H. Langford Warren (1857-1917) was an important link in the chain of individuals who contributed to the architectural practice, theories of design, and the teaching of architectural history in the United States at the turn of the twentieth century. Best known in the Boston area, Warren first worked under the renowned architect Henry Hobson Richardson before establishing his own practice. Friends and colleagues during this period included Charles Eliot Norton, the noted art historian, and Harvard's Charles Herbert Moore, a leading Ruskinian painter. Hired by Harvard University in 1893, Warren developed its architectural curriculum. In 1897 he helped found Boston's Society of Arts and Crafts. At the time of his death in 1917, Warren was Dean of the School of Architecture at Harvard and President of the Society of Arts and Crafts. At the turn of the century, Warren's philosophical vision offered a conservative and ethnocentric perspective attractive to many Bostonians and to a significant segment of Americans nationwide. According to this view, English culture was the basis of American culture. Through his work at Harvard and in the Arts and Crafts movement, he articulated and promoted an aesthetic guided by an attachment to the past, and he encouraged his students at Harvard to revive and reinterpret English and Anglo-American models. Another characteristic of Warren's aesthetic was "restraint," a quality generally attributed to the region's Puritan settlers. "Restraint" also meant a rejection of both the lavish ornamentation of the Ecole des Beaux-Arts in Paris and the more original styles such as Art Nouveau that were emerging at the turn of the century. Following the ideals of John Ruskin, William Morris, and later leaders of the English Arts and Crafts movement, Warren and his architect-colleagues promoted a close collaboration with the craftsmen who enhanced their buildings. The resulting building designs represent a significant contribution to the development of American Arts and Crafts architecture, complementing the proto-modern work of designers such as Frank Lloyd Wright. In fact, Arts and Crafts architecture in North America was extremely diverse. Meister examines

the greater complexity of this architecture by exploring the eclectic historicism of Warren, a key figure in the movement that was centered in Boston.

American Architect and Building News

The American Architect and Building News, Vol. 27, Jan-Mar, 1890, is many of the old books which have been considered important throughout the human history. They are now extremely scarce and very expensive antique. So that this work is never forgotten we republish these books in high quality, using the original text and artwork so that they can be preserved for the present and future generations. This whole book has been reformatted, retyped and designed. These books are not made of scanned copies of their original work and hence the text is clear and readable.

Excerpt from The American Architect and Building News, Vol. 18: July-December, 1885 I have dwelt thus long upon the delays which are liable to occur in the execution of architectural designs in terracotta, and the manner in which they can be avoided, for the reason that such delays or the apprehension that they will occur often militate seriously against the employment of the material. The American Architect And Building News; Volume 16

"Turns out that what you thought you knew about Lady Liberty is dead wrong. Learn the truth in this fascinating account." —O, The Oprah Magazine The Statue of Liberty is one of the most recognizable monuments in the world, a powerful symbol of freedom and the American dream. For decades, the myth has persisted that the statue was a grand gift from France, but now Liberty's Torch reveals how she was in fact the pet project of one quixotic and visionary French sculptor, Frédéric Auguste Bartholdi. Bartholdi not only forged this 151-foot-tall colossus in a workshop in Paris and transported her across the ocean, but battled to raise money for the statue and make her a reality. A young sculptor inspired by a trip to Egypt where he saw the pyramids and Sphinx, he traveled to America, carrying with him the idea of a colossal statue of a woman. There he enlisted the help of notable people of the age—including Ulysses S. Grant, Joseph Pulitzer, Victor Hugo, Gustave Eiffel, and Thomas Edison—to help his scheme. He also came up with inventive ideas to raise money, including exhibiting the torch at the Philadelphia world's fair and charging people to climb up inside. While the French and American governments dithered, Bartholdi made the statue a reality by his own entrepreneurship, vision, and determination. "By explaining Liberty's tortured history and resurrecting Bartholdi's indomitable spirit, Mitchell has done a great service. This is narrative history, well told. It is history that connects us to our past and—hopefully—to our future." —Los Angeles Times

