child on child sexual abuse IS sexual abuse.

age of the perpetrator isn't the only important or defining factor.

parents and other adults don't know what to say or do about it

talking about this will help

getting our child into therapy right away is best

shame and disgust can come along with this type of abuse (really any type of abuse)

hypersexuality is often a result of childhood sexual abuse

even though many children were first abused themselves, they are still responsible for the pain they caused

if a mandated reporter like a therapist or a teacher finds out about the abuse, child protective services will get involved and investigate

we can heal from this!
