Two on a Sled

After being required to leave a big city home for a promotion in rural Virginia, the widow, Lizbeth, and her daughter, Dendy, seek a quiet life with church and making new friends. Due to Dendy's boredom they turn to an old Ouija board and encounter exciting, yet disturbing, messages. Lizbeth's attraction to a married man, teen turbulence and cryptic happenings add to the mystery of what lies ahead. Will Lizbeth ever remarry? Why the attraction to this man? Is there anything to Ouija's revelations? What secrets are revealed? "Two On A Sled, A.J. Lloyd's novel, can best be described as a modern day gothic romance with interesting, believable characters who make the unique tale come to life against a background of rural idiosyncrasies and occult drama. This book sparkles." Ardyce Kinsley, author of The Fitzhugh Lee Sampler and Passage to Sharps, From Plantation to Village

Frankie Sparks and the Big Sled Challenge

Frankie Sparks uses her inventing skills to build the best sled ever in this third chapter book in the STEM inspired Frankie Sparks, Third-Grade Inventor series. Frankie Sparks can't wait to enter the town-wide sled design contest. With the help of a team, she must design and build a sled using only cardboard and duct tape. And there are PRIZES! Each team in the contest will be judged on: 1. Best looking sled. 2. Fastest sled. 3. Most team spirit. Even though Frankie might know a lot about building a sled, it turns out she still has a lot to learn about building a team. With lots of twists, turns, and big bumps along the way, can Frankie and her fellow super-sled designers create a dream machine—and a dream team?

Ten on the Sled

Ten on the Sled Storybook Greetings

Yukon Quest Sled Dog Race

The Yukon Quest is more than just a sled dog race. It was the dream of two Fairbanksans--a recreational musher and an amateur historian--who conceived of a race closer to the roots of Alaskan dog sledding. The Yukon Quest is a 1,000-mile slog through trails used only for this race that cross mountains, rivers,

and lakes in some of the harshest weather on the planet. It celebrates the history of the dogs that carried freight and delivered mail, dogs that many times over saved lives before the advent of aviation and snowmachines made them obsolete. The inaugural Yukon Quest Sled Dog Race of 1984 was a great success with the wholehearted support of the Fairbanks community, and it has become a much-anticipated annual event ever since.

Red Sled

Find out what happens when a cast of unlikely woodland friends discover a well-loved sled outside a cozy cabin in this whimsical wintertime Classic Board Book! In this almost wordless story, a host of woodland creatures take a child's sled for a nighttime joy ride. Their whimsical ride is gorgeously depicted in bold watercolor, complemented by humorous expressions and pitch-perfect sound effects. With a timeless tone and classic characters, Red Sled is a wintertime favorite for parents and little ones alike.

The Sled Ride

Illustrations and rhyming text extol the joys of a wondrous sled ride.

The Enchanted Sled

This book documents the return of the surviving sled dogs of the Norwegian Antarctic Expedition of 1910–1912 from Antarctica, where they had helped Roald Amundsen become the first human to reach the South Pole. This book is the sequel to the highly acclaimed Roald Amundsen's Sled Dogs: The Sledge Dogs Who Helped Discover the South Pole. It chronicles how the sled dogs were used internationally to further promote the expedition's great achievement and follows some of the dogs as they undertake subsequent expeditions – with Douglas Mawson's Australasian Antarctic Expedition of 1911–1914, which made scientific discoveries, and with Arve Staxrud's Norwegian Arctic Rescue Mission of 1913, which saved members of the Herbert Schröder-Stranz German Arctic Expedition. The book tracks the remaining 39 sled dogs to their next challenging adventures and their final destinations in Argentina, Norway, Antarctica, and Australia. Like its predecessor, the book portrays how Amundsen continued to utilize the Polar dogs – both in their lives and in their deaths – to propel his career and solidify his expedition's image.

