Latino Pentecostals in America

This "excellent study" of the Latino Pentecostal movement is "an important resource for understanding the future of Christianity in North America" (Choice). Every year an estimated 600,000 U.S. Latinos convert from Catholicism to Protestantism, a transformation spearheaded by the Pentecostal movement and Assemblies of God. Latino Assemblies of God leaders—and their 2,400 churches across the nation—represent a new and growing force in denominational, Evangelical, and presidential politics. In a deeply researched social and cultural history, Gastón Espinosa uncovers the roots and contemporary developments of this remarkable turn. Latino Pentecostals in America traces the Latino AG back more than a century, to the Azusa Street Revivals in Los Angeles and Apostolic Faith Revivals in Houston from 1906 to 1909. Espinosa describes the uphill struggles for indigenous leadership, racial equality, women in the ministry, social and political activism, and immigration reform. Their outspoken commitment to an active faith has led a new generation of leaders to combine the reconciling message of Billy Graham with the social transformation politics of Martin Luther King Jr. This eye-opening study explains why this group of working-class Latinos once called "the Silent Pentecostals" is silent no more. By giving voice to their untold story, Espinosa enriches our understanding of the diversity of Latino religion, Evangelicalism, and American culture.

William J. Seymour and the Origins of Global Pentecostalism

In 1906, William J. Seymour (1870–1922) preached Pentecostal revival at the Azusa Street mission in Los Angeles. From these and other humble origins the movement has blossomed to 631 million people around the world. Gastón Espinosa provides new insight into the life and ministry of Seymour, the Azusa Street revival, and Seymour's influence on global Pentecostal origins. After defining key terms and concepts, he surveys the changing interpretations of Seymour over the past 100 years, critically engages them in a biography, and then provides an unparalleled collection of primary sources,

all in a single volume. He pays particular attention to race relations, Seymour's paradigmatic global influence from 1906 to 1912, and the break between Seymour and Charles Parham, another founder of Pentecostalism. Espinosa's fragmentation thesis argues that the Pentecostal propensity to invoke direct unmediated experiences with the Holy Spirit empowers ordinary people to break the bottle of denominationalism and to rapidly indigenize and spread their message. The 104 primary sources include all of Seymour's extant writings in full and without alteration and some of Parham's theological, social, and racial writings, which help explain why the two parted company. To capture the revival's diversity and global influence, this book includes Black, Latino, Swedish, and Irish testimonies, along with those of missionaries and leaders who spread Seymour's vision of Pentecostalism globally.

Political Pentecostalism

The last decade has witnessed fundamental shifts in the relationship between religion and politics. In this light, religious symbols, motifs, justifications, and practices are increasingly noticeable in political discourses, as well as agendas, particularly in the Global South, with Pentecostal Christians standing out as salient actors. Performative practices enacted in political contexts such as the anointing of state authorities, prophecies, warfare prayers, etc. have drawn the attention of numerous scholars worldwide. The four surveys contained in this volume account for these developments in Africa, Asia, and Latin America, and synoptically engage with the following question: Can any meaningful nexus connecting multiple and apparently isolated nodes of Pentecostal engagement in the political sphere around the globe be identified? In addition, they do the groundwork for drawing parallels on a global level, on the basis of which new light can be shed on fundamental changes in Pentecostal actorhood and self-understanding. Thus, local developments and ethnographic studies are for the first time reflected upon from a global perspective.

Latino Pentecostals in America

Today 12.5 million U.S. Latinos self-identify as Protestant, and Assemblies of God is the destination for one out of four converts. Gastón Espinosa reveals the church's struggle for indigenous leadership, racial equality, women in the ministry, and immigration reform and shows why "Silent Pentecostals" are an activist voice in Evangelical politics.

Church and Politics in Latin America

Complex and profound changes have been taking place in the Latin American Catholic Church in the 20th century which have often been misunderstood and misrepresented. This is a collection of essays written by scholars working in the fields of history, political science, sociology, law and theology.

Power, Politics, And Pentecostals In Latin America

Today over forty million Latin Americans classify themselves as Protestant, of which the overwhelming majority belong to some form of Pentecostalism. The rapid dissemination of Pentecostal beliefs has produced vibrant alternatives to traditional dominant culture and changed relations within the family, locality, and workplace. This volume introduces broad issues in the Pentecostal movement, including gender relations, political power and organization, and inter-Pentecostal and ecumenical relations. These themes are then examined more specifically in the country case studies, which address the historical foundations of the Pentecostal movement, patterns of and explanation for its growth, and the consequences of its expanding presence, including increased political influence.

