Opener

The lack of ammunition is affecting the morale of the Ukrainian soldiers.

Russia hasn't achieved a lot of territory in the two years of the war.

The war between Russia and Ukraine is an industrial competition that the West will win.

Does Biden have to better explain to the American people why the war in Ukraine matters?

Video: The situation on the ground in Ukraine.

Do Ukrainians have a chance in this war?

The Ukrainian government has to convince their people to join forces.

Are there too many holes in the sanctions against Russia?

Taurus missiles can counter thousands of Russian artillery ammunition.

Is the West preparing for a nuclear war?

Does it make a difference, if a country is a member of NATO or not.

Video: Freezing the conflict?

Freezing the war would only help Putin.

If the West fails in Ukraine, China might take wrong steps against Taiwan.

Property and Political Order in Africa

In sub-Saharan Africa, property relationships around land and access to natural resources vary across localities, districts and farming regions. These differences produce patterned variations in relationships between individuals, communities and the state. This book captures these patterns in an analysis of structure and variation in rural land tenure regimes. In most farming areas, state authority is deeply embedded in land regimes, drawing farmers, ethnic insiders and outsiders, lineages, villages and communities into direct and indirect relationships with political authorities at different levels of the state apparatus. The analysis shows how property institutions - institutions that define political authority and hierarchy around land - shape dynamics of great interest to scholars of politics, including the dynamics of land-related competition and conflict, territorial conflict, patron-client relations, electoral cleavage and mobilization, ethnic politics, rural rebellion, and the localization and 'nationalization' of political competition.

Inequality and Political Cleavage in Africa

Extensive data, maps, and case histories show how competition between rich and poor regions drives African politics, not ethnic diversity.

African Politics in Comparative Perspective

This revised and expanded second edition of African Politics in Comparative Perspective reviews fifty years of research on politics in Africa and addresses some issues in a new light, keeping in mind the changes in Africa since the first edition was written in 2004. The book synthesizes insights from different scholarly approaches and offers an original interpretation of the knowledge accumulated in the field. Goran Hyden discusses how research on African politics relates to the study of politics in other regions and mainstream theories in comparative politics. He focuses on such key issues as why politics trumps economics, rule is personal, state is weak and policies are made with a communal rather than an individual lens. The book also discusses why in the light of these conditions agriculture is problematic, gender contested, ethnicity manipulated and relations with Western powers a matter of defiance.

The Politics of Property Rights Institutions in Africa

"Why do some political leaders create and strengthen institutions such as title registries and land tribunals that secure property rights to land, while others neglect these institutions or destroy those that already exist? How do these institutions evolve once they have been established? This book answers these questions through spatial and temporal comparison of national and subnational cases from Botswana, Ghana, and Kenya, and, to a lesser extent, Zimbabwe. Onoma argues that the level of property rights security that leaders prefer depends on how they use land. However, the extent to which leaders' institutional preferences are translated into actual institutions depends on the level of leaders' capacity. Further, once established, these institutions through their very working can contribute to their own decline over time. This book is unique in revealing the political and economic reasons why some leaders, unlike others, prefer an environment of insecure rights even as land prices increase"--Provided by publisher.

Political Domination in Africa

This collection of essays brings together historians and political scientists from Britain, France and the United States, who, from widely differing perspectives and traditions, have been involved in the process of rethinking African politics. They present here the outline of a new approach, grounded in universal political theory rather than on theories of Third World political development. This seeks to integrate the history of Africa (from pre- to post-colonial) with concepts of political theory as they have been applied historically to the analysis of Europe and America. The book addresses a wide audience: students of African history and politics, of Third World development and of political theory.

Land Politics

This book provides new insight into the high-stakes struggle to control land in the Global South through the lens of land titling in Zambia and Senegal. Based on extensive fieldwork, it shows how chiefs and communities challenge the state, in an era of increasing scarcity and booming global land markets.

African Politics in Comparative Perspective

This expanded second edition of *African Politics in Comparative Perspective* reviews fifty years of research on politics in Africa.

When Things Fell Apart

In the later decades of the 20th century, Africa plunged into political chaos. States failed, governments became predators, and citizens took up arms. In *When Things Fell Apart*, Robert H. Bates advances an explanation of state failure in Africa. In so doing, he not only plumbs the depths of the continent's late-century tragedy, but also the logic of political order and the foundations of the state. This book covers a wide range of territory by drawing on materials from Rwanda, Sudan, Liberia, and Congo. Written to be accessible to the general reader, it is nonetheless a must-read for scholars and policy makers concerned with political conflict and state failure.

Property Without Rights

A new understanding of the causes and consequences of incomplete property rights in countries across the world.

West African States: Failure and Promise

Comparison of recent political developments of seven states in West Africa - discusses politics, economic policy and government in Ghana, cote d'ivoire, Liberia, Nigeria, Senegal, Guinea and Sierra Leone. References and statistical tables.

Institutions and Democracy in Africa

Historically, African political institutions such as constitutions, legislatures and judiciaries have been seen as weak and vulnerable to manipulation, leading some to claim that the continent is 'institutionless'. However, recent developments including the consolidation of presidential term limits in a number of countries demonstrate that this depiction is no longer tenable. By drawing attention to how institutions can shape the practice of politics, this book demonstrates that electoral commissions, economic regulations and systems of land tenure are vital to our understanding of contemporary Africa. A series of cutting-edge contributions from leading scholars explain how the rules of the game shape political developments across the continent, from Kenya to Nigeria and from Benin to South Africa. In chapters that cover bureaucracies, constitutions, elections, political parties, the police and more, the authors argue that a new research agenda is required if we are to better understand the process of democratisation.