The Return of the South Pole Sled Dogs

Blow by blow accounts of one young man's two Iditarod Trail Sled Dog Race runs. Takes the reader down the trail through the author's eyes, ears, legs, and hands. Primary focus tries to stay on the incredible Alaskan Husky sled dogs who pull the author across the wild breadth of Alaska. As handler for his uncle, four time Iditarod champion Martin Buser, Chapoton goes from rookie to Iditarod finisher, then does it again the following year. Dog lovers and adventure fans will enjoy this fast paced easy read.

The Sled

Features an audio read-along! Shrieks of joy ensue when Big Brown Bear devises a clever sled that can carry four bears in this quintessential winter adventure. Here's a bright red sled On a snowy day. Where are the bears To come out and play? The little bears are ready to play in the snow. But — oh, no! Their sled is too small! It's not as much fun to go sledding only two at a time, but what can they use to carry them all? Luckily, Big Brown Bear has an idea — and it starts with a belly flop!

A Tale of Two Iditarods

This book is an analytical account of how Roald Amundsen used sledge dogs to discover the South Pole in 1911, and is the first to name and identify all 116 Polar dogs who were part of the Norwegian Antarctic Expedition of 1910–1912. The book traces the dogs from their origins in Greenland to Antarctica and beyond, and presents the author's findings regarding which of the dogs actually reached the South Pole, and which ones returned. Using crewmember diaries, reports, and written correspondence, the book explores the strategy, methodology, and personal insights of the explorer and his crew in employing canines to achieve their goal, as well as documents the controversy and internal dynamics involved in this historic discovery. It breaks ground in presenting the entire story of how the South Pole was truly discovered using animals, and how deep and profound the differences of perception were regarding

the use of canines for exploration. This historic tale sheds light on Antarctic exploration history and the human-nature relationship. It gives recognition to the significant role that animals played in this important part of history.

Bears in the Snow

After twenty years of 'living the dream,' author Laurie Niedermayer shares her story. From the silly antics in the beginning to the last official tour taken by the teams, this book is a nostalgic look at some of the reality, adventures and misadventures of life on the trail. Beginning with her first Siberian Husky, Laurie's journey has taken her from novice dog sled racer to film trainer, successful tour operator through to retirement. Her love of the dogs and passion for the sport clearly comes through in her tributes to the dogs that first started her on this path. Based on the condensed journal entries from thousands of miles of running trails, she says, "Yes, folks, this really happened, believe me, Hollywood couldn't write this stuff..."

Roald Amundsen's Sled Dogs

The Sled Book: Notes Concerning Winter's Favorite Pastime by Brice Hoskin A successful sledmaker takes readers through a brief history of sleds and sledding, and taps into the emotional pull that many of us feel when we see those first frosty snowflakes-and a classic wood-and-metal flyer. From the use of sleds in the Olympic Games and the proper technique for kick sledding to choosing a good hill and making the perfect apres-ski cocoa, this book is sure to charm readers of all ages.

Confessions of a Sled Dog Addict

A team of geologists comes to Siberia, 5,000 km east of Moscow, in search of the diamonds, called in Russian, almaz or brilliants. Together with the wealthy patriot-sponsors, they are on the mission to save the economically wracked country from the embezzlement and robbery of valuable resources. And they find it the Diamond Triangle with 50 carat crystals. At the beginning, the explorers do not suspect that it will be hunted down by other adverse forces. The people in the taiga realize their almost unbearable task in time when it is too late to skip off and run away. They come upon many perilous snares among the snowy terrains and mountains and venture into the wilderness of that remote land, which lies east of the Ural Mountains. They are entrapped all around by all kind of bounty hunters, who viciously compete for the premium prize for their heads, appraised in million dollars. The group of faithful committed people turns into the fugitives in the Siberian taiga because they possess, so rare in the present human world qualities patriotism and belief. Then, in a remote corner of Siberia, encircled from all sides by the bounty hunters and very close to a tragic finale, the fugitives hear the battle sounds; help comes from their real friends and brothers the pomors from the White Sea shores and aboriginal Nenets people, historical owners of the tundra. The sea people pomors, called in the past Ice Vikings, successfully get through that secret century-old route, north of the Arctic Circle, across the Kara Sea and Yamal Peninsula. The route their ancestors once upon a time had traced in deviation of the ruthless tsar guards and Moscows rulers. And now, almost four centuries later, they rediscover the route to freedom and escape from other merciless rulers. Once again, as in the past, the northern people of this enormous country come to help and protect against the dominance of brutal power.

