Downstream - Complete Season 1 (Episodes 1-7)

Meet Joseph Bridgeman, a reclusive insomniac with a weakness for 'The Beatles' on vinyl and a constant headache. When his annoying accountant suggests hypnotherapy might help him sleep, Joseph accidentally discovers he can time-travel and things get a little complicated. With the help of Vinny, a local record shop owner, Mark, his old school friend, and Alexia Finch, his hypno-time-travel guru, Joe sets out to change the course of his life. He needs to get back to 1992, the year his world fell apart, the year that Amy, his sister, went missing. The only problem (apart from his clothes disappearing) is that the further back he goes the less time he gets to stay there. Can Joe master his new-found gift before time catches up with him? DOWNSTREAM was originally released in Episodes. Download the Season 1 box-set (all 7 episodes in one book) and SAVE 30%. RECENT FIVE STAR REVIEWS "If you're a fan of Time Travel, this book is among the best" "Another offering of pure delight from author Nick Jones." "Love, love, love this series!! The humour is outstanding and the characters come to life. I wish I could give it more stars!" "If Nick Hornby and Michael Marshall Smith had a child, Nick Jones would be it. Read this." "This man writes great books - it's that simple!" "A wonderful writer. I love this series! It's time travel you can actually understand."

The Unexpected Gift of Joseph Bridgeman

How far would you go for someone you love? In 1992 Amy Bridgeman disappeared. Her brother is going back to discover the truth... Joseph Bridgeman - a reclusive insomniac with a weakness for 'The Beatles' on vinyl - accidentally discovers he can time travel. With the help of Vinny, a local record shop owner, an old school friend and Alexia Finch (his hypo-time-travel guru) Joe sets out to change the course of his life. He needs to get back to 1992, the year his world fell apart, the year his sister, went missing. The only problem (apart from his clothes disappearing) is that the further back he goes the less time he gets to stay there. Can Joe master his new-found gift before time catches up with him? Expect action, drama, adventure and of course the unexpected! RECENT FIVE STAR REVIEWS "If you're a fan of Time Travel, this book is among the best" "Another offering of pure delight from author Nick Jones." "Love, love, love this series!! The humour is outstanding and the characters come to life. I wish I could give it more stars!" "If Nick Hornby and Michael Marshall Smith had a child, Nick Jones would be it. Read

this." "This man writes great books - it's that simple!" "A wonderful writer. I love this series! It's time travel you can actually understand." "Absolutely loved this book. Similar to Time Travellers Wife. Edge of your seat stuff, can't wait for more books by Nick Jones. Excellent" Action, romance, intrigue and comedy combine in this, the first book in The Downstream Diaries Time Travel Adventure series.

Time Travel

So guys, this is my book includes Sci - fi, fantasy, time travelling, drama, thrill and lots of action. This story usually based up on character Andrew and Chris to fight down the alien to protect Earth. The fun part is that Andrew came from Year 2050 to year 2017. So, if you want to know the full story, just read it. It will really makes you happy and let you in an another world.

Bowker's Directory of Videocassettes for Children 1999

Margaret Cromarty was a nurse who suffered a catastrophic stroke aged just 43, which left her with Locked-In Syndrome. Still paralysed even now, with the aid of an on-screen keyboard she has written this unflinching account of her treatment. It describes the frustrations of being fully aware but ignored as a person by carers unable to communicate effectively, and the painfully slow steps towards rehabilitation. It contains vital lessons for health professionals caring for victims of stroke, and for families and friends of patients. 'I learned later that the doctors expected that I would die. They made a poor attempt at concealing this expectation. They discussed me over me. I was dismayed at the negative vibes they exuded each time they came to see me. I felt that they had written me off already. Of course they can have had little idea of how their behaviour affected me. I just lay there, seemingly unresponsive, just existing, unable to enlighten them as to what was going on inside my head.' - Margaret Cromarty.