Routledge Handbook of Democratization in Africa

This volume explores the issues and debates surrounding the ongoing processes of democratization in sub-Saharan Africa, illuminating the central dynamics characterizing Africa's democratic experiments, and considering the connections between democratization and economic, social, and cultural developments on the continent. Reflecting the diverse and rich nature of this field of study, the *Handbook of Democratization in Africa* features more than thirty contributions structured into six thematic sections: The politics and paths of regime development Institutional dynamics Political mobilization and voting dynamics The politics of identity Social forces from below The consequences of democracy. Chapters offer overviews of the key scholarship on particular topics, including central insights from the latest research, and provide suggestions for those interested in further inquiry. The material includes attention to broad cross-continental patterns, for example with respect to public opinion, political violence, or the role of different institutions and actors. It also includes rich case material, drawing on and highlighting the experiences of a diverse collection of countries. Encouraging a comprehensive view of key concerns and enhancing understanding of particular issues, the *Handbook of Democratization in*

Africa represents a critical resource for experts and students of African politics, democratization, and African studies.

Power in Africa

'This book will rightfully head many a reading list...'C.Allen, British Book News Power in Africa casts a fresh look at contemporary Black African politics. It reviews the merits and failings of existing interpretations of Africa's post-colonial society and offers a new approach to its understanding. It has two main aims. First, to present a comparative conceptual framework which places Africa's politics within its appropriate historical context. Second, to offer an explanation of what is actually happening in Africa - beyond the clichés of a dark continent perennially in crisis.

African Politics in Comparative Perspective. Gran Hydn

This revised and expanded second edition of African Politics in Comparative Perspective reviews fifty years of research on politics in Africa and addresses some issues in a new light, keeping in mind the changes in Africa since the first edition was written in 2004. The book synthesizes insights from different scholarly approaches and offers an original interpretation of the knowledge accumulated in the field. Goran Hyden discusses how research on African politics relates to the study of politics in other regions and mainstream theories in comparative politics. He focuses on such key issues as why politics trumps economics, rule is personal, state is weak and policies are made with a communal rather than an individual lens. The book also discusses why in the light of these conditions agriculture is problematic, gender contested, ethnicity manipulated and relations with Western powers a matter of defiance.

The African Condition

The noted political scientist Ali Mazrui explores six fundamental paradoxes of Africa today, focusing on Africa's key geographical position in relation to issues of economic distribution and social justice.

Party Politics and Economic Reform in Africa's Democracies

Argues that the interaction of formal institutions and the quality of democracy explain patterns of private sector development across Africa.

Precolonial Legacies in Postcolonial Politics

Offers a groundbreaking analysis of the distinctive substantive, theoretical and methodological contributions of subnational research in the field of comparative politics.

Inside Countries

This book shows that powerful hereditary chiefs do not undermine democracy in Africa but, on some level, facilitate it.

The Paradox of Traditional Chiefs in Democratic Africa

This book argues that the structure of the policy-making process in Nigeria explains variations in government performance better than other commonly cited factors.

Dictators and Democracy in African Development

Access to land and property is vital to people's livelihoods in rural, peri-urban, and urban areas in Africa. People exert tremendous energy and imagination to have land claims recognized as rights with a variety of political, administrative, and legal institutions. This book is dedicated to a detailed analysis of how public authority and the state are formed through debates and struggles over property in the Upper East Region of Ghana. While scarcity may indeed promote exclusivity, the evidence from this book shows that when there are many institutions competing for the right to authorize claims to land, the result of an effort to unify and clarify the law is to intensify competition among them and weaken their legitimacy. The book particularly explores how state divestiture of land in 1979 encouraged competition between customary authorities and how the institution of the earthpriest was revived. Such processes are key to understanding property and authority in Africa.

Local Politics and the Dynamics of Property in Africa

By examining three centuries of history, this book shows how vital border regions have been in shaping states and social contracts.

Boundaries, Communities and State-Making in West Africa

States are often minimally present in the rural periphery. Yet a limited presence does not mean a limited impact. Isolated state actions in regions where the state is otherwise scarce can have outsized, long-lasting effects on society. The Scarce State reframes our understanding of the political economy of hinterlands through a multi-method study of Northern Ghana alongside shadow cases from other world regions. Drawing on a historical natural experiment, the book shows how the contemporary economic and political elite emerged in Ghana's hinterland, linking interventions by an ostensibly weak state to new socio-economic inequality and grassroots efforts to reimagine traditional institutions. The book demonstrates how these state-generated societal changes reshaped access to political power, producing dynastic politics, clientelism, and violence. The Scarce State challenges common claims about state-building and state weakness, provides new evidence on the historical origins of inequality, and reconsiders the mechanisms linking historical institutions to contemporary politics.

The Scarce State

Paying for the state.

Liberia and Sierra Leone

Examines how the private sector in China manages to grow without secure property rights.

Africa and the International System

To a large extent, elite politicians, bureaucrats, and businessmen hold the fortunes of their societies in their hands. This edited volume describes how formal and informal institutions affect elite behaviour, which in turn affects corruption and the quality of government.

