Jake and the Giant (the Gryphon Chronicles, Book 2)

"Dragon Games," the second book in Catanese's Books of Umber trilogy, continues the imaginative, page-turning adventures of Umber and Hap.

Dragon Games

A "lively and engaging" history of the Middle Ages (Dallas Morning News) from the acclaimed historian William Manchester, author of The Last Lion. From tales of chivalrous knights to the barbarity of trial by ordeal, no era has been a greater source of awe, horror, and wonder than the Middle Ages. In handsomely crafted prose, and with the grace and authority of his extraordinary gift for narrative history, William Manchester leads us from a civilization tottering on the brink of collapse to the grandeur of its rebirth: the dense explosion of energy that spawned some of history's greatest poets, philosophers, painters, adventurers, and reformers, as well as some of its most spectacular villains. "Manchester provides easy access to a fascinating age when our modern mentality was just being born." --Chicago Tribune

Some lost treasures were never meant to be found... With the Dark Druids after him and a magical war brewing, thirteen-year-old Jake Everton must lie low for a while, so his Elder witch aunt takes him and the gang on a long beach holiday, out of harm's way. But sure enough, Jake plunges into trouble once again when he meets a feisty royal mermaid on the run. Princess Sapphira, daughter of King Nereus, recently ventured into the deep and stumbled upon a powerful artifact from ancient Atlantis. But the mysterious orb holds deadlier secrets than she ever suspected, and now every power-mad tyrant in the Seven Seas wants it-especially the dread, undead pirate king, Captain Davy Jones. When the legendary Lord of the Locker invades her father's kingdom and takes her little sister hostage, demanding the orb in exchange, Sapphira blames herself for the catastrophe and means to hand it over. But Jake finds out that if Jones gets the orb, he'll use its power to drown the world in a second Noah's Flood. Now it's up to the aspiring young Lightrider and his friends to help the mermaid rescue her little sister and save the world from the same watery doom that drowned Atlantis-if Jake and the headstrong princess don't strangle each other first. Secrets of the Deep (the Gryphon Chronicles, Book 5)

With trademark flair, Simon Goldhill shows how Christianity transformed humanity's relationship with time in ways that resonate today.

The Gangs of New York

Eileen Battersby is the chief literature critic of The Irish Times and is, in the words of John Banville, 'the finest fiction critic we have'. But her first full-length book is not about international literature or the state of the novel. It is about dogs. Two dogs in particular, with the unlikely names of Bilbo and Frodo. She adopted the first from a horrible dog pound, and the second decided he liked her and moved in to join the family. She was in her very early twenties, an intensely serious student and runner who had just moved to Ireland from California. The dogs became her most loyal companions for over twenty years, witnesses to an often difficult human life and more important to her than most other humans. This book is about two animals with personalities, emotions and prejudices. It is unlike any other book ever written about dogs. It is not sentimental or twee. Battersby became intimately involved in the lives of these intelligent, shrewd creatures, and brings them to life with rare passion and insight. She writes honestly and movingly about the reasons why, for certain people - especially women - there is more integrity in the mysterious relationship with a mammal who cannot speak than there is in most of the relationships that human society has to offer.

The Case Book of Sherlock Holmes

Master storyteller P.W. Catanese begins the Books of Umber trilogy with *Happenstance Found*—now available in paperback—when twelve-yearold *Happenstance* awakens in a cave with no memory of who he is or how he came to be there. Lord Umber and his companions rescue Hap, and the group sets out on dangerous and unusual missions that continue in *Dragon Games*. Hap's and Umber's journeys take them to the corrupt kingdom of Sarnica, where Umber's nemesis has acquired some dragon eggs. Umber wants to study a new magical species, but what starts as a quest for knowledge turns into a dangerous rescue operation. The deft plotting of these actionpacked, heart-stopping adventures will pique the imagination and leave readers anxious for the final installment.

The Ants Come Marching

This book proposes a new approach to the study of ancient Greek and Mesopotamian literature. Ranging from Homer and Gilgamesh to Herodotus and the Babylonian-Greek author Berossos, it paints a picture of two literary cultures that, over the course of time, became profoundly entwined. Along the way, the book addresses many questions that are of interest to the student of the ancient world: how did the literature of Greece relate to that of its eastern neighbours? What did ancient readers from different cultures think it meant to be human? Who invented the writing of universal history as we know it? How did the Greeks come to divide the world into Greeks and 'barbarians', and what happened when they came to live alongside those 'barbarians' after the conquests of Alexander the Great? In addressing these questions, the book draws on cutting-edge research in comparative literature, postcolonial studies and archive theory.