The American City, Vol. 7

Excerpt from The American City, Vol. 7: July-December, 1912 One cannot but ask again, why this duplication of effort? Why one gymnasium and bath for the school and another for the community? The school needs the bath and gymnasium from nine to three; the community from four to ten. One is supplementary to the other. Many of the downtown schools maintain two gymnasiums: one on the top floor for the school, which is used one or two hours a day, and another on the ground floor, which is used during the summer vacation and in the evenings. The public gets a comparatively small return from these gymnasiums, because each is used so little; and the noise which is incident to gymnastic work in the upper gymnasium disturbs the classrooms below. The ground floor gymnasium is sunless and dark and dusty. Have not the Germans really solved the problem by putting the gymnasium and bath in a separate building in the school yard? In this way the school is not annoyed by the dust and noise incident to exercise, and the building is available for the use of the public as a municipal gymnasium and bath after school hours. The school ground is the best place for these institutions because duplication is thus avoided, and the utility is thus centrally located. It will be seen that by this means the city would get twice as much use of its plant as it is able to do at present. The municipal gymnasium and bath are used almost exclusively in the late afternoon and evening, while the school needs the gymnasium and bath during the forenoon and the early part of the afternoon. Thus, they would be in use nearly all the time. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Great American City

"In his magisterial Great American City, Robert J. Sampson puts social scientific data behind an argument that we all feel and experience everyday: the neighborhood you live in has a big effect on your life and the city you live in. Not only does your neighborhood determine where your nearest hospital is, what kind of schools your children can attend, or how many police officers you might encounter (and how they respond to you), it affects how you feel, how you think about the world and your place in it. Like many sociologists before him, Sampson looks to Chicago to make his insightful interventions, based on extensive data collected across the city's diverse neighborhoods. This edition includes a new afterword by Sampson reflecting on changes in Chicago and the country that have occurred since the book was initially published. He notes the increase in gun violence, both among civilians and police killings of civilians, as well as steady or growing rates of segregation despite an increase in diversity. With these changes have come new research, much of it a continuation or elaboration of the work in Great American City. He updates readers on the status of the research initiative that serves as the basis of Great American City, the Project on Human Development in Chicago Neighborhoods (PHDCN), and summarizes how scholars have taken up his work. Many of these scholars have new tools at their disposal with the rise of big data; Sampson remarks on these changes in the field"--

America City

Arthur C. Clarke Award-Winning Author 'An uneasy read that manages to feel both timely and urgent... Beckett offers an intelligent, visceral reminder that unless we change what today looks like, tomorrow will be turbulent indeed.' - Guardian America, one century on: a warmer climate is causing vast movements of people. Droughts, floods and hurricanes force entire populations to simply abandon their homes. Tensions are mounting between north and south, and some northern states are threatening

to close their borders against homeless fellow-Americans from the south. Against this backdrop, an ambitious young British-born publicist, Holly Peacock, meets a new client, the charismatic Senator Slaymaker, a politician whose sole mission is to keep America together, reconfiguring the entire country in order to meet the challenge of the new climate realities as a single, united nation. When he runs for President, Holly becomes his right hand woman, doing battle on the whisperstream, where stories are everything and truth counts for little. But can they bring America together - or have they set the country on a new, but equally devastating, path?

Hell and Back

Sin City is a town where everyone is on the wrong side of the law, even the cops. Enter Wallace, mysterious man of integrity and strength. Out for an evening drive, he prevents a beautiful woman from committing suicide, and in doing so inadvertently takes a plunge to Hell and back. Adults only.

