The Formation of National States in Western Europe

Nine essays examine and evaluate, in relationship with current political and economic conditions, the events, processes, preconditions, and developments between 1500 and 1900 which brought about the establishment of powerful nation-states.

A Social History of Western Europe, 1450-1720

This thoroughly readable and stimulating social history of Western Europe, first published in 1984, explores the family, religion and the supernatural, and the social structure and social controls of rural society. This title will be of interest not only to students, but to anyone who is anxious to understand the lives – both internal and external – of rural people in his fascinating period that is so central to everyone's past.

An Economic and Social History of Western Europe since 1945

This is the ideal companion text to A Political History of Western Europe Since 1945. It is an introductory survey which explains how western Europe built up its postwar prosperity and is moving towards continental integration. Themes treated include: the origins of the EC; consumerism; youth culture and protest; immigration; the oil crisis and its aftermath; and the contrasting experience and expectations of the Nordic world and the Mediterranean south. The book ends with the consequences of Soviet collapse. Designed for general history students, it assumes no formal knowledge of economics, and is notably accessible and user-friendly in its approach.

The Formation of National States in Western Europe

In the Middle Ages nothing that happened was ever regarded as absolutely new; each development was seen as a renewal of a former state of things. By studying the concept of empire during that period, one can understand how it caused political structures to be formed which claimed to be a continuation of the Empire of Rome.

The Concept of Empire in Western Europe from the Fifth to the Fourteenth Century

This book examines comparatively how the writing of history has been used to 'legitimate' the nation-state against socialist, communist and catholic internationalism in the modern era.

History of Western Europe

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. A Syllabus for the History of Western Europe, with References and Review Questions

Lectures delivered in Feb. 1948 under the auspices of Claremont College, Pomona College, Scripps College and Claremont Men's College.

Western Europe in the Fifth Century

By far one of the greatest history books ever written, James Robinson's classic of Western European history is an absolute must-read for anyone seeking a greater understanding of the power struggles and armed conflicts that formed the Europe, and the world, of today. Spanning over a thousand years, from the stunning fall of the western Roman Empire to the rise of the German industrial/military empire on the eve of World War I, Robinson weaves a beautiful, easy to read historical narrative of the major events and figures of European history. From Philip Augustus to Prince Metternich, from Charles Martel to the Holy Roman Empire and the Papal States, James Robinson's heavily illustrated history takes you on a journey of several lifetimes, and aims to leave you better and more informed than when you began.

Western Europe from the Middle Ages to the close of the Napoleonic Era

By far one of the greatest history books ever written, James Robinson's classic of Western European history is an absolute must-read for anyone seeking a greater understanding of the power struggles and armed conflicts that formed the Europe, and the world, of today. Spanning over a thousand years, from the stunning fall of the western Roman Empire to the rise of the German industrial/military empire on the eve of World War I, Robinson weaves a beautiful, easy to read historical narrative of the major

events and figures of European history. From Philip Augustus to Prince Metternich, from Charles Martel to the Holy Roman Empire and the Papal States, James Robinson's heavily illustrated history takes you on a journey of several lifetimes, and aims to leave you better and more informed than when you began.

The Revision of European History

This is a comprehensive account of the eight religious wars between the Christian West and the Muslim East that dominated the Middle Ages. Calling themselves "pilgrims of Christ," thousands of Europeans from all stations in life undertook the harsh and bloody quest to reclaim Jerusalem, the Church of the Holy Sepulchre, and Christ's tomb for Christendom. Robert Payne brings to life every step of the Crusaders' thousand-mile journey: the deprivation; the desperate, rapacious, and brutal raids for food and supplies; the epic battles for Antioch, Jerusalem, and Acre; the barbarous treatment of captives; and the quarrelling European princes who vied for power and wealth in the Near East. An epic tale of the glorious and the base, of unshakable faith and unspeakable atrocities, *The Dream and the Tomb* captures not only the events but the very essence of the Crusades.

A Federation For Western Europe

This volume proposes a theoretical grounding for the study of cities and the people who live and work in them. Using a threefold, interdisciplinary approach to urban identities which links agency, space, and structure, the book examines the work of three major urban theorists.

