Ergonomics: Manual control, industrial processes, and automation

First published in 2004. Routledge is an imprint of Taylor & Francis, an informa company.

Ergonomics: Manual control, industrial processes, and automation

The fourth edition of the Handbook of Human Factors and Ergonomics has been completely revised and updated. This includes all existing third edition chapters plus new chapters written to cover new areas. These include the following subjects: Managing low-back disorder risk in the workplace Online interactivity Neuroergonomics Office ergonomics Social networking HF&E in motor vehicle transportation User requirements Human factors and ergonomics in aviation Human factors in ambient intelligent environments As with the earlier editions, the main purpose of this handbook is to serve the needs of the human factors and ergonomics researchers, practitioners, and graduate students. Each chapter has a strong theory and scientific base, but is heavily focused on real world applications. As such, a significant number of case studies, examples, figures, and tables are included to aid in the understanding and application of the material covered.

Handbook of Human Factors and Ergonomics

This book highlights the problems and hazards of manual materials handling and provides ergonomic and engineering solutions for alleviating them. It is helpful for both researchers and practitioners who are committed to solving the multifaceted manual materials handling problem.

Manual Materials Handling

Ergonomics human factors is a multidisciplinary science that uses knowledge of human capacities and capabilities to assist in the design of safe and productive jobs, workplaces, equipment, and products. Eastman Kodak, with over twenty-five years of applied research and practical experience in ergonomics, is at the forefront of this developing field. The first volume of this comprehensive er-

gonomics resource presented principles by which safe and highly effective workplaces, equipment and environments could be designed. This second volume complements Volume I by drawing on physiology, psychology, engineering, medicine, and environmental sciences to provide practical information for the design of jobs and work tasks. The guidelines and procedures included are based on ergonomic approaches that have proven to be effective within Kodak. Topics covered in this volume include:

- The Physiological Basis of Work
- Evaluation of Job Demands
- Patterns of Work with Information on Repetitive and Paced Work
- Hours of Work Including Shiftwork and Overtime
- Manual Materials Handling

Ergonomic Design for People at Work, Volume 2 offers a realistic approach to the science of ergonomics. Special consideration is given to the broad range of capabilities of the industrial population as determined by their age, sex, and health status. Over 140 illustrations graphically present key concepts that help identify solutions to many problems. Ergonomics and human factors specialists, health and safety professionals, industrial hygienists, industrial engineers, equipment designers, architects, and labor relations specialists will find this volume an indispensable reference.

Ergonomic Design for People at Work, The Design of Jobs, including Work Patterns, Hours of Work, Manual Materials Handling Tasks, Methods to Evaluate Job Demands, and the Physiological Basis of Work

The previous edition of the International Encyclopedia of Ergonomics and Human Factors made history as the first unified source of reliable information drawn from many realms of science and technology and created specifically with ergonomics professionals in mind. It was also a winner of the Best Reference Award 2002 from the Engineering Libraries Division, American Society of Engineering Education, USA, and the Outstanding Academic Title 2002 from Choice Magazine. Not content to rest on his laurels, human factors and ergonomics expert Professor Waldemar Karwowski has overhauled his standard-setting resource, incorporating coverage of tried and true methods, fundamental principles, and major paradigm shifts in philosophy, thought, and design. Demonstrating the truly interdisciplinary nature of this field, these changes make the second edition even more comprehensive, more informative, more, in a word, encyclopedic. Keeping the format popularized by the first edition, the new edition has been completely revised and updated. Divided into 13 sections and organized alphabetically within each section, the entries provide a clear and simple outline of the topics as well as precise and practical information. The book reviews applications, tools, and innovative concepts related to ergonomic research. Technical terms are defined (where possible) within entries as well as in a glossary. Students and professionals will find this format invaluable, whether they have ergonomics, engineering, computing, or psychology backgrounds. Experts and researchers will also find it an excellent source of information on areas beyond the range of their direct interests.

Ergonomics Program Management Guidelines for Meatpacking Plants

Ergonomics aims to design appliances, technical systems and tasks in such a way as to improve human safety, health, comfort and performance. It developed into a recognized field during the Second World War, when for the first time, technology and the human sciences were systematically applied in a coordinated manner. Physiologists, psychologists, anthropologists, medical doctors, work scientists and engineers, together addressed the problems arising from the operation of complex military equipment. Because of the 'applied' nature of ergonomics there are many outstanding pieces of work that have never been published in the archival literature, since they were written for contract work by commercial or governmental laboratories. These volumes collect some of those papers that have attained classical status, yet are naturally difficult to obtain, making Ergonomics: Major Writings a unique and valuable collection. Volume 1 begins with papers setting the historical context of ergonomics, and also includes several classical papers that indicate the scope and range of the discipline. It also examines methodological issues, subjective scales and their uses and task analysis. Volume 2 looks at skilled behaviour, displays and workload. Volume 3 examines psychological mechanism and models. Volume 4 deals with all facets of the engineering branch of ergonomics including; control theory, press control and manufacturing, and automation.