The Best American Newspaper Narratives, Volume 7

This anthology collects the ten winners of the 2019 Best American Newspaper Narrative Writing Contest, run by the Mayborn Literary Nonfiction Conference. The event is hosted by the Frank W. and Sue Mayborn Graduate Institute of Journalism at the University of North Texas. The conference launched the competition to honor exemplary narrative work and to encourage narrative nonfiction storytelling at newspapers across the United States. First place winner: Eli Saslow, "It Was My Job, and I Didn't Find Him" (The Washington Post), narrates the life of Scot Peterson, the former officer at Marjory Stoneman Douglas High School in Parkland, Florida, who faced public scrutiny in the wake of the school shooting. Second place: Elizabeth Bruenig, "What Do We Owe Her Now?" (The Washington Post), is the story of Amber Wyatt, a high school rape victim and the investigation without prosecution or even an arrest. Third place: Hannah Dreier, "The Disappeared" (ProPublica), follows the painful journey of a mother who lost her 15-year-old son to gang violence in a Long Island, New York, community. Runners-up include Jamie Thompson, "Standoff" (The Dallas Morning News); Lane DeGregory, "Lincoln's Shot" (Tampa Bay Times); Jenna Russell, "The World, the Stage, the Way Ahead" (The Boston Globe); Evan Allen, "Under a Dark Sky, a Baby is Born" (The Boston Globe); Lisa Gartner, "She's Taught at the Parkland High School for 14 Years. Can She Go Back?" (Tampa Bay Times); Claire McNeill, "So You Remember the Student Who Was Shot at FSU? He's Pretty Sure We've All Moved On" (Tampa Bay Times); and Bethany Barnes, "Targeted" (The Oregonian).

The American City; Volume 11

A comprehensive guide to the history and development of cities in the United States, from colonial times to the early 20th century. This book covers a wide range of topics, including urban planning, architecture, infrastructure, social welfare, and politics, and offers insights into the unique challenges and opportunities presented by the American city. Whether you're a scholar, a policy maker, or just a curious reader, this book is an essential resource. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Research in the Social Scientific Study of Religion, Volume 7

The purpose of this book is to provide an outlet for original research articles examining the role and value of religious and spiritual constructs across the social sciences. The aim of the series is to include an international and interfaith voice to this research dialogue. An effort is made to be interdisciplinary and academically eclectic. The articles in each volume represent a wide array of perspectives and research projects. Most of the articles report the findings of quantitative or qualitative investigations, but some deal with methodology, theory, or applications of social science studies in the field of religion, and some are applied, demonstrating the relevance of the social sciences to religious organizations and their clergy. The value of the volume is that it gives to researchers in this area a broad perspective on the issues and methods of religious research across a spectrum of academic disciplines. The aim of the book is to stimulate a creative, integrative dialogue that will enhance interdisciplinary research.

The Boardgamer Volume 7

The Boardgamer magazine was a quarterly magazine devoted primarily, but not exclusively, to the coverage of Avalon Hill / Victory Games titles and to other aspects of the boardgaming hobby. Initially, The Boardgamer's publication ran concurrently with Avalon Hill's house magazine, The General, but instead of focusing on new releases, it devoted coverage to those classic, Avalon Hill games which no longer graced the pages of The General. Following the cessation of The General in June 1998, The Boardgamer was the primary periodical dedicated to the titles from AH/VG, until its final issue in 2004. The contents of this volume consists of: Color War In Gangsters - Strategies of Tournament Champions New Optional Rules For Gangsters - Bombs, Shootouts & Cops BOARDGAMER's Special Panzerblitz Issue - Errata Blackbeard PBeM Series Replay - High Adventure on the Cyber Seas Sailing The Cyber-Seas - Blackbeard PBeM Dreams Of Empire - Freedom In The Galaxy Revisited Poland On A Budget - An Alternate Opening In 4th Edition Third Reich Saratoga Campaign - A Revised 1776 Scenario A New "Young Kid" Is On The Horizon - Conquest 2001 Victory In The Pacific Report War And Peace - Question Box Yom Kipper - A Scenario For Flashpoint: Golan Solving The Polish Problem - Alternative Opening Attacks For Third Reich 4th Ed Common Errors In The Play Of Gunslinger - A Schizophrenic Look The Showdowns Of Gunslinger - Analysis Of Showdown #5: The Ambush What Are Those Indians Doing In My Backyard? - An Analysis Of Gunslinger Showdown #6: The Raid The Australian Strategy - Another Path To IJN Dominance In Victory In The Pacific Atlantic Fleet - Variant For Victory In The Pacific Great Thoroughbreds Of The Past - More Races For Win Place & Show Rules Clarifications For Dune Tokyo Express Clarifications - Question Box A Gunnery Facing Device - For Jutland Insert: Countersheet for Flashpoint: Golan Variant Scenario New Scenarios For Israeli Defense Force - Also Errata For IDF Italy On A Budget - Early Italian Play In 4th Edition Third Reich Third Reich Workshop - A Little Quiz I Joins dah Mob. The American City