A Federation for Western Europe

This fascinating work is the first overview of its subject to be published in over half a century. The issues it deals with are key to early modern political, religious and cultural history. The seventeenth century is traditionally regarded as a period of expanding and extended liberalism, when superstition and received truth were overthrown. The book questions how far England moved towards becoming a liberal society at that time and whether or not the end of the century crowned a period of progress, or if one set of intolerant orthodoxies had simply been replaced by another. The book examines what toleration means now and meant then, explaining why some early modern thinkers supported persecution and how a growing number came to advocate toleration. Introduced with a survey of concepts and theory, the book then studies the practice of toleration at the time of Elizabeth I and the Stuarts, the Puritan Revolution and the Restoration. The seventeenth century emerges as a turning point after which, for the first time, a good Christian society also had to be a tolerant one. *Persecution and Toleration* is a critical addition to the study of early modern Britain and to religious and political history.

The Economic Reconstruction of Europe

Nylon, Plexiglas, Dynamit: Viele industrielle Erzeugnisse "verdanken" wir den Prinzipien der organischen Chemie. Prinzipien, die Chemiestudenten vielfach als trockenen Lehrstoff ohne jeden praktischen Bezug büffeln müssen. Dass es auch anders geht, zeigen Green und Wittcoff. In zehn knappen Kapiteln verknüpfen sie die Theorie mit industriellen Prozessen - ein Gewinn nicht nur für Studenten, sondern auch für Lehrende. Da die meisten Chemiestudenten in ihrem späteren Berufsleben mit Problemen der organischen Chemie konfrontiert sein werden, sollte diese breite Zielgruppe nach Ansicht der beiden Autoren schon vom Beginn ihrer akademischen Ausbildung an über industrielle Produkte und Prozesse informiert werden. *Organic Chemistry Principles and Industrial Practice* beschreibt die Geschichte der industriellen Chemie, liefert wertvolle, sonst kaum zugängliche Informationen und bietet nicht zuletzt auch zahlreiche Anekdoten aus dem reichen Erfahrungsschatz der Autoren. Beide sind langjährige Dozenten. Sie liefern eine leicht zu lesende, klar strukturierte Einführung, die tieferes Verständnis der Grundlagen der organischen Chemie und ihrer Anwendungen ermöglicht. Das Werk eignet sich hervorragend als Ergänzung zu den Lehrbüchern, kann aber auch von Studenten höherer Semester, Laborassistenten, Chemieingenieuren und Chemikern in der Industrie genutzt werden. Die Autoren zeigen unter anderem, wie aus Petroleum nützliche Dinge werden, gehen auf die zentrale Rolle der elektrophilen aromatischen Substitution ein, erzählen die "Nylon-Story"

History of Western Europe [Didactic Press Paperbacks]

This volume offers a literary and cultural history of the idea of crusading over the last millennium.

History of Western Europe (Jovian Press)

This book examines the need for co-operation between Europe and Asia, particularly in view of China's accession to the WTO. It looks at the cultural implications for closer cooperation between the two parts of the world, exploring corporate culture and leadership in integration management through mergers and acquisitions. It then goes on to discuss whether the world is big enough for several cultures or whether further integration will result in homogenisation. The authors are leading researchers in the field of economic and cultural co-operation.

An Introduction to the Sources of European Economic History, [fifteen Hundred to Eighteen Hundred/1500-1800].

This book challenges the common belief that race and racism are phenomena that began only in the modern era.

The Dream and the Tomb

This book outlines and analyzes the economic development of China between 1949 and 2007. Rather than being narrowly economic, the book addresses many of the broader aspects of development, including literacy, morality, demographics and the environment. The distinctive features of this book are its sweep and that it does not shy away from controversial issues. For example, there is no question that aspects of Maoism were disastrous but Bramall argues that there was another side to the whole programme. More recently, the current system of government has presided over three decades of very rapid economic growth. However, the author shows that this growth has come at a price. Bramall makes it clear that unless radical change takes place, Chinese growth will not be sustainable. This large, comprehensive text is relevant to all those studying the economic history of China as well as its contemporary economy. It is also useful more generally for students and researchers in the fields of international and development economics.

