Rechtmäßige Herrschaft auf internationaler Ebene verlangt zunehmend die Einhaltung demokratischer Standards. Das zumindest suggeriert die Prominenz des Demokratiebegriffs in den Reformdebatten internationaler Organisationen. Auf Basis eines neuen Datensatzes, der ein Jahrzehnt Demokratiediskurs von 159 Staaten über den UN-Sicherheitsrat und die UN Generalversammlung abdeckt, liefert das Buch wichtige Einblicke in das Narrativ vom demokratischen Regieren jenseits des Staates, seine Merkmale und seine Funktionsweise. Die Befunde befruchten nicht nur die Forschung zu empirischer Legitimität, Normkontestation und globaler Demokratie. In einer Zeit, in der ideologischer Wettbewerb auf dem Vormarsch ist, zeugen sie auch von der Kraft der demokratischen Idee.

Autonomous Systems and the Law

"This book aims to fill a gap in the process of confrontation between the disciplines, case laws and literature of the central EU member states. In particular it aims to address the difficulty of finding sources for scholars and professionals explaining the rules and guidelines of corporate law in the different European states. The main features of the discipline of Corporate Law in Germany, England, France, Italy, Spain, Poland, Romania and the Netherlands are illustrated. The objective of the work is not only to describe the main features of the discipline, but especially to highlight the most important critical profiles, and particularly those under the scrutiny of the case law and most studied (as problematic) by the doctrine."--Bloomsbury Publishing.

OSCE Yearbook 2019

This work provides lawyers with more than 100 legal interpretation figures that are used by lawyers worldwide to justify their legal decisions. The book puts lawyers in a position, to develop - step by step - a solution for a hitherto unsolved legal problem in such a way that it convinces the opposing party of the content of his/her solution. The book covers - legal sources - classic and modern figures of interpretation - the challenging concretisation and construction of law - influence of the constitution and European law as a higher-ranking law - determination of the limits of permissible further development of the law - and, very relevant for practice, the hermeneutics of facts. The book benefits from a combination of classic and modern methodology, a lively presentation with numerous examples from literature and jurisprudence and coverage of several cases for in-depth reflection. The work will be a significant tool for all those interested in the basics of law.

Talking Democracy at the United Nations

This book provides rule-by-rule commentaries on the Regulation (EU) No 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market. The eIDAS regulation aims at providing a framework for secure and trustworthy electronic transactions in the EU. This volume offers comprehensive comments on all provisions of this regulation containing references to European scholarly writing. As a cross-border project this book is written by an international group of contributors and provides analysis from different European countries. In order to assess the arising legal issues the contributions to this book reflect both aspects of the eIDAS regulation: On one hand the technological-neutral approach intended by this regulation, but also the nevertheless technically determined definitions and provisions of this very specific field of law.

Company Laws of the EU

The European Directive (Directive (EU) 2019/1023 of the European Parliament and of the Council of 20 June 2020 on preventive restructuring frameworks, on discharge of debts and disqualification, and on measures to increase the efficiency of procedures concerning restructuring, insolvency and discharge of debt) has to be transposed into national legislation by 26 June 2021. The main features of the Directive are: - the obligatory making available of early warning systems; - the obligatory creation of an insolvency avoidance mechanism; - the determination of certain insolvency related officers' duties; - the uniformisation of discharge rules among member states; and - measures to increase the national insolvency laws' efficiency. In this book a team of European-wide recognised, experienced insolvency law experts, some of whom had been involved in the drafting process of the Directive, analyse the Directive. The authors focus not only on the officials tasked in the national surroundings with drafting the national statutes but also on the wider implications which, one way or the other, will be national law. The commentary, thus, serves also the purposes of practitioners and judges in the field of restructuring.

eIDAS-Regulation

This new handbook takes an innovative look at the current and potential effects of big data and artificial intelligence on the legal system. It explains how technological advances in data collection and information processing will make it possible to change the design of legal rules and tailor them to specific individuals. This new type of “granular legal norms” is part of a broader trend towards algorithmic regulation in the emerging data economy. With practical examples from contract, consumer and tort law, leading experts from Canada, Europe, Israel, and the United States explain how and to what extent legal norms could be personalised. They explore the advantages, limitations and potential dangers of legal micro-targeting and explain how the personalisation of legal norms could change the relationship between individuality, privacy and the protection of general interests. This handbook offers a multi-faceted overview of the emerging field of “personalised law” and provides a unique source of inspiration for scholars, lawyers, judges and lawmakers.

