Ever wondered why we don't talk anymore? Or why you never seem to be able to get anything done at work? And why your boss is driving you mad? Answer: Email. In a short period of time, email has taken over our lives. But it is such a new form of communication. Is it any wonder that we haven't figured out how to use it yet? Send is a book so utterly necessary, it is almost impossible to imagine having survived without it. It explains the cultural implications of email and offers top tips on how to make it work FOR you, rather than AGAINST you. It might even prevent you from sending the email that could land you in jail.

31 Email Hacks That Get a Faster Response

Do you ever have difficulty getting replies to your emails? Whether it's your boss, a recruiter, a customer, or an important executive...it's harder than ever to get a prompt email reply! That's because research shows that most people today spend only 11.1 seconds reading an email—and it's usually on a very small device, like a smartphone. So the way we learned to write in high school (or college) no longer works in this super-fast, high-pressure format. This book shows you 31 easy hacks for changing your email style to reach today's super-busy readers, all developed and tested by national technical writing expert Paula Peters. Paula has used, refined, and taught these email hacks for over 5 years to more than 10,000 executives, entrepreneurs, and military leaders across the globe. You'll spend less time on your email—and get better, faster replies. And you can start with the 50 free samples of professional business emails...provided at the end of this book!

The New Email Revolution

Practices, strategies, and templates for optimizing your email use. The average business employee spends more than thirteen hours a week reading and responding to email. That's 675 or more hours—over 28 days a year—spent on email. Wouldn't it be nice to get some of that time back? In The New Email Revolution, Robert W. Bly draws from decades of experience sending millions of emails to help you take that time back. With this book in hand, you will be able to quickly and easily:

- Find templates you can use to create emails for dozens of different situations.
- Know the right wording and optimal word length for email communication.
- Get recipients to read and respond to your email messages.
- Understand when it is legal and not legal to send email to a person you do not know.
- Incorporate photos, graphics, sound, and video into your email messages.
- Measure the deliverability, bounce rate, open rate, and response rate to every email you send.
- Write clearer, more engaging, more persuasive email copy for every occasion.

Get better results in less time with The New Email Revolution.

How to be a Happier Parent

An encouraging guide to helping parents find more happiness in their day-to-day family life, from the former lead editor of the New York Times' Motherlode blog. In all the writing and reporting KJ Dell'Antonia has done on families over the years, one topic keeps coming up again and again: parents crave a greater sense of happiness in their daily lives. In this optimistic, solution-packed book, KJ asks: How can we change our family life so that it is full of the joy we'd always hoped for? Drawing from the latest research and interviews with families, KJ discovers that it's possible to do more by doing less, and make our family life a refuge and pleasure, rather than another stress point in a hectic day. She focuses on nine common problem spots that cause parents the most grief, explores why they are hard, and offers small, doable, sometimes surprising steps you can take to make them better. Whether it's getting everyone out the door on time in the morning or making sure chores and homework get done without another battle, How to Be a Happier Parent shows that having a family isn't just about raising

great kids and churning them out at destination: success. It's about experiencing joy--real joy, the kind you look back on, look forward to, and live for--along the way.

The Internet's "killer app" is not the World Wide Web or Push technologies: it is humble electronic mail. More people use email than any other Internet application. As the number of email users swells, and as email takes on an ever greater role in personal and business communication, Internet mail protocols have become not just an enabling technology for messaging, but a programming interface on top of which core applications are built. Programming Internet Email unmask the Internet Mail System and shows how a loose federation of connected networks have combined to form the world's largest and most heavily trafficked message system. Programming Internet Email tames the Internet's most popular messaging service. For programmers building applications on top of email capabilities, and power users trying to get under the hood of their own email systems, Programming Internet Email stands out as an essential guide and reference book. In typical O'Reilly fashion, Programming Internet Email covers the topic with nineteen tightly written chapters and five useful appendixes. Following a thorough introduction to the Internet Mail System, the book is divided into five parts: Part I covers email formats, from basic text messages to the guts of MIME. Secure email message formats (OpenPGP and S/MIME), mailbox formats and other commonly used formats are detailed in this reference section. Part II describes Internet email protocols: SMTP and ESMTP, POP3 and IMAP4. Each protocol is covered in detail to expose the Internet Mail System's inner workings. Part III provides a solid API reference for programmers working in Perl and Java. Class references are given for commonly used Perl modules that relate to email and the Java Mail API. Part IV provides clear and concise examples of how to incorporate email capabilities into your applications. Examples are given in both Perl and Java. Part V covers the future of email on the Internet. Means and methods for controlling spam email and newly proposed Internet mail protocols are discussed. Appendixes to Programming Internet Email provide a host of explanatory information and useful references for the programmer and avid user alike, including a comprehensive list of Internet RFCs relating to email, MIME types and a list of email related URLs. Programming Internet Email will answer all of your questions about mail and extend your abilities into this most popular messaging frontier.