The Promise of the City

This book examines ideas of 'home' of Americans and Western Europeans under the influence of the two major revolutions of our times: the gender revolution and increased mobility due to globalization. It analyzes how 'home' has been politicized, as well as alternative home-making strategies that aim to transcend the 'logic of identities'.

Persecution and Toleration in Protestant England 1558-1689

Federalism and Regionalism in Western Europe seeks to clarify the relevance, problems and consequences of operating federal systems of government in Western Europe. The book analyzes and explains varieties in the allocation of resources, the decision-making process and problem-solving capacity of West-European federal and regional states

Organic Chemistry Principles and Industrial Practice

Parliamentary theory, practices, discourses, and institutions constitute a distinctively European contribution to modern politics. Taking a broad historical perspective, this cross-disciplinary, innovative, and rigorous collection locates the essence of parliamentarism in four key aspects—deliberation, representation, responsibility, and sovereignty—and explores the different ways in which they have been contested, reshaped, and implemented in a series of representative national and regional case studies. As one of the first comparative studies in conceptual history, this volume focuses on debates about the nature of parliament and parliamentarism within and across different European countries, representative institutions, and genres of political discourse.

The Cambridge Companion to the Literature of the Crusades

This open access book focuses on family diversity from a legal, demographical and sociological perspective. It investigates what is at stake in the life of homosexuals in the field of family formation, parenting and parenthood, what it brings to everyday life, the support of the law, and what its absence implies. The book shows the paths leading to the adoption of laws while demographic analyses concentrate on the link between registration of same-sex marriages and same-sex parenting with a detailed focus on Spain. The sociological chapters in this book, based upon qualitative surveys in

France, Iceland and Italy, underline how the importance of the legal structure influenced the daily life of homosexual families. As such this book is an interesting read to lawyers, demographers, sociologists, behavioural scientists, and all those working in the field.

Asia and Europe in the New Global System

Twenty-First Century Populism analyses the phenomenon of sustained populist growth in Western Europe by looking at the conditions facilitating populism in specific national contexts and then examining populist fortunes in those countries. The chapters are written by country experts and political scientists from across the continent.

The Invention of Race in the European Middle Ages

The central argument of *The Formation of the English Kingdom in the Tenth Century* is that the English kingdom which existed at the time of the Norman Conquest was defined by the geographical parameters of a set of administrative reforms implemented in the mid- to late tenth century, and not by a vision of English unity going back to Alfred the Great (871-899). In the first half of the tenth century, successive members of the Cerdicing dynasty established a loose domination over the other great potentates in Britain. They were celebrated as kings of the whole island, but even in their Wessex heartlands they probably had few means to routinely regulate the conduct of the general populace. Detailed analysis of coins, shires, hundreds, and wapentakes suggests that it was only around the time of Edgar (957/9-975) that the Cerdicing kings developed the relatively standardised administrative apparatus of the so-called 'Anglo-Saxon state'. This substantially increased their ability to impinge upon the lives of ordinary people living between the Channel and the Tees, and served to mark that area off from the rest of the island. The resultant cleft undermined the idea of a pan-British realm, and demarcated the early English kingdom as a distinct and coherent political unit. In this volume, George Molyneux places the formation of the English kingdom in a European perspective, and challenges the notion that its development was exceptional: the Cerdicings were only one of several ruling dynasties around the fringes of the former Carolingian Empire for which the late ninth, tenth, and eleventh centuries were a time of territorial expansion and consolidation.

The Politics of Home

A Source Book for Mediaeval History : Selected Documents illustrating the History of Europe in the Middle Age It will be observed that we have made use chiefly of documents, quoting from chronicles only when it seemed absolutely necessary. An exception to this general principle is found in section I, where a larger use of chronicles was rendered necessary by the lack of documentary sources for much of the period covered; but it is perhaps unnecessary to apologize for presenting selections from the important histories of Tacitus, Gregory, Einhard, and Widukind. In the matter of form (translation, omissions, arrangements, notes, etc.), we were guided by considerations of the purpose of the book. The style of most of the documents in the original is involved, obscure, bombastic, and repetitious. A faithful rendition into English would often be quite unintelligible. We have endeavored to make a clear and readable translation, but always to give the correct meaning. If we have failed in the latter it is not for want of constant effort. We have not hesitated to omit phrases and clauses, often of a parenthetical nature, the presence of which in the translation would only render the passage obscure and obstruct the thought. As a rule we have given the full text of the body of the document, but we have generally omitted the first and last paragraphs, the former containing usually titles and pious generalities, and the latter being composed of lists of witnesses, etc. We have given a sufficient number of the documents in full to illustrate these features of mediæval diplomatics. All but the most trivial omissions in the text (which are matters rather of form of translation) are indicated thus: ... Insertions in the text to explain the meaning of phrases are inclosed in brackets []. Quotations from the Bible are regularly given in the words of the Authorized Version, but where the Latin (taken from the Vulgate) differs in any essential manner, we have sometimes translated the passage literally. Within each section the documents are arranged in chronological order, except in a few cases where the topical arrangement seemed necessary. We believe that the explanatory notes in the form of introductions and foot-notes