International Encyclopedia of Ergonomics and Human Factors, Second Edition - 3 Volume Set

A comprehensive overview of different approaches to the measurement of situation awareness in experimental and applied setting, this book directly tackles the problem of ensuring that system designs and training programs are effective at promoting situation awareness. It is the first book to provide a all-inclusive coverage of situation awareness and its measurement. Topics addressed provide a detailed analysis of the use of a wide variety of techniques for measuring situation awareness and situation assessment processes. It provides a rich resource for engineers and human factors psychologists involved in designing and evaluating systems in many domains.

Proceedings

This volume presents a comprehensive introduction to the fundamental principles of ergonomics. It details the practical application of ergonomic principles in solving actual problems in the workplace, and reviews ergonomic case studies from various industries. It also contains helpful ergonomic tables; a work-saving list of vendors of ergonomic tools, software and video-training materials; and convenient ergonomic check lists.

Ergonomics

This book presents the proceedings of the 21st Congress of the International Ergonomics Association (IEA 2021), held online on June 13-18, 2021. By highlighting the latest theories and models, as well as cutting-edge technologies and applications, and by combining findings from a range of disciplines including engineering, design, robotics, healthcare, management, computer science, human biology and behavioral science, it provides researchers and practitioners alike with a comprehensive, timely guide on human factors and ergonomics. It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance, while at the same time promoting the health, safety and wellbeing of individuals. The proceedings include papers from researchers and practitioners, scientists and physicians, institutional leaders, managers and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies, domains and productive sectors. This volume includes papers addressing the following topics: Activity Theories for Work Analysis and Design (ATWAD), Organisation design and management (ODAM), Ergonomic Work Analysis and Training (EWAT), Systems HF/E, HF/E Education and Professional Certification Development.

Situation Awareness Analysis and Measurement

This textbook introduces advanced control systems for vehicles, including advanced automotive concepts and the next generation of vehicles for ITS.

Occupational Ergonomics

The first edition of Handbook of Human Factors and Ergonomics in Health Care and Patient Safety took the medical and ergonomics communities by storm with in-depth coverage of human factors and ergonomics research, concepts, theories, models, methods, and interventions and how they can be applied in health care. Other books focus on particular human factors and ergonomics issues such as human error or design of medical devices or a specific application such as emergency medicine. This book draws on both areas to provide a compendium of human factors and ergonomics issues relevant to health care and patient safety. The second edition takes a more practical approach with coverage of methods, interventions, and applications and a greater range of domains such as medication safety, surgery, anesthesia, and infection prevention. New topics include: work schedules error recovery telemedicine workflow analysis simulation health information technology development and design patient safety management Reflecting developments and advances in the five years since the first edition, the book explores medical technology and telemedicine and puts a special emphasis on the contributions of human factors and ergonomics to the improvement of patient safety and quality of care. In order to take patient safety to the next level, collaboration between human factors professionals and health care providers must occur. This book brings both groups closer to achieving that goal.

The Industrial Environment, Its Evaluation & Control

Comprehensive Biomedical Physics, Ten Volume Set is a new reference work that provides the first point of entry to the literature for all scientists interested in biomedical physics. It is of particularly use for graduate and postgraduate students in the areas of medical biophysics. This Work is indispensable to all

serious readers in this interdisciplinary area where physics is applied in medicine and biology. Written by leading scientists who have evaluated and summarized the most important methods, principles, technologies and data within the field, Comprehensive Biomedical Physics is a vital addition to the reference libraries of those working within the areas of medical imaging, radiation sources, detectors, biology, safety and therapy, physiology, and pharmacology as well as in the treatment of different clinical conditions and bioinformatics. This Work will be valuable to students working in all aspect of medical biophysics, including medical imaging and biomedical radiation science and therapy, physiology, pharmacology and treatment of clinical conditions and bioinformatics. The most comprehensive work on biomedical physics ever published Covers one of the fastest growing areas in the physical sciences, including interdisciplinary areas ranging from advanced nuclear physics and quantum mechanics through mathematics to molecular biology and medicine Contains 1800 illustrations, all in full color

Proceedings of the 21st Congress of the International Ergonomics Association (IEA 2021)

Topics Include: industrial ergonomics, risk, accidents and accident prevention, safety and surveillance, posture perception, cognitive ergonomics, telerobotics, military occupational ergonomics, and international ergonomics.