Contrary to the popular belief, sales people don't rely on "the gift of the gab" to be successful. Actually, the opposite is true. The best sales professionals spend far more time asking and listening than they do talking and selling. They ask questions of their customers; they ask questions of their colleagues, and they ask questions of their managers. If Oxford defines curiosity as the strong desire to know or learn something, then by that definition, sales people are curious by nature. In fact, that's how sales professionals learn to be professional in the first place. This is a collection of practical answers to questions sales people ask most. Written by Susan A. Enns, a professional sales coach with a proven track record of sales excellence over her 30 plus year career. Her accomplishments include consecutively being the top sales rep in Canada, managing the top sales branch, and achieving outstanding sales growth in a national channel sales organization. She has written several books about sales and sales management and has created numerous automated sales tools. Her work has been published in several locations numerous times and has sold on five separate continents. As such, over the years, Susan has been asked many questions by many sales people. After a while, she saw that sales people, regardless of their experience, the products they sell, the industries in which they operate, or the countries where they sell, all share similar curiosities. In other words, although the wording may be different when asked in an email or when asked in person, sales people all ask the same questions, the most common of which are answered in this ebook. As the old saying goes, the only stupid questions are the ones unasked. As a sales professional, you should never be afraid to "Ask the Sales Coach" because you will learn so much from the answers! - "Susan really knows the selling world. She's honest, articulate, bright, giving, highly competent, personable and a top professional. Welcome her. It's the right thing to do." - "Our company hired Susan as our sales coach. She has helped me make more appointments, close more deals and make more money. The 3 most important concepts in sales. I would recommend any sales force hire her to help boost business sales". - "Susan ...understands the sales process intimately and is able to create a management process around it that drives sales people to accomplish their goals." - "Susan knows her stuff. She brings many years of great sales experience and success to anyone who wished to improve their skills in sales. She is very personable, and is not afraid to tell it like it is. I would recommend anyone (and I have) to Susan, her website, her books if you want to become a better sales person." - "Thanks for the training... I made my quota this year in May!"

Strategy, Leadership and the Soul

New York Times bestseller! From New York Times bestselling author Cal Newport comes a bold vision for liberating workers from the tyranny of the inbox--and unleashing a new era of productivity. Modern knowledge workers communicate constantly. Their days are defined by a relentless barrage of incoming messages and back-and-forth digital conversations--a state of constant, anxious chatter in which nobody can disconnect, and so nobody has the cognitive bandwidth to perform substantive work. There was a time when tools like email felt cutting edge, but a thorough review of current evidence reveals that the "hyperactive hive mind" workflow they helped create has become a productivity disaster, reducing profitability and perhaps even slowing overall economic growth. Equally worrisome, it makes us miserable. Humans are simply not wired for constant digital communication. We have become so used to an inbox-driven workday that it's hard to imagine alternatives. But they do exist. Drawing on years of investigative reporting, author and computer science professor Cal Newport makes the case that our current approach to work is broken, then lays out a series of principles and concrete instructions for fixing it. In *A World without Email*, he argues for a workplace in which clear processes--not haphazard messaging--define how tasks are identified, assigned and reviewed. Each person works on fewer things (but does them better), and aggressive investment in support reduces the ever-increasing burden of administrative tasks. Above all else, important communication is streamlined, and inboxes and chat channels are no longer central to how work unfolds. The knowledge sector's evolution beyond the hyperactive hive mind is inevitable. The question is not whether a world without email is coming (it is), but whether you'll be ahead of this trend. If you're a CEO seeking a competitive edge, an entrepreneur convinced your productivity could be higher, or an employee exhausted by your inbox, *A World Without Email* will convince you that the time has come for bold changes, and will walk you through exactly how to make them happen.

What does it mean to be an academic today? What kinds of experiences do students have, and how are they affected by what they learn? Why do so many students and their teachers feel like frauds? Can we learn to teach and research in ways that foster hope and deflate pretension? *Academic Life and Labour in the New University: Hope and Other Choices* addresses these big questions, discussing the challenges of teaching and researching in the contemporary university, the purpose of research and its fundamental value, and the role of the academy against the background of major changes to nature of the university itself. Drawing on a range of international media sources, political discourse and many years' professional experience, this volume explores approaches to teaching and research, with special emphasis on the importance of collegiality, intellectual honesty and courage. With attention to the intersection of large-scale institutional changes and intellectual shifts such as the

rise of transdisciplinarity and the development of a pluralist curriculum, this book proposes the pursuit of more ethical, compassionate and critical forms of teaching and research. As such, it will be of interest not only to scholars of cultural studies and education, but to all those who care about the fate of the university as an institution, including young scholars seeking to join the academy.