Contents: Toward an "Imperial City": Daniel H. Burnham and the City Beautiful Movement, Mario Manieri-Elia; From Parks to the Region: Progressive Ideology and the Reform of the American City,

Francesco Dal Co; *The City in Agrarian Ideology* and Frank Lloyd Wright: *Origins and Development of Broadacres*, Giorgio Cuicci; *The Disenchanted Mountain: The Skyscraper and the City*, Manfredo Tafuri.

Arbitrary Lines

It's time for America to move beyond zoning, argues city planner M. Nolan Gray in *Arbitrary Lines: How Zoning Broke the American City and How to Fix It*. With lively explanations, Gray shows why zoning abolition is a necessary--if not sufficient--condition for building more affordable, vibrant, equitable, and sustainable cities. Gray lays the groundwork for this ambitious cause by clearing up common misconceptions about how American cities regulate growth and examining four contemporary critiques of zoning (its role in increasing housing costs, restricting growth in our most productive cities, institutionalizing racial and economic segregation, and mandating sprawl). He sets out some of the efforts currently underway to reform zoning and charts how land-use regulation might work in the post-zoning American city. *Arbitrary Lines* is an invitation to rethink the rules that will continue to shape American life--where we may live or work, who we may encounter, how we may travel. If the task seems daunting, the good news is that we have nowhere to go but up

Close-Up

"Grady Clay looks hard at the landscape, finding out who built what and why, noticing who participates in a city's success and who gets left in a 'sink,' or depressed (often literally) area. Clay doesn't stay in the city; he looks at industrial towns, truck stops, suburbs—nearly anywhere people live or work. His style is witty and readable, and the book is crammed with illustrations that clarify his points. If I had to pick up one book to guide my observations of the American scene, this would be it."—Sonia Simone, *Whole Earth Review* "The emphasis on the informal aspects of city-shaping—topographical, historical, economic and social—does much to counteract the formalist approach to American urban design. *Close-Up*...should be required reading for anyone wishing to understand Americans and their cities."—Roger Cunliffe, *Architectural Review* "Close-Up is a provocative and stimulating book."—Thomas J. Schlereth, *Winterthur Portfolio* "Within this coherent string of essays, the urban dweller or observer, as well as the student, will find refreshing strategies for viewing the environmental 'situations' interacting to form a landscape."—*Dallas Morning News* "Clay's *Close-Up*, first published in 1973, is still a key book for looking at the real American city. Too many urban books and guidebooks concentrate on the good parts of the city....Clay looks at all parts of the city, the suburbs, and the places between cities, and develops new terms to describe parts of the built environment—fronts, strips, beats, stacks, sinks, and turf. No one who wants to understand American cities or to describe them, should fail to know this book. The illustrations are of special interest to the guidebook writer."—*American Urban Guidenotes*

