HIDDEN TEACHINGS of the Bible That Explain Manifestation, Consciousness & Oneness (POWERFUL Info!) - HIDDEN TEACHINGS of the Bible That Explain Manifestation, Consciousness & Oneness (POWERFUL Info!) by Your Youniverse 11,407,320 views 5 years ago 26 minutes - These are the hidden teachings which **Jesus**, spoke and Didymus Judas Thomas wrote down (known as The Gospel of Thomas).

Gregg Braden discussing The Gospel of Thomas

When you come to know yourselves, then you will become known, and you will realize that it is you who are the sons of the living Father.

But if you will not know yourselves, you dwell in poverty and it is you who are that poverty.

If you do not fast from the world, you will not find the (Father's) domain.

His disciples said to him, "When will the kingdom come?"

Artificial intelligence is divided into narrow AI and general AI, with the latter being a simulation of human intelligence but not conscious.

The concept of consciousness remains a mystery, with no one understanding what it truly is.

The language used to describe AI is misleading and anthropomorphized, creating a false understanding of its capabilities.

The potential dangers of AI, including ChatGPT, are discussed, with concerns about fake news and misinformation, as well as the need for ethical guidelines.

The use of facial recognition technology raises concerns about privacy and human rights, as it can be used for both security and control purposes.

The dangers and ethical concerns of AI, including privacy invasion, devaluation of human beings, and biases in AI systems.

The ethical implications of AI and the need for regulation from a Christian perspective.

The impact of AI on children's development and education is concerning, especially in relation to the transhumanist agenda and the undermining of the concept of humanity.

111,744 views 3 years ago 24 minutes - This is a lecture video about "The Puzzle of **Conscious**, Experience" by David Chalmers. In this 2002 article from Scientific ...

They suggest that consciousness may arise from certain oscillations in the cerebral cortex, which become synchronized as neurons fire 40 times per second. Crick and Koch believe the phenomenon might explain how different attributes of a single perceived object (its color and shape, for example), which are processed in different parts of the brain, are merged into a coherent whole. In this theory, two pieces of information become bound together precisely when they are represented by synchronized neural firings.

If the existence of consciousness cannot be derived from physical laws, a theory of physics is not a true theory of everything. So a final theory must contain an additional fundamental component. Toward this end, I propose that conscious experience be considered a fundamental feature, irreducible to anything more basic.

Where there is a fundamental property, there are fundamental laws. In this case, the laws must relate experience to elements of physical theory. These laws will almost certainly not interfere with those of the physical world; it seems that the latter form a closed system in their own right.