Religion and Politics in Latin America

This book explores the transformations in religion in conjunction with political change. Professor Levine suggests, highlights the dynamic and dialectical interaction between religion and politics in general, and addresses the more universal problem of relating thought to action. Originally published in 1981. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Faith and Power

"Faith and Power is framed within the larger processes of immigration, refugee policies, deindustrialization, the rise of the religious left and right, the human rights revolution, and the Chicana/o, Puerto Rican, and Immigrant freedom movements. The book explores religion and religious politics as part of the larger ecosystem that has shaped Latina/o communities specifically and American politics in general"--

The Oxford Handbook of Latinx Christianities in the United States

"This handbook is organized by various themes with the study of U.S. Latina/x/o Christianities. Keeping in mind that the Oxford Handbooks are geared toward graduate students and professors, the organization and layout of this handbook provides a thorough examination of interlocking themes within the academic study of Latina/x/o Christian histories, sociologies, and anthropologies. These essays, taken individually and collectively, pay attention to both the diachronic (over time, historical) as well as the synchronic (contemporary). Moreover, the essays cover the major U.S. Latina/x/o ethnic groups as well as major Christian denominations and movements. Finally, essays in the handbook attend to important intersectional realities that include empire, migration, diaspora, hybridities, borderlands, and gender"--

A Documentary History of Religion in America

Up-to-date one-volume edition of a standard text For decades students and scholars have turned to the two-volume Documentary History of Religion in America for access to the most significant primary sources relating to American religious history from the sixteenth century to the present. This fourth edition—published in a single volume for the first time—has been updated and condensed, allowing instructors to more easily cover the material in a single semester. With more than a hundred illustrations and a rich array of primary documents ranging from the letters and accounts of early colonists to tweets and transcripts from the 2016 presidential election, this volume remains an essential text for readers who want to encounter firsthand the astonishing scope of religious belief and practice in American history.

Sowing the Sacred

"Enter the religious landscape of California's industrial agriculture in the 1940s. Anthropologist Walter Goldschmidt's early 1940s reconnaissance tour of the social scene in the little town of Wasco offers us a composite picture of religious institutions in a typical industrial-ag town in the state. Anthropologists and sociologists of the time pointed to the proliferation of Pentecostal churches as evidence of industrial farming's undesirable social outcomes. In particular, they noted the enthusiastic and emotional expressions of Pentecostal services and how the recently dispossessed Dust Bowl or "Okie" migrants flocked into these churches. By the 1940s, Dorothea Lange's photograph of the Okie "Migrant Mother" capturing the pathos of white plight had surfaced and caught the national spotlight. California, many noted, had a migration problem, as many "undesirables" flooded into the state. Women such as the one captured in Lange's photograph "Revival Mother" standing and worshipping with eyes closed and raised hands in a makeshift garage church typified the poverty of Pentecostals described by the university researchers"--

Pentecostals and Charismatics in Latin America and Latino Communities

Pentecostal-charismatics in Latin America and among Latinos: communities that share profound historical, linguistic and cultural roots. This compilation brings together practitioners and academics with pentecostal-charismatic affiliations, who analyse from within the development of the movement among these diverse communities.

Religion, Attire, and Adornment in North America

Clothing, dress, and ornamentation are crucial parts of individual and communal religious life and practice, yet they are too often overlooked. This book convenes leading scholars to explore the roles of attire and adornment in the creation and communication of religious meaning, identity, and community. Contributors investigate aspects of religious dress in North America in the nineteenth, twentieth, and twenty-first centuries, considering adornment practices in a wide range of religious traditions and among individuals who straddle religious boundaries. The collection is organized around four frameworks for understanding the material culture of religion: theological interpretation, identity formation, negotiation of tradition, and activism. *Religion, Attire, and Adornment in North America* features essays on topics such as Black Israelites' use of African fabrics, Christian religious tattoos, Wiccan ritual nudity, Amish "plain dress," Mormon sacred garments, Hare Krishna robes, and the Church of Body Modification. Spanning the diversity of religious practice and expression, this book is suitable for a range of undergraduate courses and offers new insights for scholars in many disciplines.

The Rowman & Littlefield Handbook of Contemporary Christianity in the United States

This one-volume handbook examines Christianity's contributions to and conflicts with the contemporary culture of the postmodern United States. Chapters present historical, cultural, and theological context for the ways conservative, mainline, and evangelical Christian traditions have influenced and responded to modern life.

Latin America's Neo-Reformation

The purpose of this study is to focus on the intersection of religion and politics. Do different religions result in different politics? More specifically, are there significant contrasts between the political attitudes and behavior of Catholics and Protestants in Latin America?

Pentecostal Power

Since the 1980s an explosion of Pentecostalism across Latin America has attracted considerable attention across various academic disciplines. This edited volume provides a multidisciplinary and continent-wide treatment of Latin American Pentecostalism by various experts, representing an important contribution to the current literature.

The Cambridge Companion to American Protestantism

A comprehensive guide-from both chronological and a topical perspective-to a broad, diverse, deeply rooted, and influential religious tradition.