Stroke - it Couldn't Happen to Me

He only looked away for a second. Still haunted by the disappearance of his little sister, Amy, over twenty years ago, Joseph Bridgeman's life has fallen apart. When a friend talks him into seeing hypnotherapist Alexia Finch to help with his insomnia, Joseph accidentally discovers he can time travel. His first trip only takes him back a few minutes, but his new-found ability gives him something he hasn't felt for the longest time: hope. Joseph sets out to travel back to the night Amy went missing and save her. But after several failed attempts, he discovers the farther back he travels, the less time he gets to stay there. And the clock is ticking. With the help of Alexia, Joseph embarks on a desperate race against the past to save his sister. Can he master his new skill and solve the mystery of Amy's disappearance before it's too late? Previously released as The Unexpected Gift of Joseph Bridgeman, this updated version includes extra chapters, new plotlines, and even deeper character development. It makes way for an expanded vision of the Joseph Bridgeman Series, with the first four books released in 2021 and 2022.

Media Review Digest

Multiple Hugo Award winner Vernor Vinge takes readers on a fifty-million-year trip to a future where humanity's fate will be decided in a dangerous game of high-tech survival. In this taut thriller, a Hugo finalist for Best Novel, nobody knows why there are only three hundred humans left alive on the Earth fifty million years from now. Opinion is fiercely divided on whether to settle in and plant the seed of mankind anew, or to continue using high-energy stasis fields, or "bobbles," in venturing into the future. When somebody is murdered, it's obvious someone has a secret he or she is willing to kill to preserve. The murder intensifies the rift between the two factions, threatening the survival of the human race. It's up to 21st century detective Wil Brierson, the only cop left in the world, to find the culprit, a diabolical fiend whose lust for power could cause the utter extinction of man. Filled with excitement and adventure, Vinge's tense SF puzzler will satisfy readers with its sense of wonder and engaging characters, one of whom is a murderer with a unique modus operandi. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

And Then She Vanished

"An Occurrence at Owl Creek Bridge" (1890) is a short story by the American writer and Civil War veteran Ambrose Bierce. Described as "one of the most famous and frequently anthologized stories in American literature"

Marooned in Realtime

Earth is falling. Will our call for help be heard? The Saints of Salvation is the extraordinary conclusion to Peter F. Hamilton's Salvation Sequence: a high-octane adventure from a master of the genre. 'The most powerful imagination in science fiction' – Ken Follett, author of The Pillars of the Earth Live in hiding – or die for freedom Humanity welcomed the Olyix and their utopian technology. But mankind was tricked. Now these visitors are extracting a terrible price. For two years, the Olyix have laid siege to Earth, harvesting its people for their god. One by one, cities are crumbling beneath their devastating weaponry. And while millions have fled to seek refuge in space, others continue to fight an apparently unwinnable war. As Earth's defeat draws near, a team attempts to infiltrate the Salvation of Life – the Olyix's arkship. If it succeeds, those chosen will travel to a hidden enclave thousands of light years away. Once there, they must signal its location to future generations, to bring the battle to the enemy. Maybe allies scattered throughout space and time can join forces. Yet in the far future, humanity are still hunted by their ancient adversary. And as forces battle on in the cold reaches of space, hope seems distant indeed . . . The Saints of Salvation is the third and final book in the Salvation Sequence by Peter F. Hamilton. 'A stirring finale' – Guardian 'It delivers on every level' – Daily Mail

Geological Survey Professional Paper

"From New York to Rio de Janeiro, with nothing but a puncture repair kit for protection. Tom Kevill-Davies embarks upon an epic pedal-powered quest in search of the perfect meal ... he discovers the real flavours of the Americas, eating guinea pigs one day and armadillos the next, dining with beauty queens and sleeping with dogs. From the Great Plains of the Mid West to the golden beaches of Brazil ... This is a gripping story of determination, daring and culinary adventure"--Publisher's description.

U.S. Geological Survey Professional Paper

Mother Jones is an award-winning national magazine widely respected for its groundbreaking investigative reporting and coverage of sustainability and environmental issues.

Volcanic Eruptions of 1980 at Mount St. Helens

"Ismael provides a deeply informed account of what physics tells us about ourselves. The result is a vision that is abstract, alien, illuminating, and-Ismael argues-affirmative of most of what we all believe about our own freedom."c--Amazon.

An Occurrence at Owl Creek Bridge

The stories of Philadelphia writer Chris Gibbons often convey the harrowing experiences of America's war veterans, the thrilling wonders of space exploration, and his poignant memories of growing up during the turbulent decades of the 1960's and 1970's. In this collection of 78 of his published essays across a broad range of topics, be prepared to traverse the battlefields of America's wars, rocket across the Solar System, and travel back in time to experience the heartache, joy, and triumph often encountered on the journey of life.