Automotive Control Systems

Human Factors in Simulation and Training: Application and Practice covers the latest applications and practical implementations of advanced technologies in the field of simulation and training. The text focuses on descriptions and discussions of current applications and the use of the latest technological advances in simulation and training. It covers topics including space adaptation syndrome and perceptual training, simulation for battle-ready command and control, healthcare simulation and training, human factors aspects of cybersecurity training and testing, design and development of algorithms for gesture-based control of semi-autonomous vehicles, and advances in the after-action review process for defence training. The text is an ideal read for professionals and graduate students in the fields of ergonomics, human factors, computer engineering, aerospace engineering, occupational health, and safety.

Handbook of Human Factors and Ergonomics in Health Care and Patient Safety, Second Edition

This two-volume set was developed to help researchers and practitioners select measures to be used in the evaluation of human/machine systems. It can also be used to supplement classes at both the undergraduate and graduate courses in ergonomics, experimental psychology, human factors, human performance, measurement, and system test and evaluation. Volume 1 of the handbook begins with an overview of the steps involved in developing a test to measure human performance, workload, and/or situational awareness. This is followed by a definition of human performance and a review of human performance measures. Situational Awareness is similarly treated in a subsequent chapter. Volume 2 presents a definition of workload and a review of workload measures. Provides a short engineering tutorial on experimental design Offers readily accessible information on human performance, workload, and situational awareness (SA) measures Presents general description of the measure Covers data collection, reduction, and analysis requirement Details out the strengths and limitations or restrictions of each measure, including any known proprietary rights or restrictions, as well as validity and reliability data

Ergonomics for the New Millennium: Complex systems and performance

Proceedings of 14th International Conference on Humanizing work and work Environment

Man and Computer in Process Control

This Research Topic is dedicated to Raja Parasuraman who unexpectedly passed on March 22nd 2015. Raja Parasuraman's pioneering work led the emergence of Neuroergonomics as a new scientific field. He combined his research interests in the field of Neuroergonomics which he defined as the study of the human brain in relation to performance at work and everyday settings. Raja Parasuraman was a pioneer, a truly exceptional researcher and an extraordinary person. He made significant contributions to a number of disciplines, from human factors to cognitive neuroscience. His advice to young researchers was to be passionate in order to develop theory and knowledge that can guide the design of technologies and environments for people. His legacy, the field of Neuroergonomics, will

live on in countless faculties and students whom he advised and inspired with unmatched humility throughout the whole of his distinguished career. Raja Parasuraman was an impressive human being, a very kind person, and an absolutely inspiring individual who will be remembered by everyone who had the chance to meet him. About this Research Topic Since the advent of neuroergonomics, significant progress has been made with respect to methodology and tools for the investigation of the brain and behavior at work. This is especially the case for neuroscientific methods where the availability of ambulatory hardware, wearable sensors and advanced data analyses allow for imaging of brain dynamics in humans in applied environments. Methods such as: electroencephalography (EEG), functional near-infrared spectroscopy (fNIRS), and stimulation approaches like transcranial direct-current stimulation (tDCS) have made significant progress in both recording and altering brain activity while allowing full body movements outside laboratory environments. For neuroergonomics, the application of brain imaging in real-world scenarios is highly relevant. Traditionally, brain imaging experiments in human factors research tend to avoid active behavior for fear of artifacts and a contaminated data set that would provide limited insight into brain dynamics in real working environments. To overcome these problems new analyses approaches have to be developed that identify artifacts resulting from hostile recording environments and movement-related non-brain activity stemming from eye-, head, and full-body movements. The application of methodology from the field of Brain-Computer Interfacing (BCI) for neuroergonomics is one approach that has significant potential to enhance ambulatory monitoring and applied testing. Passive BCIs allow for assessing aspects of the user state online, such that systems can automatically adapt to their user. This neuroadaptive technology could lead to highly efficient working environments, to auto-adaptive experimental paradigms and to a continuous tracking of cognitive and affective aspects of the user state. Hence, deployment of portable neuroimaging technologies to real time settings could help assess cognitive and motivational states of personnel assigned to perform critical tasks. This Research Topic gathers submissions that cover new approaches in neuroergonomics. Different article type cover advanced neuroscience methods and neuroergonomics techniques as well as analysis approaches to investigate brain dynamics in working environments. The selection of papers provides insights into new neuroergonomic research approaches that demonstrate significant advances in brain imaging technologies that become more and more mobile. Moreover, a strong trend for new analyses approaches and paradigms investigating real work settings can be seen. Together, this unique collection of latest research papers provides a comprehensive overview on the latest developments in neuroergonomics.