Happenstance Found

According to Paul Ormerod, author of the bestselling *Butterfly Economics* and *Why Most Things Fail*, the mechanistic viewpoint of conventional economics is drastically limited - because it cannot comprehend the vital nature of networks. As our societies become ever more dynamic and intertwined, network effects on every level are increasingly profound. 'Nudge theory' is popular, but only part of the answer. To grapple successfully with the current financial crisis, businesses and politicians need to grasp the perils and possibilities of Positive Linking. Our social and economic worlds have been revolutionised by a massive increase in our awareness of the choices, decisions, behaviours and opinions of other people. For the first time in human history, more than half of us live in cities, and this combined with the Internet has transformed communications. Network effects - the fact that a person can and often does decide to change his or her behaviour simply on the basis of copying what others do - pervade the modern world. As Ormerod shows, network effects make conventional approaches to policy, whether in the public or corporate sectors, much more likely to fail. But they open up the possibility of truly 'Positive Linking' - of more subtle, effective and successful policies, ones which harness our knowledge of network effects and how they work in practice.

What happens when a seventeenth-century bad guy has twenty-first-century technology? An accident with an antigravity machine catapulted Peter Schock and Kate Dyer back to 1763. A bungled rescue attempt leaves Peter stranded in the eighteenth century while a terrifying villain, the Tar Man, takes his place and explodes onto twenty-first-century London. Concerned about the potentially catastrophic effects of time travel, the NASA scientists responsible for the situation question whether it is right to rescue Peter. Kate decides to take matters into her own hands, but things don't go as planned. Soon the physical effects of time travel begin to have a disturbing effect on her. Meanwhile, in our century, the Tar Man wreaks havoc in a city whose police force is powerless to stop him. Set against a backdrop of contemporary London and revolutionary France, *The Time Thief* is the sequel to the acclaimed *The Time Travelers*.

Positive Linking

A teenager struggles through physical loss to the start of acceptance in an absorbing, artful novel at once honest and insightful, wrenching and redemptive. (Age 12 and up) On a sunny day in June, at the

beach with her mom and brother, fifteen-year-old Jane Arrowood went for a swim. And then everything -- absolutely everything -- changed. Now she's counting down the days until she returns to school with her fake arm, where she knows kids will whisper, "That's her -- that's Shark Girl," as she passes. In the meantime there are only questions: Why did this happen? Why her? What about her art? What about her life? In this striking first novel, Kelly Bingham uses poems, letters, telephone conversations, and newspaper clippings to look unflinchingly at what it's like to lose part of yourself - and to summon the courage it takes to find yourself again.

The Time Thief

For nearly a century, scientific advances have fueled progress in U.S. agriculture to enable American producers to deliver safe and abundant food domestically and provide a trade surplus in bulk and high-value agricultural commodities and foods. Today, the U.S. food and agricultural enterprise faces formidable challenges that will test its long-term sustainability, competitiveness, and resilience. On its current path, future productivity in the U.S. agricultural system is likely to come with trade-offs. The success of agriculture is tied to natural systems, and these systems are showing signs of stress, even more so with the change in climate. More than a third of the food produced is unconsumed, an unacceptable loss of food and nutrients at a time of heightened global food demand. Increased food animal production to meet greater demand will generate more greenhouse gas emissions and excess animal waste. The U.S. food supply is generally secure, but is not immune to the costly and deadly shocks of continuing outbreaks of food-borne illness or to the constant threat of pests and pathogens to crops, livestock, and poultry. U.S. farmers and producers are at the front lines and will need more tools to manage the pressures they face. *Science Breakthroughs to Advance Food and Agricultural Research by 2030* identifies innovative, emerging scientific advances for making the U.S. food and agricultural system more efficient, resilient, and sustainable. This report explores the availability of relatively new scientific developments across all disciplines that could accelerate progress toward these goals. It identifies the most promising scientific breakthroughs that could have the greatest positive impact on food and agriculture, and that are possible to achieve in the next decade (by 2030).

From its ancient incarnation as a song to recent translations in modern languages, Homeric epic remains an abiding source of inspiration for both scholars and artists that transcends temporal and linguistic boundaries. The *Cambridge Guide to Homer* examines the influence and meaning of Homeric poetry from its earliest form as ancient Greek song to its current status in world literature, presenting the information in a synthetic manner that allows the reader to gain an understanding of the different strands of Homeric studies. The volume is structured around three main themes: Homeric Song and Text; the Homeric World, and Homer in the World. Each section starts with a series of 'macropedia' essays arranged thematically that are accompanied by shorter complementary 'micropedia' articles. The *Cambridge Guide to Homer* thus traces the many routes taken by Homeric epic in the ancient world and its continuing relevance in different periods and cultures.