The Saints of Salvation

Rosemary Mahoney was determined to take a solo trip down the Egyptian Nile in a small boat, even though civil unrest and vexing local traditions conspired to create obstacles every step of the way. Starting off in the south, she gained the unlikely sympathy and respect of a Muslim sailor, who provided her with both a seven-foot skiff and a window into the culturally and materially impoverished lives of rural Egyptians. Egyptian women don't row on the Nile, and tourists aren't allowed to for safety's sake. Mahoney endures extreme heat during the day, and a terror of crocodiles while alone in her boat at night. Whether she's confronting deeply held beliefs about non-Muslim women, finding connections to past chroniclers of the Nile, or coming to the dramatic realization that fear can engender unwarranted violence, Rosemary Mahoney's informed curiosity about the world, her glorious prose, and her wit never fail to captivate.

The Hungry Cyclist

Literary agent Joe Allston, the central character of Stegner's novel All the Little Live Things, is now retired and, in his own words, 'just killing time until time gets around to killing me.' His parents and his only son are long dead, leaving him with neither ancestors nor descendants, tradition nor ties. His job, trafficking the talent of others, had not been his choice. He passes through life as a spectator.

A postcard from an old friend causes Allston to return to the journals of a trip he and his wife had taken years before, a journey to his mother's birthplace, where he'd sought a link with the past. The memories of that trip, both grotesque and poignant, move through layers of time and meaning, and reveal that Joe Allston isn't quite spectator enough. Wallace Stegner was the author of, among other works of fiction, *Remembering Laughter* (1973); *The Big Rock Candy Mountain* (1943); *Joe Hill* (1950); *All the Little Live Things* (1967, Commonwealth Club Gold Medal); *A Shooting Star* (1961); *Angle of Repose* (1971, Pulitzer Prize); *Recapitulation* (1979); *Crossing to Safety* (1987); and *Collected Stories* (1990). His nonfiction includes *Beyond the Hundredth Meridian* (1954); *Wolf Willow* (1963); *The Sound of Mountain Water* (essays, 1969); *The Uneasy Chair: A Biography of Bernard deVoto* (1964); *American Places* (with Page Stegner, 1981); and *Where the Bluebird Sings to the Lemonade Springs: Living and Writing in the West* (1992). Three short stories have won O.Henry prizes, and in 1980 he received the Robert Kirsch Award from the Los Angeles Times for his lifetime literary achievements.

Engineering Record, Building Record and Sanitary Engineer

The basis for the new Amazon Prime Original Series! From the author of the imaginative and “awe-inspiring” (New York Journal of Books) narrative art book *The Electric State* comes the haunting sequel to his remarkable *Tales from the Loop*. Welcome back to the Loop. In 1954, the Swedish government ordered the construction of the world's largest particle accelerator in the pastoral countryside of Mäläröarna. The local population called this marvel of technology The Loop and celebrated its completion. But Mäläröarna and the world would never be the same. Infused with strange machines and unfathomable creatures, *Things from the Flood* is transcendent look at technology that will stay with you long after you turn the final page.

Mother Jones Magazine

Among the many who serve in the United States Armed Forces and who are deployed to distant locations around the world, myriad health threats are encountered. In addition to those associated with the disruption of their home life and potential for combat, they may face distinctive disease threats that are specific to the locations to which they are deployed. U.S. forces have been deployed many times over the years to areas in which malaria is endemic, including in parts of Afghanistan and Iraq. Department of Defense (DoD) policy requires that antimalarial drugs be issued and regimens adhered to for deployments to malaria-endemic areas. Policies directing which should be used as first and as second-line agents have evolved over time based on new data regarding adverse events or precautions for specific underlying health conditions, areas of deployment, and other operational factors. At the request of the Veterans Administration, *Assessment of Long-Term Health Effects of Antimalarial Drugs When Used for Prophylaxis* assesses the scientific evidence regarding the potential for long-term health effects resulting from the use of antimalarial drugs that were approved by FDA or used by U.S. service members for malaria prophylaxis, with a focus on mefloquine, tafenoquine, and other antimalarial drugs that have been used by DoD in the past 25 years. This report offers conclusions based on available evidence regarding associations of persistent or latent adverse events.