A Promising Problem

Chicana/o history has reached an intriguing juncture. While academic and intellectual studies are embracing new, highly nuanced perspectives on race, class, gender, education, identity, and community, the field itself continues to be viewed as a battleground, subject to attacks from outside academia by those who claim that the discipline promotes racial hatred and anti-Americanism. Against a backdrop of deportations and voter suppression targeting Latinos, *A Promising Problem* presents the optimistic voices of scholars who call for sophisticated solutions while embracing transnationalism and the reality of multiple, overlapping identities. Showcasing a variety of new directions, this anthology spans topics such as growth and reassessment in Chicana/o history manifested in a disruption of nationalism and geographic essentialism, the impact of legal history, interracial relations and the experiences of Latino subpopulations in the US South, race and the politics of religious history, transborder feminism in the early twentieth century, and aspirations for a field that increasingly demonstrates the relational dynamics of cultural production. As they reflect on the state of their field, the contributors offer significant insights into sociology, psychology, anthropology, political science, education, and literature, while tracing the history of activism throughout the last century and debating the very concepts of "Chicano" and "Chicano history." Although the political landscape is fraught with closed-off rhetoric, *A Promising Problem* encourages diversity of thought and opens the possibilities of historical imagination.

Global Renewal Christianity

This final volume is an authoritative collection from more than two dozen leaders and scholars of the Spirit-empowered movement.

Protestantism and State Formation in Postrevolutionary Oaxaca

In this fascinating book Kathleen M. McIntyre traces intra-village conflicts stemming from Protestant conversion in southern Mexico and successfully demonstrates that both Protestants and Catholics deployed cultural identity as self-defense in clashes over local power and authority. McIntyre's study approaches religious competition through an examination of disputes over *tequio* (collective work projects) and *cargo* (civil-religious hierarchy) participation. By framing her study between the Mexican Revolution of 1910 and the Zapatista uprising of 1994, she demonstrates the ways Protestant conversion fueled regional and national discussions over the state's conceptualization of indigenous citizenship and the parameters of local autonomy. The book's timely scholarship is an important addition to the growing literature on transnational religious movements, gender, and indigenous identity in Latin America.

Social Work with Latinos

The focus on Latinos in the United States has generally overlooked key social-economic-political dimensions that are not only growing in importance, but may ultimately hold an important key to how well this group does in the immediate and distant future in the country. The approximate ten-year period since this text's initial publication has witnessed an increase in scholarship and new social-political-economic developments regarding this population group. *Social Work with Latinos, Second Edition* captures these advances and adds to the existing body of work in this area. In particular, this revised edition provides an up-to-date demographic profile; identifies the rewards and challenges for the development of social work interventions focused on Latinos; includes a conceptual foundation from which to develop social work strategies for outreach, engagement, service-provision, and evaluation; features a series of case illustrations to highlight how cultural competency/humility can unfold to better reach this population group; grounds the Latino experience within a social, economic, cultural, and political context; and provides recommendations for social work education, research and practice.

Card-Carrying Christians

In the waning years of Latin America's longest and bloodiest civil war, the rise of an unlikely duo is transforming Colombia: Christianity and access to credit. In her exciting new book, Rebecca C. Bartel details how surging evangelical conversions and widespread access to credit cards, microfinance programs, and mortgages are changing how millions of Colombians envision a more prosperous future. Yet programs of financialization propel new modes of violence. As prosperity becomes conflated with peace, and debt with devotion, survival only becomes possible through credit and its accompanying forms of indebtedness. A new future is on the horizon, but it will come at a price.

Lived Religion, Pentecostalism, and Social Activism in Authoritarian Chile

In *Giving Life to the Faith*, Joseph Florez offers an account of Pentecostal activism and the search for a new interpretation of Christian social responsibility during the extraordinary circumstances of everyday life during the Chilean dictatorship.

The Strangers in Our Midst

"The Strangers in Our Midst tells the story of how American evangelicals have responded to refugees and immigrants - ranging from the Cuban refugee influx in the 1960s, to the Southeast Asian refugees in the 1980s, to undocumented immigrants from Latin America in the 1990s and 2000s. Evangelical Christians have been a pillar of US immigration and refugee policy since the end of World War II in two key ways: by acting as refugee sponsors and by offering legalization assistance to undocumented immigrants. They developed an elaborate evangelical theology of hospitality, which emphasized scriptural commands to "welcome the stranger." Initially, evangelicals did not distinguish between legal immigrants and refugees and "illegal," undocumented immigrants. However, a growing anti-immigrant consensus in American society at large and their political alignment with the Republican Party caused them to shed their welcoming approach to immigrants in the 1990s. Evangelicals were now divided in their stances on immigration, as conservative evangelicals viewed only legal immigrants as deserving of their aid, while progressive evangelicals-led by their Latinx coreligionists-emphasized the need for Christians to help all immigrants. In the twenty-first century, a group of Latinx evangelical leaders

resurrected and reshaped the evangelical theology of hospitality in an effort to turn the tide in the evangelical debate on immigration. The results are mixed: Unprecedented numbers of evangelicals favor a pathway to citizenship for undocumented immigrants. Yet as the 2016 presidential election showed, this preference had no impact on their political choices"--

