New Orleans Medical and Surgical Journal

Excerpt from The New Orleans Medical and Surgical Journal, 1881-'82, Vol. 9 Attention is also Specially called to the exceptionally straight and tense course of the pneumogastrics from their orifice to their foramen of exit, and to the consequent readiness with which they can be lacerated. It is believed that fatal con cassion is often due to laceration of these nerves, and of the cornu of the fourth ventricle to which they so often adhere. This lesion has been found in several instances, and should be sought for in every obscure case. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Boston Medical And Surgical Journal; Volume 106

This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book. ++++ The below data was compiled from various identification fields in the bibliographic record of this title. This data is provided as an additional tool in helping to ensure edition identification: ++++ Boston Medical And Surgical Journal, Volume 52