The Sled Book

Imagine how he or she would react when you say to him or her "Look what I have for you!" This is the perfect sled dog racing gift to show your loved one appreciation and love. It can be used as a notebook, journal, diary, planner, composition book, or for Recording dreams & travel memories, writing down routines ... Book size is 8.5 x 11 inches/ 21.59 x 27.94 centimeters and 120 pages. This journal notebook is the perfect gift for sled dog racing lovers & fans for: Birthdays Weddings Births Graduations Holidays Valentine's Day, Mother's Day Just Because or any occasion... Some features are: Premium matte cover design Printed on high quality contains 11 motivational quotes for success. So what are you waiting for? Grab yours now!

Sled Dogs

Excerpt from Ten Thousand Miles With a Dog Sled: A Narrative of Winter Travel in Interior Alaska This volume deals with a series of journeys taken with a dog team over the winter trails in the interior of Alaska. The title might have claimed fourteen or fifteen thousand miles instead of ten, for the book was

projected and the title adopted some years ago, and the journeys have continued. But ten thousand is a good round titular number, and is none the worse for being well within the mark. So far as mere distance is concerned, anyway, there is nothing noteworthy in this record. There are many men in Alaska who have done much more. A mail carrier on one of the longer dog routes will cover four thousand miles in a winter, while the writer's average is less than two thousand. But his sled has gone far off the beaten track, across the arctic wilderness, into many remote corners; wherever, indeed, white men or natives were to be found in all the great interior. These journeys were connected primarily with the administration of the extensive work of the Episcopal Church in the interior of Alaska, under the bishop of the diocese; but that feature of them has been fully set forth from time to time in the church publications, and finds only incidental reference here. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

The Diamond Triangle

One of the effective methods of controlling the European corn borer is burning the infested cornstalks or removing them from the field before May 15. The stalks must be broken or cut off at ground level and raked into windrows or piles. It is important that all of the stalks, stubble, and trash be removed or destroyed. If clean raking is to be done the stalks must all be cut free. To accomplish this simple stalk shavers have been developed.

There Are Two Types of Hobbies Sled Dog Racing and the Others

Along Alaskan Trails, Adventures in Sled Dog History, by Helen Hegener, is a collection of true stories about Alaskan sled dogs and the role they played in the development of the north, with dozens of historic photos from the archives of the Alaska State Library, the University of Alaska Fairbanks, and other sources. Among the tales shared in this book is the story of an intrepid Japanese musher who blazed a wide swath across Alaska, an Archdeacon who wrote the classic Ten Thousand Miles with a Dogsled, legendary mushers such as Scotty Allan and Leonhard Seppala, Arctic explorers like Ernest de Koven Leffingwell, and intrepid adventurers like Slim Williams and Mary Joyce. And the dogs! From Baldy to Balto, Togo to Wolf, Chinook to Rembrandt, these are the dogs who blazed across Alaskan trails and into the history books. From the fiercely-argued conflict between sled dogs and reindeer, to the spooky apparitions along the Iditarod Trail, this book captures the fascinating stories of the dogs of the north.

Ten Thousand Miles With a Dog Sled

Favourite winter activities provide a springboard for this fantastic language arts unit designed to keep students guessing what new and exciting sport will be the subject of tomorrow's lesson. Major topics include: Bobsled, Hockey, Curling, Luge, Cross Country Skiing, Downhill Skiing, Snowmobiling, and Skating. Every day, a different exciting winter sport is the topic of interest to keep students motivated. Lesson plans give suggested teacher strategies for each of the lessons. Every day there is a brainstorming activity, a study of new vocabulary, a spelling activity, work in the activity book, work in the writing book, and a homework page. This Sports unit provides a teacher and student section with a variety of reading passages, lessons, activities, crossword, and word search to create a well-rounded lesson plan.