Critical Dialogues in Latinx Studies

Introduces new approaches, theoretical trends, and understudied topics in Latinx Studies This groundbreaking work offers a multidisciplinary, social-science oriented perspective on Latinx studies, including the social histories and contemporary lives of a diverse range of Latina and Latino populations. Editors Ana Y. Ramos-Zayas and Mérida M. Rúa have crafted an anthology that is unique in both form and content. The book combines previously published canonical pieces with original, cutting-edge works created for this volume. The sections of the text are arranged thematically as critical dialogues, each with a brief preface that provides context and a conceptual direction for the scholarly conversation that ensues. The editors frame the volume around the "humanistic social sciences," using the term to highlight the historical and social contexts under which expressive cultural forms and archival records are created. Critical Dialogues in Latinx Studies masterfully sheds light on the diversity and complexity of the everyday lives of Latinx populations, the political economic structures that shape enduring racialization and cultural stereotyping, and the continuing efforts to carve out new lives as diasporic, transnational, global, and colonial subjects.

Engaging Latino/a/x Theologies

Sharon E. Heaney describes how the life-giving interruption of Latin American poets, novelists, artists, and theologians changed her life in a conflict-ridden Northern Ireland. An outsider, in this study she provides an engagement with a stream of theology in the United States she takes to be exemplary. Latino/a/x theology is *teología en conjunto* (collaborative theology). It models ways to examine complicated and contested histories and identities, and it resists dominant assumptions about theological points of departure in favor of also valuing the everyday as *locus theologicus*. Identifying major themes and foundational thinkers, alongside more recent developments, Heaney offers an overview and invites readers to further reading, study, and formation. Modelling what it esteems, each chapter closes in conversation with a Latino/a/x leader in the church. The conclusion is written by practical theologian, Altagracia Pérez-Bullard. She affirms, this "is not just an intellectual exercise, . . . this engagement . . . is the practice of our lives as we journey with God and as we journey with one another. . . . It is an exciting journey. It changes us."

God's Resistance

"This book explores the power of faith in mobilizing resistance to restrictive immigration policies in the US by analyzing the strategies, successes, and failures of faith-based immigrant rights organizations"--

Pentecostal Higher Education

This book presents a theological and missiological argument for pentecostals to engage more forcefully in higher education by expanding and renewing their commitment toward operating their own colleges and universities. The volume's first part describes past and present developments within higher education, highlighting strengths and weaknesses of both pentecostal and (post)secular institutions. The second part highlights the future potential of pentecostal higher education, which is enriched by a Spirit-empowered and mission-minded spirituality that focuses on forming the hearts, heads, and hands of students. Pentecostals increasingly desire to influence all spheres of society, an endeavor that could be amplified through a strengthened engagement in higher education, particularly one that encompasses a variety of institutions, including a pentecostal research university. In developing such an argument, this research is both comprehensive and compelling, inviting pentecostals to make a missional difference in the knowledge-based economies that will characterize the twenty-first century.

The Religious Left in Modern America

This edited collection of exciting new scholarship provides comprehensive coverage of the broad sweep of twentieth century religious activism on the American left. The volume covers a diversity of perspectives, including Protestant, Catholic, and Jewish history, and important essays on African-American, Latino, and women's spirituality. Taken together, these essays offer a comparative and long-term

perspective on religious groups and social movements often studied in isolation, and fully integrate faith-based action into the history of progressive social movements and politics in the modern United States. It becomes clear that throughout the twentieth century, religious faith has served as a powerful motivator and generator for activism, not just as on the right, where observers regularly link religion and politics, but on the left. This volume will appeal to historians of modern American politics, religion, and social movements, religious studies scholars, and contemporary activists.

New Mexico's Moses

In *New Mexico's Moses*, Ramón A. Gutiérrez dives deeply into Reies López Tijerina's religious formation during the 1940s and 1950s, illustrating how his Pentecostal foundation remained an integral part of his psyche even as he migrated toward social-movement politics. An Assemblies of God evangelist turned Pentecostal itinerant preacher, Tijerina used his secularized apocalyptic theology to inspire the dispossessed heirs of Spanish and Mexican land grants fighting to recuperate ancestral lands throughout northern New Mexico and the Southwest. Using Tijerina's collected sermons, Gutiérrez demonstrates the ways in which biblical prophecy influenced Tijerina throughout his life from his early days as a preacher to his leadership of the Alianza Federal de Mercedes. Tijerina sought justice for those who had lost their lands and was determined to eradicate the most egregious forms of racism and to valorize the language and culture of *mexicanos*. Translated into English for the first time here, Tijerina's sermons serve as a blueprint for the religious origins of the Mexican American Civil Rights Movement.

