Before they work on real patients, it is important for dental students to practice treatments on phantom lab heads and ivory teeth. While dental simulators are available for specific areas, such as restorative dentistry and prosthetics, they are not available in all dental colleges because of the high expenses. Fortunately, this book helps to simulate the operative dental cases for dental students and their supervisors in a phantom lab. The book includes more than eight hundred high-resolution images, illustrations, and tables. Tools and instruments are explained as well as the common terms used in operative dentistry. Simulating systems for caries lesions and their corresponding restorative treatments are shown in the phantom lab. Radiographic images and clinical photos are included to help students make the correct caries lesions diagnosis. From easy procedures, such as practical step-by-step rubber dam techniques to retainer application, and teeth preparation and correspondent restorations with amalgam or composite restoration, this book is an important resource for prospective dentists and those new to the field.

Sturdevant's Art and Science of Operative Dentistry

In these early 20th century literary essays, Stefan Zweig offers a Central European view of the writers he believed to be the "three greatest novelists" of the 19th century: Balzac, Dickens, and Dostoevsky. In Zweig's view, Balzac set out to emulate his childhood hero Napoleon. Writing 20 hours a day, Balzac's literary ambition was "tantamount to monomania in its persistence, its intensity, and its concentration." His characters, each similarly driven by one desperate urge, were more vital to Balzac than people in his daily life. In Zweig's reading, Dickens embodied Victorian England and its "bourgeois smugness". His characters aspire to "A few hundred pounds a year, an amiable wife, a dozen children, a well-appointed table and succulent meats to entertain their friends with, a cottage not too far from London, the windows giving a view over the green countryside, a pretty little garden, and a modicum of happiness." The ideal of middle-class respectability suffuses Dickens' fiction. Dostoevsky drew on the struggles of his own life to illuminate the contradictions of the human soul. In Zweig's view, his heroes had no desire to be citizens or ordinary human beings. While Balzac's heroes "would gladly have subjugated the world, Dostoevsky's heroes wished to transcend it."
