy, and the question of whether democracy can be encouraged in the Middle East are looked at carefully. Contributors evaluate the circumstances under which democracy can be imposed by outside force, and ask what forces are driving the confrontation between the West and Islam, before looking at how this confrontation is likely to develop.