The Private Sector in Public Office

This book spotlights, analyzes and explains varying forms and patterns of state-society relations on the African continent, taking as point of departure the complexities created by the emergence, proliferation and complicated interactions of so-called 'big men' across Africa's fifty-four states. The contributors interrogate the evolution of Africa's big men; the role of the big men in Africa's political and economic development; and the relationship between the state, the big men and the citizens. Throughout the chapters the contributors engage with a number of questions from different disciplinary and methodological orientations. How did these states evolve to exhibit various deformities in their composition, functioning and in their relations with the societies that they govern? What roles did Atlantic and other slavery and European colonialism play in creating states that are unable to display the right and good relationships with citizens in civil society? Why did these forms of predatory state-society relations continue to thrive in Africa after the end of Atlantic slave trade and subsequent colonialism? Why did the emerging African leaders at independence fail to effectively dismantle the structures of exploitation and expropriation that were the defining features of slavery and colonialism? Who are Africa's 'big men', and what are their trajectories? This book is essential reading for all students and scholars of African politics, public policy and administration, political economy, and democratisation.

Elites, Institutions and the Quality of Government

Explores the political impacts of ethnic diversity and the growth of the middle class in urban Africa.

Africa's Big Men

Africa has undergone significant political, economic, and social change since the first edition of this book was published in early 1988. Now revised and updated throughout, this new edition includes current economic, social, and political data, as well as entirely new sections on the dismantling of apartheid, civil society, democratization and multiparty politics, economic reform and structural adjustment, and the prospects for African development in the twenty-first century. Review comments on the first edition: 'Required reading for any course on politics and society of the African continent'

West Africa. 'The best available textbook on the subject ... this volume stands unchallenged in its comprehensiveness and sophistication.' - Choice

Electoral Politics and Africa's Urban Transition

This case study of Botswana focuses on the state-building qualities of biodiversity conservation in southern Africa. Drawing on extensive fieldwork, Annette A. LaRocco argues that discourses and practices related to biodiversity conservation are essential to state building in the postcolonial era. These discourses and practices invoke the ways the state exerts authority over people, places, and resources; enacts and remakes territorial control; crafts notions of ideal citizenship and identity; and structures economic relationships at the local, national, and global levels. The book's key innovation is its conceptualization of the "conservation estate," a term most often used as an apolitical descriptor denoting land set aside for the purpose of conservation. LaRocco argues that this description is inadequate and proposes a novel and much-needed alternative definition that is tied to its political elements. The components of conservation—control over land, policing of human behavior, and structuring of the authority that allows or disallows certain subjectivities—render conservation a political phenomenon that can be analyzed separately from considerations of "nature" or "wildlife." In doing so, it addresses a gap in the scholarship of rural African politics, which focuses overwhelmingly on productive agrarian dynamics and often fails to recognize that land nonuse can be as politically significant and wide reaching as land use. Botswana is an ideal empirical case study upon which to base these theoretical claims. With 39 percent of its land set aside for conservation, Botswana is home to large populations of wildlife, particularly charismatic megafauna, such as the largest herd of elephants on the continent. Utilizing more than two hundred interviews, participant observation, and document analysis, this book examines a series of conservation policies and their reception by people living on the conservation estate. These phenomena include securitized antipoaching enforcement, a national hunting ban (2014–19), restrictions on using wildlife products, forced evictions from conservation areas, limitations on mobility and freedom of movement, the political economy of Botswana's wildlife tourism industry, and the conservation of globally important charismatic megafauna species.

Politics and Society in Contemporary Africa

Very similar in some ways, but strikingly different in others, Sierra Leone and Liberia have an obvious appeal for comparative analysis. They share the legacy of foundation by immigrants of African descent and the juxtaposition of these with indigenous peoples, but within the contrasting institutional frameworks of settler independence and British colonialism. They have similar social and economic structures but sharply dissimilar political records: Liberia has long been regarded as the classic case of stability at the price of oligarchy, whereas Sierra Leone, after a period as West Africa's most successful two-party democracy, suffered a succession of military coups and by 1973 was effectively a single-party state. This study seeks to analyse and account for both similarities and differences, looking at the two countries' experience in the 1960s and early 1970s, not only in central politics but also at the local level and in economic policy.

The Nature of Politics

Argues that the interaction of formal institutions and the quality of democracy explain patterns of private sector development across Africa.

Liberia and Sierra Leone

Each country in southern Africa has a unique history but in all of them socio-economic inequalities and high poverty levels weaken the governments' legitimacy and represent a challenge to models of economic development. One key issue appears to be the solution of the land question. This vital concern affects both citizenship and democracy in the political systems of the region, yet no government has shown the capacity or commitment to solve it. In this volume leading European, American and African scholars explore in detail the relationship between state, land and democracy. They examine the historical background of asset allocation and its impact on questions of nationality, the definition of citizenship, human rights and the current political and economic processes in southern Africa.

Party Politics and Economic Reform in Africa's Democracies

Top contributors in the field of African politics write on the issues concerning this marginalized continent and its relationship to the global political and economic orders.

African Politics in Comparative Perspective African Edition

Theories of international relations, assumed to be universally applicable, have failed to explain the creation of states in Africa. There, the interaction of power and space is dramatically different from what occurred in Europe. In *States and Power in Africa*, Jeffrey Herbst places the African state-building process in a truly comparative perspective. Herbst's bold contention—that the conditions now facing African state-builders existed long before European penetration of the continent—is sure to provoke controversy, for it runs counter to the prevailing assumption that colonialism changed everything. This revised edition includes a new preface in which the author links the enormous changes that have taken place in Africa over the past fifteen years to long-term state consolidation. The final chapter on policy prescriptions has also been revised to reflect the evolution of African and international responses to state failure.

