

Elders Rising The Promise And Peril Of Aging Word Amp World

[#global aging](#) [#elderly population](#) [#aging challenges](#) [#future of aging](#) [#societal impact](#)

Delve into the profound implications of 'Elders Rising,' exploring the dynamic landscape of a rapidly aging global population. This critical examination unpacks both the immense promise—from accumulated wisdom to new economic opportunities—and the significant peril, including healthcare strains and social adjustments, that define the future of our elderly population. Understand the multifaceted societal impact and crucial challenges of aging as we navigate a world where longevity increasingly shapes policy, innovation, and human experience.

Our curated articles bring expert insights across a wide range of academic and professional topics.

Elders Rising

Riding the age wave with grace In this inspiring book, Roland D. Martinson draws on the folk wisdom and experience of over fifty persons between the ages of sixty-two and ninety-seven. He puts this wisdom in conversation with scriptural and theological understandings of elders in the last third of life and sets forth perspectives on aging for individuals, groups, civic organizations, and congregations to utilize in developing a vital, resilient, and productive quality of life for elders. The book explores some current age-wave numbers and explores elderhood in relation to Scripture, theology, and the wisdom of "pioneers and pathfinders." Practical direction is given for conversation and action based on exploring elder identity, presence, partnerships, passions, purpose, powers, and promise. Martinson lays out a process for helping communities, including faith communities, become "vital aging centers" where elders are called to look honestly and hopefully at life's third chapter and to make it a time of discovery, adventure, and capacity. The volume will help congregations better serve the needs of elders and integrate elder wisdom and capacity in their mission and ministry.

Social Capital and Lifelong Learning

Social capital and lifelong learning are central to current policy concerns both in the UK and internationally. This book confirms the significance of social capital as an analytical tool, while challenging the basis on which current policy is being developed. It: · offers a wealth of evidence on a topic that has become central to contemporary government; · provides a detailed empirical investigation of the relationship between social capital, knowledge creation and lifelong learning; · relates the findings to wider policy debates; · questions the dominant theoretical models of social capital; and · confronts the assumption of many policy makers that the obvious solution to social problems is to 'invest in social capital'.

Autonomous Vehicle Technology

The automotive industry appears close to substantial change engendered by “self-driving” technologies. This technology offers the possibility of significant benefits to social welfare—saving lives; reducing crashes, congestion, fuel consumption, and pollution; increasing mobility for the disabled; and ultimately improving land use. This report is intended as a guide for state and federal policymakers on the many issues that this technology raises.

Mein Kampf

Madman, tyrant, animal—history has given Adolf Hitler many names. In *Mein Kampf* (My Struggle), often called the Nazi bible, Hitler describes his life, frustrations, ideals, and dreams. Born to an impoverished couple in a small town in Austria, the young Adolf grew up with the fervent desire to become a painter. The death of his parents and outright rejection from art schools in Vienna forced him into underpaid work as a laborer. During the First World War, Hitler served in the infantry and was decorated for bravery. After the war, he became actively involved with socialist political groups and quickly rose to power, establishing himself as Chairman of the National Socialist German Worker's party. In 1924, Hitler led a coalition of nationalist groups in a bid to overthrow the Bavarian government in Munich. The infamous Munich "Beer-hall putsch" was unsuccessful, and Hitler was arrested. During the nine months he was in prison, an embittered and frustrated Hitler dictated a personal manifesto to his loyal follower Rudolph Hess. He vented his sentiments against communism and the Jewish people in this document, which was to become *Mein Kampf*, the controversial book that is seen as the blue-print for Hitler's political and military campaign. In *Mein Kampf*, Hitler describes his strategy for rebuilding Germany and conquering Europe. It is a glimpse into the mind of a man who destabilized world peace and pursued the genocide now known as the Holocaust.

Economic Science Fictions

An innovative new anthology exploring how science fiction can motivate new approaches to economics. From the libertarian economics of Ayn Rand to Aldous Huxley's consumerist dystopias, economics and science fiction have often orbited each other. In *Economic Science Fictions*, editor William Davies has deliberately merged the two worlds, asking how we might harness the power of the utopian imagination to revitalize economic thinking. Rooted in the sense that our current economic reality is no longer credible or viable, this collection treats our economy as a series of fictions and science fiction as a means of anticipating different economic futures. It asks how science fiction can motivate new approaches to economics and provides surprising new syntheses, merging social science with fiction, design with politics, scholarship with experimental forms. With an opening chapter from Ha-Joon Chang as well as theory, short stories, and reflections on design, this book from Goldsmiths Press challenges and changes the notion that economics and science fiction are worlds apart. The result is a wealth of fresh and unusual perspectives for anyone who believes the economy is too important to be left solely to economists. Contributors AUDINT, Khairani Barokka, Carina Brand, Ha-Joon Chang, Miriam Cherry, William Davies, Mark Fisher, Dan Gavshon-Brady and James Pockson, Owen Hatherley, Laura Horn, Tim Jackson, Mark Johnson, Bastien Kerspern, Nora O Murchú, Tobias Revell et al., Judy Thorne, Sherryl Vint, Joseph Walton, Brian Willems

Ulysses

Recent statistics suggest that fertility in Europe shows signs of recovery after decades of year-on-year drops. This report updates a study on low fertility from 2004 and explores the extent, causes and consequences of the recent recovery.

The Seven Lamps of Architecture

This book combines detailed scientific historical research with characteristic philosophic breadth and verve.

History of the Rise and Influence of the Spirit of Rationalism in Europe

Presents five hundred-one critical reading questions to prepare for the SAT I and other tests and includes skill builders on different subject matter such as U.S. history and politics, arts and humanities, health and medicine, literature and music, sports, science, and social studies.

Low Fertility in Europe

Climate change negotiations have failed the world. Despite more than thirty years of high-level, global talks on climate change, we are still seeing carbon emissions rise dramatically. This edited volume, comprising leading and emerging scholars and climate activists from around the world, takes a critical look at what has gone wrong and what is to be done to create more decisive action. Composed of twenty-eight essays—a combination of new and republished texts—the anthology is organised around seven main themes: paradigms; what counts?; extraction; dispatches from a climate change frontline country; governance; finance; and action(s). Through this multifaceted approach, the contributors ask pressing questions about how we conceptualise and respond to the climate crisis, providing both ‘big picture’ perspectives and more focussed case studies. This unique and extensive collection will be of great value to environmental and social scientists alike, as well as to the general reader interested in understanding current views on the climate crisis.

