Secret training manuals, magic swords, and flying kung fu masters—these are staples of Chinese martial arts movies and novels, but only secret manuals have a basis in reality. Chinese martial arts masters of the past did indeed write such works, along with manuals for the general public. This collection introduces Western readers to the rich and diverse tradition of these influential texts, rarely available to the English-speaking reader. Authors Brian Kennedy and Elizabeth Guo, who coauthor a regular column for Classical Fighting Arts magazine, showcase illustrated manuals from the Ming Dynasty, the Qing Dynasty, and the Republican period. Aimed at fans, students, and practitioners, the book explains the principles, techniques, and forms of each system while also placing them in the wider cultural context of Chinese martial arts. Individual chapters cover the history of the manuals, Taiwanese martial arts, the lives and livelihoods of the masters, the Imperial military exams, the significance of the Shaolin Temple, and more. Featuring a wealth of rare photographs of great masters as well as original

drawings depicting the intended forms of each discipline, this book offers a multifaceted portrait of Chinese martial arts and their place in Chinese culture.

The Shaolin Temple was built in 496 CE during the period of the Northern and Southern Empires (Nán B i Cháo), at the foot of the Song Mountains in the north-central province of Honan, China. In 520 CE, a Buddhist patriarch from India by the name of Bodhidharma (known as Ta-Mo in China) visited the Shaolin Temple to spread the new Chan (Zen) philosophy. Finding the monks of the temple in poor health and stamina, Ta-Mo created a new training regimen consisting of a unique blend of moving meditations and defensive combat skills. This practice sparked the beginning of Shaolin Fist Kung-Fu, which would rise to become the literal foundation for almost every known martial style! For over 20 years, SHAOLIN Martial Arts Canada has been cultivating the virtues of Respect, Self Control

Martial Arts and Self-Defence for Everyone

This book contains proven steps and strategies on how to defend yourself and any person in any place, situation and time by applying only limited knowledge and ordinary items as weapons. The modern world is not always safe for people. There will always be those who will try to take the money, belongings or even the lives of others. Women are also at risk of being raped and most of them were killed trying to defend themselves. For such reasons, various military organizations, police departments and martial arts schools formulated self-defense techniques. Here are some things that you are going to learn - Hand to hand self-defense - Vulnerable point self-defense - Ground control self-defense - Joint-lock self-defense - Common self-defense mistakes to avoid - And much much more... Self defense! Will reassure and make you feel freer, safer and less vulnerable. It is packed with sensible and practical advice on how to avoid danger, whether you are in the street, in the home, at work or travelling. It suggests strategies you can use when faced with potentially difficult or dangerous situations and, in the unlikely event that your prevention techniques fail, it tells you what you should do if you are attacked.

This book is the result of over four years and four hundred episodes of Martial Arts Radio. Jeremy Lesniak, as host, has spoken with hundreds of martial artists the world over. Those stories, lessons and personal experiences coalesce here, in The Martial Artist's Handbook. Based on prominent episodes and important discussions, this book is much more than a transcript of these audio episodes. In fact, every word was re-written. This book is designed to make you think. To consider who you are, as a person and, how martial arts training and experience contributes to the person you are. With practical advice on a variety of subjects, it offers guidelines on how you might achieve your goals - in and out of training. Far from claiming authority, the author instead hopes to help you find your own authority, and use this book to that end.

The Road To Shodan: A Guide To Reaching First Degree Black Belt

A Student's Guide to Knowing More Than Your Martial Arts Master is not a how-to martial arts book, its an academic passage through the gates of martial arts at a level beyond what today's Masters in 3 Years are taught. A Student's Guide to Knowing More Than Your Martial Arts Master is the result of the author's desire to increase all student's and Instructor's knowledge beyond their own styles information and is for those who know little about martial arts or believe they do. This book comprises previously unpublished writings together with simplified and complex explanation to expand the reader's ability to utilize new found knowledge-synthesized by the author from the traditional Korean, Okinawa, Chinese and Japanese Kata, Kuens and Hyungs. The author begins by exploding some of the myths of Karate, Taekwondo, Shaolin Fighting Art and Tang Soo Do as a noble art, and the reader can rest assured that those who take pride in breaking boards, smashing tiles or those that boast of performing outlandish feats of stripping flesh or plucking out ribs, are proving their training to create humility and humbleness did not work and are only doing carnival quality side show tricks. These individuals are playing in the leaves and branches of a great tree, without the slightest concept of the existence of a trunk. In his

descriptions of Karate, Taekwondo, Chuan Fa and Tang Soo Do martial arts, the author defines the origins in the ancient methods of unarmed combat in China, Korea and Japan and their explosive growth as independent fighting methods. The author included in this book and his many others the need to formulate precisely the communications and explanations between Master and student for what is being taught and why, to establish a standard of academic knowledge of martial arts as well as the physical, kick-punch aspects. The charts and graphs are not traditional, but they serve to establish the tools for understanding many aspects of any style's Instructions, thought and actions, and to facilitate the mastery today of the academic requirements of every style of martial arts that is being ignored for the physical kick-punch aspects. All these characteristics are explained to the reader by charts and tables that allow comparisons between styles and systems never available in the past. Lastly, the author recalls the explosion in information and oral traditions as a result of his past articles published around informing students and masters alike of the post World War II and the Korean War conditions that caused the greatest spread in martial arts in recorded history. This is a book that no martial arts Master wants his students and Instructors to read because it illustrates what little is known by the Masters academically about others styles and oral traditions and how much more there is to learn.

This guide is from my teaching to Dixon, plus his own notes and experiences. During my own journey, I was fortunate to have guidance from elders to see the true essence of martial arts. These elders were able to translate the classics into everyday language for proper understanding for me. What was presented is not my own interpretation; this is how it was told and taught to me. This is also Dixon's intention in putting this guide together; to present the materials in today's language for the later generations. Michael Tie Ying