State, Land and Democracy in Southern Africa

Governance has become an important concept in the politics of African development. It is therefore a crucial concept for social science analyses focusing on Africa. In public discourse Africa's future is being shaped by a combination of external interventions backed by African elites who cooperate with the donors, whose understanding of the importance of 'good governance' they share. This groundbreaking book disentangles the analytical aspects of governance from its political and normative connotations. The 'African exception' - the difference in 'development' between Africa and other regions of the South - can be understood by analysis focusing upon the specific forms of governance played out in politics and economics. The perspective of neo-patrimonialism is crucial but not sufficient here. The first section of the book explores African governance in two functional spheres: the political realm and the economic. Section two looks at new areas of governance in Africa: violent social spaces, HIV/AIDS and entrepreneurial urban governance.

Religion and American Politics

Debuting in its first edition, *Religion and American Politics* incorporates both original content from leading scholars and excerpts from classic and contemporary writings that will help you explore connections between religion and political culture, movements, institutions, and actors. Its collection of readings offer a broad and diverse overview of central debates about religion's influence on American political history, political life, governing institutions, and public policy.

Understanding American Politics

The second edition provides a very strong introduction to political institutions and includes a new chapter on public opinion. The entire book has been revised throughout, taking into account the dramatic changes that have emerged since the 2010 congressional elections, as well as incorporating the results of the 2012 presidential election. It also pays close attention to what is seen as the irreversible decline in America's global influence."--Pub. desc.

Understanding American Politics, Second Edition

Understanding American Politics provides a unique introduction to the contemporary political landscape of the United States by using as its core organizing feature the idea of "American exceptionalism," a concept that is at least as old as Tocqueville's study of American democracy. The second edition of *Understanding American Politics* maintains the unique strengths of the first edition while offering improved coverage of political institutions. A single omnibus chapter on institutions has been reorganized and split into three separate chapters on Congress, the presidency, and the courts. A new chapter on public opinion has also been included, and the chapter on religion and politics has been completely rewritten with a deeper appreciation of religion's influential role. The book has been revised throughout, taking into account the dramatic changes that have emerged since the 2010 congressional

elections and the 2012 presidential election. The text also pays close attention to what is seen as the irreversible decline in America's global influence. Visit www.utpamericanpolitics.com for additional resources.

Honoring God in Red or Blue SAMPLER

Enjoy these SAMPLE pages from *Honoring God in Red or Blue*- As our nation approaches a decision of another presidential election, they're also faced with the great challenge of discussing political issues with grace, truth, and love. Many believers fall into one of two traps: becoming so outspoken that their political fervor becomes a detriment to their Christian testimony or fearing controversy to the point of silence on important issues of faith and community. Dr. Black brings a sensibility and urgency to the issue with this nonpartisan guidebook for debating key issues with respect and conviction. For anyone frustrated until they're red in the eyes or blue in the face--or those who bite their tongues or withdraw completely from the discussion, this book is a critical manifesto to improving both our government and our sense of civility in the discourse.

Honoring God in Red or Blue

Politics isn't a four-letter word. Everyone's been at that dinner party. The conversation takes a political turn. The arguments start, the atmosphere grows tense, and all that remains is a hopeless stalemate and an awkward silence. Makes you wonder . . . is thoughtful and productive dialogue about politics even possible? In *Honoring God in the Red or Blue*, Dr. Amy Black addresses the debaters as well as those intimidated or annoyed by the debaters; political junkies and the contented uninformed. She explains the purposes and limitations of our system and helps readers create realistic expectations for government. While God's truth is perfect, human application of it is not, a reality that shouldn't deter us from engaging in debate and staying informed. Rather, it should challenge us to raise our standards for how we speak about the issues—and those in office. It's time to approach political divides with an extra measure of grace. Success begins with seeking God's honor first and foremost, regardless of where we fall on the political spectrum. Don't limit yourself to chatting about the weather.

Religion, Politics, and Polarization

In *Religion, Politics, and Polarization*, three esteemed scholars trace the confluence of religion and party in the US Congress over time. The authors examine several issues of contemporary relevance as they trace the increasing polarization in Congress.

Tocquevillian Ideas

This book presents Tocqueville's vision of the European continent, exploring his ideas of liberty, virtue, religion, patriotism, civic participation and democracy. Although Tocqueville is often revered as a classic writer on the subject of American democracy, this book focuses on the multifaceted importance of his ideas within a European context.

Black Scholars in White Space

Never before in American history have we seen the number of African Americans teaching at Christian Colleges as we see today. *Black Scholars in White Space* highlights the recent research and scholarly contributions to various academic disciplines by some of America's history-making African American scholars working in Christian Higher Education. Many are the first African Americans or only African Americans teaching at their respective institutions. Moreover, never before have this many African American female scholars in Christian Higher Education had their research presented in a single, cross-disciplinary volume. The scholars in this book, spanning the humanities and social sciences, examine the issues in public policy, church/state relations, health care, women's issues in higher education, theological anthropology, affirmative action, and black history that need to be addressed in America as we move forward in the 21st century. For these reasons and more *Black Scholars in White Space* offers timely and historic contributions to the discourse about making the black community a place where men and women thrive and make contributions to the common good.

Africans and Negative Competition in Canadian Factories

According to Fossungu, we need healthy competition for progress. Competition that is not geared toward progress is negative competition. No competition or the absence of self-help is negative

competition. With factories competing healthily, consumers have a variety of quality goods and services from which to choose. The entire community benefits when people in any grouping are competing positively; thus making the rules of competition graphical. The central focus of this book is the extent to which Canadian regulations apply without discrimination to all of Canada and to everyone, individuals and corporations alike. A swift answer is affirmative. But is that really it? The book is also about voluntary slavery, which is worse than forced enslavement. Drawing on Ignorance Theory, the book argues that the worst thing that can happen to anyone is to be ignorant of one's ignorance. He who does not know what he does not know will never know. Voluntary African slaves generally employ 'One Has No Choice' (On n'a pas le choix) to cloak their having chosen not to secure their rights. Fossungu demonstrates why he considers this an escapist way of shying away from doing the normal thing, thus giving the dictator or oppressor reason to dictate and oppress with impunity. This is Fossungu at his provocative and controversial best.