The Taming of Chance

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

501 Critical Reading Questions

Look around you and think for a minute: Is America too crowded? For years, we have been warned about the looming danger of overpopulation: people jostling for space on a planet that’s busting at the seams and running out of oil and food and land and everything else. It’s all bunk. The “population bomb” never exploded. Instead, statistics from around the world make clear that since the 1970s, we’ve been facing exactly the opposite problem: people are having too few babies. Population growth has been slowing for two generations. The world’s population will peak, and then begin shrinking, within the next fifty years. In some countries, it’s already started. Japan, for instance, will be half its current size by the end of the century. In Italy, there are already more deaths than births every year. China’s One-Child Policy has left that country without enough women to marry its men, not enough young people to support the country’s elderly, and an impending population contraction that has the ruling class terrified. And all of this is coming to America, too. In fact, it’s already here. Middle-class Americans have their own, informal one-child policy these days. And an alarming number of upscale professionals don’t even go that far—they have dogs, not kids. In fact, if it weren’t for the wave of immigration we experienced over the last thirty years, the United States would be on the verge of shrinking, too.

What happened? Everything about modern life—from Bugaboo strollers to insane college tuition to government regulations—has pushed Americans in a single direction, making it harder to have children. And making the people who do still want to have children feel like second-class citizens. *What to Expect When No One's Expecting* explains why the population implosion happened and how it is remaking culture, the economy, and politics both at home and around the world. Because if America wants to continue to lead the world, we need to have more babies.

Negotiating Climate Change in Crisis

When first published, Marshall McLuhan's *Understanding Media* made history with its radical view of the effects of electronic communications upon man and life in the twentieth century.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation

Prepare to be shocked. From the man *The Wall Street Journal* hailed as a "Swiftean satirist" comes the most shocking book ever written! *The Borowitz Report: The Big Book of Shockers*, by award-winning fake journalist Andy Borowitz, contains page after page of "news stories" too hot, too controversial, too -- yes, shocking -- for the mainstream press to handle. Sample the groundbreaking reporting from the news organization whose motto is "Give us thirty minutes -- we'll waste it."

What to Expect When No One's Expecting

Lady Hyegyong's memoirs, which recount the chilling murder of her husband by his father, form one of the best known and most popular classics of Korean literature. From 1795 until 1805 Lady Hyegyong composed this masterpiece, depicting a court life Shakespearean in its pathos, drama, and grandeur. Presented in its social, cultural, and historical contexts, this first complete English translation opens a door into a world teeming with conflicting passions, political intrigue, and the daily preoccupations of a deeply intelligent and articulate woman. JaHyun Kim Haboush's accurate, fluid translation captures the intimate and expressive voice of this consummate storyteller. Reissued nearly twenty years after its initial publication with a new foreword by Dorothy Ko, *The Memoirs of Lady Hyegyong* is a unique exploration of Korean selfhood and an extraordinary example of autobiography in the premodern era.

Understanding Media

A groundbreaking study of the origins of the Church's ministry, focusing on the significance and role of "elders" in the social world of the New Testament.

The Borowitz Report

First published in 1984, this book examines corporate crime in the pharmaceutical industry. Based on extensive research, including interviews with 131 senior executives of pharmaceutical companies in the United States, the United Kingdom, Australia, Mexico and Guatemala, the book is a major study of white-collar crime. Written in the 1980s, it covers topics such as international bribery and corruption, fraud in the testing of drugs and criminal negligence in the unsafe manufacturing of drugs. The author considers the implications of his findings for a range of strategies to control corporate crime, nationally and internationally.

The Memoirs of Lady Hyegyong

Intended as a guide for wildlife managers and ecotourism operators, as well as interested ecotourists, this book addresses the biological principles governing how ecotourism affects wildlife. The introductory chapters focus on four key responses to human visitation—behavioral, physiological, ecological, and evolutionary. Readers will discover ecotourism's effects on biodiversity in connection with various industries that are habitat or taxonomically specific: fish tourism (including both freshwater and marine), marine mammal tourism, the huge industry centered on terrestrial animals, and the well-studied industry of penguin tourism. Given that the costs and benefits of ecotourism cannot be meaningfully assessed without understanding the human context, particular attention is given to how ecotourism has been used as part of community development. In closing, the book synthesizes the current state of knowledge regarding best practices for reducing human impacts on wildlife. The final chapter highlights key research questions that must be addressed to provide more evidence-based guidelines and policy.

A Book of Golden Deeds (EasyRead Super Large 18pt Edition)

The best briefing on global warming the student or interested general reader could wish for.

On Heroes, Hero-worship, and the Heroic in History

A new edition of the most popular book of project management case studies, expanded to include more than 100 cases plus a "super case" on the Iridium Project Case studies are an important part of project management education and training. This Fourth Edition of Harold Kerzner's Project Management Case Studies features a number of new cases covering value measurement in project management. Also included is the well-received "super case," which covers all aspects of project management and may be used as a capstone for a course. This new edition: Contains 100-plus case studies drawn from real companies to illustrate both successful and poor implementation of project management Represents a wide range of industries, including medical and pharmaceutical, aerospace, manufacturing, automotive, finance and banking, and telecommunications Covers cutting-edge areas of construction and international project management plus a "super case" on the Iridium Project, covering all aspects of project management Follows and supports preparation for the Project Management Professional (PMP®) Certification Exam Project Management Case Studies, Fourth Edition is a valuable resource for students, as well as practicing engineers and managers, and can be used on its own or with the new Eleventh Edition of Harold Kerzner's landmark reference, Project Management: A Systems Approach to Planning, Scheduling, and Controlling. (PMP and Project Management Professional are registered marks of the Project Management Institute, Inc.)

The Elders

The National Bestseller "Focused and persuasive... Bray's book is many things: the first English-language transnational history of antifa, a how-to for would-be activists, and a record of advice from anti-Fascist organizers past and present."—THE NEW YORKER "Insurgent activist movements need spokesmen, intellectuals and apologists, and for the moment Mark Bray is filling in as all three... The book's most enlightening contribution is on the history of anti-fascist efforts over the past century, but its most relevant for today is its justification for stifling speech and clobbering white supremacists."—Carlos Lozada, THE WASHINGTON POST "[Bray's] analysis is methodical, and clearly informed by both his historical training and 15 years of organizing, which included Occupy Wall Street... Antifa: The Anti-Fascist Handbook couldn't have emerged at a more opportune time. Bray's arguments are incisive and cohesive, and his consistent refusal to back down from principle makes the book a crucial intervention in our political moment."—SAN FRANCISCO CHRONICLE In the wake of tragic events in Charlottesville, VA, and Donald Trump's initial refusal to denounce the white nationalists behind it all, the "antifa" opposition movement is suddenly appearing everywhere. But what is it, precisely? And where did it come from? As long as there has been fascism, there has been anti-fascism — also known as "antifa." Born out of resistance to Mussolini and Hitler in Europe during the 1920s and '30s, the antifa movement has suddenly burst into the headlines amidst opposition to the Trump administration and the alt-right. They could be seen in news reports, often clad all in black with balaclavas covering their faces, demonstrating at the presidential inauguration, and on California college campuses protesting far-right speakers, and most recently, on the streets of Charlottesville, VA, protecting, among others, a group of ministers including Cornel West from neo-Nazi violence. (West would later tell reporters, "The anti-fascists saved our lives.") Simply, antifa aims to deny fascists the opportunity to promote their oppressive politics, and to protect tolerant communities from acts of violence promulgated by fascists. Critics say shutting down political adversaries is anti-democratic; antifa adherents argue that the horrors of fascism must never be allowed the slightest chance to triumph again. In a smart and gripping investigation, historian and former Occupy Wall Street organizer Mark Bray provides a detailed survey of the full history of anti-fascism from its origins to the present day — the first transnational history of postwar anti-fascism in English. Based on interviews with anti-fascists from around the world, Antifa details the tactics of the movement and the philosophy behind it, offering insight into the growing but little-understood resistance fighting back against fascism in all its guises.