International Encyclopedia of Ergonomics and Human Factors

Simple problems have become rare in today's technologically advanced world. Problems are typically much more complex, and solving them requires integrative knowledge from several disciplines. Technology alone cannot be the answer. Collaborative teams equipped with knowledge and skills in various disciplines are indispensable to exploit technologies effectively and create new conceptual, theoretical, methodological, and translational innovations that integrate and move beyond discipline-specific approaches to address a common problem in the changing and connected world. This book presents the proceedings of TE2023, the 30th International Conference on Transdisciplinary Engineering, held in Hua Hin Cha Am, Thailand from 11-14 July 2023. The theme of this year's conference was Leveraging Transdisciplinary Engineering in a Changing and Connected World, and it provided a forum for more than 115 participants from academia and industry to exchange knowledge and ideas connected to this aspect of transdisciplinary engineering. A total of 117 submissions were received for the conference, of which 93 were selected for presentation and publication here following a rigorous abstract and full-paper review process. They are arranged under 7 categories: product design and development; team working; smart operations for value chain management; transdisciplinary approaches; engineering education; critical issues in transdisciplinary engineering; and theoretical contributions. Providing a comprehensive overview of the latest innovations and ideas in transdisciplinary engineering, the book will be of interest to all those working in the field.

IRE Transactions on Human Factors in Electronics

Handbook of Human Factors for Automated, Connected, and Intelligent Vehicles Subject Guide: Ergonomics & Human Factors Automobile crashes are the seventh leading cause of death worldwide, resulting in over 1.25 million deaths yearly. Automated, connected, and intelligent vehicles have the potential to reduce crashes significantly, while also reducing congestion, carbon emissions, and increasing accessibility. However, the transition could take decades. This new handbook serves a diverse community of stakeholders, including human factors researchers, transportation engineers,

regulatory agencies, automobile manufacturers, fleet operators, driving instructors, vulnerable road users, and special populations. It provides information about the human driver, other road users, and human–automation interaction in a single, integrated compendium in order to ensure that automated, connected, and intelligent vehicles reach their full potential. Features Addresses four major transportation challenges—crashes, congestion, carbon emissions, and accessibility—from a human factors perspective Discusses the role of the human operator relevant to the design, regulation, and evaluation of automated, connected, and intelligent vehicles Offers a broad treatment of the critical issues and technological advances for the designing of transportation systems with the driver in mind Presents an understanding of the human factors issues that are central to the public acceptance of these automated, connected, and intelligent vehicles Leverages lessons from other domains in understanding human interactions with automation Sets the stage for future research by defining the space of unexplored questions

Comprehensive Biomedical Physics

Tendon ailments are a significant cause of morbidity among athletes of all levels and are increasing in prevalence. Their management is often empirical, and para-scientific, only looking at the biological aspects of tendon ailments. This book conveys a comprehensive and concise body of knowledge on the management of tendon problems in sportspeople with practical details of clinical protocols. Tendon Injuries: Basic Science and Clinical Medicine is specifically dedicated to the clinical aspects of tendinopathy and provides the required knowledge and scientific basis for the sports medicine practitioner, orthopedic specialist and student facing upper and lower limb tendon ailments in athletes. A comprehensive review of tendon disorders is given and modern criteria of management outlined to form the basis of effective clinical management of this group of patients.

Advances In Industrial Ergonomics And Safety IV

This work contains the conference proceedings from the 2nd International Conference on Human Interfaces in Control Rooms, Cockpits and Command Centres (PIC 2001).

Occupational Ergonomics

Human Factors in Simulation and Training

Nocturne op.9, no.2, by Chopin, arranged for the left hand alone

(Woodwind Solo). A compilation of the most beautiful Baroque sonatas for treble recorder. Composers include Handel, Loeillet, Marcello, Telemann, Vivaldi and more.