Religion and Politics in the United States

From marriage equality, to gun control, to immigration reform and the threat of war, religion plays a fascinating and crucial part in our nation's political process and in our culture at large. Now in its seventh edition, *Religion and Politics in the United States* includes analyses of the nation's most pressing political matters regarding religious freedom, and the ways in which that essential constitutional freedom situates itself within modern America. The book also explores the ways that religion has affected the orientation of partisan politics in the United States. Through a detailed review of the political attitudes and behaviors of major religious and minority faith traditions, the book establishes that religion continues to be a major part of the American cultural and political milieu while explaining that it must interact with many other factors to influence political outcomes in the United States.

Principles and Practice of American Politics

"Principles and Practice of American Politics is a well-balanced reader covering all the major topics of an American Government course." —Blake Jones, Ohio Valley University Combining timeless readings with cutting-edge articles and essays, *Principles and Practice of American Politics, Seventh Edition*, enriches students' understanding of the American political system by examining the strategic behavior of key players in U.S. politics. This collection of classic and contemporary readings brings concepts to life by providing students with real examples of how political actors are influenced by the strategies of others and are governed by the Constitution, the law, and institutional rules. Carefully edited by award-winning authors Samuel Kernell and Steven S. Smith, each reading is put into context to help students understand how political actions fall within a major national political forum. New to the Seventh Edition Nine new and updated essays encourage students to reflect on the continuing debates over the polarization of the American electorate and Congress, the role of social media and "fake news" in influencing public views of politicians and issues, the fragile Trump coalition, the efficacy of polling in tracking public opinion, and other issues more relevant than ever in the wake of the 2016 elections. Additional essays challenge students to think more carefully about alternative institutions and political arrangements. The new essays present institutions of majority rule, the nature of racial discrimination, and the proper role of the court as less settled issues that provide students an opportunity to think through (and discuss) their views on the future direction of American civic life. Each selection is artfully framed by Kernell and Smith's contextual headnotes to make them appropriate for classroom use. Original readings written specifically for the volume give the book a coherent treatment of the performance of U.S. political institutions.

Principles and Practice of American Politics: Classic and Contemporary Readings, 5th Edition

This collection examines the strategic behavior of key players in American politics from the Founding Fathers to the Super PACs, by showing that political actors, though motivated by their own interests, are governed by the Constitution, the law, and institutional rules, as well as influenced by the strategies of others.

Contemporary Perspectives on Religious Epistemology

This unique textbook--the first to offer balanced, comprehensive coverage of all major perspectives on the rational justification of religious belief--includes twenty-four key papers by some of the world's leading philosophers of religion. Arranged in six sections, each representing a major approach to religious epistemology, the book begins with papers by noted atheists, setting the stage for the

main theistic responses--Wittgensteinian Fideism, Reformed epistemology, natural theology, prudential accounts of religious beliefs, and rational belief based in religious experience--in each case offering a representative sample of papers by leading exponents, a critical paper, and a substantial bibliography. A comprehensive introductory essay and ample cross-references help students to contrast and evaluate the different approaches, while the overall arrangement encourages them to assess the full range of philosophical positions on the issue. Carefully selected to provide both a comprehensive overview of current work and a series of modern perspectives on many classic sources--Swinburne's detailed discussion of Hume's critique of the design argument, for example, as well as an entire section evaluating and extending Pascal's famous Wager--the essays also provide a uniquely readable survey that will be useful in a wide range of undergraduate and graduate courses in philosophy of religion and epistemology.

Law and Theology

Law and Theology offers the definitive account of the relationship between law and theology in the Christian tradition. Drawing on diverse biblical texts and classic authors from the early church to contemporary voices from the modern period, David W. Opderbeck examines key legal questions and controversial case studies from an interdisciplinary perspective, breaking new ground for legal scholars and theologians alike. As a law professor, practicing attorney, and theologian, Opderbeck writes as an insider from both disciplines. This unique look brings fresh insight for both fields in a context where questions of theology and law are especially relevant--and increasingly urgent. Going beyond the culture wars, Opderbeck brings these real-world cases to life, examining the ins and outs of the most important legal questions facing American civic and religious life. Scholars and students of law and theology will find this book to be required reading in and outside the legal and theological classrooms.

Saving the Forsaken

Does religion encourage altruism on behalf of those who do not belong? Are the very religious more likely to be altruistic toward outsiders than those who are less religious? In this book Pearl M. Oliner examines data on Christian rescuers and nonrescuers of Jews during the Holocaust to shed light on these important questions. Drawing on interviews with more than five hundred Christians—Protestant and Catholic, very religious, irreligious, and moderately religious rescuers and nonrescuers living in Nazi-occupied Europe, Oliner offers a sociological perspective on the values and attitudes that distinguished each group. She presents several case studies of rescuers and nonrescuers within each group and then interprets the individual's behavior as it relates to his or her group. She finds that the value patterns of the religious groups differ significantly from one another, and she is able to highlight those factors that appear to have contributed most toward rescue within each group.