Corporate Crime in the Pharmaceutical Industry (Routledge Revivals)

This Illustrated & Translated edition of "Don Quixote" includes: Illustrations of objects and places mentioned in the novel. Don Quixote is a Spanish novel by Miguel de Cervantes. A founding work of Western literature, it is often labeled as the first modern novel and one of the greatest ever written. Don Quixote is also one of the most-translated books in the world.

Ecotourism's Promise and Peril

This expanded eleventh edition of the bestselling guide to style is based on the Economist's own updated house style manual, and is an invaluable companion for everyone who wants to communicate with the clarity, style and precision for which the Economist is renowned. As the introduction says, 'clarity of writing usually follows clarity of thought.' The Economist Style Guide gives general advice on writing, points out common errors and clichés, offers guidance on consistent use of punctuation, abbreviations and capital letters, and contains an exhaustive range of reference material - covering everything from accountancy ratios and stock market indices to laws of nature and science. Some of the numerous useful rules and common mistakes pointed out in the guide include: •Which informs, that defines. This is the house that Jack built. But: This house, which Jack built, is now falling down. •Discreet means circumspect or prudent; discrete means separate or distinct. Remember that "Questions are never indiscreet. Answers sometimes are" (Oscar Wilde). •Flaunt means display, flout means disdain. If you flout this distinction you will flaunt your ignorance •Forgo means do without; forego means go before. •Fortuitous means accidental, not fortunate or well-timed. •Times: Take care. Three times more than X is four times as much as X. •Full stops: Use plenty. They keep sentences short. This helps the reader.

Global Warming

When a new baby arrives among the Beng people of West Africa, they see it not as being born, but as being reincarnated after a rich life in a previous world. Far from being a tabula rasa, a Beng infant is thought to begin its life filled with spiritual knowledge. How do these beliefs affect the way the Beng rear their children? In this unique and engaging ethnography of babies, Alma Gottlieb explores how religious ideology affects every aspect of Beng childrearing practices—from bathing infants to protecting them from disease to teaching them how to crawl and walk—and how widespread poverty limits these practices. A mother of two, Gottlieb includes moving discussions of how her experiences among the Beng changed the way she saw her own parenting. Throughout the book she also draws telling comparisons between Beng and Euro-American parenting, bringing home just how deeply culture matters to the way we all rear our children. All parents and anyone interested in the place of culture in the lives of infants, and vice versa, will enjoy *The Afterlife Is Where We Come From*. "This wonderfully reflective text should provide the impetus for formulating research possibilities about infancy and toddlerhood for this century." — Caren J. Frost, *Medical Anthropology Quarterly* "Alma Gottlieb's careful and thought-provoking account of infancy sheds spectacular light upon a much neglected topic. . . . [It] makes a strong case for the central place of babies in anthropological accounts of religion. Gottlieb's remarkably rich account, delivered after a long and reflective period of gestation, deserves a wide audience across a range of disciplines."—Anthony Simpson, *Critique of Anthropology*

Project Management

With a long history and deep connection to the Earth's resources, indigenous peoples have an intimate understanding and ability to observe the impacts linked to climate change. Traditional ecological knowledge and tribal experience play a key role in developing future scientific solutions for adaptation to the impacts. The book explores climate-related issues for indigenous communities in the United States, including loss of traditional knowledge, forests and ecosystems, food security and traditional foods, as well as water, Arctic sea ice loss, permafrost thaw and relocation. The book also highlights how tribal communities and programs are responding to the changing environments. Fifty authors from tribal communities, academia, government agencies and NGOs contributed to the book. Previously published in *Climatic Change*, Volume 120, Issue 3, 2013.

Antifa

Using both epidemiological and model organism approaches, we have gained new insights into the physiological and molecular aspects of aging, which has led to significant advancements in potential anti-aging strategies. *Reviews on Biomarker Studies in Aging and Anti-Aging Research* presents a series of reviews in various aspects of aging and age-related disease research along with several methods which have shown progress as potential anti-aging approaches. The book is aimed at researchers in the areas of aging and chronic disease, as well as to clinical scientists, physicians and major drug companies. It provides important information on disease mechanisms, and each chapter is presented in the context of the aging process, specific chronic diseases or different therapeutic areas.

Don Quixote (Illustrated)

Fourteen authors, including many of the best-known scholars in the field, explore how people actually experience their culture and how those experiences are expressed in forms as varied as narrative, literary work, theater, carnival, ritual, reminiscence, and life review. Their studies will be of special interest for anyone working in anthropological theory, symbolic anthropology, and contemporary social and cultural anthropology, and useful as well for other social scientists, folklorists, literary theorists, and philosophers.

Style Guide

A survey of the state of human freedom around the world investigates such crucial indicators as the status of civil and political liberties and provides individual country reports.

The Afterlife Is Where We Come From

BOOK ONE IN THE GROUNDBREAKING SERIES, THE WARS OF LIGHT AND SHADOW A powerful, layered weaving of myth, prose and pure imagination – Curse of the Mistwraith opens an epic fantasy series perfect for fans of The Dark Tower and Earthsea.

Climate Change and Indigenous Peoples in the United States

"The Corona crisis and the Need for a Great Reset" is a guide for anyone who wants to understand how COVID-19 disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great Reset. Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least to a certain extent, to take their destiny into their hands and to plan for a better future. This is the purpose of this book: to shake up and to show the deficiencies which were manifest in our global system, even before COVID broke out.