Bearing Witness

Much like theology itself, the experience of trauma has the potential to reach into almost any aspect of life, refusing to fit within the tramlines. A follow up to the 2020 volume "Feminist Trauma Theologies"

Apostles of Change

This "important and well-researched" study of 1960s urban Latino activism and religion is "brimming with the ideas and voices of . . . Latinx activists" (Llana Barber, author of *Latino City*). In the late 1960s, American cities found themselves in steep decline, with poor and working-class families hit the hardest. Many urban religious institutions debated whether to move to the suburbs. Against the backdrop of the Black and Brown Power movements, which challenged economic inequality and white supremacy, young Latino radicals began occupying churches and disrupting services to compel church communities to join their protests against urban renewal, poverty, police brutality, and racism. *Apostles of Change* tells the story of these occupations and establishes their context within the urban crisis. It underscores the tensions they created and the activists' bold, new vision for the church and the world. Through case studies from Chicago, Los Angeles, New York City, and Houston, Felipe Hinojosa reveals how Latino freedom movements crossed the boundaries of faith and politics. He argues that understanding these radical politics is essential to understanding the dynamic changes in Latino religious groups from the late 1960s to the early 1980s.

Women in Pentecostal and Charismatic Ministry

Women in Pentecostal and Charismatic Ministry: Informing a Dialogue on Gender, Church, and Ministry, co-edited by de Alminana and Olena, offers missing and/or silent voices in the Pentecostal/charismatic movement an important corrective and a way forward to shape gender-focused discussions.

Expanding Energy

This book is the seventh and final volume in the *Global Story of Christianity* series. The volume's chapters, written by major scholars in the field, spotlight vital episodes and themes for understanding the historical development of Christianity in the United States and Canada. Serving as an accessible text for students and an informative volume for scholars, the book provides new insights into Christianity's development in North America, offering fresh perspectives on topics frequently overlooked by scholars. The book situates the history of North American Christianity within broader themes associated with Christianity's role as a global religion.

Holy Spirit, The

Reflects on the Holy Spirit in relation to the life of faith: the chapters consider how we become aware of the Holy Spirit's presence; review how the tradition of faith has interpreted the movement of the Holy Spirit; and detail what it means to discern and embrace the gift of the Holy Spirit.

Mexicanos, Third Edition

Responding to shifts in the political and economic experiences of Mexicans in America, this newly revised and expanded edition of *Mexicanos* provides a relevant and contemporary consideration of this vibrant community. Emerging from the ruins of Aztec civilization and from centuries of Spanish contact with indigenous people, Mexican culture followed the Spanish colonial frontier northward and put its distinctive mark on what became the southwestern United States. Shaped by their Indian and Spanish ancestors, deeply influenced by Catholicism, and often struggling to respond to political and economic precarity, Mexicans play an important role in US society even as the dominant Anglo culture strives to assimilate them. With new maps, updated appendixes, and a new chapter providing an up-to-date consideration of the immigration debate centered on Mexican communities in the US, this new edition of *Mexicanos* provides a thorough and balanced contribution to understanding Mexicans' history and their vital importance to 21st-century America.

Protestants on Screen

Protestants on Screen explores the Protestant contributions to American and European film from the silent era to the present day. The authors analyze how Protestant filmmakers, beliefs, theology, symbols, sensibilities, and cultural patterns have shaped the history of film. Challenging the stereotype of Protestants as world-denouncing-and-defying puritans and iconoclasts who stood in the way of film's maturation as an art, the authors contend that Protestants were among the key catalysts in the origins and development of film, bringing an identifiably Protestant aesthetic to the medium. The essays in this volume track key Protestant themes like faith and doubt, sin and depravity, biblical literalism, personal conversion and personal redemption, holiness and sanctification, moralism and pietism, Providence and secularism, apocalypticism, righteousness and justice, religion and race, the priesthood of all believers and its offshoots-democratization and individualism. Protestants, the essays in this volume demonstrate, helped birth and shape the film industry and harness the power of motion pictures for spiritual instruction, edification, and cultural influence.

Navigating Languages, Literacies and Identities

Navigating Languages, Literacies and Identities showcases innovative research at the interface of religion and multilingualism, offering an analytical focus on religion in children and adolescents' everyday lives and experiences. The volume examines the connections between language and literacy practices and social identities associated with religion in a variety of sites of learning and socialization, namely homes, religious education classes, places of worship, and faith-related schools and secular schools. Contributors engage with a diverse set of complex multiethnic and religious communities, and investigate the rich multilingual, multiliterate and multi-scriptal practices associated with religion which children and adolescents engage in with a range of mediators, including siblings, peers, parents, grandparents, religious leaders, and other members of the religious community. The volume is organized into three sections according to context and participants: (1) religious practices at home and across generations, (2) religious education classes and places of worship and (3) bridging home, school and community. The edited book will be a valuable resource for researchers in applied linguistics, linguistic anthropology, socio-linguistics, intercultural communication, and early years, primary and secondary education.