Democratic Procedures and Liberal Consensus

Liberal theory seeks agreement on political principles in spite of the moral, religious and philosophical diversity of contemporary societies. This text develops principles from research on liberal citizen's attitudes.

Religion and the Political Imagination

The theory of secularisation became a virtually unchallenged truth of twentieth-century social science. First sketched out by Enlightenment philosophers, then transformed into an irreversible global process by nineteenth-century thinkers, the theory was given substance by the precipitate drop in religious practice across Western Europe in the 1960s. However, the re-emergence of acute conflicts at the interface between religion and politics has confounded such assumptions. It is clear that these ideas must be rethought. Yet, as this distinguished, international team of scholars reveal, not everything contained in the idea of secularisation was false. Analyses of developments since 1500 reveal a wide spectrum of historical processes: partial secularisation in some spheres has been accompanied by sacralisation in others. Utilising new approaches derived from history, philosophy, politics and anthropology, the essays collected in Religion and the Political Imagination offer new ways of thinking about the urgency of religious issues in the contemporary world.

Them That Believe

Explores the religious practice of serpent handling in churches of Alabama, Georgia, Tennessee, Kentucky, North Carolina, and West Virginia. This book provides an analysis of this phenomenon from historical, social, religious, and psychological perspectives. It deals with the near-death experiences of individuals who were bitten but survived.

God at the Grassroots 2016

In *God at the Grassroots, 2016*, a distinguished group of political scientists assess the 2016 elections from the standpoint of religious conservative activism. The 2016 elections, more than any election that they have analyzed, best tell the story of the resilience of this movement and of its enduring importance.

The Bloomsbury Reader in Religion and Childhood

From recent sex abuse scandals in the Roman Catholic Church, to arguments about faith schools and religious indoctrination, this volume considers the interconnection between the actual lives of children and the position of children as placeholders for the future. Childhood has often been a particular site of struggle for negotiating the location of religion in public and everyday social life, and children's involvement and non-involvement in religion raises strong feelings because they represent the future of religious and secular communities, even of society itself. The *Bloomsbury Reader in Religion and Childhood* provides a rich resource for students and scholars of this interdisciplinary field, and addresses wider questions about the distinctiveness of childhood and its religious dimensions in historical and contemporary perspective. Divided into five thematic parts, the volume provides classic, contemporary, and specially commissioned readings from a range of perspectives, including the sociological, anthropological, historical, and theological. Case studies range from Augustine's description of childhood in *Confessions*, the psychology of religion and childhood, to religion in children's literature, religious education, and Qur'anic schools. - Religious traditions covered include Christianity, Judaism, Islam, Hinduism, and Buddhism, in the UK and Europe, USA, Latin America and Africa - An introduction situates each thematic part, and each reading is contextualised by the editors - Guidance on further reading and study questions are provided on the book's webpage

What It Means to Be Moral

"A thoughtful perspective on humans' capacity for moral behavior." —Kirkus Reviews "A comprehensive introduction to religious skepticism." —Publishers Weekly In *What It Means to Be Moral: Why Religion Is Not Necessary for Living an Ethical Life*, Phil Zuckerman argues that morality does not come from God. Rather, it comes from us: our brains, our evolutionary past, our ongoing cultural development, our social experiences, and our ability to reason, reflect, and be sensitive to the suffering of others. By deconstructing religious arguments for God-based morality and guiding readers through the premises and promises of secular morality, Zuckerman argues that the major challenges facing the world today—from global warming and growing inequality to religious support for unethical political policies to gun violence and terrorism—are best approached from a nonreligious ethical framework. In short, we need to look to our fellow humans and within ourselves for moral progress and ethical action. "In this brilliant, provocative, and timely book, Phil Zuckerman breaks down the myth that our morality comes from religion—compellingly making the case that when it comes to the biggest challenges we face today, a secular approach is the only truly moral one." —Ali A. Rizvi, author of *The Atheist Muslim*

Science and Religion

The idea of an inevitable conflict between science and religion was decisively challenged by John Hedley Brooke in his classic *Science and Religion: Some Historical Perspectives* (Cambridge, 1991). Almost two decades on, *Science and Religion: New Historical Perspectives* revisits this argument and asks how historians can now impose order on the complex and contingent histories of religious engagements with science. Bringing together leading scholars, this volume explores the history and changing meanings of the categories 'science' and 'religion'; the role of publishing and education in forging and spreading ideas; the connection between knowledge, power and intellectual imperialism; and the reasons for the confrontation between evolution and creationism among American Christians and in the Islamic world. A major contribution to the historiography of science and religion, this book makes the most recent scholarship on this much misunderstood debate widely accessible.

Understanding Theories of Religion

Featuring comprehensive updates and additions, the second edition of *Understanding Theories of Religion* explores the development of major theories of religion through the works of classic and contemporary figures. • A new edition of this introductory text exploring the core methods and theorists in religion, spanning the sixteenth-century through to the latest theoretical trends • Features an entirely new section covering religion and postmodernism; race, sex, and gender; and religion and postcolonialism • Examines the development of religious theories through the work of classic and contemporary figures from the history of anthropology, sociology, psychology, philosophy, and theology • Reveals how the study of religion evolved in response to great cultural conflicts and major historical events • Student-friendly features include chapter introductions and summaries, biographical vignettes, a timeline, a glossary, and many other learning aids

An Introduction to the Sociology of Religion

What are religion and nonreligion? How do fundamentalism and religious radicalization emerge and grow? How do social class, gender, sexuality, race, ethnicity, and other factors affect religious beliefs, practices, and organizations? Is religion a fundamental driving force or do political leaders use religion for their own purposes? In exploring these pertinent questions, *An Introduction to the Sociology of Religion* provides an overview of sociological theories of contemporary religious life. Theoretical discussion is accompanied by presentations of empirical research from several religious traditions in many parts of the world. The sociology of religion is linked closely to developments in general sociology. Some chapters are organized according to topic, while others offer brief presentations of classical and contemporary sociologists from Karl Marx to Patricia Hill Collins and their perspectives on social life, including on religion. This second edition has been thoroughly updated throughout with new chapters on religion and social inequalities, social and religious movements, and extremism. Covering classical sociology of religion as well as contemporary debates and topics, this book is ideal reading for students approaching the sociology of religion for the first time.