will be found of service; they are by no means exhaustive, but are intended to explain the setting and importance of the document and the difficult or obscure passages it may contain. The reference to the work or the collection in which the original is found is given after the title of practically every document; the meaning of the references will be plain from the accompanying bibliography. The original of nearly all the documents is in Latin; some few are in Greek, Old French, or German, and in such cases the language of the original is indicated. It is impossible, of course, to give explicit directions as to the use of the book, other than the very obvious methods of requiring the student to read and analyze the documents assigned in connection with the lesson in the text-book, and of making clear to him the relation of the document to the event. It may be possible also for the teacher to give the student some notion of the meaning of "historical method"; e.g., the necessity of making allowance for the ignorance or the bias of the author in chronicles, or the way in which a knowledge of institutions is deduced from incidental references in documents. Suggestions of both sorts will be found in the introduction and notes. The teacher should insist on the use of such helps as are found in the book: notes, cross-references, glossary, etc. Groups of documents can be used to advantage in topical work: assigned topics worked up from authorities can be illustrated by documents selected from the book; e.g., imperial elections, papal elections, the Normans in Sicily, history of the Austrian dominions, Germans and Slavs on the eastern frontier, relations of the emperors and the popes before the investiture strife, etc.

English for Common Entrance 13+ Practice Book Ebook

This work sets out Austin's conclusions in the field to which he directed his main efforts for at least the last ten years of his life. Starting from an exhaustive examination of his already well-known distinction between performative utterances and statements, Austin here finally abandons that distinction, replacing it with a more general theory of 'illocutionary forces' of utterances which has important bearings on a wide variety of philosophical problems.

Higher English: Practice Papers for SQA Exams

Nicomachean Ethics Aristotle - The Nicomachean Ethics is one of Aristotle's most widely read and influential works. Ideas central to ethics—that happiness is the end of human endeavor, that moral virtue is formed through action and habituation, and that good action requires prudence—found their most powerful proponent in the person medieval scholars simply called "the Philosopher." Drawing on their intimate knowledge of Aristotle's thought, Robert C. Bartlett and Susan D. Collins have produced here an English-language translation of the Ethics that is as remarkably faithful to the original as it is graceful in its rendering. Aristotle is well known for the precision with which he chooses his words, and in this elegant translation his work has found its ideal match. Bartlett and Collins provide copious

notes and a glossary providing context and further explanation for students, as well as an introduction and a substantial interpretive essay that sketch central arguments of the work and the seminal place of Aristotle's *Ethics* in his political philosophy as a whole. The *Nicomachean Ethics* has engaged the serious interest of readers across centuries and civilizations—of peoples ancient, medieval, and modern; pagan, Christian, Muslim, and Jewish—and this new edition will take its place as the standard English-language translation.

CAE Practice Tests

The never-before-told story of Ewan Forbes and the landmark case that rocked British society and transformed transgender experience to this day 'A remarkable story' *The Times* 'Almost reads like a thriller' *Sunday Times* 'One of the most important pieces of investigative journalism ever written about trans people' *i*-----Ewan Forbes was born Elisabeth Forbes to a wealthy landowning family in 1912. It quickly became clear that the gender applied to him at birth was not correct, and from the age of six he began to see specialists in Europe for help. With the financial means of procuring synthetic hormones, Ewan was able to live as a boy, and then as man, and was even able to correct the sex on his birth certificate in order to marry. Then, in 1965, his older brother died and Ewan was set to inherit the family baronetcy. After his cousin contested the inheritance on the grounds that it could only be inherited by a male heir, Ewan was forced to defend his male status in an extraordinary court case, testing the legal system of the time to the limits of its understanding. In *The Hidden Case of Ewan Forbes*, Zoë Playdon draws on the fields of law, medicine, psychology and biology to reveal a remarkable hidden history, uncovering for the first time records that were considered so threatening that they had been removed from view for decades.