The Death and Life of Great American Cities

Compassionate, bracingly indignant, and keenly detailed, a monumental work that provides an essential framework for assessing the vitality of all cities. "The most refreshing, provocative, stimulating and exciting study of this [great problem] which I have seen. It fairly crackles with bright honesty and common sense." —*The New York Times* A direct and fundamentally optimistic indictment of the short-sightedness and intellectual arrogance that has characterized much of urban planning in this century, *The Death and Life of Great American Cities* has, since its first publication in 1961, become the standard against which all endeavors in that field are measured. In prose of outstanding immediacy, Jane Jacobs writes about what makes streets safe or unsafe; about what constitutes a neighborhood, and what function it serves within the larger organism of the city; about why some neighborhoods remain impoverished while others regenerate themselves. She writes about the salutary role of funeral parlors and tenement windows, the dangers of too much development money and too little diversity.

Cities of the World

Remarkably, more than half of the world's population now lives in cities, and the numbers grow daily as people abandon rural areas. This fully updated and revised seventh edition of the classic text offers readers a comprehensive set of tools for understanding the urban landscape, and, by extension, the world's politics, cultures, and economies. Providing a sweeping overview of world urban geography, noted experts explore the eleven major global regions. Each regional chapter considers urban history, economy, culture, and environment, as well as urban spatial models and problems and prospects. Each

begins with two facing pages: a regional map that shows the major cities and a table of basic statistical information about cities and urbanization in each region and a list of ten salient points about that region's urban experience. Chapters conclude with a list of references, including films and webpages, which can be used by the student and instructor for additional information about specific cities. This edition adds the important new themes of climate change and migration, while continuing to focus specifically on sustainability, water, technology, social and environmental justice, security and conflict, the history of urban settlement, urban planning trends, and daily life. Vignettes of key cities give the reader a vivid understanding of daily life and the "spirit of place." The opening chapter presents an overview of key terms and concepts and explores contemporary world urbanization, and a concluding chapter projects the world's urban future. Liberally illustrated in full color with a new selection of photographs, maps, and diagrams, the text also includes a rich array of textboxes to highlight key topics ranging from migration and immigration to LGBTQ activism, human security, and climate change. Clearly written and timely, *Cities of the World* will be invaluable for those teaching introductory or advanced classes on global cities, regional geography, the developing world, and urban studies.

Lost in the American City

This work looks at European reactions to America and American cities in the 19th century. He explores the changes in American 19th century urban culture which made America so different and so impossible to map for the European, and which made American modernity so unreadable and challenging.

Frank Miller's Sin City Volume 7: Hell and Back (Deluxe Edition)

Experience the biggest, baddest yarn the signature noir series has to offer in this oversized and slipcased hardcover that includes a portfolio and exclusive print. Wallace was living a pretty simple life, a good guy, an artist, trying to make his way but not willing to sacrifice his principles to do it. Then, he meets Esther. He saves her from trying to take her own life, and falls in love. But before she can explain her reasons, she's taken, kidnapped by a shadowy cabal up to serious no good. Luckily there's more to Wallace than goodness. He isn't the kind to lose his head, he's really good at killing people. And he'll kill anyone that needs killing if it gets him closer to finding Esther again. He's going to hell . . . and back. Frank Miller's return to his comic opus graphic novel series continues with the luxury edition of Volume 7 Hell and Back. High-end materials and finishes, and iconic textures from the series detail this luxury package, bringing the blood-soaked burg to life! Housed in a cloth-covered slipcase with foil stamping and printing is an oversized hardcover featuring a soft-touch matte finish with spot gloss and foil stamping. The slipcase includes a matching portfolio featuring a deluxe print of new artwork by Frank Miller. This edition does include twenty-three pages of covers and pinups from previous editions, featuring art from Eduardo Barreto, Brian Bolland, Geof Darrow, Gary Gianni, Paul Grist, R. C. Harvey, Russ Heath, Gil Kane, Jason Pearson, and Matt Wagner. As an added bonus, each volume's slipcase has a different letter from the logo, placed on the front cover in such a way that alone it looks like a splash of red wrapping around the slipcase. But when all seven volumes are together it is clear that the grouping spells out "Sin City." Discerning fans and new readers can experience the final volume of the crime noir in the deluxe edition to beat all others . . . to a bloody pulp! FOR MATURE READERS