Construction of Sled-type Cornstalk Shavers

One of the effective methods of controlling the European corn borer is the burning of the infected cornstalks before May 15. The stalks must be broken or cut off at ground level and raked into piles or windrows. The practice of winter poling--dragging a heavy log or railroad iron sideways across the field to break off the stalks--usually leaves many of them still firmly rooted in the ground. If clean raking is to be done the stalks must be cut free. To accomplish this a simple stalk shaver has been developed.

I'm Reading About the Iditarod topics include: An Introduction Location Carrying the Mail Carrying Medicine The Race Begins Iditarod Routes Teamwork Sleds and Supplies Commands A Dog's Life Alaskan Husky Dangerous Trails Traditions Junior Iditarod Did You Know? Amazing Race! Glossary

Winter Sports

"Santa Christina is the wife of Santa Claus," begins this cheerful tale of some doings at the North Pole, in Alaska and the Arctic, and even in New York City. Everyone knows that Mrs. Claus is a kindly helpmate without whom Christmas just wouldn't be the same, but few knew until now that she is also a splendid athlete, a star at Alaska's official state sport--dog mushing. How this came about and some of the wonderful things that resulted make up the story in Santa Christina and Her Sled Dogs. Amy Cameron's lively illustrations bring George Kelly's charming story to vibrant life, full of happy dogs, playful reindeer, and enough presents to please girls and boys the world over.

Construction of a Sled-type Cornstalk Shaver

An inspiring book about dedication, the love of dogs, and the physical endurance and mental toughness needed to run the Iditarod sled dog race -- from a female perspective. Lisa Frederic didn't set out to run the Iditarod. She just fell in love with the event and wanted to help. She ended up working as a volunteer for the Trail Committee at various checkpoints. Then she helped Iditarod champion Jeff King train his puppies. She had never mushed before. She was a rookie, but a rookie with heart and drive. She started out with short races and eventually raced the 1,049 miles from Anchorage to Nome in the Iditarod. Her story speaks to everyone who has ever followed a dream and found that the dream realized is even bigger than the imagined one.

Laboratory Astrophysics: Studying the Stuff of Stars - Laboratory Astrophysics: Studying the Stuff of Stars by MIT Plasma Science and Fusion Center 516 views 2 years ago 41 minutes - Instabilities in the Crab Nebula jet; magnetic reconnection in the magnetopause; collisionless shocks in the universe, caused by ...

Intro

Overview

Traditionally, astrophysics was constrained to observations, theory, and simulation Observation

The laboratory is a much more controlled environment, allowing for better physics explorations and model validation

Inertial confinement fusion facilities can be used to generate plasma for lab astro studies

The NIF experiments are relevant to astrophysical systems

Inertial confinement fusion (ICF) implosions use lasers to reach fusion relevant densities and temperatures

ICF implosions can reach similar conditions to the interior of stars

ICF implosions offer a better platform than accelerators to study Stellar nucleosynthesis

Experiments at OMEGA have measured the $3\text{e}3\text{He}$ proton spectrum

Theoretical modeling and numerical simulations suggest that the kink be a consequence of fields and current-driven MHD instabilities

To mimic the Crab jet, a laboratory experiment requires magnetic fields with the right properties

Physical parameters and similarity scaling between the laboratory Jet and the Crab nebula jet

To scale the laboratory results to the environment of the Crab nebula equations need to be invariant under the transformations for the two s

different parameter regimes

Classical Sweet-Parker reconnection model cannot explain the fast reconnection

W.Fox et al investigated the onset of the tearing instability in a laser magnetic reconnection experiment at the OMEGA Laser Facility