Commercial Contracts in Germany

Caldarola/Schrey Big Data and Law “Big Data” refers to large amounts of data originating from various sources which are stored, processed and analysed with specific applications to obtain all kind of (inter-) dependency analyses, environmental and trend research, and for system and production control purposes. As in data mining, knowledge discovery is a priority for Big Data applications. Big Data is now seen as a new source and a “reserve” of additional revenue. When dealing with Big Data, it is not enough to have the necessary technical expertise and infrastructure. Rather, the legal scope must also be observed. As a result of the applicability of the EU General Data Protection Regulation since 25 May 2018 and the associated potentially substantial fines for data protection infringements, data protection supervisory authorities in particular will intensify their supervisory measures and also focus their attention on Big Data applications. With numerous guidelines and graphics, this book is a practical legal guide to gathering, storing and analysing personal and other types of data in Big Data applications. It provides comprehensive, practice-oriented assistance and reliability for planning everyday business in a Big Data environment.

Mergers and Acquisitions in Germany

This book presents a broad survey of standards for the judicial control of B2B contract terms in different legal systems. Each chapter analyses in great detail the regulatory framework and the general principles that govern the judicial control of B2B contracts in a specific country, in particular the relevant standards for the judicial scrutiny of clauses and the resulting legal consequences thereof. Providing first-hand information with a focus on practical relevance from authors who specialise in the judicial control of contracts in their respective legal systems, this book is of particular value for lawyers who advise their clients in international business transactions and anyone interested in comparative contract law. The list of countries includes Austria, the Czech Republic, Denmark, England, Estonia, Finland, France, Germany, Italy, the Netherlands, Poland, Portugal, Romania, Spain, Switzerland, Sweden and Taiwan.

European Preventive Restructuring

New edition of the seminal guide to immigration law in the European Union

U.S. Law for Civil Lawyers

This article-by-article Commentary on the Canada-European Union Comprehensive Economic and Trade Agreement (CETA) is a vital resource for practitioners and academics in the field of EU investment protection law. CETA has been called a game-changer. In the investment chapter, it has introduced a number of key innovations, including; - the investment court system with an appellate tribunal, - guidelines on third party funding, - transparency and information sharing, - modern versions of standards of protection, and - detailed provisions on reservations and exceptions. Considering that the new dispute resolution provisions in this chapter have also passed the scrutiny of the Court of Justice of the European Union, it is expected that CETA's investment chapter will serve as a blueprint for future EU investment agreements and so a full understanding of this, offered by this useful commentary, is essential for lawyers.

Data Economy and Algorithmic Regulation

"What Is Narratology?" sees itself as contributing to the intensive international discussion and controversy on the structure and function of narrative theory. The 14 papers in the volume advance proposals for determining the object of narratology, modelling its concepts and characterising its status within cultural studies.

Big Data and Law

This book investigates and discusses the respective issues arising in the current discourse on climate protection from different legal perspectives (including international law, European law and national public and civil law). In particular, it addresses the issue of "climate protection by courts". It gives an overview of important jurisdictions in the field of climate change litigation, including the US, Canada, Australia, the UK, France, the Netherlands, Italy, Brazil and Germany. The handbook provides answers and ideas both to scholars and practitioners in the field. Furthermore, it is guaranteed to provide an overview of the latest news in cases and progress in the field of climate change litigation.

Judicial Review of Commercial Contracts

"... provides deep and varied insight into subtle distinctions between the rules and the differences in the wording of the various articles ... It would be worthwhile to make room for it on your bookshelf whether you are an academic, practitioner or work in connection with institutional arbitration." Apostolos Anthimos, Armenopoulos This unique and seminal text offers a comprehensive article-by-article commentary to the rules of arbitration by the leading institutions. Institutions examined include: AAA; DIS; ICC; PCA; LCIA and ISCA. Edited by an experienced arbitrator, scholar and practitioner and with contributions from leading global arbitration specialists, this is an essential reference point for all those practising in the field.