The Aleut Language

Fight fear, destroy discouragement, win against worry, and disarm your doubts. The Bible warns us of "giants in the land," and whether they're literal like Goliath or figurative like fear, loneliness, and temptation, their goal is the same: to crush God's people. Beloved Bible teacher and pastor Dr. David Jeremiah shows you how to stand up to these bullies and win—with God's help! Whichever giant is intimidating you, the message of Slaying the Giants in Your Life is that God has the strength to bring you victory. You never walk alone and never have to live defeated. Learn to: Fight your fear Destroy your discouragement Liberate yourself from loneliness Win against worry Guard against guilt Resist your resentment These are daunting giants, but thankfully you have access to God's Word, which is a wealth of knowledge, encouragement, and power. With God on your side, you never walk alone or in weakness. Stand against the giants that seek to discourage you!

Reviews on Biomarker Studies in Aging and Anti-Aging Research

The hero of the novel, Mr. Barnstaple, is a depressive journalist working for the newspaper "The Liberal." At the beginning of the story, Barnstaple, as well as a few other Englishmen, are accidentally transported to the parallel world of Utopia. Utopia is like an advanced Earth, although it had been quite similar to Earth in the past in a period known to Utopians as the "Days of Confusion." Utopia is a utopian world: it has a utopian world government, advanced science, and even pathogens have been eliminated and predators are almost tamed. --wikipedia.com.

The Anthropology of Experience

A new edition of a classic title, featuring updated and additional material to reflect today's competitive work environments, contributed by a team of international experts. Essential for anyone involved in the design, management and use of work places, this is a critical multidisciplinary review of the factors affecting productivity, as well a practical solutions manual for common problems and issues.

Freedom in the World 2012

This publication contains the OECD's biannual compendium of social indicators which seek to give a concise overview and assessment of social trends, policies and outcomes across OECD countries. It includes context indicators to illustrate national differences in social trends; and social status and response indicators categorised under four broad social policy areas of self-sufficiency, equity, health and social cohesion, covering a wide range of social policy issues including demography, family characteristics, employment, working mothers, unemployment benefits, educational attainment, poverty and income inequality, social spending, life expectancy, health care expenditure, social isolation, teenage births and drug use.

Making Volunteers

An inside look at how community service organizations really work Volunteering improves inner character, builds community, cures poverty, and prevents crime. We've all heard this kind of empowerment talk from nonprofit and government-sponsored civic programs. But what do these programs really accomplish? In Making Volunteers, Nina Eliasoph offers an in-depth, humorous, wrenching, and at times uplifting look inside youth and adult civic programs. She reveals an urgent need for policy reforms in order to improve these organizations and shows that while volunteers learn important lessons, they are not always the lessons that empowerment programs aim to teach. With short-term funding and a dizzy mix of mandates from multiple sponsors, community programs develop a complex web of intimacy, governance, and civic life. Eliasoph describes the at-risk youth served by such programs, the college-bound volunteers who hope to feel selfless inspiration and plump up their resumés, and what happens when the two groups are expected to bond instantly through short-term projects. She looks at adult "plug-in" volunteers who, working in after-school programs and limited by time, hope to become like beloved aunts to youth. Eliasoph indicates that adult volunteers can provide grassroots support but they can also undermine the family-like warmth created by paid organizers. Exploring

contradictions between the democratic rhetoric of empowerment programs and the bureaucratic hurdles that volunteers learn to navigate, the book demonstrates that empowerment projects work best with less precarious funding, more careful planning, and mandatory training, reflection, and long-term commitments from volunteers. Based on participant research inside civic and community organizations, *Making Volunteers* illustrates what these programs can and cannot achieve, and how to make them more effective.

The Oxford Handbook of Cultural Sociology

Explains the social science of cultural sociology, a study of the ways in which culture, society, politics, and economy interact in the world.

Inside the Critics' Circle

An inside look at the politics of book reviewing, from the assignment and writing of reviews to why critics think we should listen to what they have to say. Taking readers behind the scenes in the world of fiction reviewing, *Inside the Critics' Circle* explores the ways critics evaluate books despite the inherent subjectivity involved and the uncertainties of reviewing when seemingly anyone can be a reviewer. Drawing on interviews with critics from such venues as the New York Times, Los Angeles Times, and Washington Post, Philippa Chong delves into the complexities of the review-writing process, including the considerations, values, and cultural and personal anxieties that shape what critics do. Chong explores how critics are paired with review assignments, why they accept these time-consuming projects, how they view their own qualifications for reviewing certain books, and the criteria they employ when making literary judgments. She discovers that while their readers are of concern to reviewers, they are especially worried about authors on the receiving end of reviews. As these are most likely peers who will be returning similar favors in the future, critics' fears and frustrations factor into their willingness or reluctance to write negative reviews. At a time when traditional review opportunities are dwindling while other forms of reviewing thrive, book reviewing as a professional practice is being brought into question. *Inside the Critics' Circle* offers readers a revealing look into critics' responses to these massive transitions and how, through their efforts, literary values get made.

Community-Based Global Learning

International education, service-learning, and community-based global learning programs are robust with potential. They can positively impact communities, grow civil society networks, and have transformative effects for students who become more globally aware and more engaged in global civil society – at home and abroad. Yet such programs are also packed with peril. Clear evidence indicates that poor forms of such programming have negative impacts on vulnerable persons, including medical patients and children, while cementing stereotypes and reinforcing patterns of privilege and exclusion. These dangers can be mitigated, however, through collaborative planning, design, and evaluation that advances mutually beneficial community partnerships, critically reflective practice, thoughtful facilitation, and creative use of resources. Drawing on research and insights from several academic disciplines and community partner perspectives, along with the authors' decades of applied, community-based development and education experience, they present a model of community-based global learning that clearly espouses an equitable balance between learning methodology and a community development philosophy. Emphasizing the key drivers of community-driven learning and service, cultural humility and exchange, seeking global citizenship, continuous and diverse forms of critically reflective practice, and ongoing attention to power and privilege, this book constitutes a guide to course or program design that takes into account the unpredictable and dynamic character of domestic and international community-based global learning experiences, the varying characteristics of destination communities, and a framework through which to integrate any discipline or collaborative project. Readers will appreciate the numerous toolboxes and reflective exercises to help them think through the creation of independent programming or courses that support targeted learning and community-driven development. The book ultimately moves beyond course and program design to explore how to integrate these objectives and values in the wider curriculum and throughout formal and informal community-based learning partnerships.