Human Rights or Religious Rules?

Drawing on historical insights, systematic reflections and empirical data, this book offers a substantive understanding of the complex relationship between religion and human rights and of the empirical impact of Christianity and Islam on the attitudes toward human rights, i.e. a human rights culture.

The Changing World Religion Map

This extensive work explores the changing world of religions, faiths and practices. It discusses a broad range of issues and phenomena that are related to religion, including nature, ethics, secularization, gender and identity. Broadening the context, it studies the interrelation between religion and other fields, including education, business, economics and law. The book presents a vast array of examples to illustrate the changes that have taken place and have led to a new world map of religions. Beginning with an introduction of the concept of the “changing world religion map”, the book first focuses on nature, ethics and the environment. It examines humankind’s eternal search for the sacred, and discusses the emergence of “green” religion as a theme that cuts across many faiths. Next, the book turns to the theme of the pilgrimage, illustrated by many examples from all parts of the world. In its discussion of the interrelation between religion and education, it looks at the role of missionary movements. It explains the relationship between religion, business, economics and law by means of a discussion of legal and moral frameworks, and the financial and business issues of religious organizations. The next part of the book explores the many “new faces” that are part of the religious landscape and culture of the Global North (Europe, Russia, Australia and New Zealand, the U.S. and Canada) and the Global South (Latin America, Africa and Asia). It does so by looking at specific population movements, diasporas, and the impact of globalization. The volume next turns to secularization as both a phenomenon occurring in the Global religious North, and as an emerging and distinguishing feature in the metropolitan, cosmopolitan and gateway cities and regions in the Global South. The final part of the book explores the changing world of religion in regards to gender and identity issues, the political/religious nexus, and the new worlds associated with the virtual technologies and visual media.

The Sociology of Religion

The *Sociology of Religion* is a comprehensive and wide-ranging introduction to theoretical debates in the sociology of religion, placing these theories in the context of specific religious beliefs and practices. Using examples as diverse as primitive religions, Buddhism, millennial movements, the Protestant Ethic,

secularisation, cults and the new religious movements, Malcolm Hamilton demonstrates the multiplicity of religious traditions and enables readers to place their own experiences in a wider context. He draws on both historical and anthropological perspectives in his exam.

Spiritual Diversity in Social Work Practice

Many of the people served by social workers draw upon spirituality, by whatever names they call it, to help them thrive, to succeed at challenges, and to infuse their resources and relationships with meaning beyond mere survival value. This revised and expanded edition of a classic provides a comprehensive framework of values, knowledge, skills, and evidence for spiritually sensitive practice with diverse clients. Weaving together interdisciplinary theory and research, as well as the results from a national survey of practitioners, the authors describe a spiritually oriented model for practice that places clients' challenges and goals within the context of their deepest meanings and highest aspirations. Using richly detailed case examples and thought-provoking activities, this highly accessible text illustrates the professional values and ethical principles that guide spiritually sensitive practice. It presents definitions and conceptual models of spirituality and religion; draws connections between spiritual diversity and cultural, gender, and sexual orientation diversity; and offers insights from Buddhism, Christianity, Confucianism, Hinduism, Indigenous religions, Islam, Judaism, Existentialism, and Transpersonal theory. Eminently practical, it guides professionals in understanding and assessing spiritual development and related mental health issues and outlines techniques that support transformation and resilience, such as meditation, mindfulness, ritual, forgiveness, and engagement of individual and community-based spiritual support systems. For social workers and other professional helpers committed to supporting the spiritual care of individuals, families, and communities, this definitive guide offers state-of-the-art interdisciplinary and international insights as well as practical tools that students and practitioners alike can put to immediate use.

Modern Perspectives in Western Art History

A collection of essays that reflect the breadth of twentieth-century scholarship in art history. Kleinbauer has sought to illustrate the variety of methods scholars have developed for conveying the unfolding of the arts in the Western world. Originally published by Holt, Rinehart, and Winston, 1971.

Religion and Spirituality in Psychotherapy

This book offers new possibilities for mental health professionals who are looking for ways to adapt traditional therapy and counseling techniques to address the spiritual and psychological issues their clients face. The author utilizes an Adlerian Individual Psychology perspective, which rejects biological determinism and focuses on the influence of powerful environmental factors on personality. This book provides specific methods and guidelines for applying Individual Psychology concepts to clients of each of the world's major religions, including Christianity, Judaism, Buddhism, Hinduism, and Islam. The author offers a wealth of insight into the customs, theories, and philosophies of each religion. With this knowledge, mental health professionals can use Individual Psychology methods and techniques to better understand and assist clients. Key Features Discusses how Individual Psychology can be integrated with Christian spirituality Examines the relational and social theories of Judaism as compared to Adler's theories of social interest Compares Adler's theories with the ethical, spiritual, and social systems of Islam Reviews the doctrines of Hinduism, including the belief in karma and reincarnation, the goals of life, and the paths to God Presents case examples to illustrate how psychological and spiritual problems may be approached using Adlerian psychotherapy

Longing in a Culture of Cynicism

Through current expressions of religion, people are confronted with all kinds of longings and desires which have no place in a rationalised and alienated culture. At the same time, these longings are seeking and finding opportunities for expression. How to understand this cultural ambiguity? The authors in this volume explore the possibilities of a rationality beyond rationalism, reflecting beyond the borders of human imagination on the hidden God.