Rise of Allies

How is academia portrayed in children's literature? This Element ambitiously surveys fictional professors in texts marketed towards children, who are overwhelmingly white and male, tending to be elderly scientists. Professors fall into three stereotypes: the vehicle to explain scientific facts, the baffled genius, and the evil madman. By the late twentieth century, the stereotype of the male, mad, muddlehead, called Professor SomethingDumb, is formed in humorous yet pejorative fashion. This Element provides a publishing history of the role of academics in children's literature, questioning the book culture which promotes the enforcement of stereotypes regarding intellectual expertise in children's media. This title is also available, with additional material, as Open Access.

Jake and the Gingerbread Wars (a Gryphon Chronicles Christmas Novella)

We live in a visual age. Images and visual artefacts shape international events and our understanding of them. Photographs, film and television influence how we view and approach phenomena as diverse as war, diplomacy, financial crises and election campaigns. Other visual fields, from art and cartoons to maps, monuments and videogames, frame how politics is perceived and enacted. Drones, satellites and surveillance cameras watch us around the clock and deliver images that are then put to political use. Add to this that new technologies now allow for a rapid distribution of still and moving images around the world. Digital media platforms, such as Twitter, YouTube, Facebook and Instagram, play an important role across the political spectrum, from terrorist recruitment drives to social justice campaigns. This book offers the first comprehensive engagement with visual global politics. Written by leading experts in numerous scholarly disciplines and presented in accessible and engaging language, Visual Global Politics is a one-stop source for students, scholars and practitioners interested in understanding the crucial and persistent role of images in today's world.

"A powerful opener to a series [that] will produce a combination of feisty protagonists and challenging circumstances to thoroughly involve not just young adults, but adult fantasy fans who seek epic stories fueled by powerful friendships and adversaries." --Midwest Book Review (Diane Donovan) (re A Throne

for Sisters) "Morgan Rice's imagination is limitless!" --Books and Movie Reviews (re A Throne for Sisters) From USA Today and #1 bestselling fantasy author Morgan Rice comes a new fantasy series for teens and adults. THE MAGIC FACTORY: OLIVER BLUE AND THE SCHOOL FOR SEERS (BOOK ONE) tells the story of one very special boy, Oliver Blue, different than those around him and unloved by his hateful family. Obsessed with inventions, Oliver is determined to escape his horrible life and make his mark on the world. When Oliver's family moves again, to another awful house and school, he is bullied and excluded, and sees no way out. But when he stumbles across an abandoned invention factory, he wonders if this could be his way out. Who is the mysterious old inventor hiding in the factory? What is his secret invention? And might this factory be a portal to somewhere else? An inspiring fantasy, THE MAGIC FACTORY is book #1 in a riveting new series filled with magic, love, humor, heartbreak, tragedy, destiny, and a series of shocking twists. It will make you fall in love with Oliver Blue, and keep you turning pages late into the night. Book #2 in the series (THE ORB OF KANDRA) and Book #3 (THE OBSIDIANS) are now also available! "The beginnings of something remarkable are there." --San Francisco Book Review (re A Quest of Heroes)

The Time Hunters

Examining the intersection of disability and genre in popular works of horror, crime, science fiction, fantasy, and romance published since the late 1960s, *Disability, Literature, Genre* is a major contribution to both cultural disability studies and genre fiction studies. Drawing on recent work on affect and emotion, the book explores how disability makes us feel, and how those feelings shape interpersonal and fictional encounters. Written in a clear and accessible style, *Disability, Literature, Genre* offers a timely reflection on the rapidly growing body of scholarship on disability representation, as well as an innovative new theorisation of genre. By reconceptualising genre reading as an affective process, Ria Cheyne establishes genre fiction as a key site of investigation for disability studies. She argues that genre fiction's unique combination of affectivity and reflexivity makes it ideally suited to the production of reflexive representations of disability: representations which encourage the reader to reflect upon what they understand about disability, and potentially to rethink it. Examining the affective--and effective--power of disability representations in a wide range of popular genre fiction, this book will be essential reading for academics in disability studies, literary studies, popular culture studies, and the medical humanities.

Jake & The Gingerbread Wars (A Gryphon Chronicles Christmas Novella)

A myth-shattering investigation of the true cost of America's passion for finding a better bargain From the shuttered factories of the Rust Belt to the strip malls of the Sun Belt-and almost everywhere in between-America has been transformed by its relentless fixation on low price. This pervasive yet little-examined obsession with bargains is arguably the most powerful and devastating market force of our time, having fueled an excess of consumerism that blights our land-scapes, escalates personal debt, lowers our standard of living, and even skews of our concept of time. Spotlighting the peculiar forces that drove Americans away from quality, durability, and craftsmanship and towards quantity, quantity, and more quantity, Ellen Ruppel Shell traces the rise of the bargain through our current big-box profusion to expose the astronomically high cost of cheap
