

Combat And Operational Stress Control

[#combat stress control](#) [#operational stress management](#) [#military mental health](#) [#PTSD prevention](#) [#soldier psychological resilience](#)

Combat and Operational Stress Control (COSC) is a critical framework designed to enhance soldier psychological resilience and support military mental health during and after deployments. This vital program focuses on combat stress control and operational stress management, implementing strategies for early intervention and PTSD prevention, ensuring personnel can effectively cope with the unique pressures of military service.