How Physics Makes Us Free

A fireman in charge of burning books meets a revolutionary school teacher who dares to read. Depicts a future world in which all printed reading material is burned.

BULLETIN of the Atomic Scientists

The magnificent Danube both cuts across and connects central Europe, flowing through and alongside ten countries: Romania, Ukraine, Moldova, Bulgaria, Serbia, Croatia, Hungary, Slovakia, Austria, and Germany. Travelling its full length from east to west, against the river's flow, Nick Thorpe embarks on an inspiring year-long journey that leads to a new perspective on Europe today. Thorpe's account is personal, conversational, funny, immediate, and uniquely observant—everything a reader expects in the best travel writing. Immersing himself in the Danube's waters during daily morning swims, Thorpe likewise becomes immersed in the histories of the lands linked by the river. He observes the river's ecological conditions, some discouraging and others hopeful, and encounters archaeological remains that whisper of human communities sustained by the river over eight millennia. Most fascinating of all are the ordinary and extraordinary people along the way—the ferrymen and fishermen, workers in the fields, shopkeepers, beekeepers, waitresses, smugglers and border policemen, legal and illegal

immigrants, and many more. For readers who anticipate their own journeys on the Danube, as well as those who only dream of seeing the great river, this book will be a unique and treasured guide.

Soldiers, Space, and Stories of Life

New York Times bestselling author Steve Alten's *Meg: Primal Waters* continues his thrilling action adventure series--the basis for the feature film *The Meg*, starring Jason Statham as Jonas Taylor. Eighteen years have passed since *Angel*, the Megalodon shark broke free of the Tanaka Lagoon and returned to the Mariana Trench. Meanwhile, Jonas Taylor-adventurer, has become Jonas Taylor, middle-aged father of two, overwhelmed by mountains of bills and the daily strife of raising a family. But life is about to change. A Hollywood television producer wants Jonah to join his new survival series: *Daredevils*. For the next six weeks, two teams of crazy daredevils on a South Pacific Ocean voyage on-board a replica of a Spanish Galleon will try to outperform one another in front of the cameras. Jonas needs the money, and the job seems easy enough--doing color commentary. But behind the scenes, someone else is pulling the strings. And before it's over, Jonas, Terry, and Mac will again come face to face with the most dangerous creatures ever to stalk the Earth. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The New York Times Book Review

This alternate history from the award-winning author of *'The Wild Shore'* takes us on a journey through seven hundred years of history as it never was, but might have been.

Down the Nile

Set in the future when "firemen" burn books forbidden by the totalitarian "brave new world" regime.

New York Times Saturday Review of Books and Art

How our collective intelligence has helped us to evolve and prosper Humans are a puzzling species. On the one hand, we struggle to survive on our own in the wild, often failing to overcome even basic challenges, like obtaining food, building shelters, or avoiding predators. On the other hand, human groups have produced ingenious technologies, sophisticated languages, and complex institutions that have permitted us to successfully expand into a vast range of diverse environments. What has enabled us to dominate the globe, more than any other species, while remaining virtually helpless as lone individuals? This book shows that the secret of our success lies not in our innate intelligence, but in our collective brains—on the ability of human groups to socially interconnect and learn from one another over generations. Drawing insights from lost European explorers, clever chimpanzees, mobile hunter-gatherers, neuroscientific findings, ancient bones, and the human genome, Joseph Henrich demonstrates how our collective brains have propelled our species' genetic evolution and shaped our biology. Our early capacities for learning from others produced many cultural innovations, such as fire, cooking, water containers, plant knowledge, and projectile weapons, which in turn drove the expansion of our brains and altered our physiology, anatomy, and psychology in crucial ways. Later on, some collective brains generated and recombined powerful concepts, such as the lever, wheel, screw, and writing, while also creating the institutions that continue to alter our motivations and perceptions. Henrich shows how our genetics and biology are inextricably interwoven with cultural evolution, and how culture-gene interactions launched our species on an extraordinary evolutionary trajectory. Tracking clues from our ancient past to the present, *The Secret of Our Success* explores how the evolution of both our cultural and social natures produce a collective intelligence that explains both our species' immense success and the origins of human uniqueness.