How Civic Action Works

"This book develops a new way to think about how social advocacy works in everyday life. Varied scholarly approaches to social advocacy over the past four decades have tended to highlight skilled

actors who craft rhetorical appeals and pursue resources and opportunities strategically to win their ends. Lichterman argues that this approach presents a thin view of culture and oversimplifies action as a product of collective actors whose speech and action do not vary by setting. In this study of housing advocacy, he turns the analytic lens away from the actors to the social settings and the cultural contexts of unfolding action, which allows him to develop a more precise explanation of success and failure. Lichterman draws on four years of ethnographic research on four campaigns, three coalitions, and twelve organizations that took up affordable housing, homelessness, and related problems in Los Angeles. The author follows how the actors' identities, claims and strategies unfold in specific settings as they promote new legislation, oppose gentrification, build affordable housing, and pursue health and environmental issues alongside housing problems. He finds that the discursive fields are crucial contexts that influence the work and that organization style powerfully shapes civic action. *How Civic Action Works* offers a new conceptual framework and research agenda for studies of social advocacy"--

Making Moral Citizens

This fascinating book takes readers inside the world of faith-based progressive community organizing, one of the largest and most effective social justice movements in the United States. Drawing on rich ethnographic observation and in-depth interviews, Jack Delehanty shows how organizers use religion to build power for change. As Delehanty convincingly demonstrates, religion is more than beliefs, doctrines, and rituals; within activist communities, it also fuels a process of personal reflection and relationship building that transforms people's understandings of themselves, those around them, and the political system. Relational practices like one-on-one conversation and public storytelling take on new significance in faith-based community organizations. Delehanty reveals how progressive organizers use such relational practices to help people see common ground across lines of race, class, and religious sect. From this common ground, organizers work to develop and deploy shared ideas of moral citizenship that emphasize common dignity, equity, and prosperity and nurture the sense that public action is the only way one can live out religious faith.

Empathy Beyond US Borders

Why do colleges and churches travel to help distant others and what does transnational civic engagement actually accomplish?

Billionaire Wilderness

"*Billionaire Wilderness* offers an unprecedented look inside the world of the ultra-wealthy and their relationship to the natural world, showing how the ultra-rich use nature to resolve key predicaments in their lives. Justin Farrell immerses himself in Teton County, Wyoming--both the richest county in the United States and the county with the nation's highest level of income inequality--to investigate interconnected questions about money, nature, and community in the twenty-first century. Farrell draws on three years of in-depth interviews with "ordinary" millionaires and the world's wealthiest billionaires, four years of in-person observation in the community, and original quantitative data to provide comprehensive and unique analytical insight on the ultra-wealthy. He also interviewed low-income workers who could speak to their experiences as employees for and members of the community with these wealthy people. He finds that the wealthy leverage nature to climb even higher on the socioeconomic ladder, and they use their engagement with nature and rural people as a way of creating more virtuous and deserving versions of themselves. *Billionaire Wilderness* demonstrates that our contemporary understanding of the relationship between the ultra-wealthy and the environment is empirically shallow, and our reliance on reports of national economic trends distances us from the real experiences of these people and their local communities"--

Civic Imagination

The *Civic Imagination* provides a rich empirical description of civic life and a broader discussion of the future of democracy in contemporary America. Over the course of a year, five researchers observed and participated in 7 civic organisations in a mid-sized US city. They draw on this ethnographic evidence to map the 'civic imaginations' that motivate citizenship engagement in America today. The book unpacks how contemporary Americans think about and act toward positive social and political change while the authors' findings challenge contemporary assertions of American apathy. This will be an important book for students and academics interested in political science and sociology.

Modernizing Democracy

Modernizing Democracy brings together scholars focusing the role of associations and associating in contemporary societies. Organizations and associations have been identified as the “meso level of society” and as the “basic elements of democracy”. They are important providers of welfare services and play an important role between the individual and political spheres. In recent years the environment of associations and associating has changed dramatically. Individualization, commercialization and globalization are challenging both democracy and the capability of associations to fulfill the functions attributed to them by social sciences. This change provides the central question of the volume: Is being part of an organization or association becoming an outdated model? And do associations still have the capacity of modernizing societies or are they just outdated remnants of post-democracy? The contributions to Modernizing Democracy will be organized into: Studying Association and Associating in the 21st Century, Associating in Times of Post-Democracy and Associations and the Challenge of Capitalist Development. The book will be attractive to third sector researchers as well as a broader academic community of political scientists, sociologists, economists, legal scientists and related disciplines.

Science by the People

Studies show that citizen science projects--projects involving nonprofessionals--face dilemmas ranging from austerity to presumed boundaries between science and activism. By unpacking the politics of citizen science, this book aims to help people negotiate a complex political landscape and choose paths moving toward social change and environmental sustainability.

Religion on the Edge

The thirteen essays in this volume offer a challenge to conventional scholarly approaches to the sociology of religion. They urge readers to look beyond congregational settings, beyond the United States, and to religions other than Christianity, and encourage critical engagement with religion's complex social consequences. By expanding conceptual categories, the essays reveal how aspects of the religious have always been part of allegedly non-religious spaces and show how, by attending to these intellectual blindspots, we can understand aspects of identity, modernity, and institutional life that have long been obscured. Religion on the Edge addresses a number of critical questions: What is revealed about the self, pluralism, or modernity when we look outside the U.S. or outside Christian settings? What do we learn about how and where the religious is actually at work and what its role is when we unpack the assumptions about it embedded in the categories we use? Religion on the Edge offers groundbreaking new methodologies and models, bringing to light conceptual lacunae, re-centering what is unsettled by their use, and inviting a significant reordering of long-accepted political and economic hierarchies. The book shows how social scientists across the disciplines can engage with the sociology of religion. By challenging many of its long-standing empirical and analytic tendencies, the contributors to this volume show how their work informs and is informed by debates in other fields and the analytical purchase gained by bringing these many conversations together. Religion on the Edge will be a crucial resource for any scholar seeking to understand our post-modern, post-secular world.

Magazines and the Making of America

From the colonial era to the onset of the Civil War, Magazines and the Making of America looks at how magazines and the individuals, organizations, and circumstances they connected ushered America into the modern age. How did a magazine industry emerge in the United States, where there were once only amateur authors, clumsy technologies for production and distribution, and sparse reader demand? What legitimated magazines as they competed with other media, such as newspapers, books, and letters? And what role did magazines play in the integration or division of American society? From their first appearance in 1741, magazines brought together like-minded people, wherever they were located and whatever interests they shared. As America became socially differentiated, magazines engaged and empowered diverse communities of faith, purpose, and practice. Religious groups could distinguish themselves from others and demarcate their identities. Social-reform movements could energize activists across the country to push for change. People in specialized occupations could meet and learn from one another to improve their practices. Magazines built translocal communities—collections of people with common interests who were geographically dispersed and could not easily meet face-to-face. By supporting communities that crossed various axes of social structure, magazines

also fostered pluralistic integration. Looking at the important role that magazines had in mediating and sustaining critical debates and diverse groups of people, *Magazines and the Making of America* considers how these print publications helped construct a distinctly American society.

Doing Reflexivity

This book provides social science researchers with both a strong rationale for the importance of thinking reflexively and a practical guide to doing it. The first book to build on Pierre Bourdieu's reflexive work, it combines academic analysis with practical examples and case studies. The book will be of interest to researchers and students.