Psychiatry and Religion

The argument of this book is that the divide between psychiatry and religion is an artificial one and that there is much room for understanding the same phenomena from different perspectives. In it

thirteen senior mental health professionals and pastoral workers come together to explore what their different philosophies have to offer each other for the benefit of the individuals in their care. The book as a whole: * sets the relationship between psychiatry and religion in historical context * provides detailed information about specific religions and the significance of their belief systems for mental health management * examines the relationship between psychopathology, psychiatry and religion.

Sin, Sex, and Democracy

Explores the Christian Right's use of tailored rhetorics to advance multiple and varied antigay political projects.

Psychology of Religion

In the past four decades or so, the so-called psychology of religion – after having been deemed extinct, impossible or unlikely – has risen to prominence again: the number of publications is rapidly growing, an impressive secondary literature (handbooks, introductions, etc.) is available already, infrastructure has been developed (a number of new journals devoted to the subject have been founded, organizations have been established, increasingly funding is going to the area), attracting many new researchers. Organizations like the American Psychological Association are now publishing in the field of psychology of religion (and its Div. 36 ["psych of rel"] with almost 3,000 members is already midsized among the APA-divisions). This book documents this re-emergence and development.

NIDA Research Monograph

The long battle between exclusionary and inclusive versions of the American story Was America founded as a Christian nation or a secular democracy? Neither, argues Philip Gorski in *American Covenant*. What the founders envisioned was a prophetic republic that would weave together the ethical vision of the Hebrew prophets and the Western political heritage of civic republicanism. In this eye-opening book, Gorski shows why this civil religious tradition is now in peril—and with it the American experiment. *American Covenant* traces the history of prophetic republicanism from the Puritan era to today, providing insightful portraits of figures ranging from John Winthrop and W.E.B. Du Bois to Jerry Falwell, Ronald Reagan, and Barack Obama. Featuring a new preface by the author, this incisive book demonstrates how half a century of culture war has drowned out the quieter voices of the vital center, and demonstrates that if we are to rebuild that center, we must recover the civil religious tradition on which the republic was founded.

Problems of Drug Dependence

Many claim that meditation is effective in the treatment of many ailments associated with stress and high blood pressure, and in the management of pain. While there are many popular books on meditation, few embrace the science as well as the art of meditation. In this volume, Shapiro and Walsh fill this need by assembling a complete collection of scholarly articles--*Meditation: Classic and Contemporary Perspectives*. From an academic rather than a popular vantage, the volume takes the claims and counterclaims about meditation to a deeper analytical level by including studies from clinical psychology and psychiatry, neuroscience, psychophysiology, and biochemistry. Each selection is a contribution to the field, either as a classic of research, or by being methodologically elegant, heuristically interesting, or creative. Original articles cover such topics as the effects of meditation in the treatment of stress, hypertension, and addictions; the comparison of meditation with other self-regulation strategies; the adverse effects of meditation; and meditation-induced altered states of consciousness. Concluding with a major bibliography of related works, *Meditation* offers the reader a valuable overview of the state and possible future directions of meditation research. Today, in the popular media and elsewhere, debate continues: Is meditation an effective technique for spiritual and physical healing, or is it quackery? *Meditation: Classic and Contemporary Perspectives* weighs in on this debate by presenting what continues to be the most complete collection of scholarly articles ever amassed on the subject of meditation.

American Covenant

Scholarly and comprehensive yet accessible, this state-of-the-science work is widely regarded as the definitive graduate-level psychology of religion text. The authors synthesize classic and contemporary empirical research on numerous different religious groups. Coverage includes religious thought, belief,

and behavior across the lifespan; links between religion and biology; the forms and meaning of religious experience; the social psychology of religious organizations; and connections to morality, coping, mental health, and psychopathology. Every chapter features thought-provoking quotations and examples that bring key concepts to life. New to This Edition *Revised and updated with the latest theories, methods, and empirical findings.*Many new research examples.*Restructured with fewer chapters for better “fit” with a typical semester.*More attention to the differences between religion and spirituality*Covers emerging topics: genetics and neurobiology, positive psychology, atheism, and more.

How does a religious fundamentalist come to embrace a counter-cultural world view? Fundamentalism can be analysed from a variety of perspectives. It is a type of belief system which enables individuals to make sense of their lives and provides them with an identity. It is a social phenomenon, in which strictly religious people act according to the norms, values, and beliefs of the group to which they belong. It is a cultural product, in the sense that different cultural settings result in different forms of fundamentalism. And it is a global phenomenon, in the obvious sense that it is to be found everywhere, and also because it is both a reaction against, and also a part of, the globalising modern world. Religious Fundamentalism deals with all of these four levels of analysis, uniquely combining sociological and psychological perspectives, and relating them to each other. Each chapter is followed by a lengthy case study, and these range from a close textual analysis of George W. Bush's second inaugural speech through to a treatment of Al-Qaida as a global media event. This book provides a comprehensive social scientific perspective on a subject of immense contemporary significance, and should be of use both to university students and also to students of the contemporary world.