Hell and Back, the final volume of Frank Miller's signature series, is the biggest and baddest Sin City of them all! This newly redesigned edition features a brand--new cover by Miller--some of his first comics art in years! It's one of those clear, cool nights that drops in the middle of summer like a gift from on high. If it weren't for the rent, Wallace wouldn't have a care in the world. Then he sees Esther, about to throw it all away--and throw herself off a cliff. Wallace jumps in after her, saves her life, and falls in love, but before he can find out what she was running from, she's gone again, kidnapped. But Wallace isn't the kind to lose his head. He's calm. Like a monk. Like an executioner. And he'll find them. With a new look generating more excitement than ever before, this third edition is the perfect way to attract a whole new generation of readers to Frank Miller's masterpiece! * Over a million Sin City books in print! * New cover by Frank Miller! * With Miller and co-director Robert Rodriguez gearing up for Sin City 2, this third edition is being released at just the right time! * *Hell and Back* is planned for a future Sin City film, starring Johnny Depp as Wallace

Frank Miller's Sin City Volume 7: Hell and Back 3rd Edition

In this eye-opening cultural history, Brian Tochtermann examines competing narratives that shaped post--World War II New York City. As a sense of crisis rose in American cities during the 1960s and 1970s, a period defined by suburban growth and deindustrialization, no city was viewed as in its death throes more than New York. Feeding this narrative of the dying city was a wide range of representations in film, literature, and the popular press--representations that ironically would not have been produced if not for a city full of productive possibilities as well as challenges. Tochtermann reveals how elite culture producers, planners and theorists, and elected officials drew on and perpetuated the fear of death to press for a new urban vision. It was this narrative of New York as the dying city, Tochtermann argues, that contributed to a burgeoning and broad anti-urban political culture hostile to state intervention on behalf of cities and citizens. Ultimately, the author shows that New York's decline--and the decline of American cities in general--was in part a self-fulfilling prophecy bolstered by urban fear and the new political culture nourished by it.

Volume VII of the Cambridge History of American Literature examines a broad range of American literature of the past half-century, revealing complex relations to changes in society. Christopher Bigsby discusses American dramatists from Tennessee Williams to August Wilson, showing how innovations in theatre anticipated a world of emerging countercultures and provided America with an alternative view of contemporary life. Morris Dickstein describes the condition of rebellion in fiction from 1940 to 1970, linking writers as diverse as James Baldwin and John Updike. John Burt examines writers of the American South, describing the tensions between modernization and continued entanglements with the past. Wendy Steiner examines the postmodern fictions since 1970, and shows how the questioning of artistic assumptions has broadened the canon of American literature. Finally, Cyrus Patell highlights the voices of Native American, Asian American, Chicano, gay and lesbian writers, often marginalized but here discussed within and against a broad set of national traditions.