Political Translation

At a time of increasing doubts about political legitimacy, concern for equal and inclusive democratic processes and deliberation is sweeping the social sciences. In this empirical study, the author presents the collective practices of political translation, which help multilingual and culturally diverse groups work together more democratically.

Handbook of Classical Sociological Theory

This is the first handbook focussing on classical social theory. It offers extensive discussions of debates, arguments, and discussions in classical theory and how they have informed contemporary sociological theory. The book pushes against the conventional classical theory pedagogy, which often focused on single theorists and their contributions, and looks at isolating themes capturing the essence of the interest of classical theorists that seem to have relevance to modern research questions and theoretical traditions. This book presents new approaches to thinking about theory in relationship to sociological methods.

Religion and Volunteering

Religion is considered a key predictor of volunteering: the more religious people are, the more likely they are to volunteer. This positive association enjoys significant support in current research; in fact, it could be considered the 'default perspective' on the relationship between both phenomena. In this book, the authors claim that, although the dominant approach is legitimate and essential, it nonetheless falls short in grasping the full complexity of the interaction between religion and volunteering. It needs to be recognized that there are tensions between religion and volunteering, and that these tensions are intensifying as a result of the changing meaning and role of religion in society. Therefore, the central aim and contribution of this book is to demonstrate that the relationship between religion and volunteering is not univocal but differentiated, ambiguous and sometimes provocative. By introducing the reader to a much wider landscape of perspectives, this volume offers a richer, more complex and variable understanding. Apart from the established positive causality, the authors examine tensions between religion and volunteering from the perspective of religious obligation, religious change, processes of secularization and notions of post-secularity. They further explore how actions that are considered altruistic, politically neutral and motivated by religious beliefs can be used for political reasons. This volume opens up the field to new perspectives on religious actors and on how religion and volunteering are enacted outside Western liberal and Christian societies. It emphasizes interdisciplinary perspectives, including theology, philosophy, sociology, political science, anthropology and architecture.

Back to the Roots

Across the Commonwealth of Massachusetts, urban farmers and gardeners are reclaiming cultural traditions linked to food, farming, and health; challenging systemic racism and injustice in the food system; demanding greater community control of resources in marginalized neighborhoods; and moving towards their visions of more equitable urban futures. As part of this urgent work, urban farmers and gardeners encounter and reckon with both the cultural meanings and material legacies of the past. Drawing on their narratives, *Back to the Roots* demonstrates that urban agriculture is a critical domain for explorations of, and challenges to, the long standing inequalities that shape both the materiality of cities and the bodies of their inhabitants.

The Politics of Surviving

"A trauma revolution is quietly sweeping social services in the United States. For women who have experienced domestic violence, proving that you are a "good victim" is no longer enough when navigating these institutions. Women must also show that they are recovering, as if domestic violence were a disease: they must show that they are transforming from "victims" into "survivors." Through archival research, life story interviews, and participation observation, *The Politics of Surviving* shows that "becoming" a survivor is full of contradictions, perils, politics, and pleasures. Using an intersectional lens, Paige L. Sweet reveals how the idea of "resilience" and being a "survivor" can become a coercive force in women's lives. With nuance and compassion, *The Politics of Surviving* wrestles with questions about the gendered nature of the welfare state, the unintended consequences of feminist mobilizations for these programs, and the women who are left behind by the limited forms of citizenship we offer them"--

The New Politics of Numbers

This open access book offers unique insight into how and where ideas and instruments of quantification have been adopted, and how they have come to matter. Rather than asking what quantification is, *New Politics of Numbers* explores what quantification does, its manifold consequences in multiple domains. It scrutinizes the power of numbers in terms of the changing relations between numbers and democracy, the politics of evidence, and dreams and schemes of bettering society. The book engages Foucault inspired studies of quantification and the economics of convention in a critical dialogue. In so doing, it provides a rich account of the plurality of possible ways in which numbers have come to govern, highlighting not only their disciplinary effects, but also the collective mobilization capacities quantification can offer. This book will be invaluable reading for academics and graduate students in a wide variety of disciplines, as well as policymakers interested in the opportunities and pitfalls of governance by numbers.

Partisans and Partners

Partisans and partners -- Keynesianism -- The old families -- The lions of labor -- Politics embedded in community governance: the community leadership party -- Neoliberalism -- The political construction of partnership -- Prairieville's business community in transition -- The Ben Denison campaign: how partners failed to colonize politics -- Neoliberalism (continued): politics disembedded from community -- Governance -- The activist party -- What regular people think -- How Obama won the heartland (thrice) -- Conclusion: the politics of the post-Keynesian society

Data Analysis in Qualitative Research

From two experts in the field comes an accessible, how-to guide that will help researchers think more productively about the relation between theory and data at every stage of their work. In *Data Analysis in Qualitative Research*, Iddo Tavory and Stefan Timmermans provide a how-to guide filled with tricks of the trade for researchers who hope to take excellent qualitative data and transform it into powerful scholarship. In their previous book, *Abductive Analysis: Theorizing Qualitative Research*, Timmermans and Tavory offered a toolkit for innovative theorizing in the social sciences. In this companion, they go one step further to show how to uncover the surprising revelations that lie waiting in qualitative data—in sociology and beyond. In this book, they lay out a series of tools designed to help both novice and expert scholars see and understand their data in surprising ways. Timmermans and Tavory show researchers how to "stack the deck" of qualitative research in favor of locating surprising findings that may lead to theoretical breakthroughs, whether by engaging with theory, discussing research strategies, or walking the reader through the process of coding data. From beginning to end of a research project, *Data Analysis in Qualitative Research* helps social scientists pinpoint the most promising paths to take in their approach.

Fighting Discrimination in a Hostile Political Environment

The book investigates the experience of ethno-racial discrimination in France and the forms that resistance takes in a colour-blind context. Among pluriethnic, multi-religious, post-colonial states with a long immigration history, France holds a specific place in international comparisons due to its distinct colour-blindness. It does not recognize racial or ethnic groups either as legitimate social or political categories or as targets for policy. Nevertheless, the book embarks in testing existing theories on the experience of discrimination, and on the diverse repertoire of collective action to fight discriminatory practices in France. It features chapters that draw on empirical qualitative research done at various

levels of political action (city, regional or national) and focusing on various actors (inhabitants, activists, administrative, judicial and elected officials). The contributors argue that far from disappearing, race operates at the political level and is embedded in policy design. They highlight the centrality of institutions and policies in the production of a colour-blind racial regime. Despite the hostile character of the French political environment, the fight against discrimination takes renewed forms, from infrapolitical tactics to legal battles. While the social sciences have, themselves, been under attack, scholarship on France demonstrates the reproduction of ethnoracial inequalities and investigates the forms that resistance to discrimination takes. *Fighting Discrimination in a Hostile Political Environment* will be a key resource for academics, researchers, and advanced students of Race and Ethnic Studies, Politics and Public Policy, European Studies, Research Methods and Sociology. This book was originally published as a special issue of *Ethnic and Racial Studies*.