The Spectator Bird

Blast off into hyperspace with an all-new collection of five action-packed retellings from *Star Wars: The Force Awakens* and *Star Wars: The Last Jedi*! Each of these exciting stories can be read in just five minutes--perfect for galactic adventures at lightspeed!

Things From the Flood

Lady Sybil, wife of Sam Vimes, convinces him to travel to the countryside for a vacation. Out of his element, Sam soon finds various crimes to investigate. But he is out of his element and must rely on his instincts to bring the culprits to justice.

Assessment of Long-Term Health Effects of Antimalarial Drugs When Used for Prophylaxis

Jim Carver: a tough, resolute war veteran, he returns from the trenches to build a better life for his family to find his wife dead. Archie Carver: Jim's eldest son, smart, ruthless, he has a quick eye for financial profits and beautiful women. Elaine Frith: beautiful and ambitious, she uses her charms to snare any man she thinks will bring her wealth. The First World War ends and the soldiers return to the peaceful Avenue. On the surface their homes look just the same, but behind the carefully tended front gardens everything has changed, and their families' lives in the next twenty years will be as turbulent as any they have known.

Fahrenheit 451

Generate Better, Faster Results—Using Less Capital and Fewer Resources! “[The High-Velocity Edge] contains ideas that form the basis for structured continuous learning and improvement in every aspect of our lives. While this book is tailored to business leaders, it should be read by high school seniors, college students, and those already in the workforce. With the broad societal application of these ideas, we can achieve levels of accomplishment not even imagined by most people.” The Honorable Paul H. O’Neill, former CEO and Chairman, Alcoa, and Former Secretary of the Treasury “Some firms outperform competitors in many ways at once—cost, speed, innovation, service. How? Steve Spear opened my eyes to the secret of systemizing innovation: taking it from the occasional, unpredictable ‘stroke of genius’ to something you and your people do month-in, month-out to outdistance rivals.” Scott D. Cook, founder and Chairman of the Executive Committee, Intuit, Inc. “Steven Spear connects a deep study of systems with practical management insights and does it better than any organizational scholar I know. [This] is a profoundly important book that will challenge and inspire executives in all industries to think more clearly about the technical and social foundations of organizational excellence.” Donald M. Berwick, M.D., M.P.P., President and CEO, Institute for Healthcare Improvement About the Book How can some companies perform so well that their industry counterparts are competitors in name only? Although they operate in the same industry, serve the same market, and even use the same suppliers, these extraordinary, high-velocity organizations consistently outperform all the competition—and, more importantly, continually widen their leads. In *The High-Velocity Edge*, the reissued edition of five-time Shingo Prize winner Steven J. Spear’s critically acclaimed book *Chasing the Rabbit*, Spear describes what sets market-dominating companies apart and provides a detailed framework you can leverage to surge to the lead in your own industry. Spear examines the internal operations of dominant organizations across a wide spectrum of industries, from technology to design and from manufacturing to health care. While he investigates several great operational triumphs, like top-tier teaching hospitals’ fantastic improvements in quality of care, Pratt & Whitney’s competitive gains in jet engine design, and the U.S. Navy’s breakthroughs in inventing and applying nuclear propulsion, *The High-Velocity Edge* is not just about the adoration of success. It also takes a critical look at some of the operational missteps that have humbled even the most reputable and respected of companies and organizations. The decades-long prominence of Toyota, for example, is contrasted with the many factors leading to the automaker’s sweeping 2010 product recalls. Taken together, these multiple perspectives and in-depth case studies show how to: Build a system of “dynamic discovery” designed to reveal operational problems and weaknesses as they arise Attack and solve problems when and where they occur, converting weaknesses into strengths Disseminate knowledge gained from solving local problems throughout the company as a whole Create managers invested in developing everyone’s capacity to continually innovate and improve Whatever kind of company you operate—from technology to finance to healthcare—mastery of these four key capabilities will put you on the fast track to operational excellence, where you will generate faster, better results—using less capital and fewer resources. Apply the lessons of Steven J. Spear and gain a high-velocity edge over every competitor in your industry.

The Danube

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Thailand, Indochina & Burma Handbook

As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

MEG: Primal Waters

The Years of Rice and Salt