Vierzig tagliche Studien

Krzysztof Penderecki's Threnody is composed for Full Orchestra

Musikhandel

Zeitschrift für Theorie und Praxis der Musikerziehung.

Gradus ad Parnassum du violoniste

The Book aims to be a guide through the little universe which is the working place of the man who writes music. As such it talks predominantly to the layman, although the expert composer may also find some stimulation in it... From the center of basic theory our discussion will spread out into all the realms of experience which border the technical aspect on composing, such as aesthetics, sociology, philosophy and so on... We must be grateful that with our art we have been placed halfway between science and religion, enjoying equally the advantages of exactitude in thinking... and of the unlimited world of faith. Paul Hindemith, from the preface

Musiktexte

A Violin solo with Piano Accompaniment composed by Antonin Dvorák.

Schott Blockflöten-Bibliothek

(Easy Piano Songbook). Kids from all corners of the world love and sing along to the songs of Taylor Swift, One Direction, Katy Perry and other pop stars. This collection features 25 songs from these and many more artists in easy piano format. Includes: Brave * Can't Stop the Feeling * Firework * Happy * Home * Let It Go * Shake It Off * What Makes You Beautiful * and more.

Threnody

Position Pieces for Cello is designed to give students a logical and fun way to learn their way around the fingerboard. Each hand position is introduced with exercises called "Target Practice," "Geography Quiz," and "Names and Numbers." Following these exercises are tuneful cello duets which have been specifically composed to require students to play in that hand position. In this way, students gain a thorough knowledge of how to find the hand positions and, once there, which notes are possible to play. Using these pieces (with names like "I Was a Teenage Monster," "The Irish Tenor," and "I've Got the Blues, Baby"), position study on the cello has never been so much fun!

Quartet for strings

(Instrumental Folio). If you've been taking cello lessons for a little while, you're probably eager to put those new skills to work and play some familiar songs. The First 50 Songs You Should Play on the Cello includes a wide variety of favorite songs, from pop hits and movie themes, to folk songs and classical melodies, several of which originally featured cello! Titles include: Air (Air on the G String) * All of Me * All You Need Is Love * Circle of Life * Fight Song * God Bless America * Hallelujah * Hello * I Will Always Love You * Let It Go * Roar * Satin Doll * See You Again * Shake It Off * Shallow * Stand by Me * Summertime * The Swan (Le Cygne) * This Is Me * What a Wonderful World * and more!

Musik und Bildung

Alfred's Ultimate Movie Instrumental Solos series arranged for flute, clarinet, alto sax, tenor sax, trumpet, horn in F, trombone, violin, viola, cello, and optional piano accompaniment. All wind instrument arrangements are fully compatible, and can be successfully performed as ensembles or solos by students who have completed the first book of any standard band method. A fully orchestrated accompaniment MP3 CD is provided, featuring each song as a live performance demo track followed by a play-along track. The CD also contains a PDF of the Piano Accompaniment and Alfred's Tempo Changer Software. Contains 60 songs, including: Cantina Band * Follow the Yellow Brick Road / We're Off to See the Wizard * Gollum's Song * Hedwig's Theme * James Bond Theme * Obliviate * Pink Panther Theme * Raiders March * Superman Theme * Wonka's Welcome Song * and many more. Due to level considerations regarding keys and instrument ranges, the wind instrument arrangements are not compatible with the string instrument arrangements in this series. This title is available in SmartMusic.

A Composer's World

(Educational Piano Library). Eight fantastic duet arrangements of classic and current pop hits! Titles: Can't Feel My Face (The Weeknd) * Hallelujah, I Love Her So (Ray Charles) * Halo (Beyonce) * I Got You (I Feel Good) (James Brown) * I Want You Back (Jackson 5) * Isn't She Lovely (Stevie Wonder) * Just the Way You Are (Bruno Mars) * Respect (Aretha Franklin).

Sonata in F Major, Opus 57

The Really Easy series returns to put some musical presents in your stocking. The Bumper Christmas Book contains easy piano arrangements of 45 Christmas favourites, from carols to contemporary anthems, from Slade to Silent Night, from Paul McCartney to O Christmas Tree. Each piece is accompanied by background notes alongside performance hints and tips, making this the perfect title for beginners hoping to improve their piano playing and impress their folks over the holidays, as well as simply for those looking to extend their repertoire with some festive favourites. An integrated Spotify playlist within the digital edition also allows you to hear each of the songs before you begin, allowing anyone to jump right in and become a master. The songs included are: - A Spaceman Came Travelling [Chris de Burgh] - A Winter's Tale [David Essex] - All I Want For Christmas Is You [Mariah Carey] - Angels From The Realms Of Glory [Traditional] - Away In A Manger [Traditional] - Blue Christmas [Elvis Presley] - The Coventry Carol [Traditional] - Deck The Halls [Traditional] - Ding Dong! Merrily On High [Traditional] - Fairytale Of New York [The Pogues feat. Kirsty MacColl] - The First Nowell [Traditional] -