Handbook of Democratic Innovation and Governance

Democratic innovations are proliferating in politics, governance, policy, and public administration. These new processes of public participation are reimagining the relationship between citizens and institutions. This Handbook advances understanding of democratic innovations, in theory and practice, by critically reviewing their importance throughout the world. The overarching themes are a focus on citizens and their relationship to these innovations, and the resulting effects on political equality. The Handbook therefore offers a definitive overview of existing research on democratic innovations, while also setting the agenda for future research and practice.

Tangled Goods

"The advertising industry seems like one of the most craven manifestations of capitalism, with large firms crafting creative concepts designed to make big companies bigger through the sale of dubious if not downright harmful products. In *Tangled Goods*, authors Iddo Tavory, Sonia Prehat, and Shelly Ronen consider an important dimension of the advertising industry that appears to depart from the industry's consumerist foundations: pro bono ad campaigns. Interviewing more than 100 advertisers, the authors trace the complicated web of meanings of the "good" in these pro bono projects. Doing something altruistic often helps employees feel more at ease working for big pharma or corporate banks, and often these projects afford them greater creative leeway than they normally have, not to mention greater potential rewards and recognition. Though the authors uncover selfish motivations behind altruistic work, they are more interested in considering how these various notions of the good come together and fall apart, with different motivations and benefits rising to the surface at different moments. This book sheds new light on how goodness and prestige, personal and altruistic motivations, interact to produce value for individuals and institutions"--

Perspectives on Volunteering

This volume overlooks the distinct expressions and awareness of volunteering in the lived reality of people from different regions of the world. By casting the net widely this book not only expands the geographic reach of experiences, models and case studies but also transcends the conventional focus on formal volunteering. It highlights institutional forms of volunteering specific to developing nations and also describes volunteering that is more loosely institutionalized, informal, and a part of solidarity and collective spirit. As a result this book provides a different look at the values, meaning, acts and expressions of volunteering. The chapters in this book consist of essays and case studies that present recent academic research, thinking and practice on volunteering. Working from the premise that volunteering is universal this collection draws on experiences from Latin America, Africa including Egypt, and Asia. This book focuses on developing countries and countries in transition in order to provide a fresh set of experiences and perspectives on volunteering. While developing countries and countries in transition are in the spotlight for this volume, the developed country experience is not ignored. Rather the essays use it as a critical reference point for comparisons, allowing points of convergence, disconnect and intersection to emerge.

Common Enemies

For over a hundred years, millions of Americans have joined together to fight a common enemy by campaigning against diseases. In *Common Enemies*, Rachel Kahn Best asks why disease campaigns have dominated a century of American philanthropy and health policy and how the fixation on diseases shapes efforts to improve lives. Combining quantitative and qualitative analyses in an unprecedented

history of disease politics, Best shows that to achieve consensus, disease campaigns tend to neglect stigmatized diseases and avoid controversial goals. But despite their limitations, disease campaigns do not crowd out efforts to solve other problems. Instead, they teach Americans to give and volunteer and build up public health infrastructure, bringing us together to solve problems and improve our lives.

The Muslim Social

Since coming to power in 2003, Turkey's governing party, the AKP, has made poverty relief a central part of their political program. In addition to neoliberal reforms, AKP's program has involved an emphasis on Islamic charity that is unprecedented in the history of the Turkish Republic. To understand the causes and consequences of this phenomenon, Zencirci introduces the concept of the Muslim Social, defined as a welfare regime that reimagined and reconfigured Islamic charitable practices to address the complex needs of a modern market society. In *The Muslim Social*, Zencirci explores the blending of religious values and neoliberal elements in dynamic, flexible, and unexpected ways. Although these governmental assemblages of Islamic neoliberalism produced new forms of generosity, distinctive notions of poverty, and novel ways of relating to others in society, Zencirci reveals how this welfare regime privileged managerial efficiency and emotional well-being at the expense of other objectives such as equality, development, or justice. The book provides a lens onto the everyday life of Islamic neoliberalism, while also mapping the kind of political concerns that animate poverty governance in our capitalist present.

The Nonprofit Sector

"Timely, unique, and definitive . . . not only chronicles the history of the nonprofit sector but also provides a broad but critical analysis of its current state." —Vartan Gregorian, President, Carnegie Corporation of New York The nonprofit sector has changed in fundamental ways in recent decades. As the sector has grown in scope and size, both domestically and internationally, the boundaries between for-profit, governmental, and charitable organizations have become intertwined. Nonprofits are increasingly challenged on their roles in mitigating or exacerbating inequality. And debates flare over the role of voluntary organizations in democratic and autocratic societies alike. *The Nonprofit Sector* takes up these concerns and offers a cutting-edge empirical and theoretical assessment of the state of the field. This book, now in its third edition, brings together leading researchers—economists, historians, philosophers, political scientists, and sociologists along with scholars from communication, education, law, management, and policy schools—to investigate the impact of associational life. Chapters consider the history of the nonprofit sector and of philanthropy; the politics of the public sphere; governance, mission, and engagement; access and inclusion; and global perspectives on nonprofit organizations. Across this comprehensive range of topics, *The Nonprofit Sector* makes an essential contribution to the study of civil society. Praise for previous editions "Takes a decidedly multidisciplinary approach . . . invaluable." —*Journal of Policy Analysis and Management* "A major contribution to the field." —*Social Forces*

The SAGE Handbook of the Sociology of Work and Employment

The *SAGE Handbook of the Sociology of Work and Employment* is a landmark collection of original contributions by leading specialists from around the world. The coverage is both comprehensive and comparative (in terms of time and space) and each 'state of the art' chapter provides a critical review of the literature combined with some thoughts on the direction of research. This authoritative text is structured around six core themes: Historical Context and Social Divisions The Experience of Work The Organization of Work Nonstandard Work and Employment Work and Life beyond Employment Globalization and the Future of Work. Globally, the contours of work and employment are changing dramatically. This handbook helps academics and practitioners make sense of the impact of these changes on individuals, groups, organizations and societies. Written in an accessible style with a helpful introduction, the retrospective and prospective nature of this volume will be an essential resource for students, teachers and policy-makers across a range of fields, from business and management, to sociology and organization studies.

