Flats, Vrbn Hovses and Cottage Homes

Excerpt from Flats, Urban Houses and Cottage Homes: A Companion Volume to "the British Home of to-Day" It should be our aim to design a plan having few corridors; only those should be retained which are necessary for service purposes. Costing as much to build as if the same space were allotted to rooms, corridors are of no use except as a means of communication. When the nature of the site renders their employment necessary, they should be planned in such a way that they do not form a vista from the entrance portion of a suite and if they must be designed in one long length, intersect them by a lobby or a pleasing ante-room. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Flats, Urban Houses and Cottage Homes

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Flats, urban houses and cottage homes

Unlike some other reproductions of classic texts (1) We have not used OCR (Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Flats, Urban Hovses and Cottage Homes

This volume of primary source materials documents the nineteenth-century search for a representative style, and the alternating fashions for interiors that demonstrated the consumerism of the period. Although in some senses every interior is unique so that a style canon may seem to be meaningless, there have been important historical trends or styles that have influenced individual interiors, and these have formed the groundwork from which other styles and tastes have developed and changed. Accompanied by extensive editorial commentary, this collection will be of great interest to students and scholars of art history.

Flats, Urban Houses and Cottage Homes; a Companion Volume to the British Home of To-Day;

Why some architects fail to realize their ideal buildings, and what architecture critics can learn from novelists. The usual history of architecture is a grand narrative of soaring monuments and heroic makers. But it is also a false narrative in many ways, rarely acknowledging the personal failures and disappointments of architects. In *Bleak Houses*, Timothy Brittain-Catlin investigates the underside of architecture, the stories of losers and unfulfillment often ignored by an architectural criticism that values novelty, fame, and virility over fallibility and rejection. As architectural criticism promotes increasingly narrow values, dismissing certain styles wholesale and subjecting buildings to a Victorian litmus test of "real" versus "fake," Brittain-Catlin explains the effect this superficial criticality has had not only on architectural discourse but on the quality of buildings. The fact that most buildings receive no critical scrutiny at all has resulted in vast stretches of ugly modern housing and a pervasive public illiteracy about architecture.

FLATS URBAN HOUSES & COTTAGE H

Many homes across America have designs based on plans taken from pattern books or mail-order catalogs. In *Houses from Books*, Daniel D. Reiff traces the history of published plans and offers the first comprehensive survey of their influence on the structure and the style of American houses from 1738 to 1950. *Houses from Books* shows that architectural publications, from Palladio's *I Quattro Libri* to Aladdin's *Readi-Cut Homes*, played a decisive role in every aspect of American domestic building. Reiff discusses the people and the firms who produced the books as well as the ways in which builders and architects adapted the designs in communities throughout the country. His book also offers a wide-ranging analysis of the economic and social conditions shaping American building practices. As architectural publication developed and grew more sophisticated, it played an increasingly prominent part in the design and the construction of domestic buildings. In villages and small towns, which often did not have professional architects, the publications became basic resources for carpenters and builders at all levels of expertise. Through the use of published designs, they were able to choose among a variety of plans, styles, and individual motifs and engage in a fruitful dialogue with past and present architects. *Houses from Books* reconstructs this dialogue by examining the links between the published designs and the houses themselves. Reiff's book will be indispensable to architectural historians, architects, preservationists, and regional historians. Realtors and homeowners will also find it of great interest. A catalog at the end of the book can function as a guide for those attempting to locate a model and a date for a particular design. *Houses from Books* contains a wealth of photographs, many by the author, that enhance its importance as a history and guide.

Flats, Urban Houses and Cottage Homes; a Companion Volume to the British Home of To-Day ...

The bachelor has long held an ambivalent, uncomfortable and even at times unfriendly position in society. This book carefully considers the complicated relationships between the modern queer bachelor and interior design, material culture and aesthetics in Britain between 1885 and 1957. The seven deadly sins of the modern bachelor (queerness, idolatry, askesis, decadence, the decorative, glamour and artifice) comprise a contested site and reveal in their respective ways the distinctly queer twinning of shame and resistance. It pays close attention to the interiors of Lord Ronald Gower, Alfred Taylor, Oscar Wilde, Charles Shannon and Charles Ricketts, Edward Perry Warren and John Marshall, Sir Cedric Morris and Arthur Lett-Haines, Noël Coward and Cecil Beaton. Richly illustrated and written in a lively and accessible manner, *Bachelors of a different sort* is at once theoretically ambitious and rich in its use of archival and various historical sources.