Hispanic Women/Latina Leaders Overcoming Barriers in Higher Education

Though the percentage of Hispanics in universities continues to grow, few Hispanic women/Latinas advance into leadership positions; instead, many are constrained by a glass ceiling. Therefore, the voices and experiences of those that have overcome these barriers in higher education are pivotal stories to be told. Ranging from the perceptions of these women's journeys to leadership, to an understanding of the barriers they encounter, to the question of their access to the resources they need, each factor is a critical component to understanding Hispanic women/Latinas in the higher education atmosphere. Comprehensive research in this area is needed to explore the themes of identity in terms of racial/ethnic identification, social perception, and gender, along with systemic themes on the institutional level regarding the recruitment, retention, and promotion of a diverse higher education administration.

Hispanic Women/Latina Leaders Overcoming Barriers in Higher Education explores the recruitment, promotion, retention process, and the barriers and resilience needed for Hispanic women/Latinas in higher education leadership roles. The chapters use data collected via a qualitative, phenomenological research study including open-ended interviews, field notes, biographical questionnaires, and a researcher's reflective journal. While covering topics surrounding these women's experiences such as identity themes, self-identification, institutional shortcomings, and valuable support systems, this book is ideally intended for Latina educators, informing legislators, educational officials, and higher education administrators along with practitioners, researchers, academicians, and students interested in institutional equality, female empowerment, and Hispanic women/Latinas' journey in higher education.

From Demon to Darling

"Reflecting America's complicated and often confused cultural identity, laws have long regulated who can and cannot make, sell, distribute, purchase, and drink wine. Richard Mendelson's compelling legal history is detailed but never dry because it reveals as much about Americans' attitudes towards themselves as about their understanding of wine."—Paul Lukacs, author of *American Vintage: The Rise of American Wine* and *The Great Wines of America* "This concise yet well-documented history of how the wine industry has fared, and ultimately triumphed, through temperance, Prohibition, and convoluted control systems makes an enjoyable read for any serious oenophile."—Philip J. Cook, author of *Paying the Tab: The Costs and Benefits of Alcohol Control*

Albion's Seed

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes

toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Marijuana Law, Policy, and Authority

Marijuana Law, Policy, and Authority is a first-of-its-kind law school casebook in a rapidly-emerging and exciting new field. The accessible, comprehensive, and engaging material guides students through the competing approaches to regulating marijuana, the purposes and effects of those approaches, and the legal authorities for choosing among them. The helpful organization intersperses these issues of substantive law, policy, and authority throughout the discussion of users, suppliers, and third parties. Substantive law materials cover either prohibitions or regulations targeting users, suppliers, or third parties. Policy materials cover the goals of marijuana law and policy as well as the research on the impact of different marijuana policies. Authority materials address the different levels of government—federal, state, and local. Notes, questions, and numerous problems in each chapter provide additional thought-provoking material and help to reinforce student learning. Current, news-headlining cases keep the discussion interesting and lively. Key Features: Internationally renowned author Robert Mikos is the premier authority on marijuana law. He draws upon nearly a decade of professional experience teaching, lecturing, consulting, and writing about marijuana law and policy. Three distinct but inter-woven topics are covered: the substantive law governing marijuana; the policy rationales behind and outcomes produced by different approaches to regulating the drug; and the legal authority to regulate the drug. Students are guided through the multi-faceted legal and policy issues now confronting lawyers, lawmakers, judges, and policy analysts working in this emerging field. Written in a style that is familiar to law students, but also accessible to a much broader audience, including graduate and upper level undergraduate students in courses in policy studies, political science, and criminology. Cutting-edge issues are included that are intellectually engaging for students and professors alike—e.g., how are conflicts between state/ federal law resolved? What are the roles of courts and executive officers in terms of policy? Dives deeply into classic legal issues: contract enforceability and powers of court, Congress, and the state. Notes and Questions following cases offer stimulating fodder for discussion.

Toward Liquor Control

A comparative and collaborative study of the foundational principles and concepts that underpin different domestic systems of criminal law.