Cae

There is a great difficulty in the way of a writer who attempts to sketch a living Constitution—a Constitution that is in actual work and power. The difficulty is that the object is in constant change. An historical writer does not feel this difficulty: he deals only with the past; he can say definitely, the Constitution worked in such and such a manner in the year at which he begins, and in a manner in such and such respects different in the year at which he ends; he begins with a definite point of time and ends with one also. But a contemporary writer who tries to paint what is before him is puzzled and a perplexed: what he sees is changing daily. He must paint it as it stood at some one time, or else he will be putting side by side in his representations things which never were contemporaneous in reality.

The Albumen & Salted Paper Book

This fascinating volume examines the impact that rapid urbanization has had upon diets and food systems throughout Western Europe over the past two centuries. Bringing together studies from across the continent, it stresses the fundamental links between key changes in European social history and food systems, food cultures and food politics. Contributors respond to a number of important questions, including: when and how did local food production cease to be sufficient for the city and when did improved transport conditions and liberal commercial relations replace local by supra-regional food supplies? How far did the food industry contribute to improved living conditions in cities? What influence did urban consumers have? *Food and the City in Europe since 1800* also examines issues of food hygiene and health impacts in cities, looks at various food innovations and how 'new' foods often first gained acceptance in cities, and explores how eating fashions have changed over the centuries.

501 Critical Reading Questions

A Precarious Game is an ethnographic examination of video game production. The developers that Ergin Bulut researched for almost three years in a medium-sized studio in the U.S. loved making video games that millions play. Only some, however, can enjoy this dream job, which can be precarious and alienating for many others. That is, the passion of a predominantly white-male labor force relies on material inequalities involving the sacrificial labor of their families, unacknowledged work of precarious testers, and thousands of racialized and gendered workers in the Global South. *A Precarious Game* explores the politics of doing what one loves. In the context of work, passion and love imply freedom, participation, and choice, but in fact they accelerate self-exploitation and can impose emotional toxicity on other workers by forcing them to work endless hours. Bulut argues that such ludic discourses in the game industry disguise the racialized and gendered inequalities on which a profitable transnational industry thrives. Within capitalism, work is not just an economic matter, and the political nature

of employment and love can still be undemocratic even when based on mutual consent. As Bulut demonstrates, rather than considering work simply as a matter of economics based on trade-offs in the workplace, we should consider the question of work and love as one of democracy rooted in politics.

How to Do Things with Words

A prominent lawyer and administrator, Pliny (c. AD 61-113) was also a prolific letter-writer, who numbered among his correspondents such eminent figures as Tacitus, Suetonius and the Emperor Trajan, as well as a wide circle of friends and family. His lively and very personal letters address an astonishing range of topics, from a deeply moving account of his uncle's death in the eruption that engulfed Pompeii, to observations on the early Christians - 'a desperate sort of cult carried to extravagant lengths' - from descriptions of everyday life in Rome, with its scandals and court cases, to Pliny's life in the country.

Research in Education

Leviathan or The Matter, Forme and Power of a Common-Wealth Ecclesiastical and Civil is a book written by an English materialist philosopher Thomas Hobbes about problems of the state existence and development. Leviathan is a name of a Bible monster, a symbol of nature powers that belittles a man. Hobbes uses this character to describe a powerful state ("God of the death"). He starts with a postulate about a natural human state ("the war of all against all") and develops the idea "man is a wolf to a man". When people stay for a long time in the position of an inevitable extermination they give a part of their natural rights, for the sake of their lives and general peace, according to an unspoken agreement to someone who is obliged to maintain a free usage of the rest of their rights – to the state. The state, a union of people, where the will of a single one (the state) is compulsory for everybody, has a task to regulate the relations between all the people. The book was banned several times in England and Russia.