Prisms of the People

Grassroots organizing and collective action have always been fundamental to American democracy but have been burgeoning since the 2016 election, as people struggle to make their voices heard in this moment of societal upheaval. Unfortunately much of that action has not had the kind of

impact participants might want, especially among movements representing the poor and marginalized who often have the most at stake when it comes to rights and equality. Yet, some instances of collective action have succeeded. What's the difference between a movement that wins victories for its constituents, and one that fails? What are the factors that make collective action powerful? *Prisms of the People* addresses those questions and more. Using data from six movement organizations—including a coalition that organized a 104-day protest in Phoenix in 2010 and another that helped restore voting rights to the formerly incarcerated in Virginia—Hahrie Han, Elizabeth McKenna, and Michelle Oyakawa show that the power of successful movements most often is rooted in their ability to act as “prisms of the people,” turning participation into political power just as prisms transform white light into rainbows. Understanding the organizational design choices that shape the people, their leaders, and their strategies can help us understand how grassroots groups achieve their goals. Linking strong scholarship to a deep understanding of the needs and outlook of activists, *Prisms of the People* is the perfect book for our moment—for understanding what's happening and propelling it forward.

Microfoundations of Institutions

The notion of microfoundations has received growing interest in neo-institutional theory along with an interest in microfoundational research in disciplines such as strategic management and economics.

Participatory Democracy in Southern Europe

Using a highly original multi-method approach, this book examines a wide range of innovative institutional participatory processes across Spain, Italy and France.

The New Handbook of Political Sociology

Political sociology is a large and expanding field with many new developments, and *The New Handbook of Political Sociology* supplies the knowledge necessary to keep up with this exciting field. Written by a distinguished group of leading scholars in sociology, this volume provides a survey of this vibrant and growing field in the new millennium. The Handbook presents the field in six parts: theories of political sociology, the information and knowledge explosion, the state and political parties, civil society and citizenship, the varieties of state policies, and globalization and how it affects politics. Covering all subareas of the field with both theoretical orientations and empirical studies, it directly connects scholars with current research in the field. A total reconceptualization of the first edition, the new handbook features nine additional chapters and highlights the impact of the media and big data.

Continuity and Change in Voluntary Action

There are great expectations of voluntary action in contemporary Britain but limited in-depth insight into the level, distribution and understanding of what constitutes voluntary activity. Drawing on extensive survey data and written accounts of citizen engagement, this book charts change and continuity in voluntary activity since 1981. How voluntary action has been defined and measured is considered alongside individuals' accounts of their participation and engagement in volunteering over their life-courses. Addressing fundamental questions such as whether the public are cynical about or receptive to calls for greater voluntary action, the book considers whether respective government expectations of volunteering can really be fulfilled. Is Britain really a “shared society”, or a “big society”, and what is the scope for expansion of voluntary effort? This pioneering study combines rich, qualitative material from the Mass Observation Archive between 1981 and 2012, and data from many longitudinal and cross-sectional social surveys. Part of the Third Sector Research Series, this book is informed by research undertaken at the Third Sector Research Centre, funded by the Economic and Social Research Council and Barrow Cadbury Trust.

The SAGE Handbook of Current Developments in Grounded Theory

Extensively updated and with eight new chapters, this remains the definitive resource on Grounded Theory for advanced students and researchers across the social sciences.

Inventing the Ties That Bind

At a time of deep political divisions, leaders have called on ordinary Americans to talk to one another: to share their stories, listen empathetically, and focus on what they have in common, not what makes them different. In *Inventing the Ties that Bind*, Francesca Polletta questions this popular solution for healing

our rifts. Talking the way that friends do is not the same as equality, she points out. And initiatives that bring strangers together for friendly dialogue may provide fleeting experiences of intimacy, but do not supply the enduring ties that solidarity requires. But Polletta also studies how Americans cooperate outside such initiatives, in social movements, churches, unions, government, and in their everyday lives. She shows that they often act on behalf of people they see as neighbors, not friends, as allies, not intimates, and people with whom they have an imagined relationship, not a real one. To repair our fractured civic landscape, she argues, we should draw on the rich language of solidarity that Americans already have.

Navigating Conflict

Urban schools are often associated with violence, chaos, and youth aggression. But is this reputation really the whole picture? In *Navigating Conflict*, Calvin Morrill and Michael Musheno challenge the violence-centered conventional wisdom of urban youth studies, revealing instead the social ingenuity with which teens informally and peacefully navigate strife-ridden peer trouble. Taking as their focus a multi-ethnic, high-poverty school in the American southwest, the authors complicate our vision of urban youth, along the way revealing the resilience of students in the face of carceral disciplinary tactics. Grounded in sixteen years of ethnographic fieldwork, *Navigating Conflict* draws on archival and institutional evidence to locate urban schools in more than a century of local, state, and national change. Morrill and Musheno make the case for schools that work, where negative externalities are buffered and policies are adapted to ever-evolving student populations. They argue that these kinds of schools require meaningful, inclusive student organizations for sustaining social trust and collective peer dignity alongside responsive administrative leadership. Further, students must be given the freedom to associate and move among their peers, all while in the vicinity of watchful, but not intrusive adults. Morrill and Musheno make a compelling case for these foundational conditions, arguing that only through them can schools enable a rich climate for learning, achievement, and social advancement.

Making Diabetes

Diabetes is regarded as one of the most challenging global health issues of the 21st century. Especially countries with weak health infrastructure are struggling to deal with the increased demands this chronic disease entails. Tracing the effects of a diagnostic device, the glucometer, this book examines how it contributes to the making of diabetes in contemporary Uganda. Arlena S. Liggins demonstrates that depending on who uses the glucometer, the outcomes may go far beyond diagnosis. The book draws a complex picture of hopes and misplaced expectations, of trust and mistrust in a technology to which access in the first place is all but a given.

L'associarsi quotidiano

Che cosa fanno i cittadini quando fondano o partecipano a un'associazione? E, ancora prima, che cosa possono fare? Queste le domande di partenza del volume di Sebastiano Citroni sulla quotidianità dell'associazionismo. A partire da un'indagine etnografica, che restituisce concretezza al vissuto dei protagonisti e alla specificità delle pratiche, vengono analizzati la diffusione di nuove forme d'impegno civico a livello individuale, il crescente peso dell'organizzazione di eventi nel repertorio d'azione degli enti di terzo settore e la contrattualizzazione dei loro rapporti con enti pubblici e privati finanziatori. Per ciascuna di queste trasformazioni, i risultati di ricerca mostrano come gli stili associativi filtrino e "metaforizzino" nella vita quotidiana di gruppo i fattori generali di contesto nell'ambito dei quali l'azione civica prende forma. La ricerca etnografica condotta da Citroni invita così ad abbandonare ogni facile retorica sulla neo-liberalizzazione del terzo settore e mostra quanto la sua azione come società civile si dispieghi anche sul piano ordinario degli stili dell'associarsi quotidiano e del loro potere istituzionale.