Core Concepts in Criminal Law and Criminal Justice

Scholars in many fields increasingly find themselves caught between the academy, with its demands for rigor and objectivity, and direct engagement in social activism. Some advocate on behalf of the communities they study; others incorporate the knowledge and leadership of their informants directly into the process of knowledge production. What ethical, political, and practical tensions arise in the course of such work? In this wide-ranging and multidisciplinary volume, leading scholar-activists map the terrain on which political engagement and academic rigor meet. Contributors: Ruth Wilson Gilmore, Edmund T. Gordon, Davydd Greenwood, Joy James, Peter Nien-chu Kiang, George Lipsitz, Samuel Martínez, Jennifer Bickham Mendez, Dani Nabudere, Jessica Gordon Nembhard, Jemima Pierre, Laura Pulido, Shannon Speed, Shirley Suet-ling Tang, João Vargas

Prominent Families of New York

Formal education is beginning to reflect an increase in environmental concern. Drawing on case studies, the authors explain how this subject can best be implemented at classroom level.

Landmark Briefs and Arguments of the Supreme Court of the United States

A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of Born to Run lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner.

Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

Engaging Contradictions

Service learning, as defined by the editors, is the generation of knowledge that is of benefit to the community as a whole. This seventh volume in the Outreach Scholarship book series contributes a unique discussion of how service learning functions as a critical cornerstone of outreach scholarship. The sections and chapters of this book marshal evidence in support of the idea that undergraduate service learning, infused throughout the curriculum and coupled with outreach scholarship, is an integral means through which higher education can engage people and institutions of the communities of this nation in a manner that perpetuate civil society. The editors, through this series of models of service learning, make a powerful argument for the necessity of "engaged institutions".

The Handbook of Environmental Education

In this book, 78 leading attorneys in California and New York describe how they evaluate, negotiate and resolve litigation cases. Selected for their demonstrated skill in predicting trial outcomes and knowing when cases should be settled or taken to trial, these attorneys identify the key factors in case evaluation and share successful strategies in pre-trial discovery, negotiation, mediation, and trials. Integrating law and psychology, the book shows how skilled attorneys mentally frame cases, understand jurors' perspectives, develop persuasive themes and arguments and achieve exceptional results for clients.

Born to Run

Quality of life (QOL) research in tourism has gained much momentum over the last two decades. Academics working in this area research issues related to tourists and host communities. Practitioners are becoming increasingly interested in understanding the science that allows them to develop better marketing and managerial programs designed to enhance the quality of life of tourists. Tourism bureaus and government agencies are increasingly interested in issues of sustainable tourism, specifically in understanding and measuring the impact of tourism on the quality of life of the residents of the host communities. This handbook covers all relevant topics and is divided into two parts: research relating to travelers/tourists, and research relating to the residents of host communities. It is the only state-of-the-art reference book in its field and will prove invaluable to academics interested in QOL research, as well as tourism practitioners interested in applying the science of QOL in the tourism industry.

How Leading Lawyers Think

This timely collection of essays - written by nine recognized forestry and environmental specialists - tells the story of the conservation, use, and changes in the Commonwealth's forests over time. The book traces the development of pre-settlement, colonial, and post-Revolutionary War forest practices, and concludes with recommendations as to how history might be used to inform and shape future policy. Underscored is the importance of private and local leadership, such as the unique Massachusetts town forest movement. Economic contributions and educational programs are detailed, as well as the ways Massachusetts' leadership has influenced national forestry. Written for the layperson, and reflecting the particular experience and style of each contributor, the history will appeal to a range of readers from local conservation activists to forestry professionals and policymakers.

Who's Who in the West

Pop music surrounds us - in our cars, over supermarket speakers, even when we are laid out at the dentist - but how often do we really hear what's playing? *Switched on Pop* is the book based on the eponymous podcast that has been hailed by NPR, Rolling Stone, The Guardian, and Entertainment Weekly for its witty and accessible analysis of Top 40 hits. Through close studies of sixteen modern classics, musicologist Nate Sloan and songwriter Charlie Harding shift pop from the background to the foreground, illuminating the essential musical concepts behind two decades of chart-topping songs. In 1939, Aaron Copland published *What to Listen for in Music*, the bestseller that made classical music approachable for generations of listeners. Eighty years later, Nate and Charlie update Copland's idea for a new audience and repertoire: 21st century pop, from Britney to Beyoncé, Outkast to Kendrick Lamar. Despite the importance of pop music in contemporary culture, most discourse only revolves around lyrics and celebrity. *Switched on Pop* gives readers the tools they need to interpret our modern soundtrack. Each chapter investigates a different song and artist, revealing musical insights such as how a single melodic motif follows Taylor Swift through every genre that she samples, André 3000 uses metric manipulation to get listeners to "shake it like a Polaroid picture," or Luis Fonsi and Daddy Yankee create harmonic ambiguity in "Despacito" that mirrors the patterns of global migration. Replete with engaging discussions and eye-catching illustrations, *Switched on Pop* brings to life the musical qualities that catapult songs into the pop pantheon. Readers will find themselves listening to familiar tracks in new ways and not just those from the Top 40. The timeless concepts that Nate and Charlie define can be applied to any musical style. From fanatics to skeptics, teenagers to octogenarians, non-musicians to professional composers, every music lover will discover something ear-opening in *Switched on Pop*.