God Rest Ye Merry, Gentlemen [Traditional] - Good King Wenceslas [Traditional] - Happy Xmas (War Is Over) [John & Yoko and The Plastic Ono Band] - Hark! The Herald Angels Sing [Traditional] - The Holly And The Ivy [Traditional] - I Believe In Father Christmas [Greg Lake] - I Saw Mommy Kissing Santa Claus [Jimmy Boyd] - I Saw Three Ships [Traditional] - I Wish It Could Be Christmas Every Day [Wizzard] - In The Bleak Midwinter [Traditional] - Jingle Bell Rock [Bobby Helms] - Jingle Bells [Traditional] - Joy To The World [Traditional] - Let It Snow! Let It Snow! Let It Snow! [Frank Sinatra] - Lonely This Christmas [Mud] - Merry Xmas Everybody [Slade] - O Christmas Tree (O Tannenbaum) [Traditional] - O Come, All Ye Faithful [Traditional] - O Little Town Of Bethlehem [Traditional] - Once In Royal David's City [Traditional] - Please Come Home For Christmas [The Eagles] - Santa Baby [Eartha Kitt] - Silent Night [Traditional] - Step Into Christmas [Elton John] - Stop The Cavalry [Jona Lewie] - The Twelve Days Of Christmas [Traditional] - (There's No Place Like) Home For The Holidays [Perry Como] - Unto Us A Boy Is Born [Traditional] - We Three Kings Of Orient Are [Traditional] - We Wish You A Merry Christmas [Traditional] - While Shepherds Watched Their Flocks [Traditional] - White Christmas [Bing Crosby] - Winter Wonderland [Perry Como] - Wonderful Christmastime [Paul McCartney]

Pop Songs for Kids

An orchestral study score.

Dictionary of Terms in Music / Wörterbuch Musik

This book contains the second violin part and some third violin parts written by Dr. Suzuki to selected pieces from Suzuki Violin School, Volumes 1, 2, and 3. When a student starts playing advanced pieces he may learn the second part. Contents are: Lightly Row (Folk Song) * Song of the Wind (Folk Song) * Go Tell Aunt Rhody (Folk Song) * O Come, Little Children (Folk Song) * May Song (Folk Song) * Long, Long Ago (T. H. Bayly) * Allegro (Shinichi Suzuki) * Perpetual Motion (Shinichi Suzuki) * Allegretto (Shinichi Suzuki) * Andantino (Shinichi Suzuki) * Etude (Shinichi Suzuki) * Minuet No. 1, Minuet III from Suite in G Minor for Klavier, BWV 822 (J. S. Bach) * Minuet No. 2, Minuet, BWV Anh. II 116 from Notebook for Anna Magdalena Bach (J. S. Bach) * Chorus from Judas Maccabaeus (G. F. Handel) * Mussette, Gavotte II or the Musette from English Suite III in G Minor for Klavier, BWV 808 (J. S. Bach) * Bourrée from Sonata in F Major for Oboe, HHA IV/18, No. 8 (G. F. Tibia

Gustav Mahler and Richard Strauss came to know one another as young conductors in Leipzig in 1887. From then until Mahler's death in 1911—the year of the first performance of *Der Rosenkavalier*—they kept in touch. Mahler himself described their relationship as that of two miners tunneling from opposite directions with the hope of eventually meeting. This first publication of their correspondence, which includes twenty-five previously unknown Strauss letters, offers a portrait of two men who were as antithetical in their musical means and goals as in their temperaments and personalities, but who exercised a strong fascination for one another. These sixty-three letters show both composers advancing in their careers as they battled against adverse conditions in the musical world at the turn of the century. They present Mahler's energetic support of Strauss's *Symphonia Domestica*, which Mahler conducted in 1904 and, in turn, Strauss's championing of Mahler's music, especially the Second and Third Symphonies. The correspondence is fully annotated and is supplemented with a major essay by Herta and Paul Amirian. "Unfailingly absorbing. . . . An indispensable addition to the literature on these composers."—Norman Del Mar, *Times Literary Supplement*