The Cambridge History of American Literature: Volume 7, Prose Writing, 1940-1990

The fight for the future of the city street between pedestrians, street railways, and promoters of the automobile between 1915 and 1930. Before the advent of the automobile, users of city streets were diverse and included children at play and pedestrians at large. By 1930, most streets were primarily a motor thoroughfare where children did not belong and where pedestrians were condemned as "jaywalkers." In *Fighting Traffic*, Peter Norton argues that to accommodate automobiles, the American city required not only a physical change but also a social one: before the city could be reconstructed for the sake of motorists, its streets had to be socially reconstructed as places where motorists belonged. It was not an evolution, he writes, but a bloody and sometimes violent revolution. Norton describes how street users struggled to define and redefine what streets were for. He examines developments in the crucial transitional years from the 1910s to the 1930s, uncovering a broad anti-automobile campaign that reviled motorists as "road hogs" or "speed demons" and cars as "juggernauts" or "death cars." He considers the perspectives of all users—pedestrians, police (who had to become "traffic cops"), street railways, downtown businesses, traffic engineers (who often saw cars as the problem, not the solution), and automobile promoters. He finds that pedestrians and parents campaigned in moral terms, fighting for "justice." Cities and downtown businesses tried to regulate traffic in the name of "efficiency." Automotive interest groups, meanwhile, legitimized their claim to the streets by invoking "freedom"—a rhetorical stance of particular power in the United States. *Fighting Traffic* offers a new look at both the origins of the automotive city in America and how social groups shape technological change.

Ed: SUNY, Buffalo, Revised papers from two conferences, 1992 and 1993.

The American City

The Fall of a Great American City is the story of what is happening today in New York City and in many other cities across America. It is about how the crisis of affluence is now driving out everything we love most about cities: small shops, decent restaurants, public space, street life, affordable apartments, responsive government, beauty, idiosyncrasy, each other. This is the story of how we came to lose so much—how the places we love most were turned over to land bankers, billionaires, the worst people in the world, and criminal landlords—and how we can - and must - begin to take them back. Co-published with Harper's Magazine, where an earlier version of this essay was originally published in 2018. The landlords are killing the town. As New York City approaches the third decade of the twenty-first century, it is in imminent danger of becoming something it has never been before: unremarkable. By unremarkable I don't just mean periodic, slump-in-the-art-world, all-the-bands-suck, cinema-is-dead boring. I mean flatlining. No longer a significant cultural entity but a blank white screen of mere existence. I mean The-World's-Largest-Gated-Community-with-a-few-cupcake-shops. For the first-time in our history, creative-young-people-will-no-longer want-to-come-here boring. Even, New-York-is-over boring. Or worse, New York is like everywhere else. Unremarkable. This is not some new phenomenon, but a cancer that's been metastasizing on the city for decades now. Even worse, it's not something that anyone wants, except the landlords, and not even all of them. What's happening to New York now—what's already happened to most of Manhattan, its core, and what is happening in every American city of means, Boston, Washington, San Francisco, Seattle, you name it—is something that almost nobody wants, but everybody gets. As such, the current urban crisis exemplifies our wider crisis: an America where we believe that we no longer have any ability to control the systems we live under.

A collection of original essays exploring the history of the various American religious traditions and the meaning of their many expressions The Blackwell Companion to American Religious History explores the key events, significant themes, and important movements in various religious traditions throughout the nation's history from pre-colonization to the present day. Original essays written by leading scholars and new voices in the field discuss how religion in America has transformed over the years, explore its many expressions and meanings, and consider religion's central role in American life. Emphasizing the integration of religion into broader cultural and historical themes, this wide-ranging volume explores the operation of religion in eras of historical change, the diversity of religious experiences, and religion's intersections with American cultural, political, social, racial, gender, and intellectual history. Each chronologically-organized chapter focuses on a specific period or event, such as the interactions between Moravian and Indigenous communities, the origins of African-American religious institutions, Mormon settlement in Utah, social reform movements during the twentieth century, the growth of ethnic religious communities, and the rise of the Religious Right. An innovative historical genealogy of American religious traditions, the Companion: Highlights broader historical themes using clear

and compelling narrative Helps teachers expose their students to the significance and variety of America's religious past Explains new and revisionist interpretations of American religious history Surveys current and emerging historiographical trends Traces historical themes to contemporary issues surrounding civil rights and social justice movements, modern capitalism, and debates over religious liberties Making the lessons of American religious history relevant to a broad range of readers, The Blackwell Companion to American Religious History is the perfect book for advanced undergraduate and graduate students in American history courses, and a valuable resource for graduate students and scholars wanting to keep pace with current historiographical trends and recent developments in the field.