Health and Wellness Tourism

Building on the ideas Harney and Moten developed in *The Undercommons*, *All Incomplete* extends the critical investigation of logistics, individuation and sovereignty. It reflects their chances to travel,

listen and deepen their commitment to and claim upon partiality. All Incomplete studies the history of a preference for the force and ground and underground of social existence. Engaging a vibrant constellation of thought that includes the work of Amílcar Cabral, Erica Edwards, Denise Ferreira da Silva, Cedric Robinson, Walter Rodney, Hortense Spillers and many others, Harney and Moten seek to share and understand that preference. In so doing, Moten and Harney hope to have forged what Manolo Callahan, echoing Ivan Illich, calls a convivial tool that - despite the temptation to improve and demand, develop and govern, separate and grasp - helps us renew our habits of assembly. All Incomplete features the work of award winning photographer Zun Lee, exploring and celebrating the everyday spaces of Black sociality, intimacy, belonging, and insurgency, and a preface by Denise Ferreira da Silva.

Business Law and the Legal Environment

Thanks to a far-sighted band of creative pioneers, and thanks to a very special community intelligence and spirit, the Napa Valley has transformed itself from a sleepy, inward-looking farm and ranching enclave into one of the most prestigious and exciting wine-growing regions in the world. In Appellation Napa Valley, the renowned wine lawyer and industry authority Richard Mendelson takes us inside the legal and commercial struggles that did so much to make the Napa Valley into what it is today. Along the way, he brings us incisive portraits of the men and women who joined hands in common cause and common spirit, igniting a revolution in American wine and food in the process. Enlivened by exquisite maps and drawings from vineyards and cellars, plus a foreword by the celebrated French Laundry chef Thomas Keller, Appellation Napa Valley is a unique keepsake book to be savored and cherished for many years to come.

A fascinating and comprehensive look into the life of American fashion designer Ralph Lauren, now with an afterword. "Deep-dish...sharp-clawed...honestly admiring."—New York Times There are at least two Ralph Laurens. To the public he's a gentle, modest, yet secure and purposeful man. Inside the walls of Polo Ralph Lauren, though, he was long seen by some as a narcissist, an insecure ditherer, and, at times, a rampaging tyrant. Michael Gross, author of the bestsellers *Model* and *740 Park*, lays bare the truths of this fashion emperor's rise, and reveals not only the secrets of his meteoric success in marketing our shared fantasies, but also a widely unknown side that's behind the designer's chic façade.

Public Health Policy and Ethics brings together philosophers and practitioners to address the foundations and principles upon which public health policy may be advanced. What is the basis that justifies public health in the first place? Why should individuals be disadvantaged for the sake of the group? How do policy concerns and clinical practice work together and work against each other? Can the boundaries of public health be extended to include social ills that are amenable to group-dynamic solutions? These are some of the crucial questions that form the core of this volume of original essays sure to cause practitioners to engage in a critical re-evaluation of the role of ethics in public health policy. This volume is unique because of its philosophical approach. It develops a theoretical basis for public health and then examines cutting-edge issues of practice that include social and political issues of public health. In this way the book extends the usual purview of public health. Public Health Policy and Ethics is of interest to those working in public health policy, ethics and social philosophy. It may be used as a textbook for courses on public health policy and ethics, medical ethics, social philosophy and applied or public philosophy.

Stepping Back to Look Forward

This book examines how movements from below pose challenges to the status quo. The 2010s have seen an explosion of protest movements, sometimes characterised as riots by governments and the media. But these are not new phenomena, rather reflecting thousands of years of conflict between different social classes. Beginning with struggles for democracy and control of the state in Athens and ancient Rome, this book traces the common threads of resistance through the Middle Ages in Europe and into the modern age. As classes change so does the composition of the protestors and the goals of their movements; the one common factor being how groups can mobilise to resist unbearable oppression, thereby developing a crowd consciousness that widens their political horizons and demonstrates the possibility of overthrowing the existing order. To appreciate the roots and motivations of these so-called deviants the author argues that we need to listen to the sound of the crowd. This book will be of interest to researchers of social movements, protests and riots across sociology, history and international relations.

This book examines the emergence and evolution of the discipline of urban design as articulated through the work of Josep Lluís Sert (1902–1983), one of its most influential practitioners. Sert was noted for his city planning and urban development projects in Europe, South America, and the United States, and the master plans of his later career were significant for their integration of natural landscape features into the urban building scheme. With essays by leading scholars and a wide selection of archival materials, illustrations, plans, and maps, this book provides a timely look at the man who advocated the idea of “urban consciousness” and an architecture that dealt with the total environment--well before these concepts became commonplace.
